About Metricell9

1 Revision History

Version	Date	Revision Author	Summary of Changes
[1.0]	07/10/2026	TEST2 QA Automation	Generated from TEST2 evidence review

2 Test Cycle Information

Tester:	Automated
Jira Ticket:	TEST2-62
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 154.0.8037.98
Date of Test:	07/10/2026
Limitations during Testing:	Criterion 3: Clicked Open API request audit; waited for Requests and errors over time, and observed populated Requests, Error rate, Callers, Median latency and P95 latency metrics and chart. Defects (No.) counts directly contradicted criteria, not unique Jira bugs; blockers and inconclusive evidence count as zero.
Overall review outcome:	Passed
Browser URL(s) recorded after criteria:	https://o2intelligence-v4-dev.metricell.com/gis ; https://o2intelligence-v4-dev.metricell.com/launcher ; https://o2intelligence-v4-dev.metricell.com/api-request-audit

3 Test Summary

Area of test	Pass	Fail	Defects (No.)
1. Starting from the authorised V4 launcher with...	Y	N	0
2. Starting from the authorised V4 launcher,...	Y	N	0
3. Starting from the returned authorised V4...	Y	N	0
4. Starting from the authorised V4 launcher,...	Y	N	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

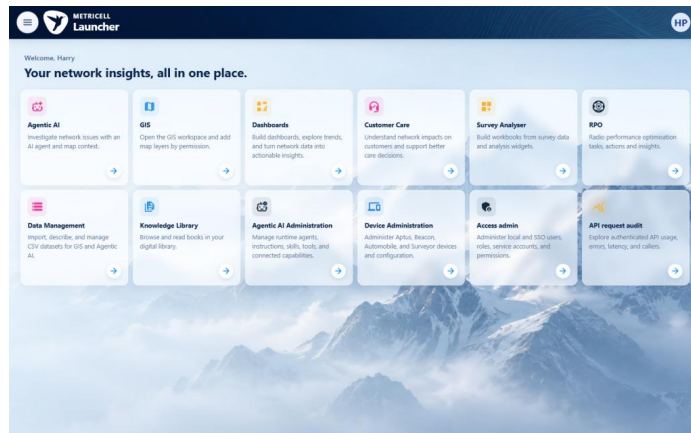

4.1 Tests

Preconditions:		V4 access and ticket conditions.	Associated Requirements:	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.
ID / Criterion	Criteria Tested	Expected Result		Actual Result / Evidence Path		Outcome
1.0.0	Starting from the authorised V4 launcher with its module cards visible, open GIS and verify that the GIS destination settles on a map with visible map controls, rather than a login or application-error page.	Starting from the authorised V4 launcher with its module cards visible, open GIS and verify that the GIS destination settles on a map with visible map controls, rather than a login or application-error page.		Criterion-owned launcher before-open captures show authorised module cards; after-open and final captures show a settled UK/Ireland GIS map with Search Map, north reset and zoom controls, with no login or application-error page. Browser-derived browserUrl confirms the GIS destination. Evidence: E01, E02		Passed

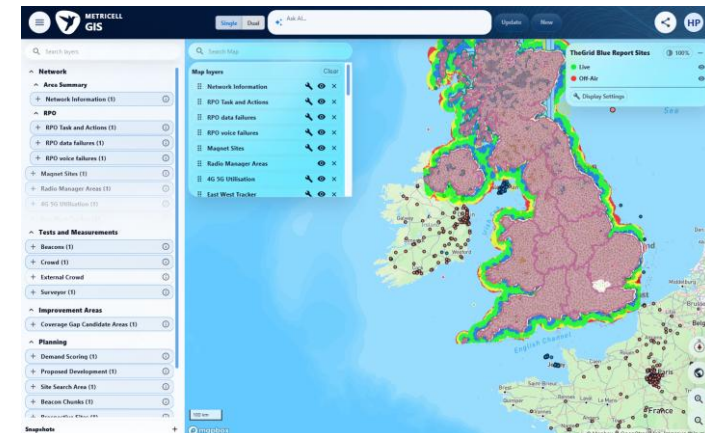

Criterion 1 evidence: Starting from the authorised V4 launcher with its module cards visible, open GIS and verify that the GIS destination settles on a map with visible map controls, rather than a login or application-error page.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E01 - Before open gis (criterion-1-before-open-gis.png)

E02 - Final (criterion-1-final.png)

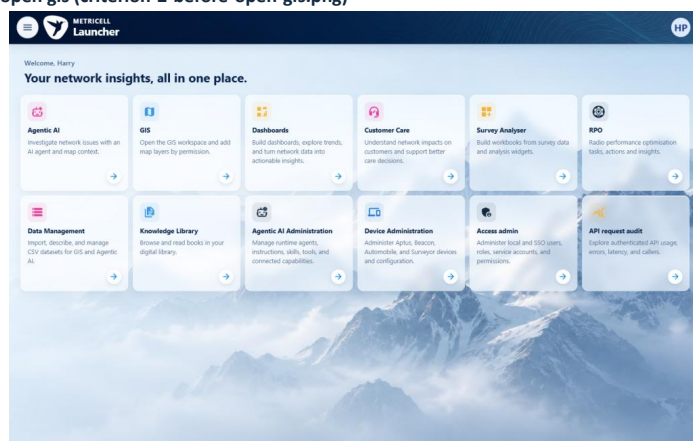

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
2.0.0	Starting from the authorised V4 launcher, open GIS, wait for the GIS map to load, then use browser Back and verify that the launcher returns with its module cards visible, including API Request Audit.	Starting from the authorised V4 launcher, open GIS, wait for the GIS map to load, then use browser Back and verify that the launcher returns with its module cards visible, including API Request Audit.	Criterion-owned ordered captures and steps show launcher to loaded GIS, then browser Back to launcher. After-back and final captures show module cards including API request audit; browser-derived browserUrl confirms the launcher destination. Evidence: E01, E03	Passed

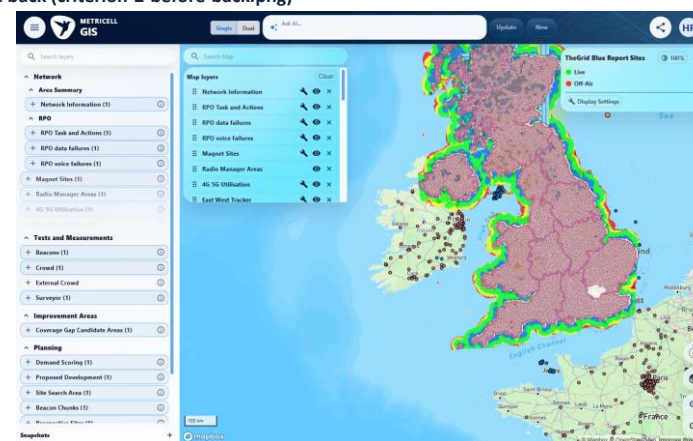

Criterion 2 evidence: Starting from the authorised V4 launcher, open GIS, wait for the GIS map to load, then use browser Back and verify that the launcher returns with its module cards visible, including API Request Audit.

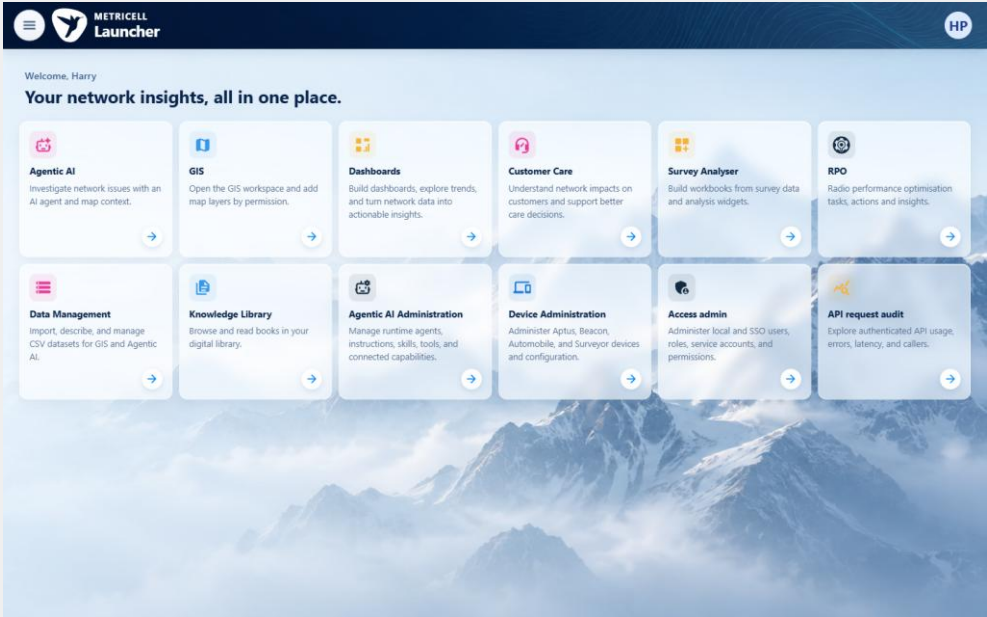

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/launcher>

E01 - Before open gis (criterion-2-before-open-gis.png)

E03 - Before back (criterion-2-before-back.png)

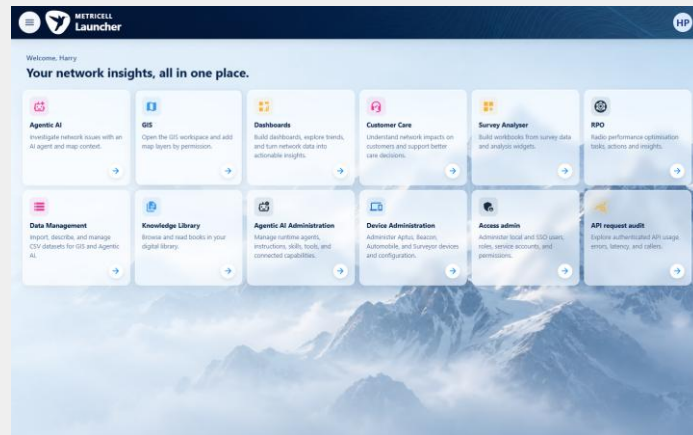

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
	Criterion 2 continued: Starting from the authorised V4 launcher, open GIS, wait for the GIS map to load, then use browser Back and verify that the launcher returns with its module cards visible, including API Request Audit. Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/launcher E01 - Final (criterion-2-final.png)		 The screenshot displays the Metricell Launcher interface. At the top, there is a dark blue header with the Metricell logo and the text 'Metricell Launcher' on the left, and a user profile icon labeled 'HP' on the right. Below the header, a light blue banner reads 'Welcome, Harry' and 'Your network insights, all in one place.' The main area features a grid of twelve module cards, each with an icon, a title, a brief description, and a right-pointing arrow. The modules are: Agentic AI (Investigate network issues with an AI agent and map context), GIS (Open the GIS workspace and add map layers by permission), Dashboards (Build dashboards, explore trends, and turn network data into actionable insights), Customer Care (Understand network impacts on customers and support better care decisions), Survey Analyser (Build workbooks from survey data and analysis widgets), RPO (Radio performance optimisation tasks, actions and insights), Data Management (Import, describe, and manage CSV datasets for GIS and Agentic AI), Knowledge Library (Browse and read books in your digital library), Agentic AI Administration (Manage runtime agents, instructions, skills, tools, and connected capabilities), Device Administration (Administer Aptus, Beacon, Automobile, and Surveyor devices and configuration), Access admin (Administer local and SSO users, roles, service accounts, and permissions), and API request audit (Explore authenticated API usage, errors, latency, and callers).	

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
3.0.0	Starting from the returned authorised V4 launcher with its module cards visible, open API Request Audit and verify that the audit destination shows identifiable audit content, such as request metrics or the Requests and errors over time chart, rather than a login or application-error page.	Starting from the returned authorised V4 launcher with its module cards visible, open API Request Audit and verify that the audit destination shows identifiable audit content, such as request metrics or the Requests and errors over time chart, rather than a login or application-error page.	Criterion-owned ordered captures and steps show launcher to settled GIS, Back to the returned launcher, then API request audit. After-open-audit and final captures show populated request metrics and the Requests and errors over time chart, with no login or application-error page; browser-derived browserUrl confirms the audit destination. Evidence: E04, E05	Passed

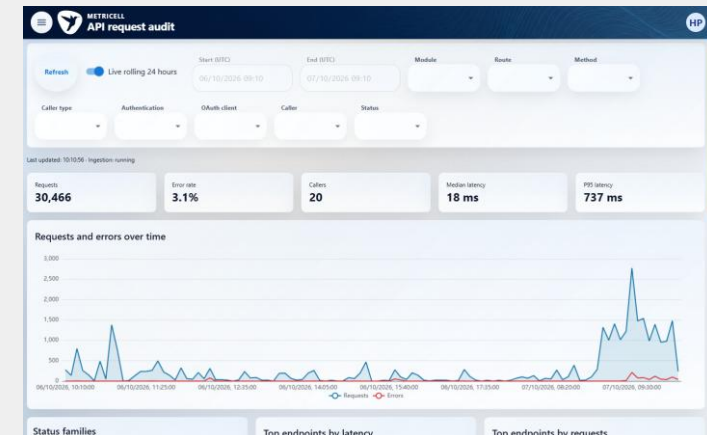

Criterion 3 evidence: Starting from the returned authorised V4 launcher with its module cards visible, open API Request Audit and verify that the audit destination shows identifiable audit content, such as request metrics or the Requests and errors over time chart, rather than a login or application-error page.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/api-request-audit>

E04 - Before open audit (criterion-3-before-open-audit.png)

E05 - Final (criterion-3-final.png)

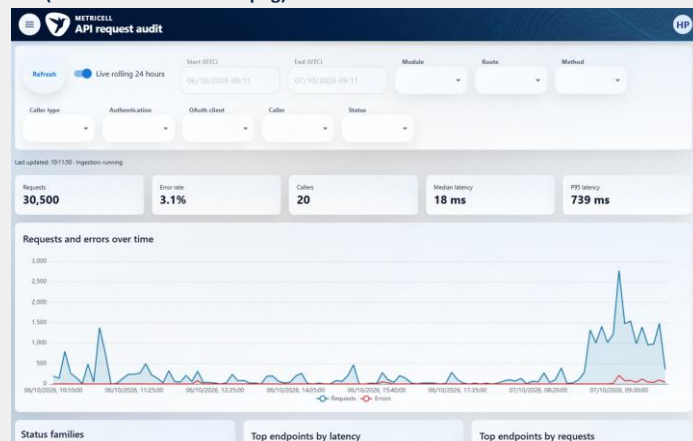

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
4.0.0	Starting from the authorised V4 launcher, open API Request Audit, wait for the audit content to load, then use browser Back and verify that the launcher returns with both GIS and API Request Audit cards available.	Starting from the authorised V4 launcher, open API Request Audit, wait for the audit content to load, then use browser Back and verify that the launcher returns with both GIS and API Request Audit cards available.	Criterion-owned ordered captures and steps show launcher to populated API request audit, then browser Back. After-back and final captures show both GIS and API request audit cards available; browser-derived browserUrl confirms the launcher destination. Evidence: E06, E07	Passed

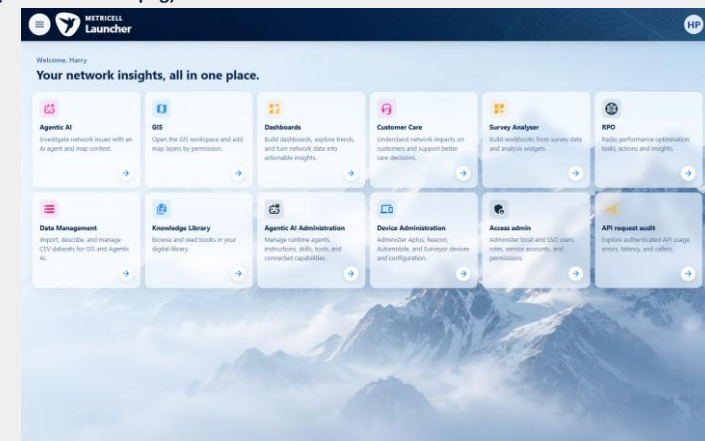

Criterion 4 evidence: Starting from the authorised V4 launcher, open API Request Audit, wait for the audit content to load, then use browser Back and verify that the launcher returns with both GIS and API Request Audit cards available.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/launcher>

E07 - Final (criterion-4-final.png)

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
