About Metricell 13

1 Revision History

Version	Date	Revision Author	Summary of Changes
[1.0]	12/10/2026	TEST2 QA Automation	Generated from TEST2 evidence review

2 Test Cycle Information

Tester:	**Automated**
Jira Ticket:	TEST2-73
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 155.0.8059.40
Date of Test:	12/10/2026
Limitations during Testing:	Criterion 1: The existing ALL Coverage Gap Candidate Areas layer showed 'Unable to load coverage gap candidate areas.' before and after testing. Its selection and the rendered basemap were observable, so catalogue search and preservation assertions could be tested. No data, layers or map settings were altered; the query was cleared. Criterion 2: A text-only wait for placeholder text timed out; direct input inspection and visible catalogue snapshot confirmed the GIS was ready, then testing continued. Defects (No.) counts directly contradicted criteria, not unique Jira bugs; blockers and inconclusive evidence count as zero.
Overall review outcome:	Passed
Browser URL(s) recorded after criteria:	https://o2intelligence-v4-dev.metricell.com/gis

3 Test Summary

Area of test	Pass	Fail	Defects (No.)
1. With a distinctive unmatched query entered in the GIS layer catalogue search, the query remains visible and the catalogue shows no unrelated layer entries as matches.	Y	N	0

Area of test	Pass	Fail	Defects (No.)
2. After the search query is cleared, the GIS layer catalogue shows the original catalogue contents and browsing controls at the same catalogue position recorded before searching.	Y	N	0
3. Searching and clearing the catalogue does not change the active layers that were present before searching.	Y	N	0
4. Searching and clearing the catalogue does not change the visible map state that was present before searching.	Y	N	0
5. After clearing, the catalogue search field is empty and the GIS page is restored to its recorded initial catalogue, map, and active-layer state.	Y	N	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

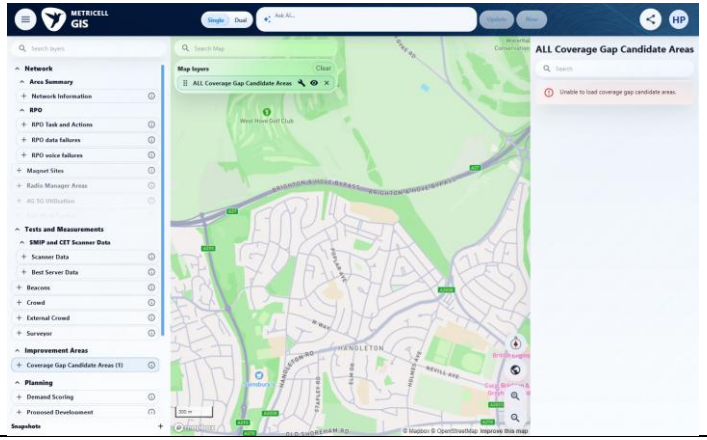

4.1 Tests

Preconditions:	V4 access and ticket conditions.	***Associated Requirements:***	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.

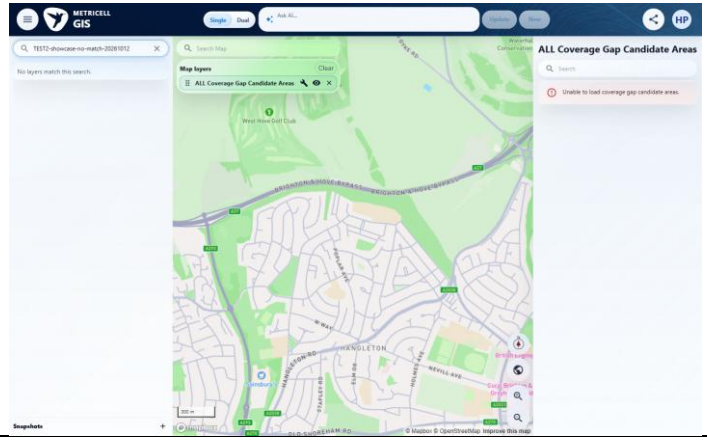

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	With a distinctive unmatched query entered in the GIS layer catalogue search, the query remains visible and the catalogue shows no unrelated layer entries as matches.	With a distinctive unmatched query entered in the GIS layer catalogue search, the query remains visible and the catalogue shows no unrelated layer entries as matches.	criterion-1-before-search.png shows the populated catalogue; criterion-1-after-search.png and criterion-1-final.png show TEST2-showcase-no-match-20261012 still visible with 'No layers match this search.' and no catalogue entries. Evidence: E01, E02	Passed

Criterion 1 evidence: With a distinctive unmatched query entered in the GIS layer catalogue search, the query remains visible and the catalogue shows no unrelated layer entries as matches.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E01 - Before search (criterion-1-before-search.png)

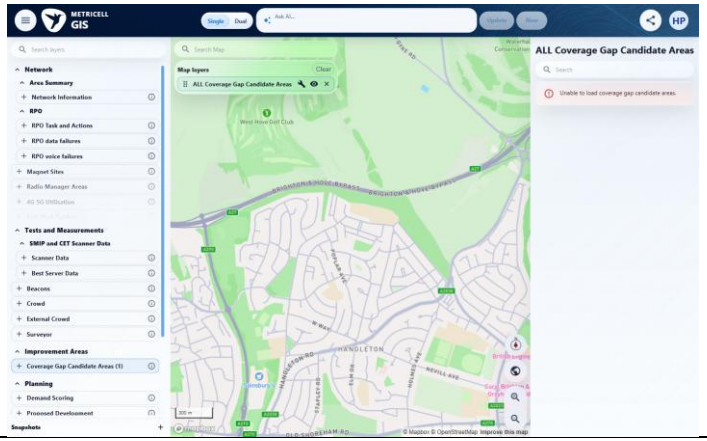

E02 - Final (criterion-1-final.png)

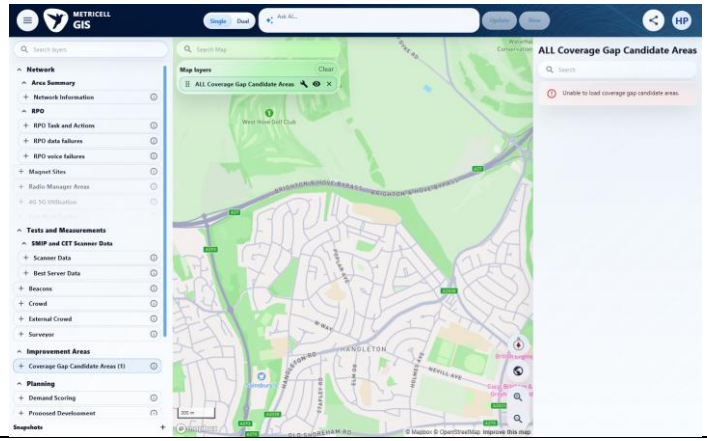

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
2.0.0	After the search query is cleared, the GIS layer catalogue shows the original catalogue contents and browsing controls at the same catalogue position recorded before searching.	After the search query is cleared, the GIS layer catalogue shows the original catalogue contents and browsing controls at the same catalogue position recorded before searching.	criterion-2-before-search.png records the catalogue at the top with Network, RPO, Tests and Measurements, Improvement Areas and Planning controls. criterion-2-after-search.png and criterion-2-before-clear.png show the unmatched query; criterion-2-after-clear.png and criterion-2-final.png restore the same visible entries, controls and scrollbar position with an empty search. The reported text-selector timeout was recovered before this complete sequence. Evidence: E03, E04	Passed

Criterion 2 evidence: After the search query is cleared, the GIS layer catalogue shows the original catalogue contents and browsing controls at the same catalogue position recorded before searching.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E03 - Before search (criterion-2-before-search.png)

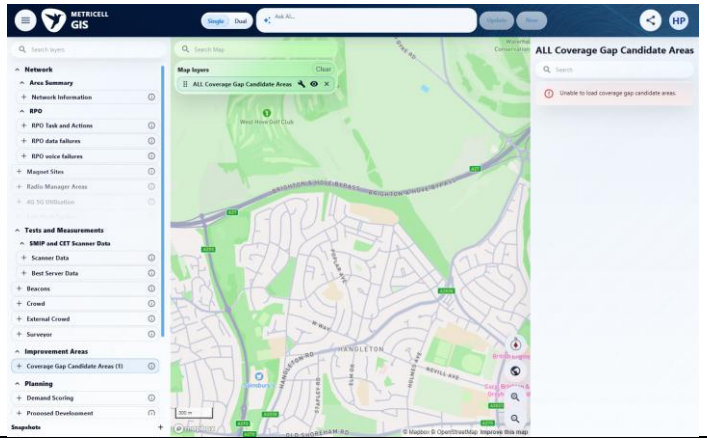

E04 - Final (criterion-2-final.png)

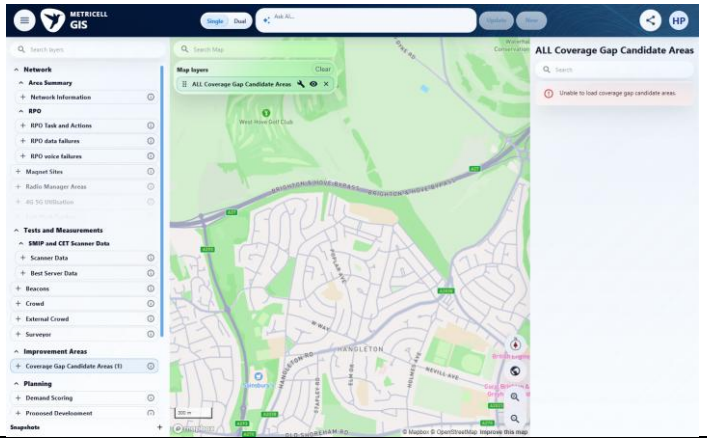

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
3.0.0	Searching and clearing the catalogue does not change the active layers that were present before searching.	Searching and clearing the catalogue does not change the active layers that were present before searching.	criterion-3-baseline-layers.png shows the complete one-item active-layer list, ALL Coverage Gap Candidate Areas, with its visibility and controls. criterion-3-after-search.png and criterion-3-before-clear.png retain that list during the unmatched query; criterion-3-after-clear.png and criterion-3-final.png retain it after clearing. criterion-3-baseline-map.png supplies the original visible map comparison. The launcher selector retry did not interrupt the evidenced sequence. Evidence: E05, E06, E07	Passed

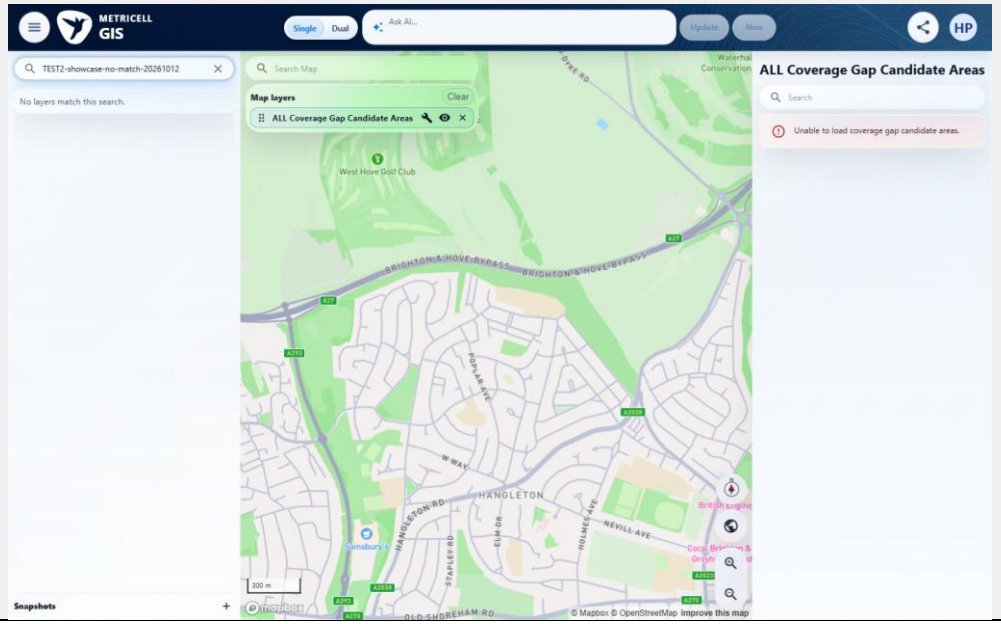

Criterion 3 evidence: Searching and clearing the catalogue does not change the active layers that were present before searching.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E05 - Baseline layers (criterion-3-baseline-layers.png)

E06 - Final (criterion-3-final.png)

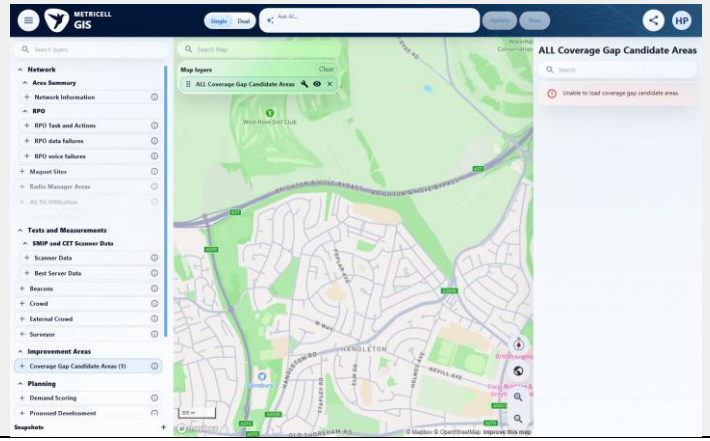

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 3 continued: Searching and clearing the catalogue does not change the active layers that were present before searching. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E07 - After search (criterion-3-after-search.png)** 				

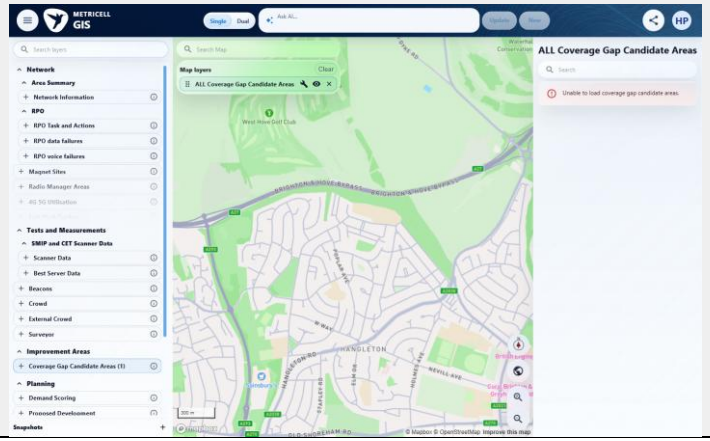

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
4.0.0	Searching and clearing the catalogue does not change the visible map state that was present before searching.	Searching and clearing the catalogue does not change the visible map state that was present before searching.	criterion-4-baseline-map.png records the unobscured visible map around Hangleton and West Hove Golf Club, north-up at 300 m scale. criterion-4-after-search.png and criterion-4-before-clear.png retain the same landmarks, extent and controls; criterion-4-after-clear.png and criterion-4-final.png match that baseline after clearing. criterion-4-baseline-layers.png and criterion-4-final.png retain the complete one-item layer list and existing coverage-gap load alert. Evidence: E05, E04, E07	Passed

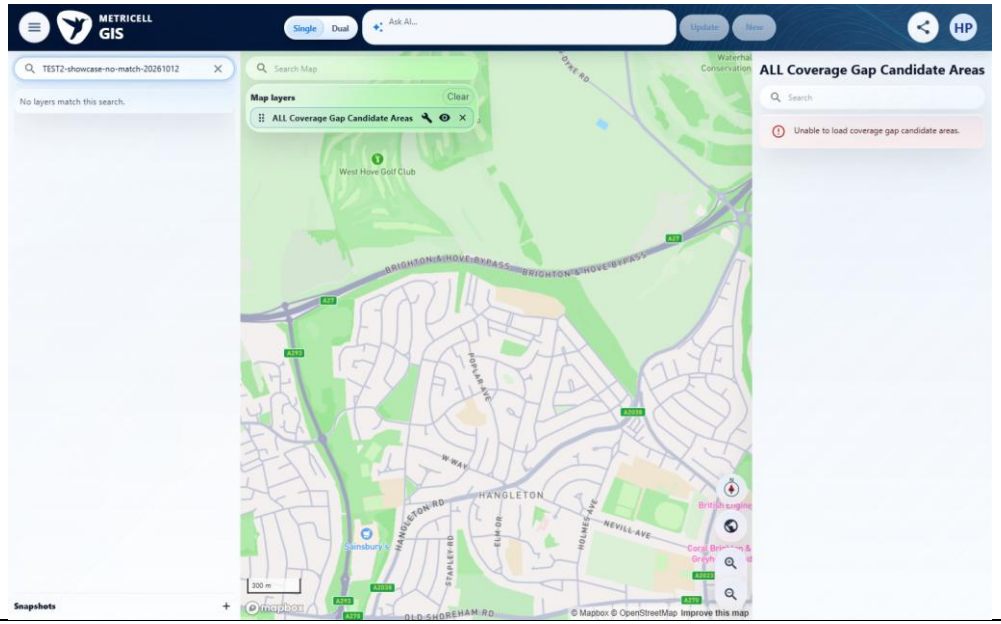

Criterion 4 evidence: Searching and clearing the catalogue does not change the visible map state that was present before searching.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E05 - Baseline map (criterion-4-baseline-map.png)

E04 - Final (criterion-4-final.png)

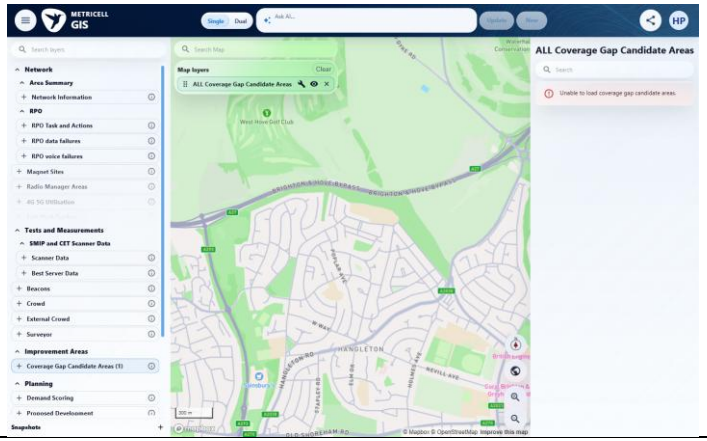

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 4 continued: Searching and clearing the catalogue does not change the visible map state that was present before searching. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E07 - After search (criterion-4-after-search.png)** 				

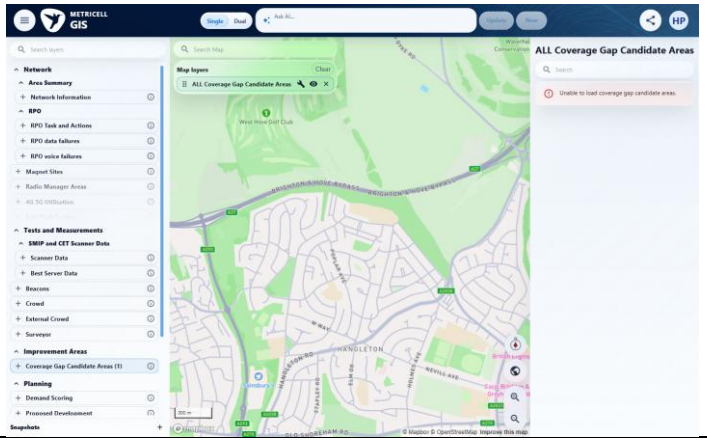

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
5.0.0	After clearing, the catalogue search field is empty and the GIS page is restored to its recorded initial catalogue, map, and active-layer state.	After clearing, the catalogue search field is empty and the GIS page is restored to its recorded initial catalogue, map, and active-layer state.	criterion-5-before-search.png, criterion-5-baseline-map.png and criterion-5-baseline-layers.png record the original catalogue position, visible map and complete one-item active-layer list. criterion-5-after-search.png and criterion-5-before-clear.png show the unmatched query; criterion-5-after-clear.png and criterion-5-final.png show an empty search and restore the same visible catalogue entries and controls, map extent at 300 m scale, active layer and existing load alert. Evidence: E05, E03	Passed

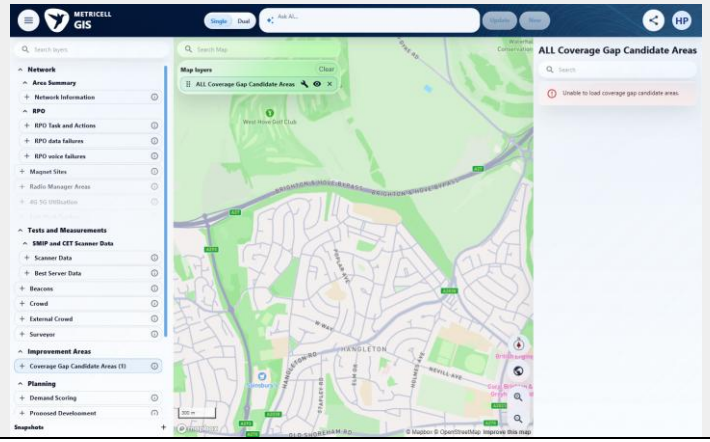

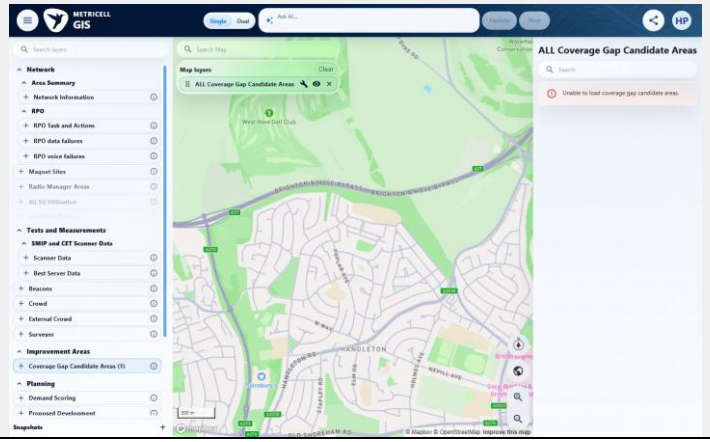

Criterion 5 evidence: After clearing, the catalogue search field is empty and the GIS page is restored to its recorded initial catalogue, map, and active-layer state.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E05 - Baseline map (criterion-5-baseline-map.png)

E03 - Final (criterion-5-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 5 continued: After clearing, the catalogue search field is empty and the GIS page is restored to its recorded initial catalogue, map, and active-layer state. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E03 - Baseline layers (criterion-5-baseline-layers.png)**  **E03 - Final (criterion-5-final.png)**  				

metricell
Better Connected

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
