Version	Date	Revision Author	Summary of Changes
[1.0]	09/09/2026	TEST2 QA Automation	Generated from TEST2 evidence review

Tester:	Automated
Jira Ticket:	TEST2-8
Environment:	Chrome
Browser Details:	Chrome version not recorded
Date of Test:	09/09/2026
Limitations during Testing:	None recorded

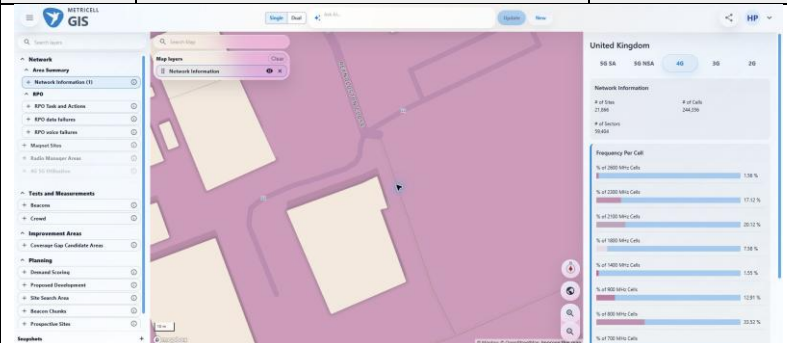

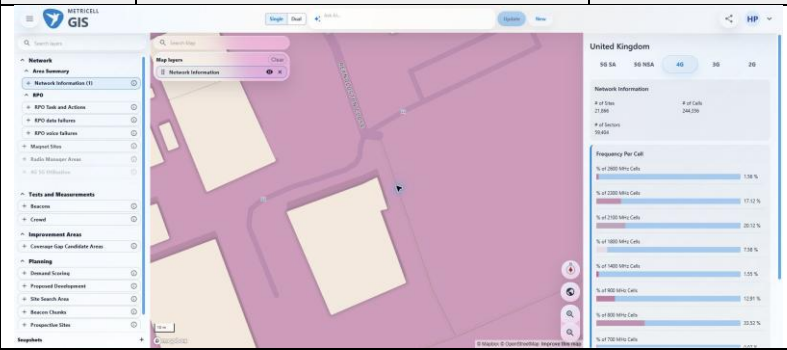

Area of test	Pass	Fail	Defects (No.)
1. Open the GIS workspace and verify that the map and its controls are visible.	Y	N	0
2. Select a coverage layer, close the layer panel, and verify that the selected coverage layer remains visible on the map.	N	Y	1
3. Change the zoom position, use another map tool, and verify that the zoom position is retained.	N	Y	1
4. Return to the default view and verify that the expected starting area is restored while the map controls remain visible.	N	Y	1

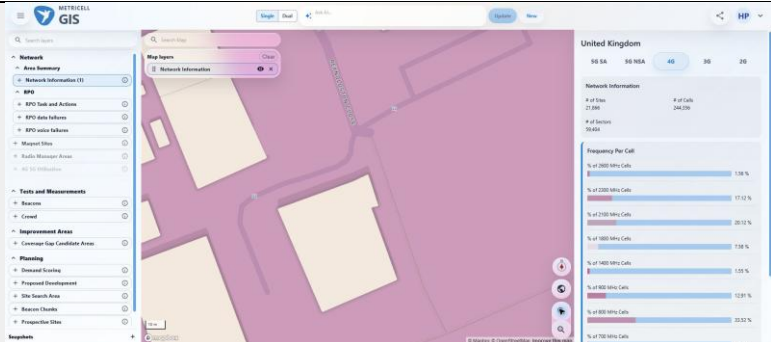

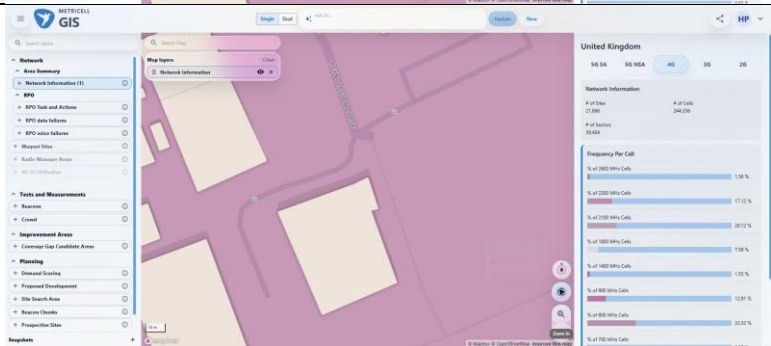

All automated tests must map to an approved criterion and produce reproducible results plus decisive evidence. Use Failed, Blocked, or Unverified where applicable.

4.1 Tests

Preconditions:	Not recorded in agent output.	Associated Requirements:	Criteria from criteria.md.	Automation Notes:	Automated browser run; PNG evidence reviewed.
-----------------------	-------------------------------	---------------------------------	----------------------------	--------------------------	---

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	Open the GIS workspace and verify that the map and its controls are visible.	Open the GIS workspace and verify that the map and its controls are visible.	criterion-1-initial.png directly shows the GIS workspace, map, layer panel, search, Single/Dual controls, and map controls. Steps taken: Reloaded the V4 GIS page; Completed the visible email sign-in step; Verified the map region, layer search, map style, zoom, reset, and layer controls were visible	Passed
				
2.0.0	Select a coverage layer, close the layer panel, and verify that the selected coverage layer remains visible on the map.	Select a coverage layer, close the layer panel, and verify that the selected	The evidence shows a selected Beacons layer and map data, but does not directly show the required coverage layer remaining visible after the layer panel is closed.	Failed

		coverage layer remains visible on the map.	Steps taken: Verified the Coverage Gap Candidate Areas layer was present in the layer list; Observed the selected coverage layer data failed to load	
				
3.0.0	Change the zoom position, use another map tool, and verify that the zoom position is retained.	Change the zoom position, use another map tool, and verify that the zoom position is retained.	The screenshots show map controls and a map-tool interaction, but do not provide decisive evidence that the zoom position changed and was retained after using another tool. Steps taken: Clicked Zoom in; Opened Map style as another map tool; Verified the map remained available and the zoom controls remained visible	Failed
				

					
					
4.0.0	<table><tr><td>Return to the default view and verify that the expected starting area is restored while the map controls remain visible.</td><td>Return to the default view and verify that the expected starting area is restored while the map controls remain visible.</td><td>The final map screenshot shows controls, but the evidence does not decisively establish that the expected starting area was restored; another captured state shows the sign-in screen. Steps taken: Clicked Reset north and flatten map; Verified map controls remained visible; Observed the active map layer/panel was Network Information rather than the original coverage layer</td><td>Failed</td></tr></table>	Return to the default view and verify that the expected starting area is restored while the map controls remain visible.	Return to the default view and verify that the expected starting area is restored while the map controls remain visible.	The final map screenshot shows controls, but the evidence does not decisively establish that the expected starting area was restored; another captured state shows the sign-in screen. Steps taken: Clicked Reset north and flatten map; Verified map controls remained visible; Observed the active map layer/panel was Network Information rather than the original coverage layer	Failed

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
