| ID / Criterion | Criteria Tested                        | Expected Result                        | Actual Result / Evidence Path                                                                                                                                                                                                                                                                                                                                                                                                                                       | Outcome |
|----------------|----------------------------------------|----------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 1.0.0          | GIS screen can be opened from launcher | GIS screen can be opened from launcher | Direct screenshot evidence from attempt-005 shows the Metricell Launcher with the GIS module and the resulting GIS workspace with map visible after opening GIS.<br>Steps taken: Navigated to the V4 launcher and waited for it to finish loading.; Captured the launcher initial state.; Captured the state immediately before opening GIS.; Clicked the visible GIS Open module control.; Waited for GIS to finish loading and captured the resulting GIS screen. | Passed  |

## About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
