Version	Date	Revision Author	Summary of Changes
[1.0]	25/09/2026	TEST2 QA Automation	Generated from TEST2 evidence review

Tester:	Automated
Jira Ticket:	TEST2-33
Environment:	Chrome
Browser Details:	Chrome version not recorded
Date of Test:	25/09/2026
Limitations during Testing:	None recorded

Area of test	Pass	Fail	Defects (No.)
1. Starting at the V4 launcher, after signing in if prompted, opening GIS, and waiting for the base map to finish loading, the map displays visible zoom-in (+) and zoom-out (-) controls that can be selected.	N	Y	1
2. With the loaded GIS map at its initial zoom level, selecting the zoom-in (+) control once increases the zoom level and visibly shows a smaller geographic area without an application error.	Y	N	0
3. After zooming in once, selecting the zoom-out (-) control once decreases the zoom level	Y	N	0

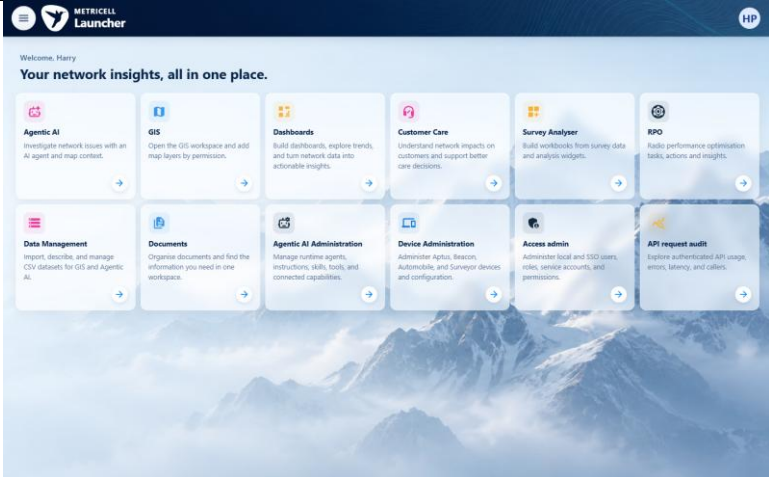

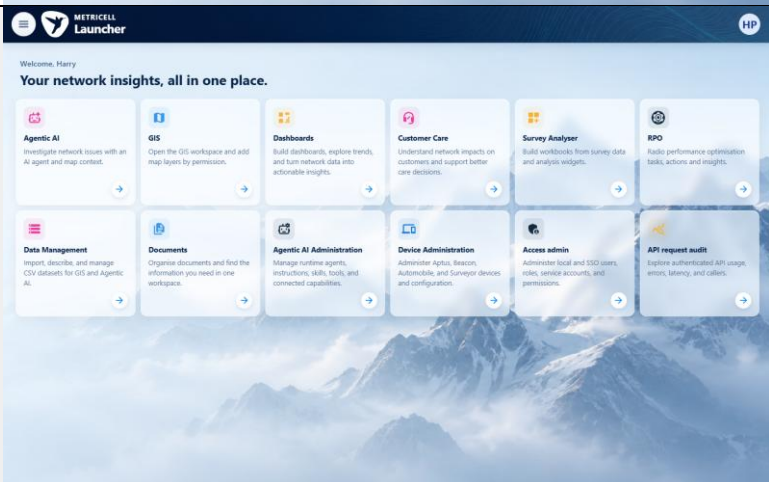

and visibly shows a larger geographic area without an application error.			
---	--	--	--

All automated tests must map to an approved criterion and produce reproducible results plus decisive evidence. Use Failed, Blocked, or Unverified where applicable.

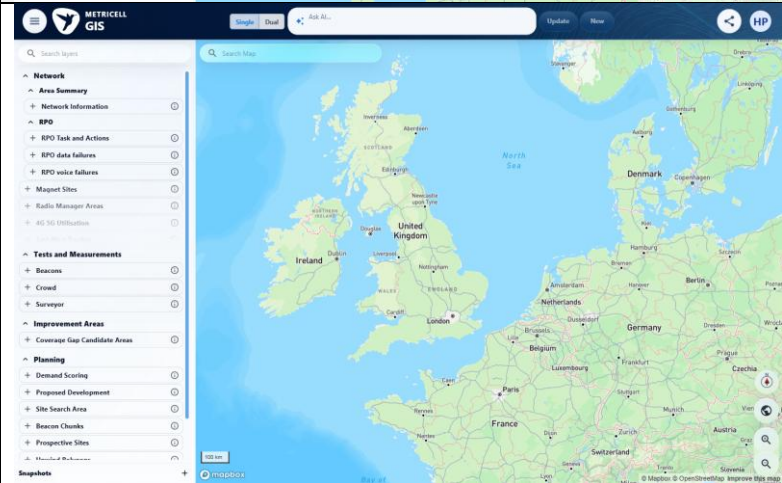

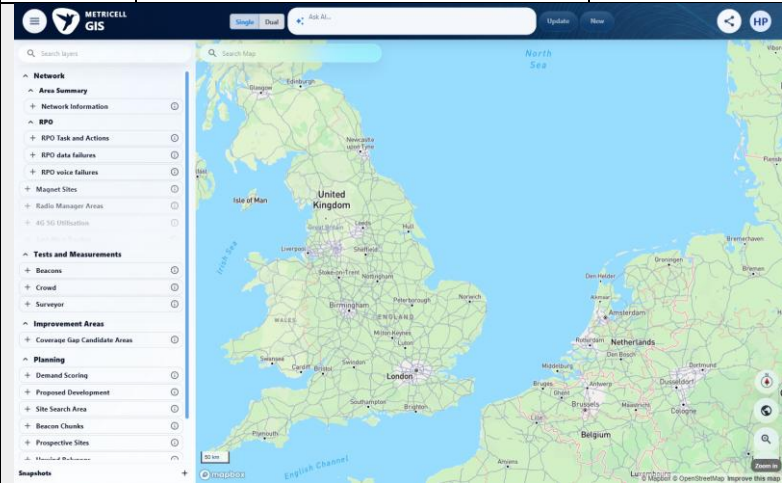

4.1 Tests

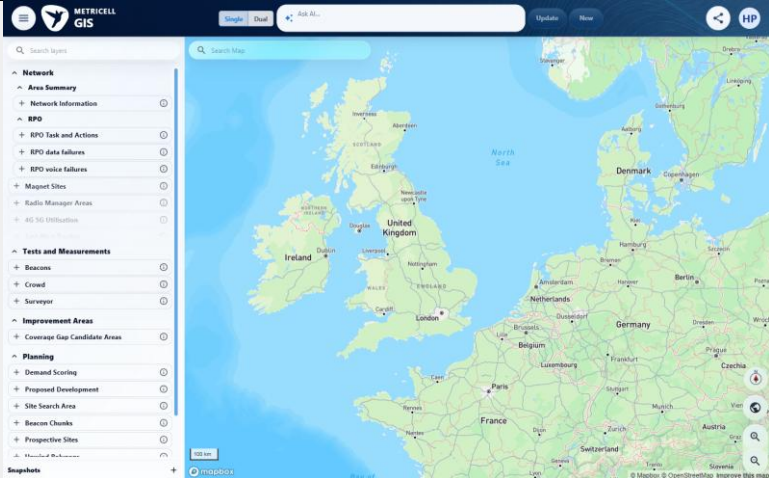

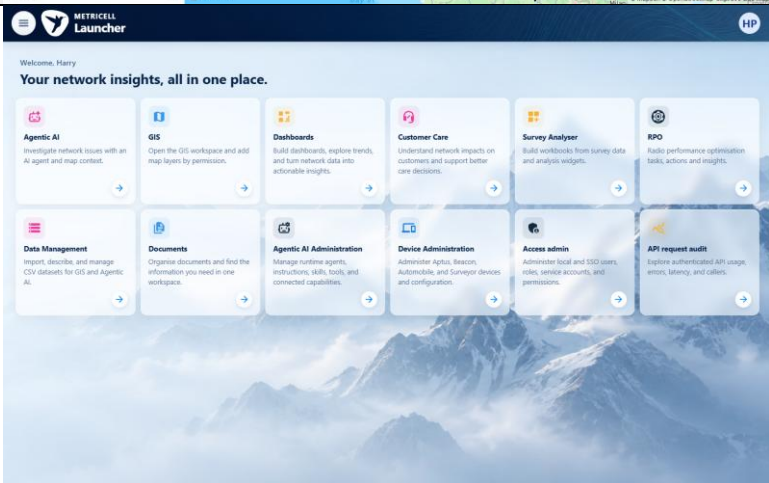

Preconditions:	Not recorded in agent output.	Associated Requirements:	Criteria from criteria.md.	Automation Notes:	Automated browser run; PNG evidence reviewed.

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	Starting at the V4 launcher, after signing in if prompted, opening GIS, and waiting for the base map to finish loading, the map displays visible zoom-in (+) and zoom-out (-) controls that can be selected.	Starting at the V4 launcher, after signing in if prompted, opening GIS, and waiting for the base map to finish loading, the map displays visible zoom-in (+) and zoom-out (-) controls that can be selected.	The required PNGs exist and browserUrl is on the expected V4 host, but both criterion-specific screenshots show the launcher; neither directly shows the GIS zoom controls after opening GIS. Steps taken: Navigated to the required launcher URL.; Entered harry.piper@metricell.com in the visible email field and clicked Continue once; the launcher loaded.; Opened GIS from the launcher, waited for the map to load, and observed visible Zoom in and Zoom out controls.; Returned to the launcher after completing the criterion.	Failed

				
				
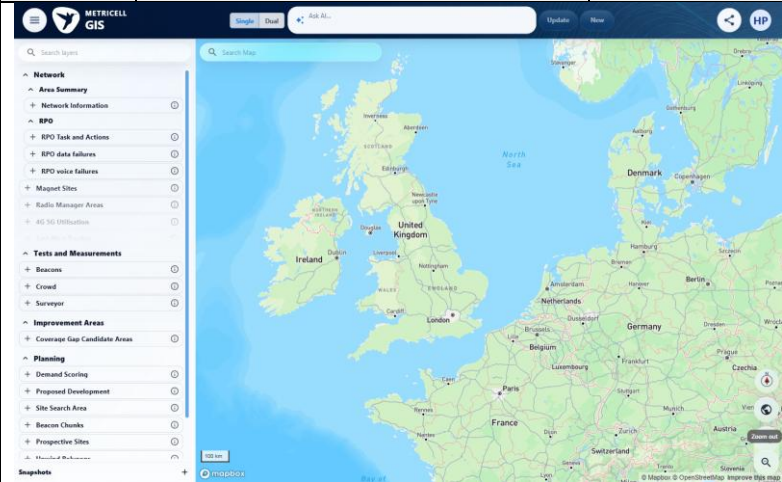

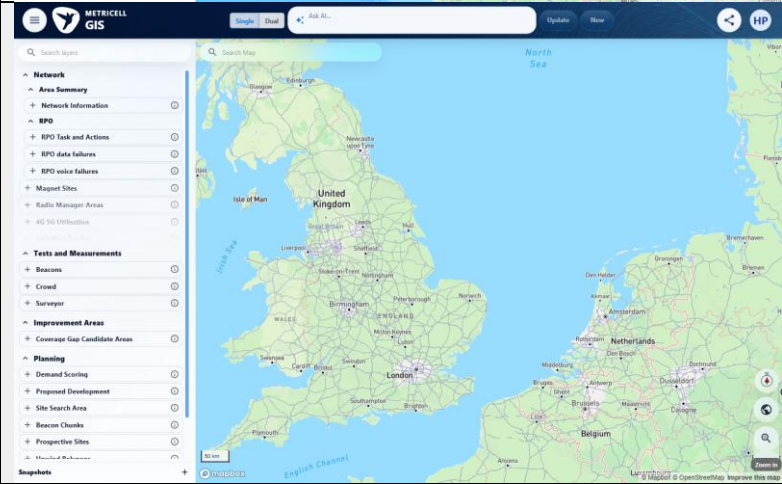

2.0.0	With the loaded GIS map at its initial zoom level, selecting the zoom-in (+) control once increases the zoom level and visibly shows a smaller geographic area without an application error.	With the loaded GIS map at its initial zoom level, selecting the zoom-in (+) control once increases the zoom level and visibly shows a smaller geographic area without an application error.	The before and after screenshots show the map scale changing from 100 km to 50 km, with the zoom-in control visible and no application error shown. Steps taken: Started at the launcher and saved criterion-specific initial evidence.; Opened GIS and waited for the base map to load; initial map scale was 100 km at zoom 4.63.; Saved evidence immediately before selecting Zoom	Passed

			in, selected it once, and saved evidence immediately after.; Observed the scale change to 50 km and zoom to 5.63 with no application error.	
--	--	--	---	--

				
				
3.0.0	After zooming in once, selecting the zoom-out (-) control once decreases the zoom level and visibly shows a larger geographic area without an application error.	After zooming in once, selecting the zoom-out (-) control once decreases the zoom level and visibly shows a larger geographic area without an application error.	The before and after screenshots show the map scale changing from 50 km to 100 km after zoom-out, with no application error shown. Steps taken: Started at the launcher and saved criterion-specific initial evidence.; Opened GIS and waited for the base map to load at 100 km and zoom 4.63.; Selected Zoom in once to establish the required preceding state, then	Passed

			saved evidence before selecting Zoom out.; Selected Zoom out once and saved evidence immediately after; observed return to 100 km and zoom 4.63 without an application error.

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
