About Metricell11

Version	Date	Revision Author	Summary of Changes
[1.0]	10/09/2026	TEST2 QA Automation	Generated from TEST2 evidence review

Tester:	Automated
Jira Ticket:	TEST2-7
Environment:	Chrome
Browser Details:	Chrome version not recorded
Date of Test:	10/09/2026
Limitations during Testing:	None recorded

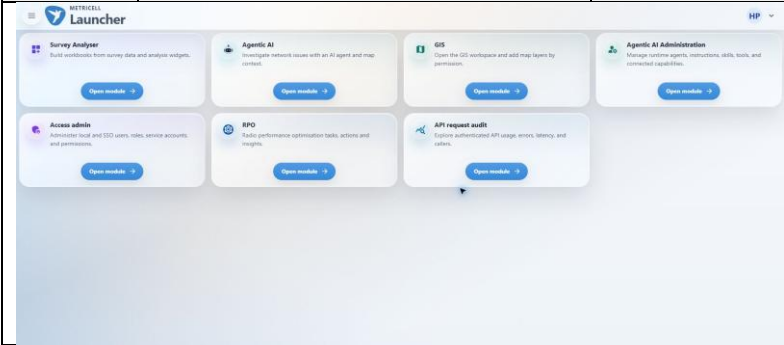

Area of test	Pass	Fail	Defects (No.)
1. Open GIS from the V4 launcher; the GIS workspace loads with the map and its controls visible.	Y	N	0
2. Open the map layer control and enable an available coverage or network layer; the selected layer becomes visible on the map.	Y	N	0
3. Use the zoom-in control; the map visibly changes scale while remaining centred on the current area.	Y	N	0
4. Use the reset map view control; the map returns to its default view and the GIS controls remain usable.	Y	N	0

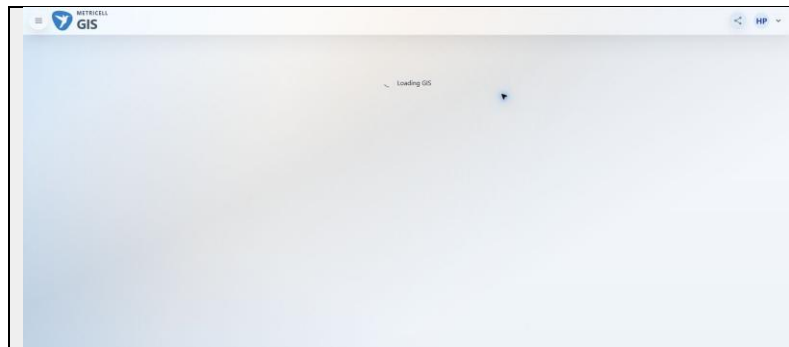

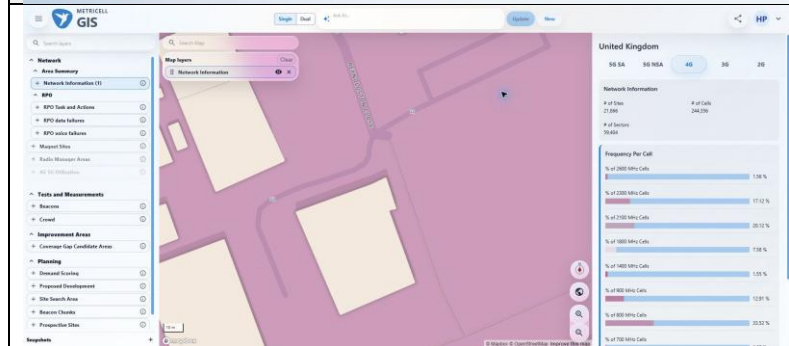

5. Open the map style control and select another available style; the map appearance changes and the style control remains available for further use.	Y	N	0
---	---	---	---

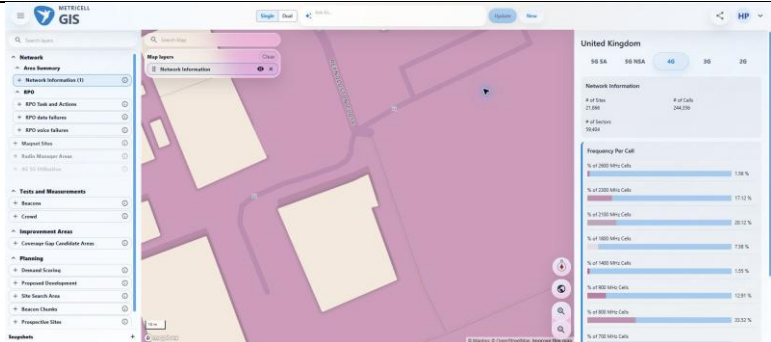

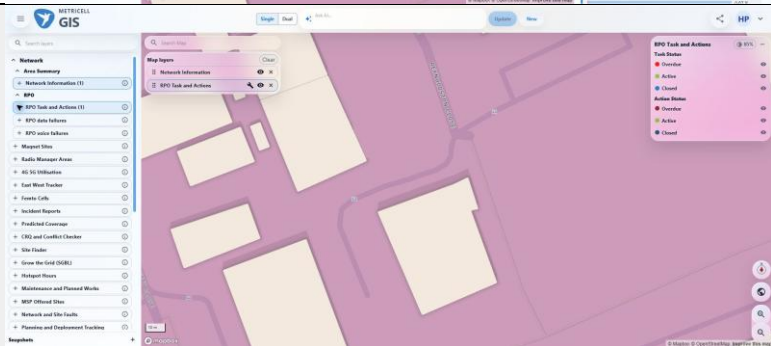

All automated tests must map to an approved criterion and produce reproducible results plus decisive evidence. Use Failed, Blocked, or Unverified where applicable.

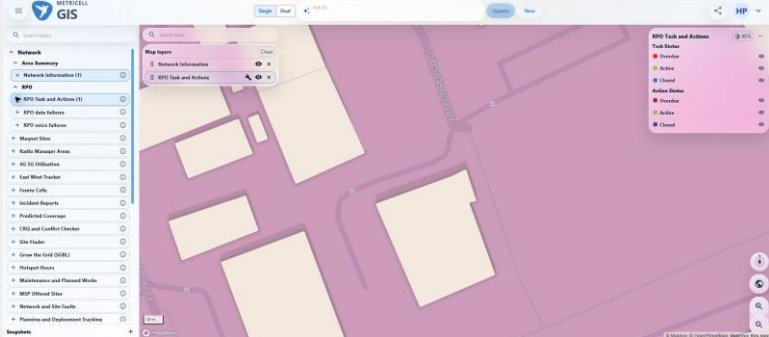

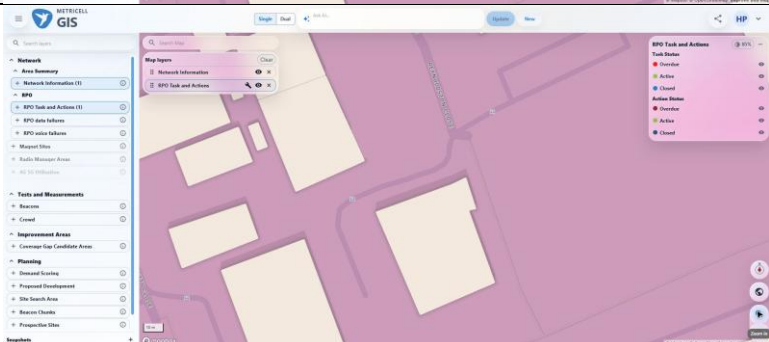

4.1 Tests

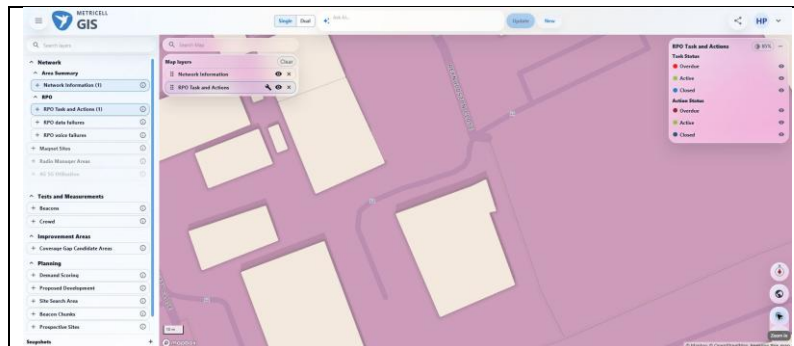

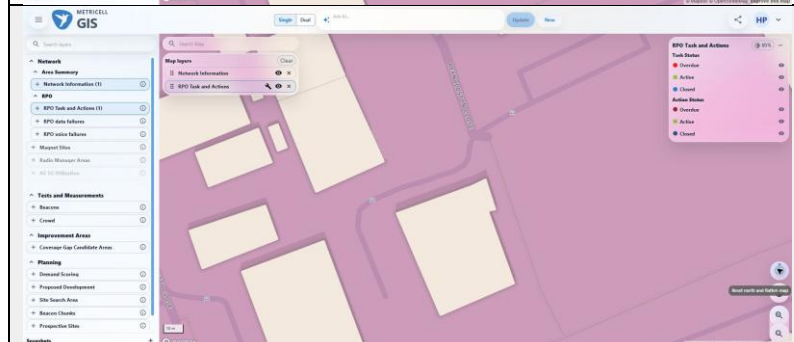

Preconditions:	Not recorded in agent output.	Associated Requirements:	Criteria from criteria.md.	Automation Notes:	Automated browser run; PNG evidence reviewed.
----------------	-------------------------------	--------------------------	----------------------------	-------------------	---

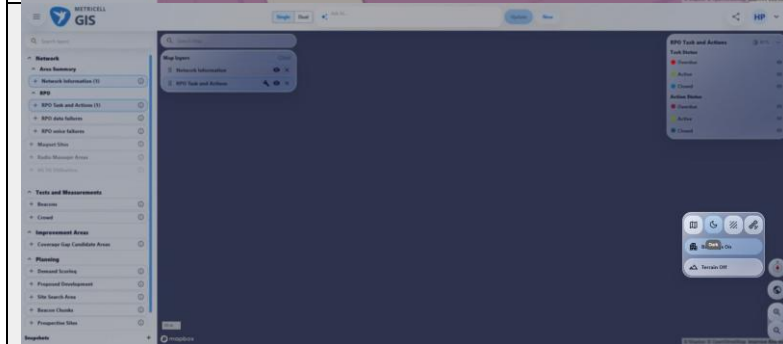

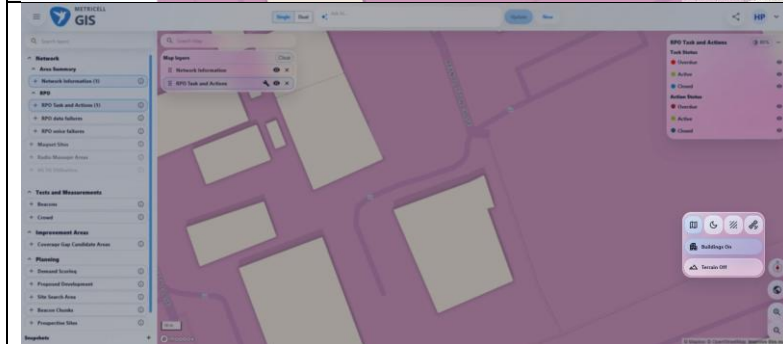

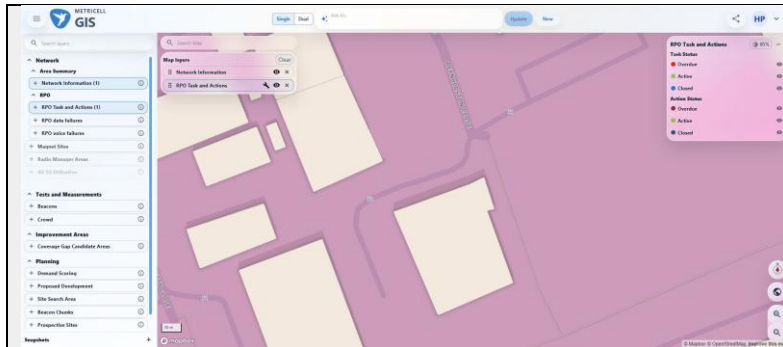

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	Open GIS from the V4 launcher; the GIS workspace loads with the map and its controls visible.	Open GIS from the V4 launcher; the GIS workspace loads with the map and its controls visible.	Direct screenshot evidence from attempt-003 shows the launcher and the loaded GIS workspace with map controls visible. Steps taken: Reloaded the V4 launcher; Captured the visible launcher; Clicked the GIS module Open module control; Waited for the GIS workspace to load	Passed
				

				
				
2.0.0	Open the map layer control and enable an available coverage or network layer; the selected layer becomes visible on the map.	Open the map layer control and enable an available coverage or network layer; the selected layer becomes visible on the map.	Direct before/after screenshots from attempt-003 show the RPO Task and Actions layer enabled and visible with its legend. Steps taken: Captured the GIS baseline; Clicked Add layer for RPO Task and Actions; Verified the selected layer and legend became visible	Passed

				
				
3.0.0	Use the zoom-in control; the map visibly changes scale while remaining centred on the current area.	Use the zoom-in control; the map visibly changes scale while remaining centred on the current area.	Direct before/after screenshots from attempt-003 show the map scale changing while the GIS workspace and control remain available. Steps taken: Captured the pre-zoom map; Clicked Zoom in; Verified the map remained in the current GIS workspace and the control stayed available	Passed

				
				
4.0.0	Use the reset map view control; the map returns to its default view and the GIS controls remain usable.	Use the reset map view control; the map returns to its default view and the GIS controls remain usable.	Direct before/after screenshots from attempt-003 show reset-map interaction and retained GIS controls. Steps taken: Captured the pre-reset map; Clicked Reset north and flatten map; Verified GIS controls remained available	Passed

				
				
5.0.0	Open the map style control and select another available style; the map appearance changes and the style control remains available for further use.	Open the map style control and select another available style; the map appearance changes and the style control remains available for further use.	Direct screenshots from attempt-003 show the style options and the changed Dark map appearance. Steps taken: Opened Map style; Captured the available styles; Selected Dark; Verified Dark was selected; Restored Street	Passed

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
