Version	Date	Revision Author	Summary of Changes
[1.0]	29/09/2026	TEST2 QA Automation	Generated from TEST2 evidence review

Tester:	Automated
Jira Ticket:	TEST2-40
Environment:	Chrome
Browser Details:	Chrome version not recorded
Date of Test:	29/09/2026
Limitations during Testing:	None recorded

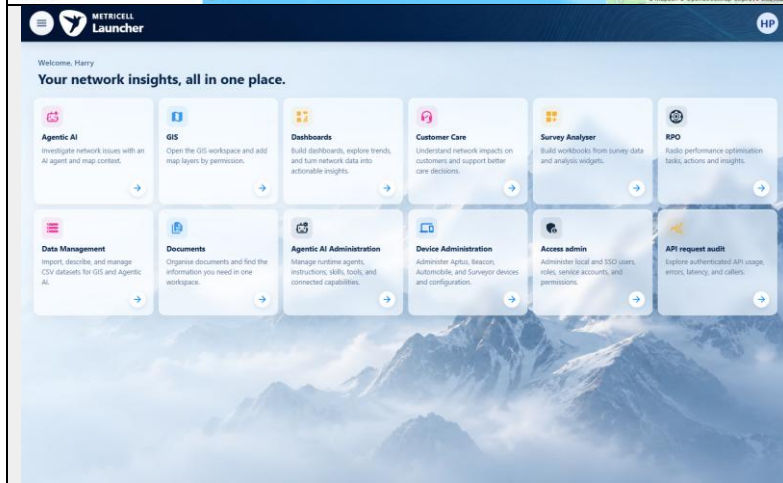

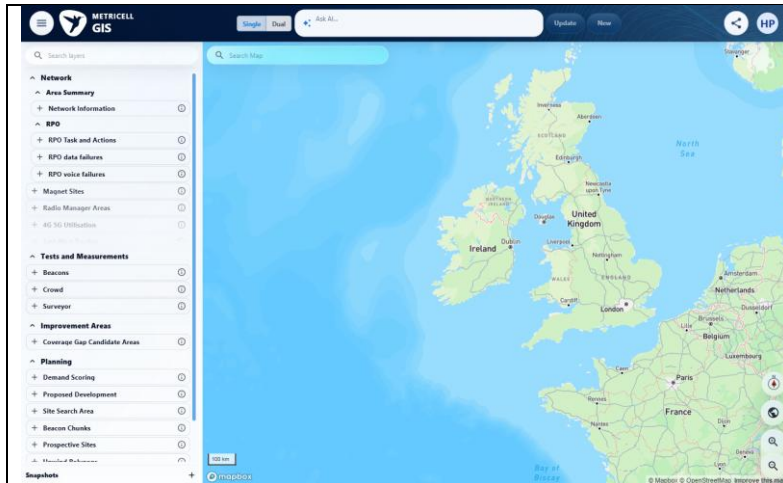

Area of test	Pass	Fail	Defects (No.)
1. Starting at the V4 launcher, opening GIS displays the GIS map view and its visible controls without an application error.	Y	N	0
2. From the GIS view, using the browser Back control returns to the V4 launcher and displays the launcher module cards.	Y	N	0
3. From the V4 launcher after returning from GIS, opening API Request Audit displays its dashboard or request explorer without an application error.	Y	N	0

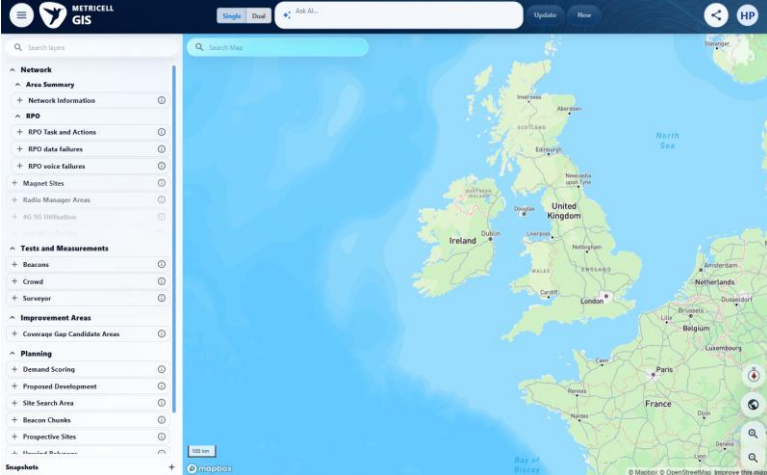

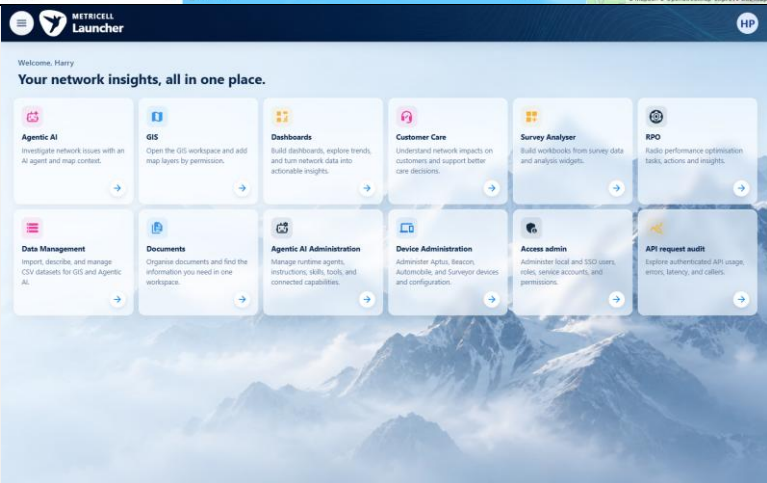

All automated tests must map to an approved criterion and produce reproducible results plus decisive evidence. Use Failed, Blocked, or Unverified where applicable.

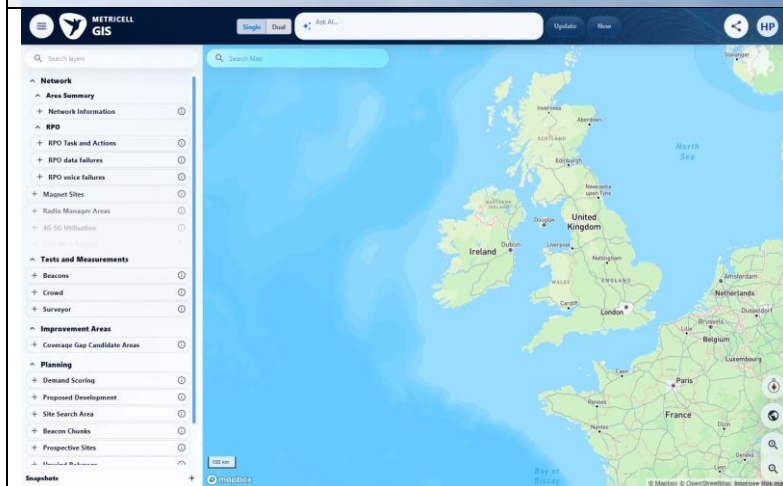

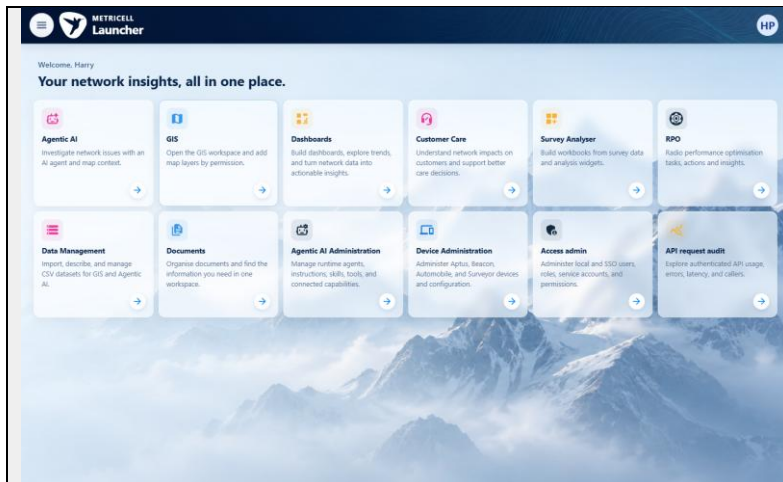

4.1 Tests

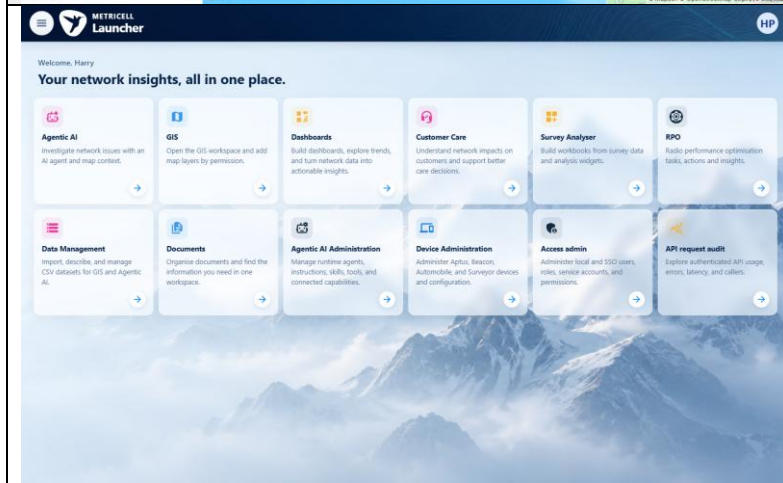

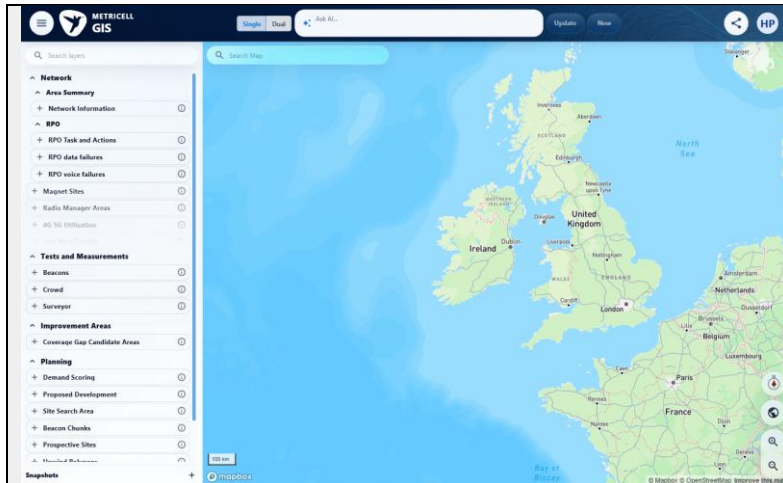

Preconditions:	Not recorded in agent output.	Associated Requirements:	Criteria from criteria.md.	Automation Notes:	Automated browser run; PNG evidence reviewed.
-----------------------	-------------------------------	---------------------------------	----------------------------	--------------------------	---

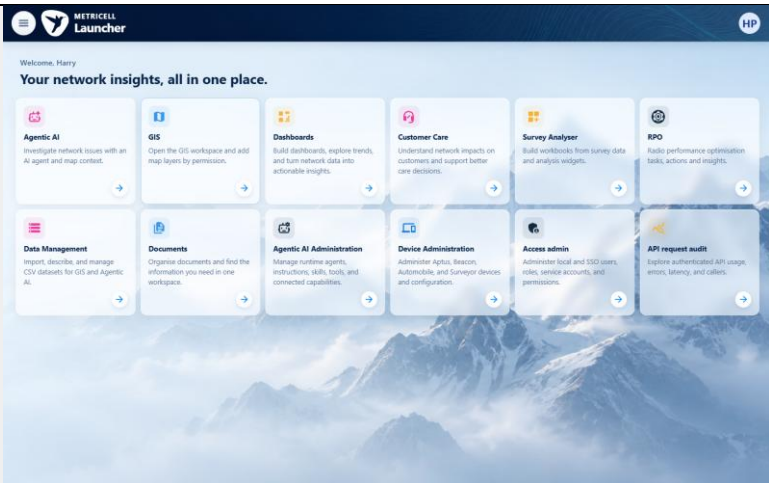

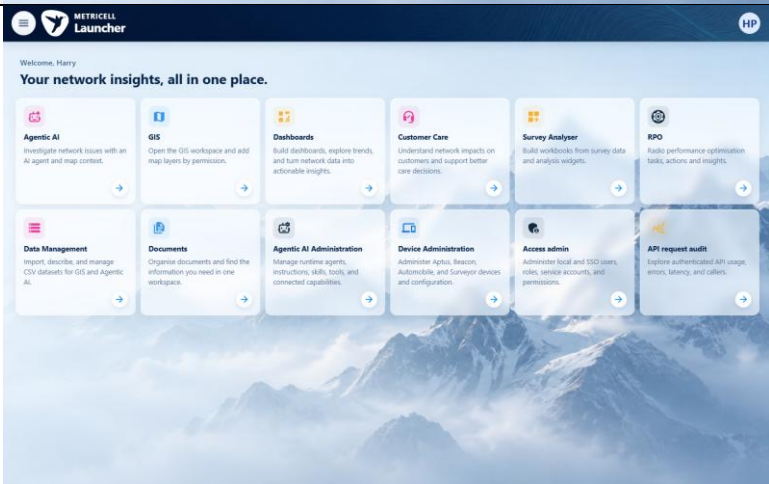

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	Starting at the V4 launcher, opening GIS displays the GIS map view and its visible controls without an application error.	Starting at the V4 launcher, opening GIS displays the GIS map view and its visible controls without an application error.	The attempt-001 launcher screenshot shows the starting module cards, and the after-open-GIS screenshot shows the GIS map and controls. The result records the expected V4 GIS host. Steps taken: Navigated to the V4 launcher and confirmed the GIS module card was visible.; Opened GIS from the launcher.; Confirmed the GIS workspace header, map view, and visible map controls were present; the browser reported no console errors.	Passed

				
				
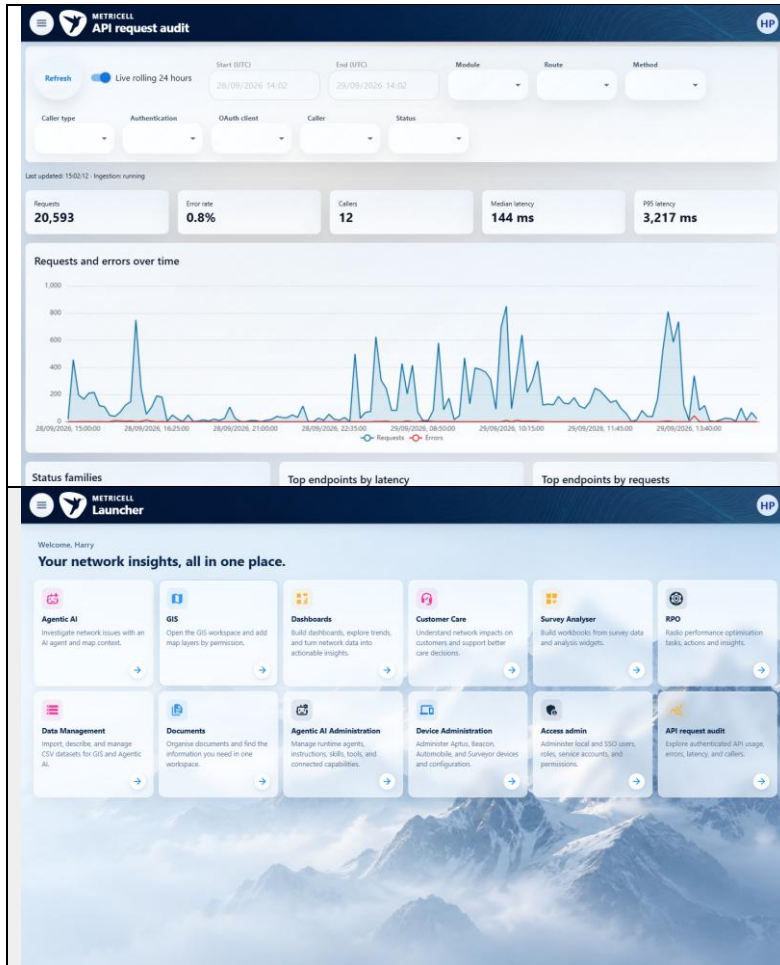

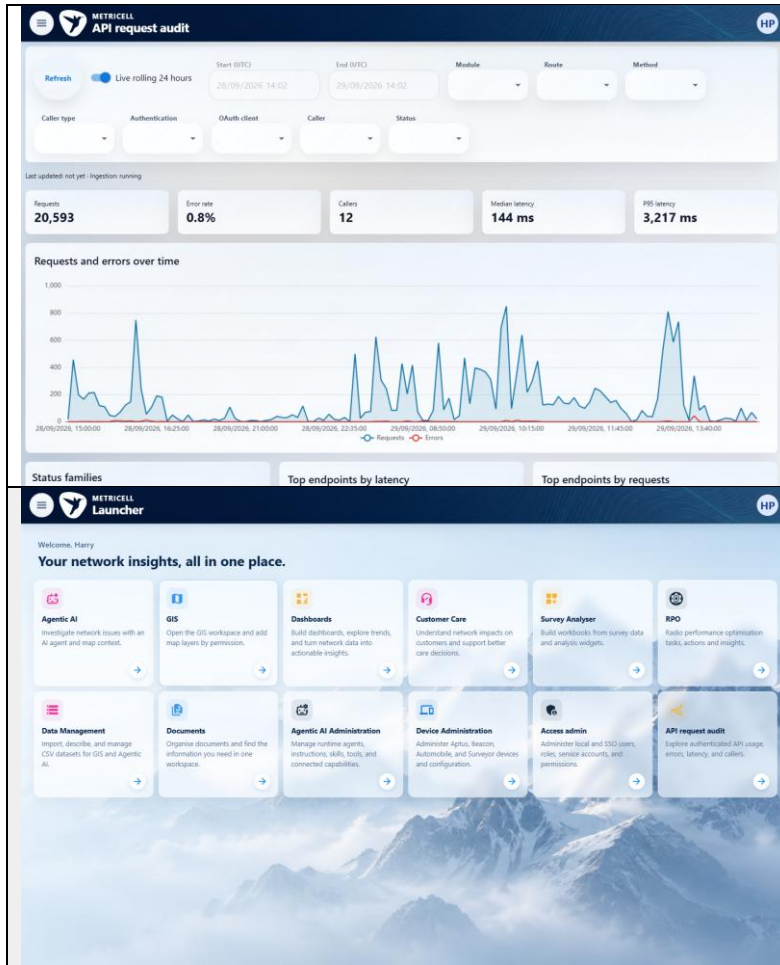

2.0.0	From the GIS view, using the browser Back control returns to the V4 launcher and displays the launcher module cards.	From the GIS view, using the browser Back control returns to the V4 launcher and displays the launcher module cards.	The attempt-001 after-back screenshot shows the V4 launcher and its GIS and API request audit module cards. The result records the expected V4 launcher URL. Steps taken: Navigated to the V4 launcher and opened GIS to establish the required starting view.; Used the browser Back control.; Confirmed the launcher URL and the visible module cards, including GIS and API request audit.	Passed

				
				
3.0.0	From the V4 launcher after returning from GIS, opening API Request Audit displays its dashboard or request explorer without an application error.	From the V4 launcher after returning from GIS, opening API Request Audit displays its dashboard or request explorer without an application error.	The attempt-001 after-open-audit screenshot shows the API request audit dashboard, filters, metrics, and chart. The result records the expected V4 API request audit host. Steps taken: Started from the launcher reached by browser Back from GIS.; Opened API request audit from its launcher card.; Confirmed the dashboard loaded with request metrics, charts, filters, and no browser console errors.	Passed

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
