About Metricell13

1 Revision History

Version	Date	Revision Author	Summary of Changes
[1.0]	06/10/2026	TEST2 QA Automation	Generated from TEST2 evidence review

2 Test Cycle Information

Tester:	Automated
Jira Ticket:	TEST2-56
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 154.0.8037.98
Date of Test:	06/10/2026
Limitations during Testing:	0 blocked; 3 inconclusive criterion(s). Cancellation and reopening are evidenced; the required current Map layers baseline and before/after list states are not visible. Criterion 2: The failed locator interaction was recovered before the decisive assertion; only recovered dialog and cancellation captures support this result.
Overall review outcome:	Failed (inconclusive evidence)
Browser URL(s) recorded after criteria:	https://o2intelligence-v4-dev.metricell.com/gis

3 Test Summary

Area of test	Pass	Fail	Defects (No.)
1. In the settled GIS workspace, record the...	N	Y	1
2. Select Cancel in the Surveyor add-layer...	Y	N	0
3. After cancelling, verify that the visible Map...	N	Y	1
4. Open the Surveyor add-layer dialog again,...	N	Y	1

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

4.1 Tests

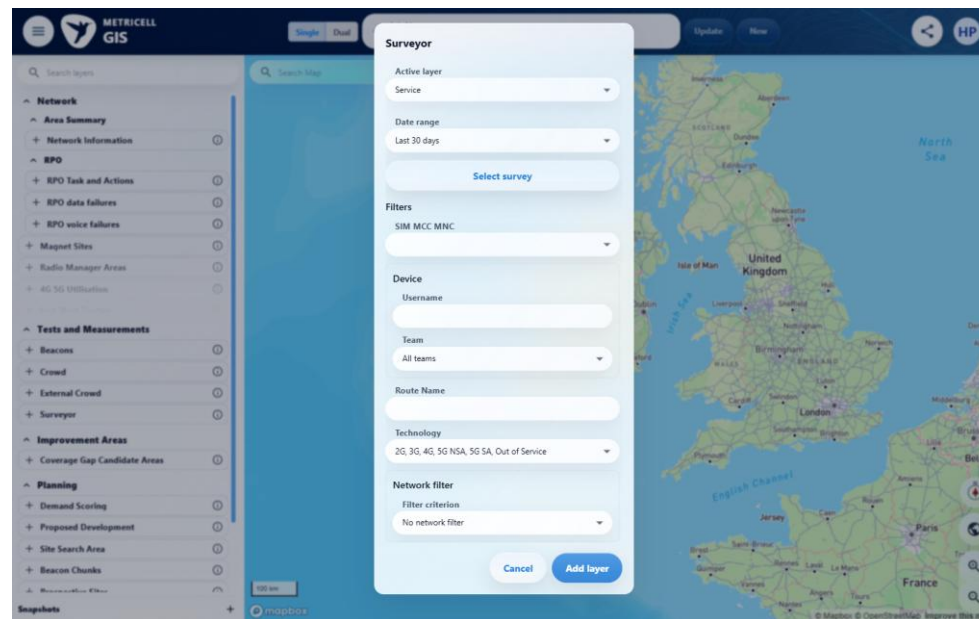

Preconditions:		V4 access and ticket conditions.	Associated Requirements:	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.
ID / Criterion	Criteria Tested		Expected Result	Actual Result / Evidence Path		Outcome

1.0.0	In the settled GIS workspace, record the visible Map layers list or empty-layer state, then select Add layer for Surveyor and verify that its configuration dialog opens with identifiable controls and a visible Cancel action.	In the settled GIS workspace, record the visible Map layers list or empty-layer state, then select Add layer for Surveyor and verify that its configuration dialog opens with identifiable controls and a visible Cancel action.	Settled GIS shows the available-layer catalogue and base map; Surveyor opens with Active layer, Date range, Select survey, filters and Cancel. No current Map layers list or explicit empty-layer state is visible, so the required baseline is unverified. Evidence: E01	Failed
-------	--	--	--	--------

Criterion 1 evidence: In the settled GIS workspace, record the visible Map layers list or empty-layer state, then select Add layer for Surveyor and verify that its configuration dialog opens with identifiable controls and a visible Cancel action.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E01 - Final (criterion-1-final.png)

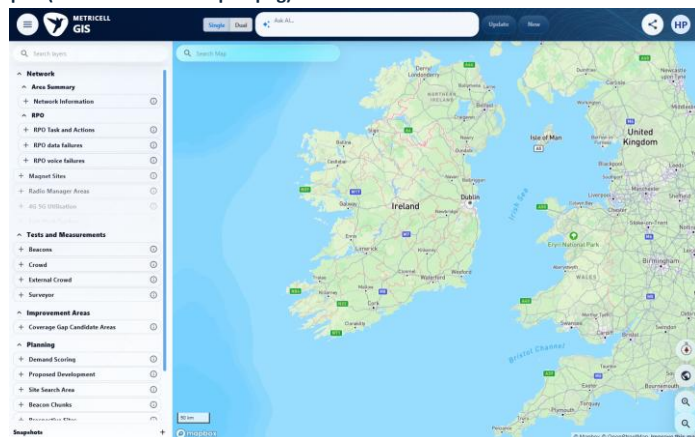

2.0.0	Select Cancel in the Surveyor add-layer dialog and verify that the dialog closes and the GIS map is displayed again.	Select Cancel in the Surveyor add-layer dialog and verify that the dialog closes and the GIS map is displayed again.	Criterion-owned recovered screenshots show Surveyor with Cancel, followed by the unobscured GIS map with the dialog closed; final-recovered confirms the returned map. The recorded steps identify the recovered Cancel action and exclude the unsuccessful earlier interaction. Evidence: E02, E03, E04	Passed
-------	--	--	--	--------

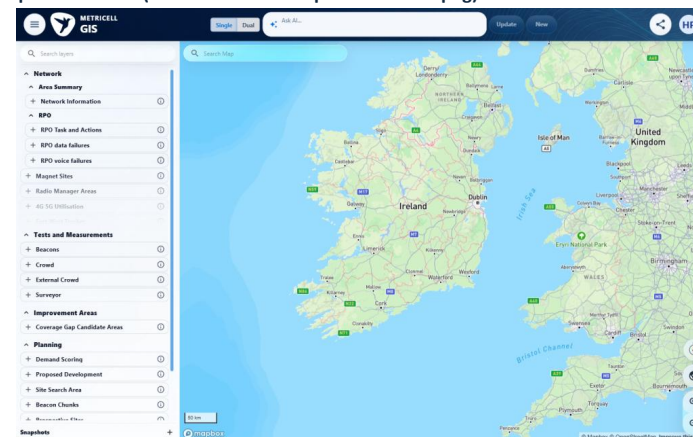

Criterion 2 evidence: Select Cancel in the Surveyor add-layer dialog and verify that the dialog closes and the GIS map is displayed again.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E02 - Before open (criterion-2-before-open.png)

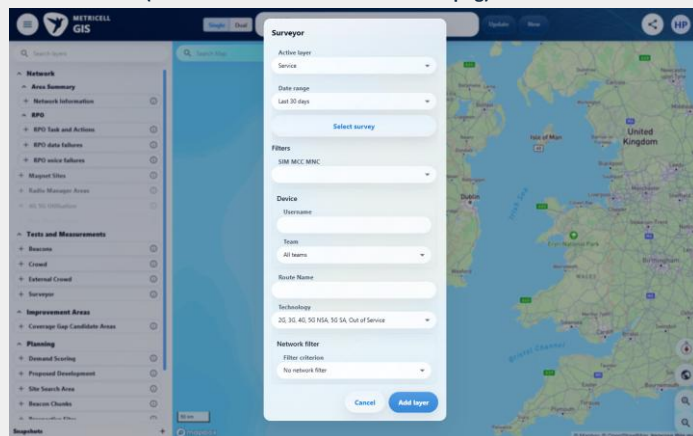

E03 - Before open recovered (criterion-2-before-open-recovered.png)

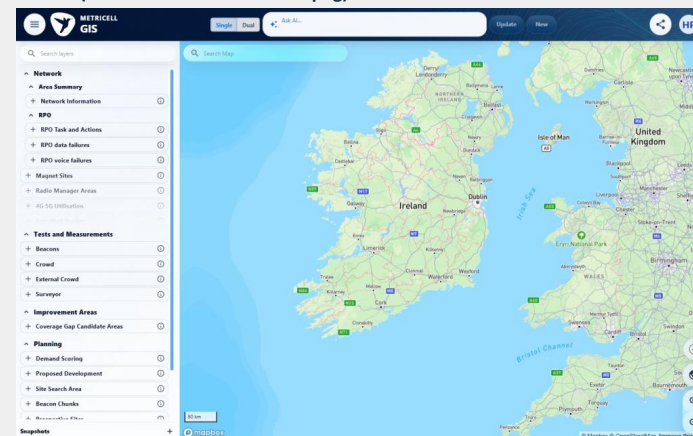

Criterion 2 continued: Select Cancel in the Surveyor add-layer dialog and verify that the dialog closes and the GIS map is displayed again.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E04 - Before cancel recovered (criterion-2-before-cancel-recovered.png)

E03 - Final recovered (criterion-2-final-recovered.png)

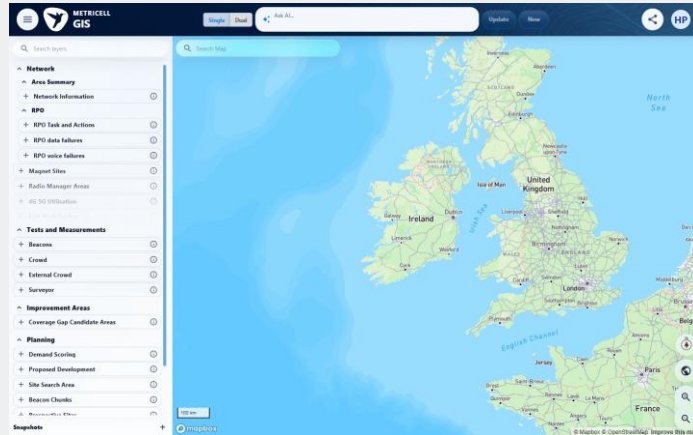

3.0.0	After cancelling, verify that the visible Map layers list matches the recorded before state and contains no newly added Surveyor layer.	After cancelling, verify that the visible Map layers list matches the recorded before state and contains no newly added Surveyor layer.	Before and after cancellation show the available-layer catalogue and base map, with the Surveyor dialog closed afterward. Neither state exposes a current Map layers list or explicit empty state, so unchanged entries and absence of a new Surveyor layer cannot be verified. Evidence: E05, E06, E07	Failed
-------	---	---	--	--------

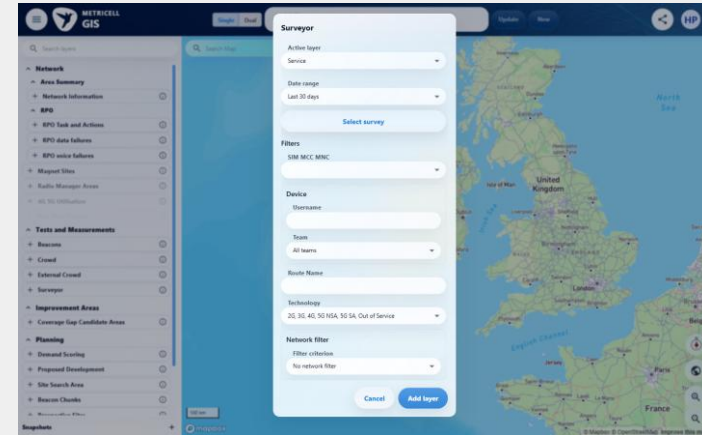

Criterion 3 evidence: After cancelling, verify that the visible Map layers list matches the recorded before state and contains no newly added Surveyor layer.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E05 - Before open (criterion-3-before-open.png)

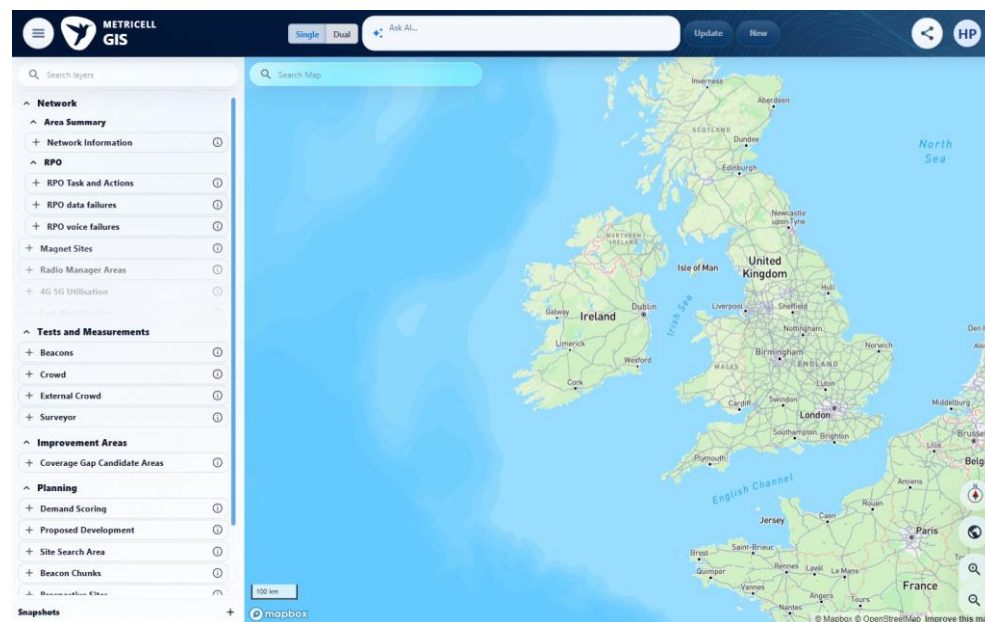

E06 - Before cancel (criterion-3-before-cancel.png)

Criterion 3 continued: After cancelling, verify that the visible Map layers list matches the recorded before state and contains no newly added Surveyor layer.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E07 - Final (criterion-3-final.png)

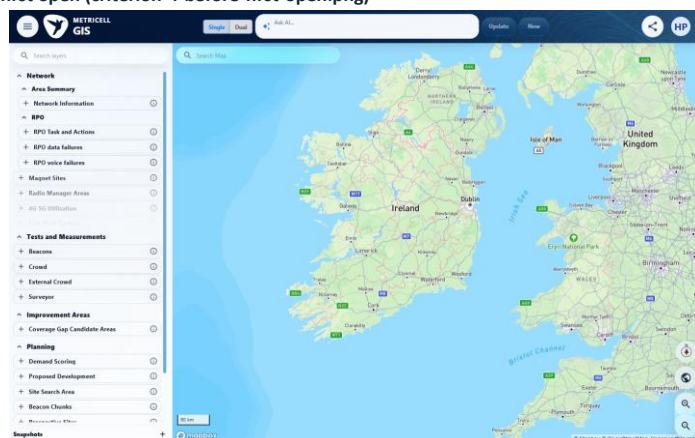

4.0.0	Open the Surveyor add-layer dialog again, verify the configuration controls and Cancel action are visible, select Cancel, and verify that the GIS map returns without changing the visible Map layers list.	Open the Surveyor add-layer dialog again, verify the configuration controls and Cancel action are visible, select Cancel, and verify that the GIS map returns without changing the visible Map layers list.	Criterion-owned ordered captures show the first dialog, returned map, reopened Surveyor controls and Cancel, then the returned map after the second cancellation. The current Map layers baseline and after-state are not visible, leaving the unchanged-layer assertion unverified. Evidence: E02, E08, E03, E09	Failed
-------	---	---	--	--------

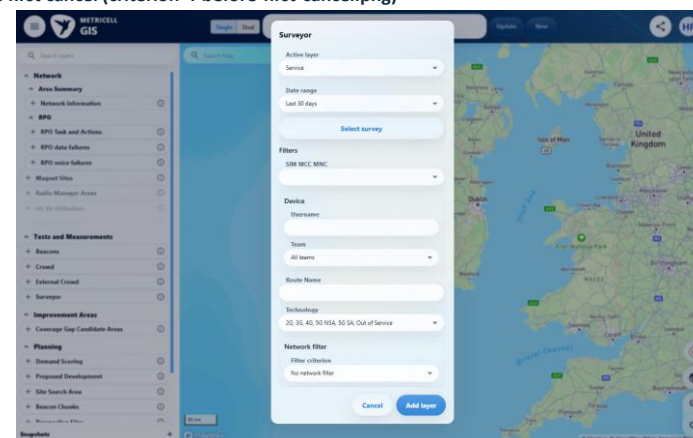

Criterion 4 evidence: Open the Surveyor add-layer dialog again, verify the configuration controls and Cancel action are visible, select Cancel, and verify that the GIS map returns without changing the visible Map layers list.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E02 - Before first open (criterion-4-before-first-open.png)

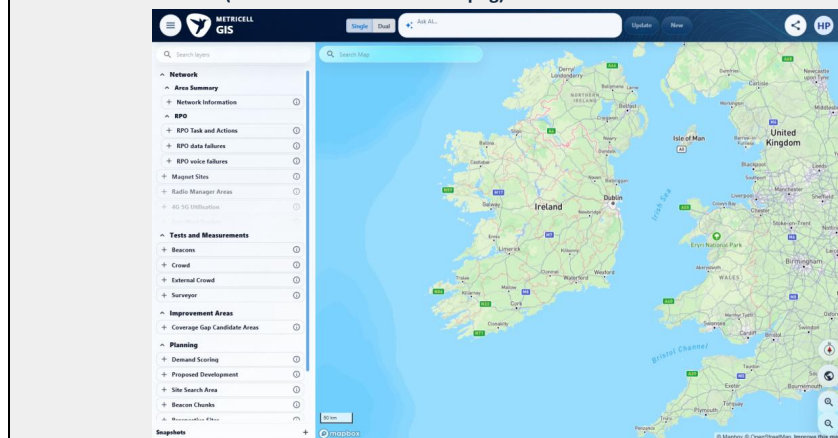

E08 - Before first cancel (criterion-4-before-first-cancel.png)

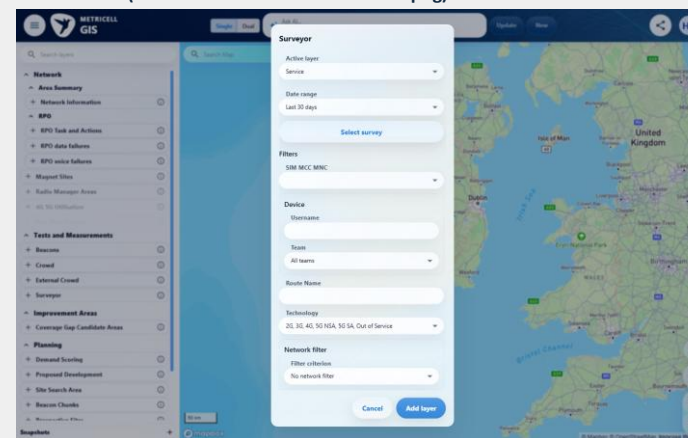

Criterion 4 continued: Open the Surveyor add-layer dialog again, verify the configuration controls and Cancel action are visible, select Cancel, and verify that the GIS map returns without changing the visible Map layers list.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E03 - After first cancel (criterion-4-after-first-cancel.png)

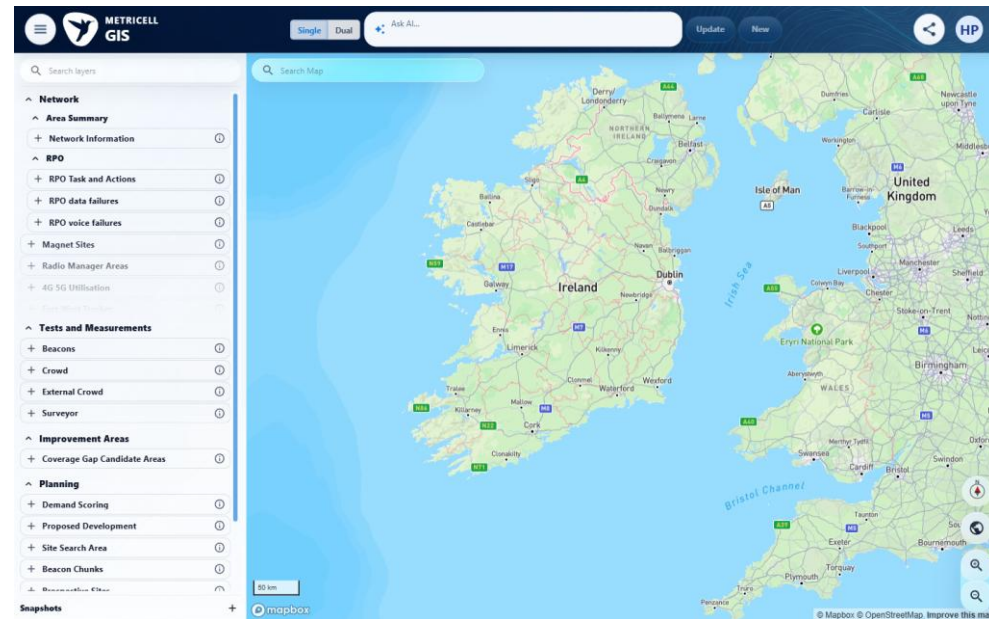

E09 - Before second cancel (criterion-4-before-second-cancel.png)

Criterion 4 continued: Open the Surveyor add-layer dialog again, verify the configuration controls and Cancel action are visible, select Cancel, and verify that the GIS map returns without changing the visible Map layers list.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E03 - Final (criterion-4-final.png)

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
