1 Revision History

Version	Date	Revision Author	Summary of Changes
[1.0]	12/10/2026	TEST2 QA Automation	Generated from TEST2 evidence review

2 Test Cycle Information

Tester:	**Automated**
Jira Ticket:	TEST2-71
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 155.0.8059.40
Date of Test:	12/10/2026
Limitations during Testing:	0 blocked; 1 inconclusive criterion(s). Reviewed the live remote inputs and non-empty attempt-001 PNG evidence; complete catalogue restoration lacks full screenshot comparison. Criterion 2: A wait for literal 'Open GIS' text timed out because the button's accessible name differs from its displayed text, and a text-based selector did not match. The subsequent accessibility snapshot confirmed the authenticated launcher and its Open GIS button; clicking its exact reference succeeded. The pre-existing data-load alert remained unrelated to the search assertions. Criterion 3: Cleared Search layers and waited for Network Information to reappear. Inconclusive evidence is reported as Failed, but is not a confirmed application defect. Defects (No.) counts directly contradicted criteria, not unique Jira bugs; blockers and inconclusive evidence count as zero.
Overall review outcome:	Failed (inconclusive evidence)
Browser URL(s) recorded after criteria:	https://o2intelligence-v4-dev.metricell.com/gis

3 Test Summary

Area of test	Pass	Fail	Defects (No.)
1. With GIS open and Search layers initially empty, entering zzqa_showcase_no_match_20261012 leaves the entered text visible, shows no matching catalogue entries, and keeps the GIS map available.	Y	N	0

Area of test	Pass	Fail	Defects (No.)
2. Replacing the no-match text with Surveyor without reloading GIS shows Surveyor in the filtered catalogue while keeping the GIS map available.	Y	N	0
3. Clearing Search layers restores the original catalogue and leaves the complete Map layers entries and order and the map view matching the recorded pre-search baseline, with no layer added or removed.	N	Y	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

4.1 Tests

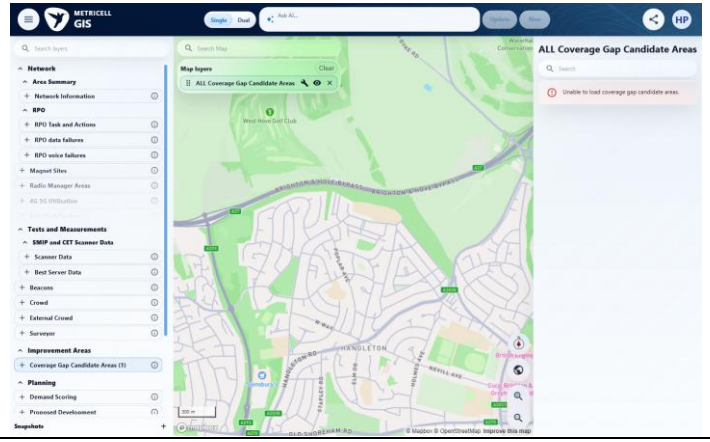

Preconditions:	V4 access and ticket conditions.	***Associated Requirements:***	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	With GIS open and Search layers initially empty, entering zzqa_showcase_no_match_20261012 leaves the entered text visible, shows no matching catalogue entries, and keeps the GIS map available.	With GIS open and Search layers initially empty, entering zzqa_showcase_no_match_20261012 leaves the entered text visible, shows no matching catalogue entries, and keeps the GIS map available.	criterion-1-before-no-match.png shows empty Search layers and the catalogue; criterion-1-after-no-match.png shows zzqa_showcase_no_match_20261012 retained, no matching entries, and the rendered GIS map still available. Evidence: E01, E02	Passed

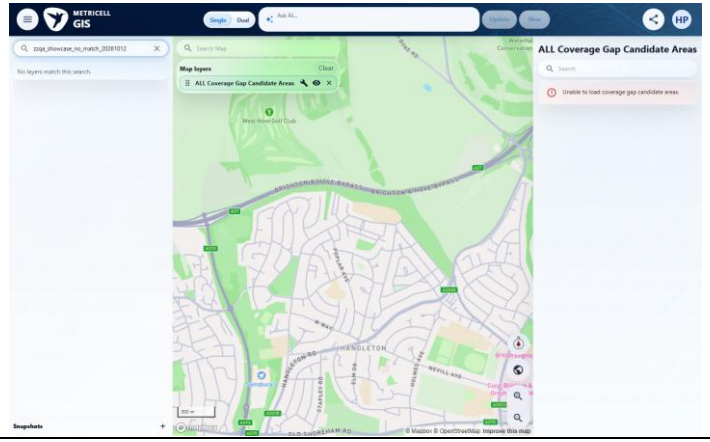

Criterion 1 evidence: With GIS open and Search layers initially empty, entering zzqa_showcase_no_match_20261012 leaves the entered text visible, shows no matching catalogue entries, and keeps the GIS map available.

Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E01 - Before no match (criterion-1-before-no-match.png)

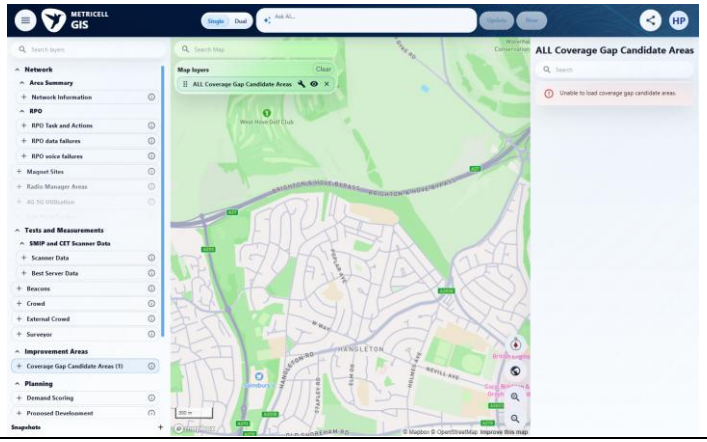

E02 - Final (criterion-1-final.png)

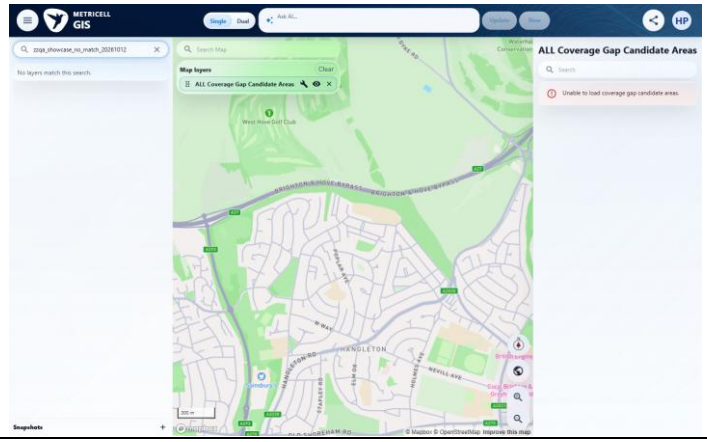

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
2.0.0	Replacing the no-match text with Surveyor without reloading GIS shows Surveyor in the filtered catalogue while keeping the GIS map available.	Replacing the no-match text with Surveyor without reloading GIS shows Surveyor in the filtered catalogue while keeping the GIS map available.	The criterion-owned sequence from criterion-2-before-surveyor.png to criterion-2-after-surveyor.png and criterion-2-final.png shows no-match text replaced by Surveyor, the Surveyor catalogue entry returned, and the map retained. Recorded steps show replacement without navigation or reload; the recovered launcher selector error does not contradict this sequence. Evidence: E03, E04, E05, E06, E07	Passed

Criterion 2 evidence: Replacing the no-match text with Surveyor without reloading GIS shows Surveyor in the filtered catalogue while keeping the GIS map available.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E03 - Before no match (criterion-2-before-no-match.png)

E04 - After no match (criterion-2-after-no-match.png)

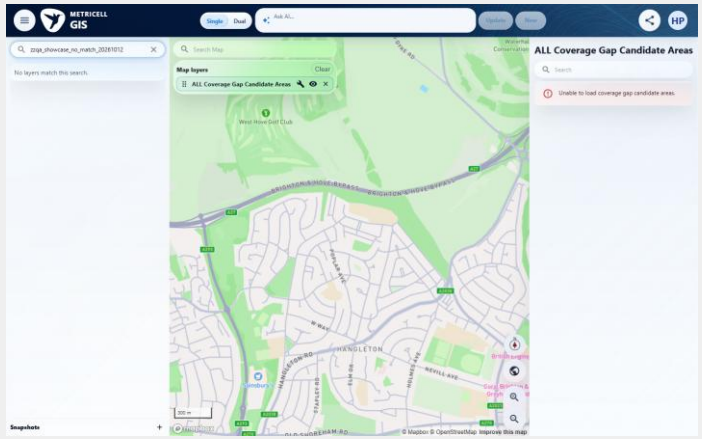

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome

Criterion 2 continued: Replacing the no-match text with Surveyor without reloading GIS shows Surveyor in the filtered catalogue while keeping the GIS map available.

Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

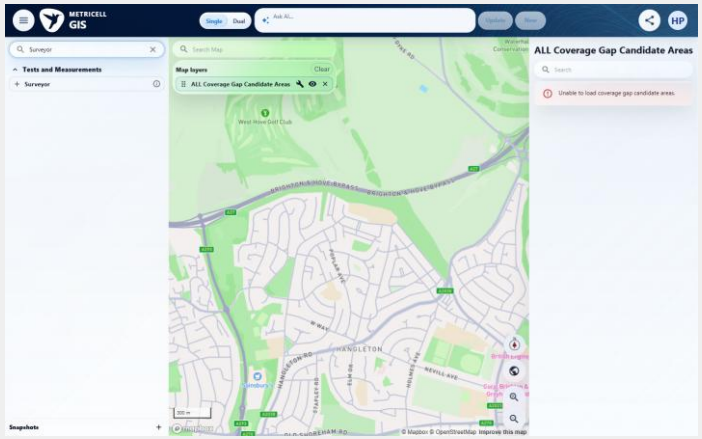

E05 - Before surveyor (criterion-2-before-surveyor.png)

Criterion 2 continued: Replacing the no-match text with Surveyor without reloading GIS shows Surveyor in the filtered catalogue while keeping the GIS map available. Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis E07 - Final (criterion-2-final.png)				

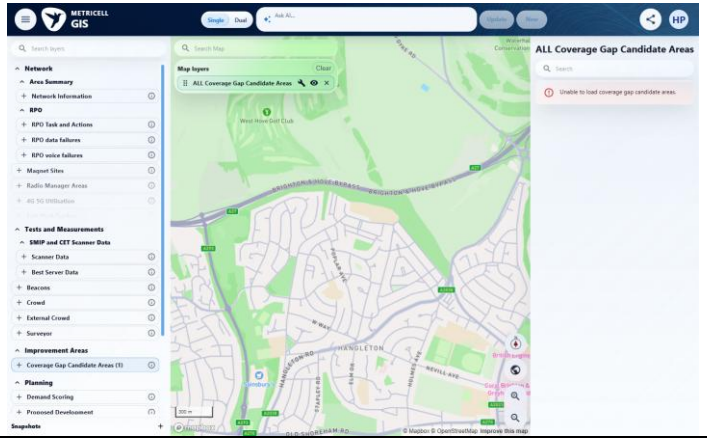

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
3.0.0	Clearing Search layers restores the original catalogue and leaves the complete Map layers entries and order and the map view matching the recorded pre-search baseline, with no layer added or removed.	Clearing Search layers restores the original catalogue and leaves the complete Map layers entries and order and the map view matching the recorded pre-search baseline, with no layer added or removed.	criterion-3-baseline-map.png and criterion-3-baseline-layers.png, followed by criterion-3-after-no-match.png, criterion-3-after-surveyor.png, criterion-3-before-clear.png and criterion-3-after-clear.png, show clearing restores the visible catalogue. criterion-3-restored-map.png and criterion-3-restored-layers.png match the original map extent and complete single-entry ALL Coverage Gap Candidate Areas list. However, criterion-3-baseline-catalogue-network-bottom.png has no matching restored scroll capture, and screenshots do not cover the full original/restored catalogue. The claimed 38-entry DOM comparison in notes cannot independently prove complete catalogue restoration. Evidence: E03, E08, E09, E10, E11, E07, E06, E12	Failed

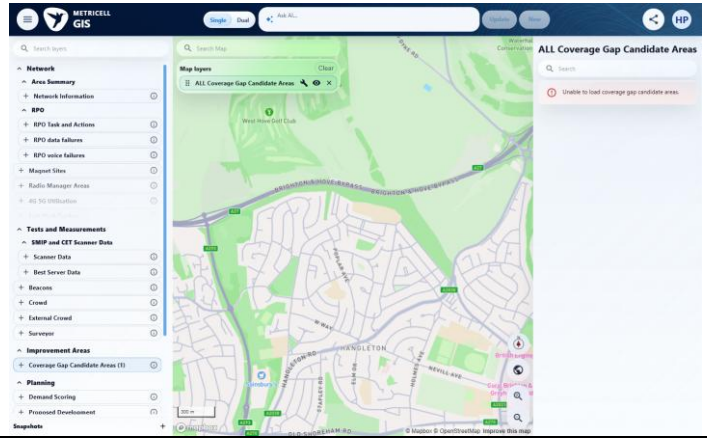

Criterion 3 evidence: Clearing Search layers restores the original catalogue and leaves the complete Map layers entries and order and the map view matching the recorded pre-search baseline, with no layer added or removed.

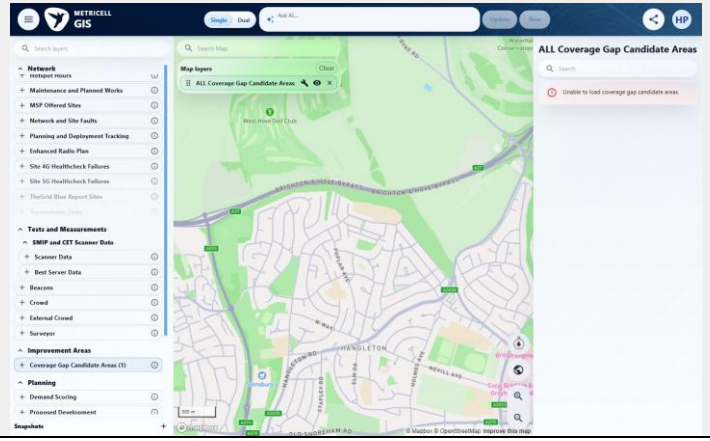

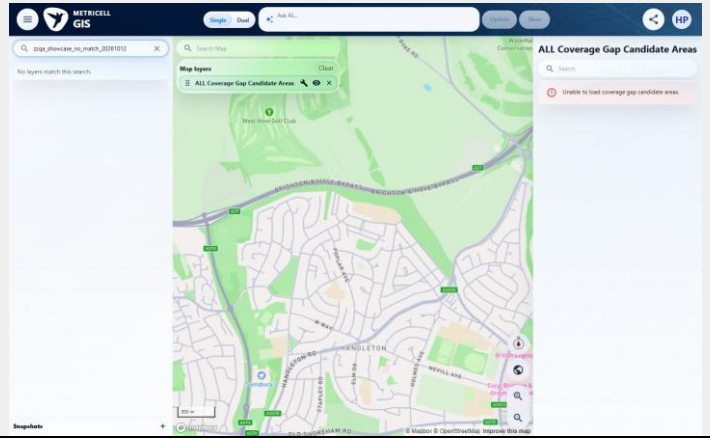

Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

Better Connected

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
