About Metricell16

1 Revision History

Version	Date	Revision Author	Summary of Changes
[1.0]	06/10/2026	TEST2 QA Automation	Generated from TEST2 evidence review

2 Test Cycle Information

Tester:	Automated
Jira Ticket:	TEST2-58
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 154.0.8037.98
Date of Test:	06/10/2026
Limitations during Testing:	No testing limitations recorded. Defects (No.) counts directly contradicted criteria, not unique Jira bugs; blockers and inconclusive evidence count as zero.
Overall review outcome:	Passed
Browser URL(s) recorded after criteria:	https://o2intelligence-v4-dev.metricell.com/gis

3 Test Summary

Area of test	Pass	Fail	Defects (No.)
1. With one test-created Surveyor layer already...	Y	N	0
2. Opening Add layer for Surveyor a second time...	Y	N	0
3. After selecting Cancel in the second Surveyor...	Y	N	0
4. After cancelling the second Surveyor...	Y	N	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

4.1 Tests

Preconditions:		V4 access and ticket conditions.	Associated Requirements:	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.
ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path		Outcome	
1.0.0	With one test-created Surveyor layer already loaded, a settled GIS map visibly shows that layer in the Map layers list or legend, and the visible list and layer identity are recorded before opening a second Surveyor layer configuration.	With one test-created Surveyor layer already loaded, a settled GIS map visibly shows that layer in the Map layers list or legend, and the visible list and layer identity are recorded before opening a second Surveyor layer configuration.	Criterion-owned empty-map and first-configuration captures lead to criterion-1-final.png, which shows one Surveyor - Service entry, Surveyor (1), and its matching legend before any second configuration. Evidence: E01, E02, E03		Passed	

Criterion 1 evidence: With one test-created Surveyor layer already loaded, a settled GIS map visibly shows that layer in the Map layers list or legend, and the visible list and layer identity are recorded before opening a second Surveyor layer configuration.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E01 - Before first surveyor (criterion-1-before-first-surveyor.png)

E02 - After first configuration (criterion-1-after-first-configuration.png)

Criterion 1 continued: With one test-created Surveyor layer already loaded, a settled GIS map visibly shows that layer in the Map layers list or legend, and the visible list and layer identity are recorded before opening a second Surveyor layer configuration.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E03 - Final (criterion-1-final.png)

2.0.0	Opening Add layer for Surveyor a second time displays identifiable Surveyor configuration controls and a Cancel action while the original layer remains visibly loaded.	Opening Add layer for Surveyor a second time displays identifiable Surveyor configuration controls and a Cancel action while the original layer remains visibly loaded.	Criterion-2-before-second-configuration.png records one Surveyor - Service entry; criterion-2-after-second-configuration.png shows Surveyor controls, Service, Last 30 days and Cancel with that entry and legend still visible behind the dialog. Evidence: E04, E05, E06, E07, E08	Passed
-------	---	---	---	--------

Criterion 2 evidence: Opening Add layer for Surveyor a second time displays identifiable Surveyor configuration controls and a Cancel action while the original layer remains visibly loaded.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E04 - Before first configuration (criterion-2-before-first-configuration.png)

E05 - After first configuration (criterion-2-after-first-configuration.png)

Criterion 2 continued: Opening Add layer for Surveyor a second time displays identifiable Surveyor configuration controls and a Cancel action while the original layer remains visibly loaded.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metrice.com/gis>

E06 - Before second configuration (criterion-2-before-second-configuration.png)

E07 - After second configuration (criterion-2-after-second-configuration.png)

Criterion 2 continued: Opening Add layer for Surveyor a second time displays identifiable Surveyor configuration controls and a Cancel action while the original layer remains visibly loaded.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E08 - Final (criterion-2-final.png)

3.0.0	After selecting Cancel in the second Surveyor configuration, the configuration closes and the map returns with a visible Map layers list containing the same entries as the recorded pre-configuration list; no additional Surveyor layer is present and the original layer remains present.	After selecting Cancel in the second Surveyor configuration, the configuration closes and the map returns with a visible Map layers list containing the same entries as the recorded pre-configuration list; no additional Surveyor layer is present and the original layer remains present.	Criterion-3-baseline-before-second-configuration.png records two Surveyor - Service entries (one existing, one test-created). The same journey shows Cancel in the second configuration and then the closed configuration with the identical two-entry list and Surveyor (2); no extra entry appears. Evidence: E09, E10, E11, E12, E13	Passed
-------	--	--	--	--------

Criterion 3 evidence: After selecting Cancel in the second Surveyor configuration, the configuration closes and the map returns with a visible Map layers list containing the same entries as the recorded pre-configuration list; no additional Surveyor layer is present and the original layer remains present.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E09 - Before first configuration (criterion-3-before-first-configuration.png)

E10 - After first configuration (criterion-3-after-first-configuration.png)

Criterion 3 continued: After selecting Cancel in the second Surveyor configuration, the configuration closes and the map returns with a visible Map layers list containing the same entries as the recorded pre-configuration list; no additional Surveyor layer is present and the original layer remains present.
 Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E11 - Baseline before second configuration (criterion-3-baseline-before-second-configuration.png)

E12 - After second configuration (criterion-3-after-second-configuration.png)

Criterion 3 continued: After selecting Cancel in the second Surveyor configuration, the configuration closes and the map returns with a visible Map layers list containing the same entries as the recorded pre-configuration list; no additional Surveyor layer is present and the original layer remains present.
 Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E13 - Before cancel (criterion-3-before-cancel.png)

E11 - Final (criterion-3-final.png)

4.0.0	After cancelling the second Surveyor configuration, Display Settings can be opened for the original layer and Show linked sites visibly has the same state as its separately recorded pre-cancellation baseline.	After cancelling the second Surveyor configuration, Display Settings can be opened for the original layer and Show linked sites visibly has the same state as its separately recorded pre-cancellation baseline.	Criterion-4-baseline-linked-sites-checked.png shows Show linked sites checked. Its own sequence closes settings, opens the next Surveyor configuration, cancels it, and reopens Display Settings; criterion-4-after-reopen-display-settings.png shows the checkbox still checked for the recorded test-created layer. Evidence: E06, E10, E11, E14, E15, E12, E16, E17	Passed
-------	--	--	---	--------

Criterion 4 evidence: After cancelling the second Surveyor configuration, Display Settings can be opened for the original layer and Show linked sites visibly has the same state as its separately recorded pre-cancellation baseline.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E06 - Before first configuration (criterion-4-before-first-configuration.png)

E10 - After first configuration (criterion-4-after-first-configuration.png)

Criterion 4 continued: After cancelling the second Surveyor configuration, Display Settings can be opened for the original layer and Show linked sites visibly has the same state as its separately recorded pre-cancellation baseline.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E11 - Before baseline display settings (criterion-4-before-baseline-display-settings.png)

E14 - Before close baseline settings (criterion-4-before-close-baseline-settings.png)

Criterion 4 continued: After cancelling the second Surveyor configuration, Display Settings can be opened for the original layer and Show linked sites visibly has the same state as its separately recorded pre-cancellation baseline.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E15 - Before second configuration (criterion-4-before-second-configuration.png)

E12 - Before cancel (criterion-4-before-cancel.png)

Criterion 4 continued: After cancelling the second Surveyor configuration, Display Settings can be opened for the original layer and Show linked sites visibly has the same state as its separately recorded pre-cancellation baseline.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E16 - After cancel (criterion-4-after-cancel.png)

E17 - Before reopen display settings (criterion-4-before-reopen-display-settings.png)

Criterion 4 continued: After cancelling the second Surveyor configuration, Display Settings can be opened for the original layer and Show linked sites visibly has the same state as its separately recorded pre-cancellation baseline.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E14 - Final (criterion-4-final.png)

Supporting setup captures - full attempt evidence remains in the local evidence folder

E18 - After open gis (criterion-1-after-open-gis.png)

E19 - After open gis (criterion-2-after-open-gis.png)

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
