Tester:	**Automated**
Jira Ticket:	TEST2-89
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 156.0.8078.48; Google Chrome 156.0.8078.74
Date of Test:	Not recorded
Limitations during Testing:	Blocked criterion(s): 13, 14. See the assessment below each criterion. Unverified criterion(s): 2, 3, 10, 11, 12. See the assessment below each criterion. Criteria 14 used simulated UI conditions; see their assessments. Inconclusive evidence is reported as Failed, but is not a confirmed application defect.

3 Test Summary

Area of test	Pass (Y/N)	Fail (Y/N)	Blocked (Y/N)	Defect No
1. Before selecting the MS Teams Call layer, the map shows no MS Teams Call test-result points.	Y	N	N	0
2. When the user selects the MS Teams Call layer and authorised matching results are available, each matching result is shown as a selectable map point.	N	Y	N	0
3. For a displayed MS Teams Call point with Poor Quality 0–0.99, its map colour is Green.	N	Y	N	0
4. For a displayed MS Teams Call point with Poor Quality 1–9.99, its map colour is Yellow.	Y	N	N	0
5. For a displayed MS Teams Call point with Poor Quality 10–24.99, its map colour is Amber.	Y	N	N	0
6. For a displayed MS Teams Call point with Poor Quality 25 or greater, its map colour is Red.	Y	N	N	0
7. When the user selects a map point and its details load successfully, the details dialog displays Test ID, Test Result, Connection Time, Call Duration, Poor Quality, MSISDN and Test Technologies.	Y	N	N	0
8. When the user selects a map point and its details load successfully, the details dialog displays signal and download charts and shows handover markers when available.	Y	N	N	0
9. When the user selects a map point and its details load successfully, the details dialog displays a detailed-sample table that omits label, latitude, longitude and handover-only columns.	Y	N	N	0
10. When detailed samples are displayed, sorting a supported column changes their displayed order to match the selected sort.	N	Y	N	0
11. When detailed samples are displayed, filtering a supported column limits the displayed samples to those matching the filter.	N	Y	N	0
12. When the user exports a selected test as CSV, the exported CSV contains data for that selected test.	N	Y	N	0
13. When a zero-duration result is selected, its details dialog does not display stale or misleading data.	N	N	Y	0
14. When details for a selected result fail to load, the dialog does not display stale or misleading data.	N	N	Y	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

2.0.0	When the user selects the MS Teams Call layer and authorised matching results are available, each matching result is shown as a selectable map point.	When the user selects the MS Teams Call layer and authorised matching results are available, each matching result is shown as a selectable map point.	criterion-2-selected-layer-map-3c79e3ab-4fdf-49a8-a107-23636a4fe141.png, criterion-2-selected-cluster-a88db975-38e2-45dd-bef4-f21fe1f62255.png, criterion-2-final-b15b5ff7-d56f-49eb-8003-264d0814c35c.png show Automobile MS Teams Call result symbols, a five-member cluster and one opened MS Teams detail. Complete reconciliation and normal selection of every matching result/cluster member in a defined genuine scope remain unverified; the retained Call detail in selected-layer-map is unrelated. Recorded /api/platform/automobile/ms-teams-call requests corroborate module provenance. Evidence: E04, E05, E06, E07, E08, E09	Failed

No criterion-owned image visibly establishes a green target's Poor Quality value within 0–0.99. The aggregate value 0.049346879535558 and pixel correlation appear only in tester notes; neither the legend nor this cluster list independently proves that value-to-symbol association. 11.0.0	When detailed samples are displayed, filtering a supported column limits the displayed samples to those matching the filter.	When detailed samples are displayed, filtering a supported column limits the displayed samples to those matching the filter.	criterion-11-supplement-final-a6141306-3a6a-49f9-9767-0f08ad05a0d6.png shows the correct individual MS Teams detailed-sample table with populated rows, sort arrow and export control, but no visible sample filter in the captured left-column view. Tester notes report inspecting all 11 headers; the criterion-owned evidence does not capture the right-side headers or their inspected controls, or a filter action/final matching-row state. The layer catalogue filter and cluster-list search are unrelated. Filtering is not demonstrated, and this partial capture does not conclusively establish global control absence as a product defect. Evidence: E81	Failed

13.0.0	When a zero-duration result is selected, its details dialog does not display stale or misleading data.	When a zero-duration result is selected, its details dialog does not display stale or misleading data.	criterion-13-supplement-final-26f79388-68a3-43b0-8e5b-fbe4d29157f0.png shows the complete bounded two-row MS Teams cluster with both Call Duration values 120 s. A genuine zero-duration fixture was not supplied or located in that checked scope, so selection and stale-data protection for zero duration could not be tested. This does not establish dataset-wide absence or a product defect. Evidence: E83	Blocked
Criterion 13 assessment: Testing notes: Captured the bounded fixture search. No qualifying zero-duration identity was supplied or located in this checked scope; did not claim a product failure or a zero-duration pass.				

Criterion 13 evidence: When a zero-duration result is selected, its details dialog does not display stale or misleading data.

14.0.0	When details for a selected result fail to load, the dialog does not display stale or misleading data.	When details for a selected result fail to load, the dialog does not display stale or misleading data.	Testing could not be completed; see the assessment below. Evidence: E84, E85, E86	Blocked

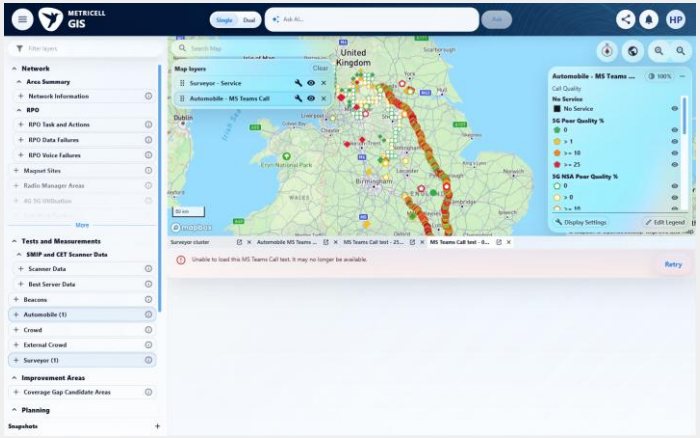

Criterion 14 assessment: SIMULATED UI STATE: on the configured development /gis host, the tester records an exact-URL GET-only browser handler injecting HTTP 503 for /api/platform/automobile/ms-teams-call/tests/131879769 after genuine test 132124168 loaded. criterion-14-supplement-before-385e41bf-2bbe-484a-abab-93892b5a257e.png shows the distinct 25 August 11:33:08 baseline; criterion-14-supplement-final-3830d827-7d85-499f-9fb8-7df1ed351058.png shows the explicit MS Teams load error and Retry with no previous summary, charts or samples visible; criterion-14-supplement-restored-672b6bc0-3229-473e-831d-a45622987a71.png shows genuine recovery to 4 August 11:41:02. Endpoint/module scope matches Automobile MS Teams Call, and tester steps record one intercepted read, removal of the exact handler, genuine HTTP 200 on Retry and verification that the handler was absent, followed by cleanup of owned tabs/layer and restoration of the pre-existing Surveyor camera/session. However, the supplied selected inputs provide no independent error-response contract provenance for the injected 503 condition; the observed genuine successful endpoint does not establish that failure contract. No visible loading transition is captured before recovery. The required simulation contract prerequisite is therefore Blocked; this demonstrates a visible browser-local error/recovery sequence, not a naturally occurring backend failure or backend integration pass.

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
