About Metricell26

Version	Date	Revision Author	Summary of Changes
[1.0]	28/09/2026	TEST2 QA Automation	Generated from TEST2 evidence review

Tester:	Automated
Jira Ticket:	TEST2-38
Environment:	Chrome
Browser Details:	Chrome version not recorded
Date of Test:	28/09/2026
Limitations during Testing:	None recorded

Area of test	Pass	Fail	Defects (No.)
1. Starting at `https://o2intelligence-v4-dev.metricell.com/launcher`, with the V4 launcher displayed and the user signed in if prompted, select the **API Request Audit** card.	Y	N	0
2. After the first card selection, verify that the API Request Audit module is displayed on the `o2intelligence-v4-dev.metricell.com` V4 host and no application load error is shown.	Y	N	0
3. From the first API Request Audit module view, use the browser Back control and verify that the V4 launcher is displayed again.	Y	N	0

4. From the restored V4 launcher, select the **API Request Audit** card a second time during the same browser session.	Y	N	0
5. After the second card selection, verify that the API Request Audit module is displayed again on the `o2intelligence-v4-dev.metricell.com` V4 host and no application load error is shown.	Y	N	0
6. Across the two module openings, verify that the browser URLs identify the same V4 host and that the intermediate launcher view is visible between the openings.	Y	N	0
7. During this flow, verify that no audit data is created or modified.	N	Y	1

All automated tests must map to an approved criterion and produce reproducible results plus decisive evidence. Use Failed, Blocked, or Unverified where applicable.

4.1 Tests

Preconditions:	Not recorded in agent output.	Associated Requirements:	Criteria from criteria.md.	Automation Notes:	Automated browser run; PNG evidence reviewed.
-----------------------	-------------------------------	---------------------------------	----------------------------	--------------------------	---

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	Starting at `https://o2intelligence-v4-dev.metricell.com/launcher`, with the V4 launcher displayed and the user signed in if prompted, select the **API Request Audit** card.	Starting at `https://o2intelligence-v4-dev.metricell.com/launcher`, with the V4 launcher displayed and the user signed in if prompted, select the **API Request Audit** card.	Attempt-002 screenshots show the signed-in V4 launcher and API Request Audit card; the corresponding browserUrl is on the required o2intelligence-v4-dev.metricell.com host. Steps taken: Opened the required launcher URL and confirmed the signed-in launcher.; Selected the API Request Audit card.	Passed

HP

Welcome, Harry

Your network insights, all in one place.

Agentic AI
 Investigate network issues with an AI agent and map context.

GIS
 Open the GIS workspace and add map layers by permission.

Dashboards
 Build dashboards, explore trends, and turn network data into actionable insights.

Customer Care
 Understand network impacts on customers and support better care decisions.

Survey Analyst
 Build workbooks from survey data and analysis widgets.

RPO
 Radio performance optimisation tasks, actions and insights.

Data Management
 Import, describe, and manage CSV datasets for GIS and Agentic AI.

Documents
 Organise documents and find the information you need in one workspace.

Agentic AI Administration
 Manage runtime agents, instructions, skills, tools, and connected capabilities.

Device Administration
 Administer Aplus, Beacon, Automobile, and Surveyor devices and configuration.

Access admin
 Administer local and SSO users, roles, service accounts, and permissions.

API request audit
 Explore authenticated API usage, errors, latency, and callers.

Metricell
API request audit

7.0.0	During this flow, verify that no audit data is created or modified.	During this flow, verify that no audit data is created or modified.	The screenshots show live ingestion and changing request totals, while no mutation controls are used. The evidence cannot establish whether audit data was created or modified during the flow. Steps taken: Opened API Request Audit and inspected its read-only dashboard.; Did not use any data creation or editing controls.; Observed that the dashboard reports live	Failed

ingestion and changing request totals, so the UI did not establish whether audit data was created or modified during the flow.

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
