| Area of test                                                                                                                                                                            | Pass | Fail | Defects (No.) |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|------|---------------|
| 1. Starting at `https://o2intelligence-v4-dev.metricell.com/launcher`, with the V4 launcher displayed and the user signed in if prompted, select the <b>**API Request Audit**</b> card. | Y    | N    | 0             |
| 2. After the first card selection, verify that the API Request Audit module is displayed on the `o2intelligence-v4-dev.metricell.com` V4 host and no application load error is shown.   | Y    | N    | 0             |
| 3. From the first API Request Audit module view, use the browser Back control and verify that the V4 launcher is displayed again.                                                       | Y    | N    | 0             |

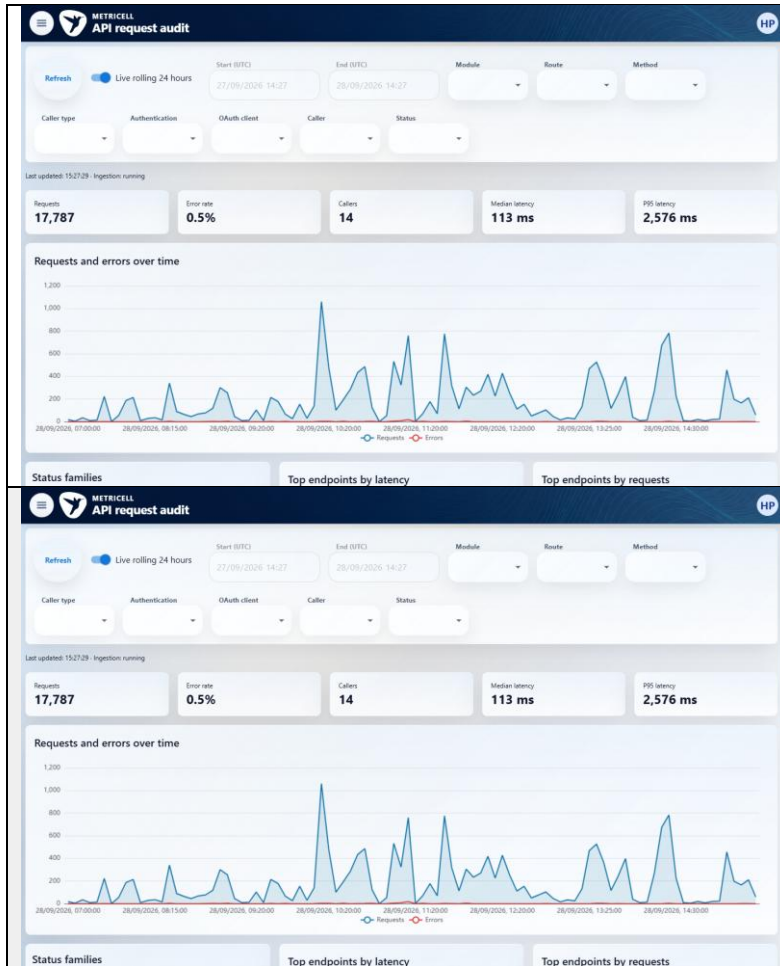

|                                                                                                                                                                                              |   |   |   |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|---|---|
| 4. From the restored V4 launcher, select the <b>**API Request Audit**</b> card a second time during the same browser session.                                                                | Y | N | 0 |
| 5. After the second card selection, verify that the API Request Audit module is displayed again on the `o2intelligence-v4-dev.metricell.com` V4 host and no application load error is shown. | Y | N | 0 |
| 6. Across the two module openings, verify that the browser URLs identify the same V4 host and that the intermediate launcher view is visible between the openings.                           | Y | N | 0 |
| 7. During this flow, verify that no audit data is created or modified.                                                                                                                       | N | Y | 1 |

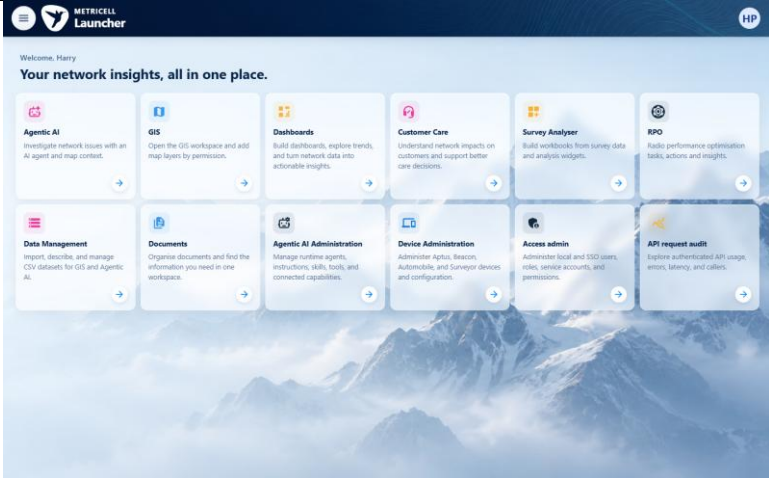

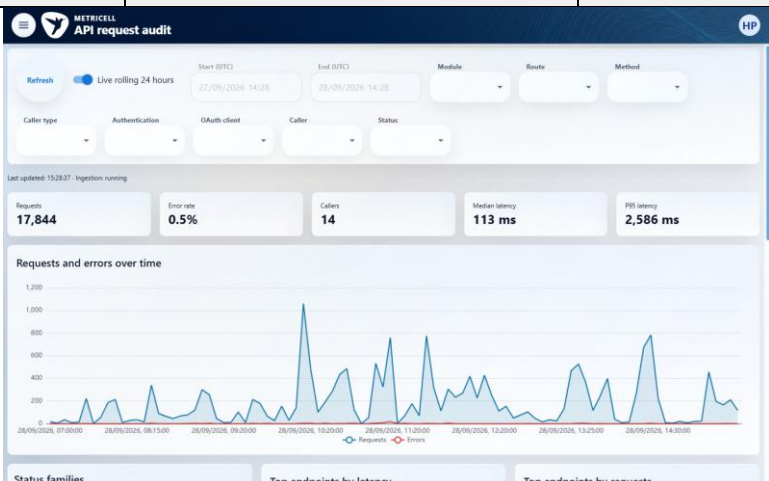

All automated tests must map to an approved criterion and produce reproducible results plus decisive evidence. Use Failed, Blocked, or Unverified where applicable.

## 4.1 Tests

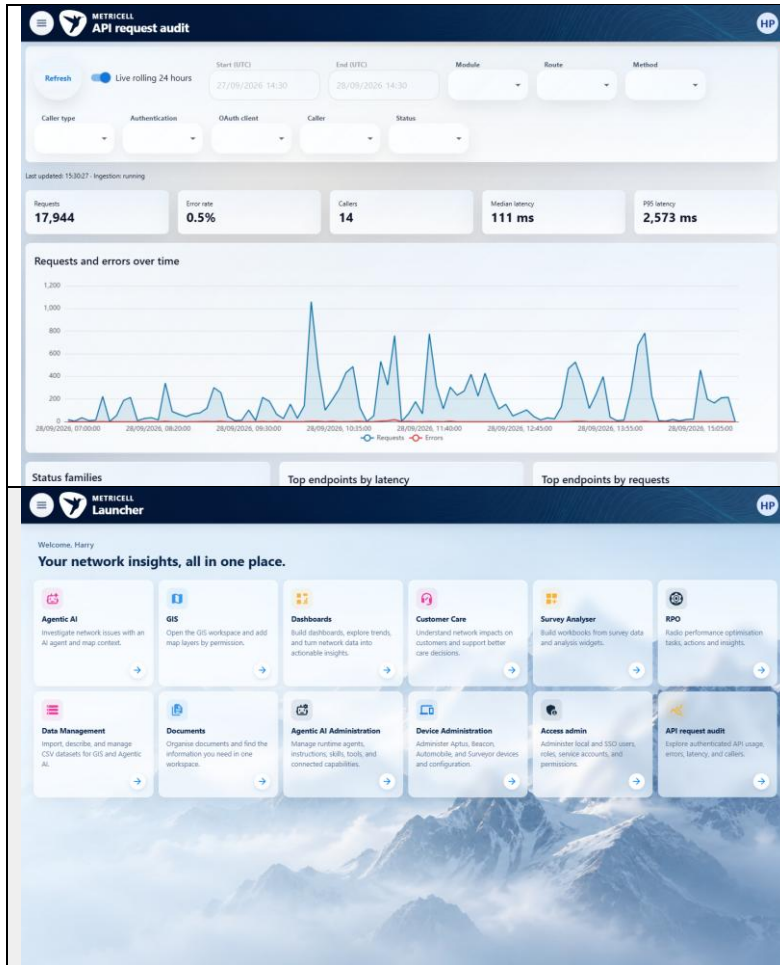

|                       |                               |                                 |                            |                          |                                               |
|-----------------------|-------------------------------|---------------------------------|----------------------------|--------------------------|-----------------------------------------------|
| <b>Preconditions:</b> | Not recorded in agent output. | <b>Associated Requirements:</b> | Criteria from criteria.md. | <b>Automation Notes:</b> | Automated browser run; PNG evidence reviewed. |

| 6.0.0                                                                             | Across the two module openings, verify that the browser URLs identify the same V4 host and that the intermediate launcher view is visible between the openings. | Across the two module openings, verify that the browser URLs identify the same V4 host and that the intermediate launcher view is visible between the openings. | The selected attempt screenshots show both audit module views with the launcher between them; the result browserUrls for both module views and the intermediate launcher use the same expected V4 host. Steps taken: Opened the module from the V4 launcher and recorded its URL.; Used browser Back and captured the intermediate launcher.; Selected the card again and recorded the second module URL. | Passed |

7.0.0

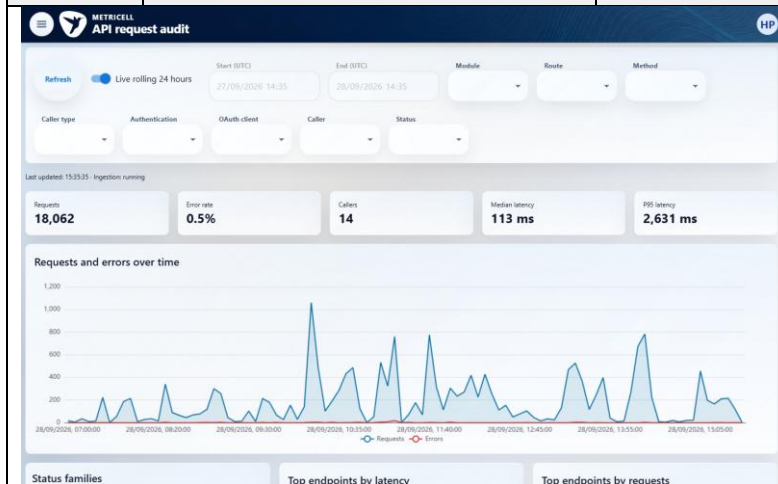

During this flow, verify that no audit data is created or modified.

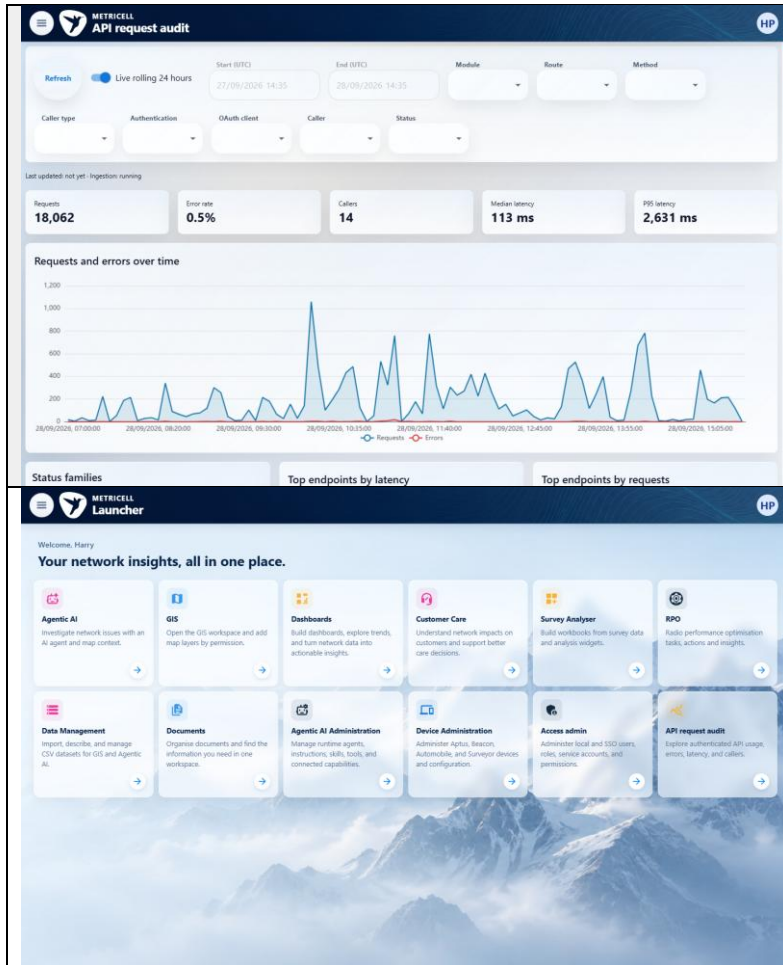

During this flow, verify that no audit data is created or modified.

The screenshots show live request totals changing while ingestion is running. They cannot establish whether the changes came from this test or background traffic, so data immutability cannot be confirmed.

Steps taken: Opened API Request Audit from the launcher.; Viewed the module without changing filters, selecting records, or using data-editing controls.

Failed

## About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
