Tester:	**Automated**
Jira Ticket:	TEST2-79
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 155.0.8059.85
Date of Test:	20/10/2026
Limitations during Testing:	15 blocked; 0 inconclusive criterion(s). Reviewed attempt-002 evidence against all 16 canonical criteria. The unselected-layer visible map state is evidenced; recorded reproducible Download and Upload points-service HTTP 500 failures prevented the remaining result-dependent checks. Criterion 2: GET /api/platform/automobile/download/points returned HTTP 500 on the initial and controlled fresh load. This was a service error, not a settled empty response. Matching authorised Download results and point selectability could not be checked. The screenshots show a selected layer with no result points; the word Error appears in the legend as a category and is not claimed as an HTTP error message. The test-added layer was removed. Criterion 2: Waited for the map transition and inspected the network request. GET /api/platform/automobile/download/points returned HTTP 500; selectable result points could not be obtained. Criterion 3: GET /api/platform/automobile/upload/points returned HTTP 500 on the initial and controlled fresh load. This was a service error, not a settled empty response. Matching authorised Upload results and point selectability could not be checked. The screenshots show a selected layer with no result points; the word Error appears in the legend as a category and is not claimed as an HTTP error message. The test-added layer was removed. Criterion 3: Waited for the map transition and inspected the network request. GET /api/platform/automobile/upload/points returned HTTP 500; selectable result points could not be obtained. Criterion 4: Cannot obtain Download summary dialog because Download and Upload point retrieval failed with HTTP 500 on initial and controlled fresh loads. No result point was selected and this assertion was not exercised. This criterion's screenshots document its independent reachable state; they do not demonstrate a successful empty response or a details error/loading state. No test data was created. Criterion 5: Cannot obtain Upload summary dialog because Download and Upload point retrieval failed with HTTP 500 on initial and controlled fresh loads. No result point was selected and this assertion was not exercised. This criterion's screenshots document its independent reachable state; they do not demonstrate a successful empty response or a details error/loading state. No test data was created. Criterion 6: Cannot obtain Download chart because Download and Upload point retrieval failed with HTTP 500 on initial and controlled fresh loads. No result point was selected and this assertion was not exercised. This criterion's screenshots document its independent reachable state; they do not demonstrate a successful empty response or a details error/loading state. No test data was created. Criterion 7: Cannot obtain Upload chart because Download and Upload point retrieval failed with HTTP 500 on initial and controlled fresh loads. No result point was selected and this assertion was not exercised. This criterion's screenshots document its independent reachable state; they do not demonstrate a successful empty response or a details error/loading state. No test data was created. Criterion 8: Cannot obtain Download detailed table because Download and Upload point retrieval failed with HTTP 500 on initial and controlled fresh loads. No result point was selected

	and this assertion was not exercised. This criterion's screenshots document its independent reachable state; they do not demonstrate a successful empty response or a details error/loading state. No test data was created. Criterion 9: Cannot obtain Upload detailed table because Download and Upload point retrieval failed with HTTP 500 on initial and controlled fresh loads. No result point was selected and this assertion was not exercised. This criterion's screenshots document its independent reachable state; they do not demonstrate a successful empty response or a details error/loading state. No test data was created. Criterion 10: Cannot obtain result-detail signal and rate units because Download and Upload point retrieval failed with HTTP 500 on initial and controlled fresh loads. No result point was selected and this assertion was not exercised. This criterion's screenshots document its independent reachable state; they do not demonstrate a successful empty response or a details error/loading state. No test data was created. Criterion 11: Cannot obtain a result with a null Error Message because Download and Upload point retrieval failed with HTTP 500 on initial and controlled fresh loads. No result point was selected and this assertion was not exercised. This criterion's screenshots document its independent reachable state; they do not demonstrate a successful empty response or a details error/loading state. No test data was created. Criterion 12: Cannot obtain multiple detailed-table rows for sorting because Download and Upload point retrieval failed with HTTP 500 on initial and controlled fresh loads. No result point was selected and this assertion was not exercised. This criterion's screenshots document its independent reachable state; they do not demonstrate a successful empty response or a details error/loading state. No test data was created. Criterion 13: Cannot obtain detailed-table rows for filtering because Download and Upload point retrieval failed with HTTP 500 on initial and controlled fresh loads. No result point was selected and this assertion was not exercised. This criterion's screenshots document its independent reachable state; they do not demonstrate a successful empty response or a details error/loading state. No test data was created. Criterion 14: Cannot obtain a known zero-duration result because Download and Upload point retrieval failed with HTTP 500 on initial and controlled fresh loads. No result point was selected and this assertion was not exercised. This criterion's screenshots document its independent reachable state; they do not demonstrate a successful empty response or a details error/loading state. No test data was created. Criterion 15: Cannot obtain a result whose details can be requested to observe loading because Download and Upload point retrieval failed with HTTP 500 on initial and controlled fresh loads. No result point was selected and this assertion was not exercised. This criterion's screenshots document its independent reachable state; they do not demonstrate a successful empty response or a details error/loading state. No test data was created. Criterion 16: Cannot obtain a result whose detail request fails because Download and Upload point retrieval failed with HTTP 500 on initial and controlled fresh loads. No result point was selected and this assertion was not exercised. This criterion's screenshots document its independent reachable state; they do not demonstrate a successful empty response or a details error/loading state. No test data was created. Defects (No.) counts directly contradicted criteria, not unique Jira bugs; blockers and inconclusive evidence count as zero.

1. With neither layer selected, the map shows no Download or Upload test-result points.	Y	N	0

Area of test	Pass	Fail	Defects (No.)
2. After selecting Download, the map shows selectable points for matching authorised Download results only.	N	N	0
3. After selecting Upload, the map shows selectable points for matching authorised Upload results only.	N	N	0
4. Selecting a Download result point opens its details dialog with Data Technology, MSISDN, Service, Serving Cell, Test Duration, Test Technologies, Download Rate, and Wi-Fi Connected.	N	N	0
5. Selecting an Upload result point opens its details dialog with Data Technology, MSISDN, Service, Serving Cell, Test Duration, Test Technologies, Upload Rate, and Wi-Fi Connected.	N	N	0
6. The Download result details chart plots Signal Strength in dBm and Download Rate in Mbps over time.	N	N	0
7. The Upload result details chart plots Signal Strength in dBm and Upload Rate in Mbps over time.	N	N	0
8. The Download details table displays MSISDN, Start Time, End Time, Download Rate, Band, Serving Cell, Service, Test Technologies, Data Technology, Wi-Fi Connected, URL, and Error Message.	N	N	0
9. The Upload details table displays MSISDN, Start Time, End Time, Upload Rate, Band, Serving Cell, Service, Test Technologies, Data Technology, Wi-Fi Connected, URL, and Error Message.	N	N	0
10. Where signal strength or rate values are shown, each value includes its applicable unit (dBm or Mbps).	N	N	0
11. For a result whose Error Message is null, the details table displays “No Error”.	N	N	0

Area of test	Pass	Fail	Defects (No.)
12. Sorting a supported Download or Upload details-table column changes the displayed row order to match the selected sort.	N	N	0
13. Filtering a supported Download or Upload details-table column displays rows matching the applied filter.	N	N	0
14. Requesting details for a zero-duration test does not open a details dialog.	N	N	0
15. While result details are loading, the interface shows a loading state without stale or misleading detail data.	N	N	0
16. If result details fail to load, the interface shows an error state without stale or misleading detail data.	N	N	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

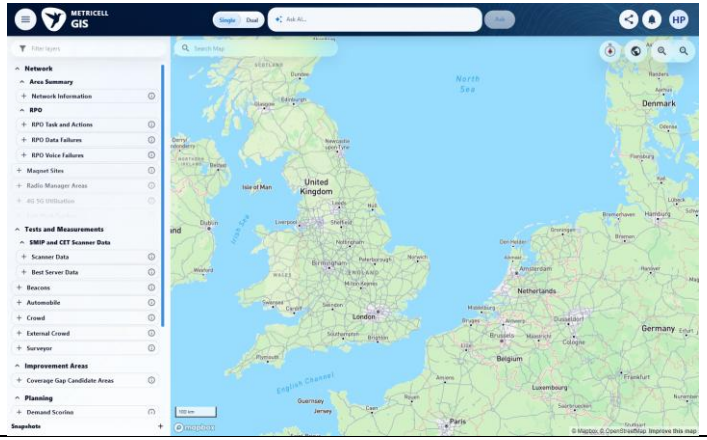

4.1 Tests

Preconditions:	V4 access and ticket conditions.	***Associated Requirements:***	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.

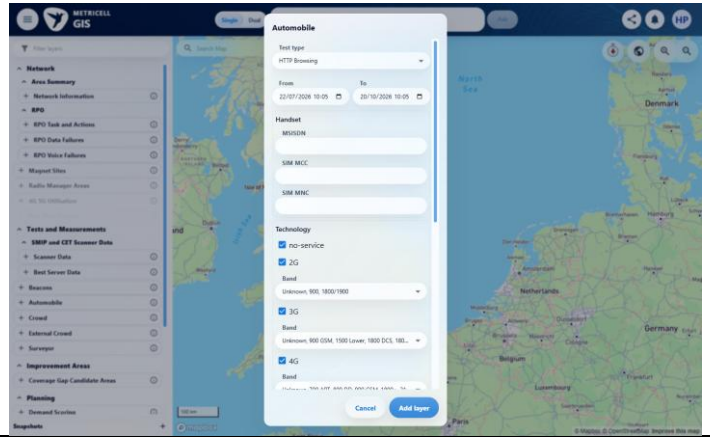

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	With neither layer selected, the map shows no Download or Upload test-result points.	With neither layer selected, the map shows no Download or Upload test-result points.	criterion-1-before-automobile.png and criterion-1-final.png show the settled unobscured map with Automobile unselected and no Download or Upload result points in the visible viewport; criterion-1-after-automobile.png shows configuration only, with no layer added. Evidence: E01, E02, E03	Passed

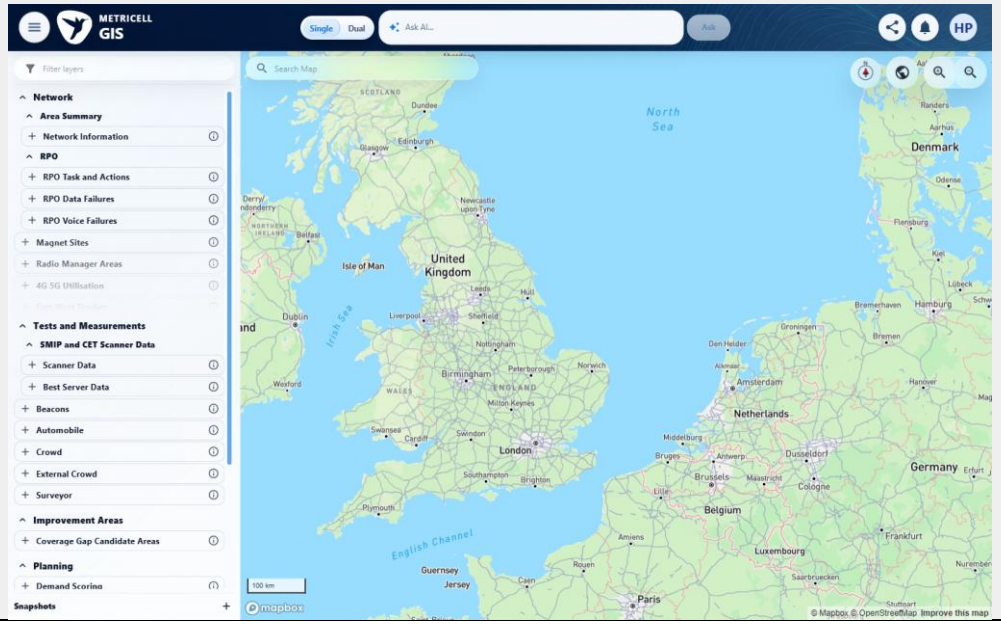

Criterion 1 evidence: With neither layer selected, the map shows no Download or Upload test-result points.

2.0.0	After selecting Download, the map shows selectable points for matching authorised Download results only.	After selecting Download, the map shows selectable points for matching authorised Download results only.	criterion-2-after-download.png and criterion-2-fresh-before-add.png show Download selected; criterion-2-after-add.png and criterion-2-final.png show its layer and legend without result points. Results record GET /api/platform/automobile/download/points returning HTTP 500 on both initial and controlled fresh loads, preventing checks of matching authorised results and selectability. The legend's Error category is not an error notification. Evidence: E04, E05, E06, E07, E08, E09, E10, E11, E12	Blocked

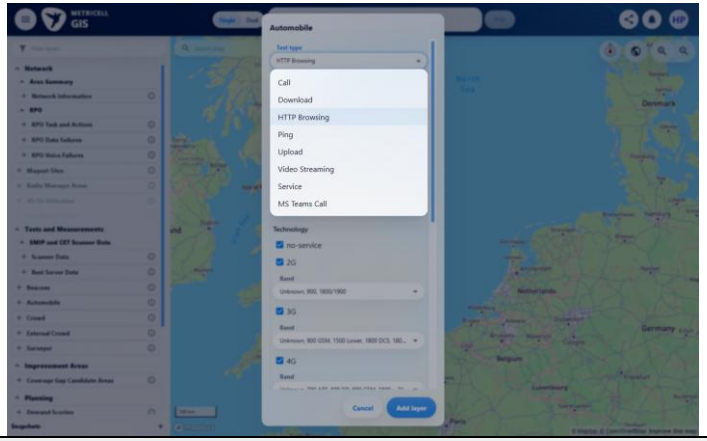

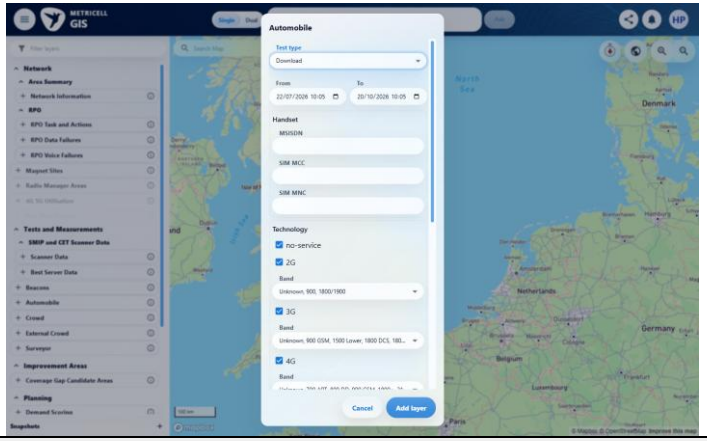

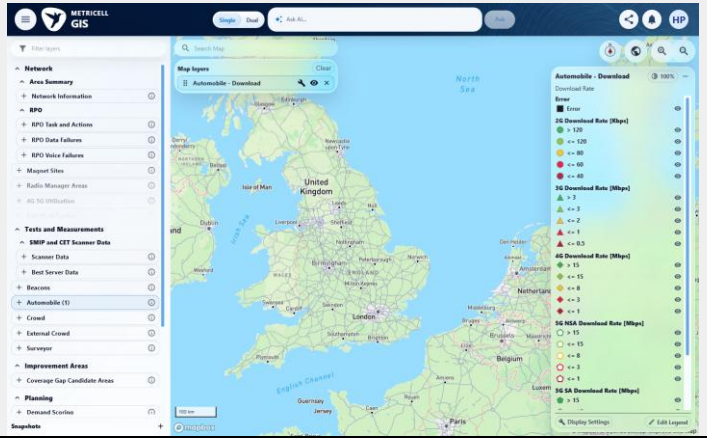

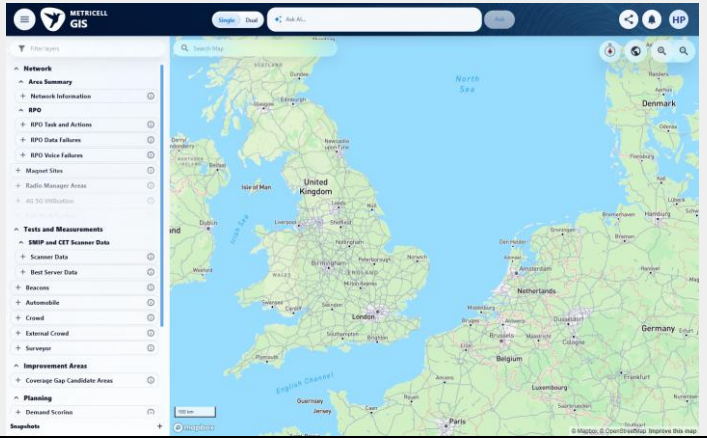

Criterion 2 evidence: After selecting Download, the map shows selectable points for matching authorised Download results only.

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
3.0.0	After selecting Upload, the map shows selectable points for matching authorised Upload results only.	After selecting Upload, the map shows selectable points for matching authorised Upload results only.	criterion-3-before-add.png shows Upload selected; criterion-3-after-add.png and criterion-3-final.png show its layer without result points. Results record GET /api/platform/automobile/upload/points returning HTTP 500 on initial and controlled fresh loads. Matching authorised results and selectability were unavailable; the stale-selector interaction error after reload does not establish an application defect. Evidence: E13, E14, E15, E16, E17, E18	Blocked
