About Metricell18

Version	Date	Revision Author	Summary of Changes
[1.0]	30/09/2026	TEST2 QA Automation	Generated from TEST2 evidence review

Tester:	Automated
Jira Ticket:	TEST2-45
Environment:	Chrome
Browser Details:	Chrome version not recorded
Date of Test:	30/09/2026
Limitations during Testing:	None recorded

Area of test	Pass	Fail	Defects (No.)
1. Starting from the V4 GIS layer selector while signed in as an authorised user, expand the layer group list and verify that the Surveyor group is positioned immediately beneath Tests and Measurements.	N	Y	1
2. With the Surveyor group expanded, verify that a Data Experience layer entry is displayed.	N	Y	1
3. With the Surveyor group expanded, verify that a Ping layer entry is displayed.	N	Y	1
4. With the Surveyor group expanded, verify that a Service layer entry is displayed.	N	Y	1

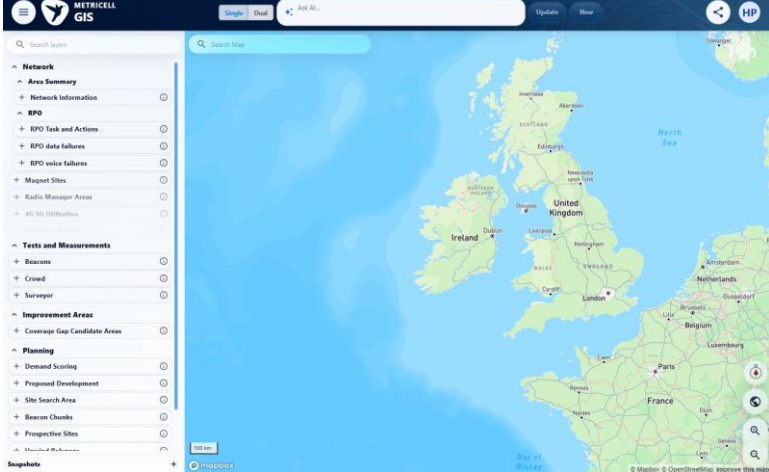

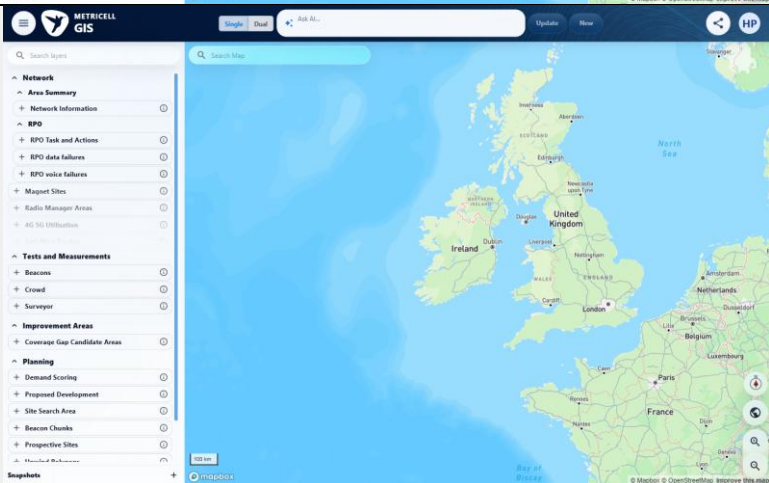

5. With the Surveyor group expanded, verify that a Building layer entry is displayed.	N	Y	1
6. With the Surveyor group expanded, verify that a Download layer entry is displayed.	N	Y	1
7. With the Surveyor group expanded, verify that an Upload layer entry is displayed.	N	Y	1
8. With the Surveyor group expanded, verify that a Site Testing layer entry is displayed.	N	Y	1
9. With the Surveyor group expanded, verify that a Call layer entry is displayed.	N	Y	1
10. For each displayed Surveyor layer entry, select the entry and verify that the GIS layer selector accepts the selection.	N	Y	1
11. Using a signed-in account without access to a Surveyor layer, open the V4 GIS layer selector and verify that the unavailable layer is not displayed.	N	N	0
12. With the Surveyor group expanded, verify that User, Browsing, and YouTube layer entries are not displayed.	N	Y	1

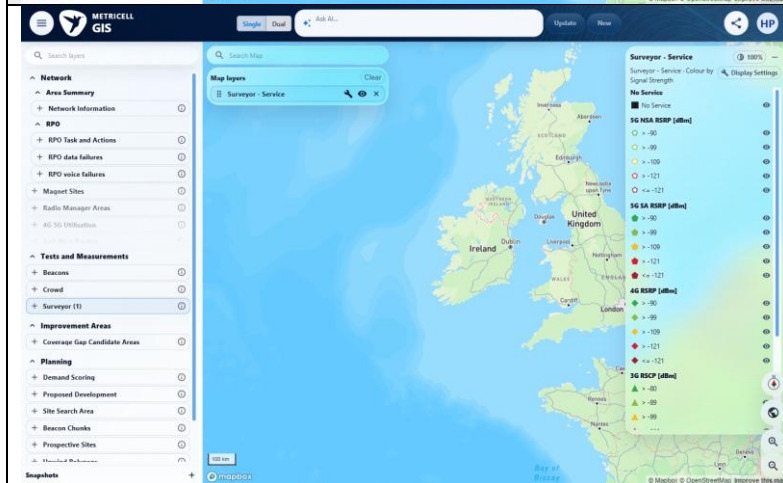

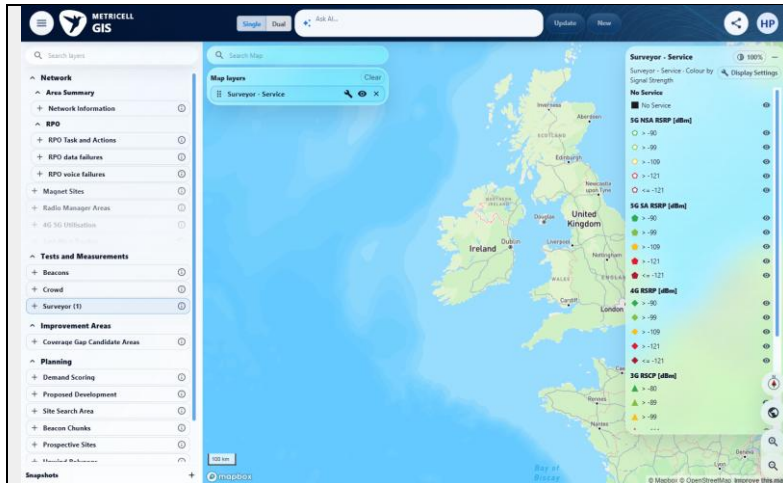

All automated tests must map to an approved criterion and produce reproducible results plus decisive evidence. Use Failed, Blocked, or Unverified where applicable.

4.1 Tests

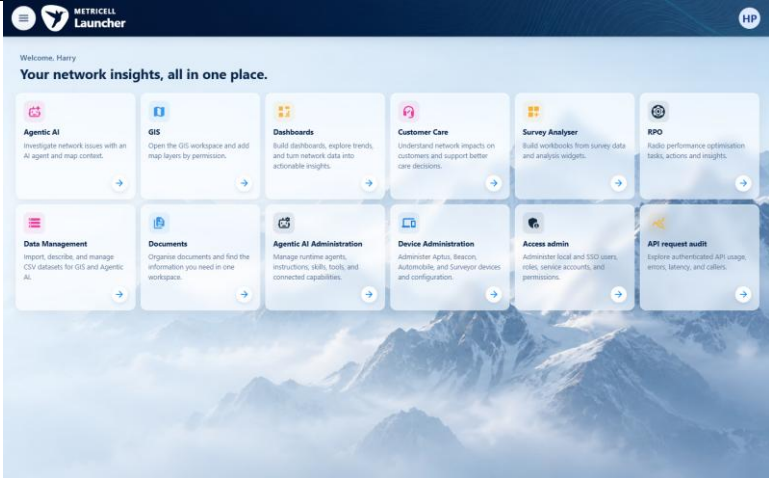

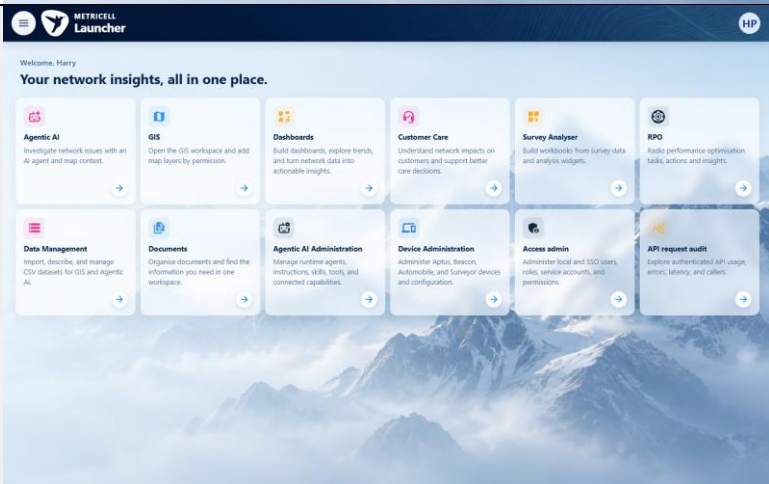

Preconditions:	Not recorded in agent output.	Associated Requirements:	Criteria from criteria.md.	Automation Notes:	Automated browser run; PNG evidence reviewed.
-----------------------	-------------------------------	---------------------------------	----------------------------	--------------------------	---

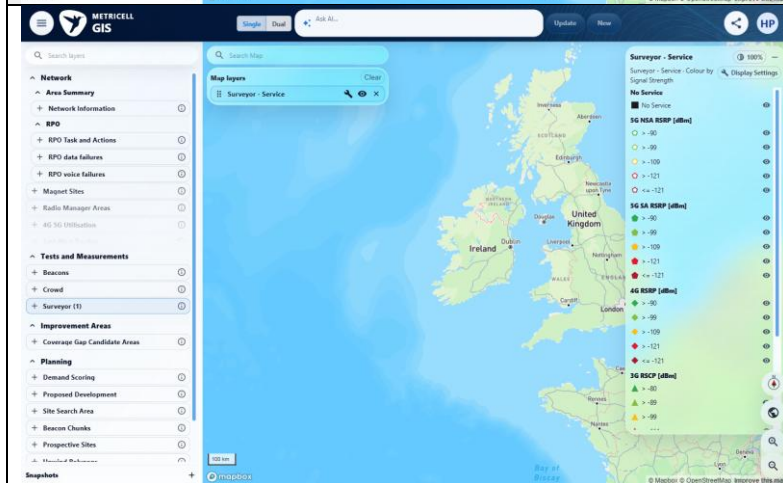

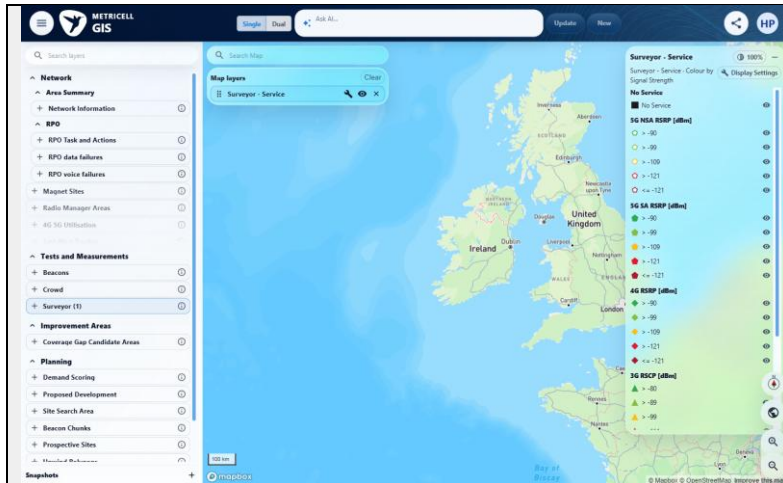

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	Starting from the V4 GIS layer selector while signed in as an authorised user, expand the layer group list and verify that the Surveyor group is positioned immediately beneath Tests and Measurements.	Starting from the V4 GIS layer selector while signed in as an authorised user, expand the layer group list and verify that the Surveyor group is positioned immediately beneath Tests and Measurements.	The GIS view shows Surveyor as an item nested within Tests and Measurements; available evidence does not establish that it is a separate group positioned immediately beneath that group. Steps taken: Navigated to the V4 launcher, opened GIS, and inspected the visible layer catalogue.	Failed

				
				
2.0.0	With the Surveyor group expanded, verify that a Data Experience layer entry is displayed.	With the Surveyor group expanded, verify that a Data Experience layer entry is displayed.	The current signed-in GIS catalogue does not provide conclusive criterion-specific evidence with the Surveyor group expanded. The live test data/session may not match the requested catalogue; this is not evidence of a product failure. Steps taken: Navigated to the V4 launcher, opened GIS, and inspected the visible layer catalogue.	Failed

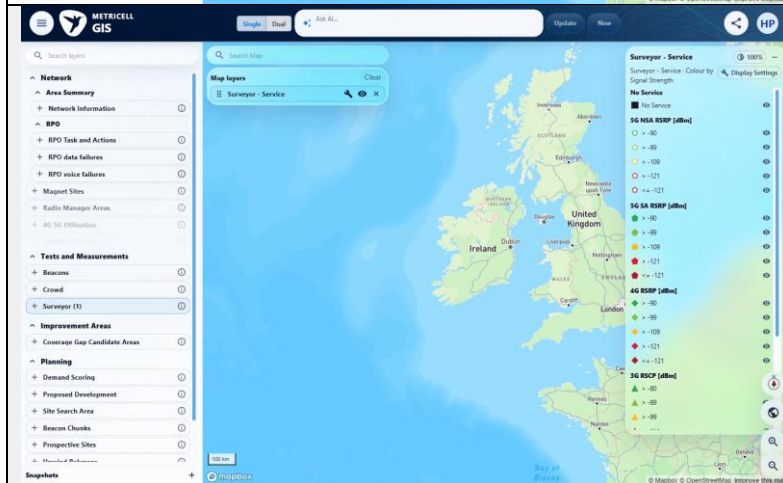

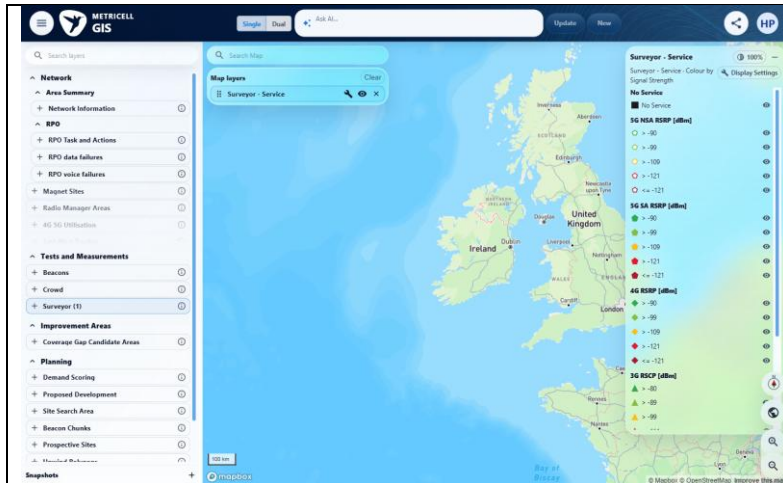

3.0.0	With the Surveyor group expanded, verify that a Ping layer entry is displayed.	With the Surveyor group expanded, verify that a Ping layer entry is displayed.	The current signed-in GIS catalogue does not provide conclusive criterion-specific evidence with the Surveyor group expanded. The live test data/session may not match the requested catalogue; this is not evidence of a product failure. Steps taken: Navigated to the V4 launcher, opened GIS, and inspected the visible layer catalogue.	Failed
-------	--	--	---	--------

				
				
4.0.0	With the Surveyor group expanded, verify that a Service layer entry is displayed.	With the Surveyor group expanded, verify that a Service layer entry is displayed.	The current signed-in GIS catalogue does not provide conclusive criterion-specific evidence with the Surveyor group expanded. The live test data/session may not match the requested catalogue; this is not evidence of a product failure. Steps taken: Navigated to the V4 launcher, opened GIS, and inspected the visible layer catalogue.	Failed

5.0.0	With the Surveyor group expanded, verify that a Building layer entry is displayed.	With the Surveyor group expanded, verify that a Building layer entry is displayed.	The current signed-in GIS catalogue does not provide conclusive criterion-specific evidence with the Surveyor group expanded. The live test data/session may not match the requested catalogue; this is not evidence of a product failure. Steps taken: Navigated to the V4 launcher, opened GIS, and inspected the visible layer catalogue.	Failed
-------	--	--	---	--------

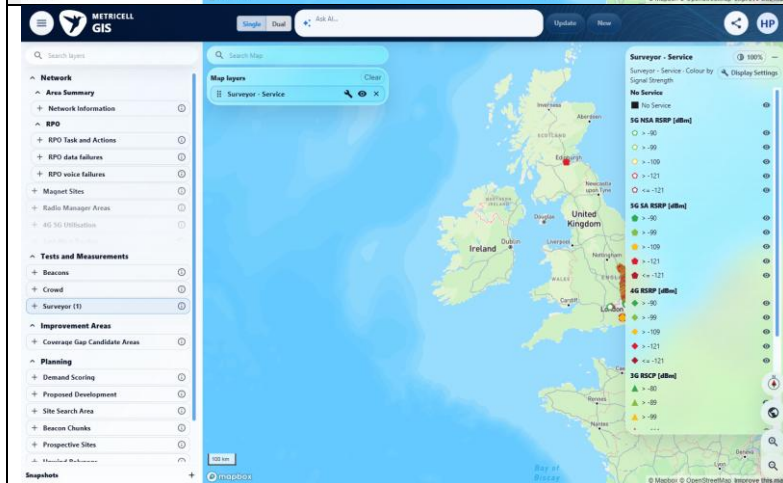

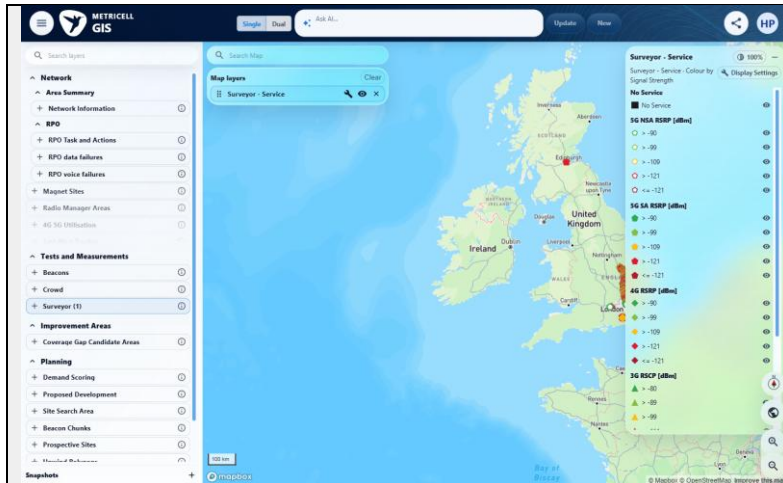

6.0.0

With the Surveyor group expanded, verify that a Download layer entry is displayed.

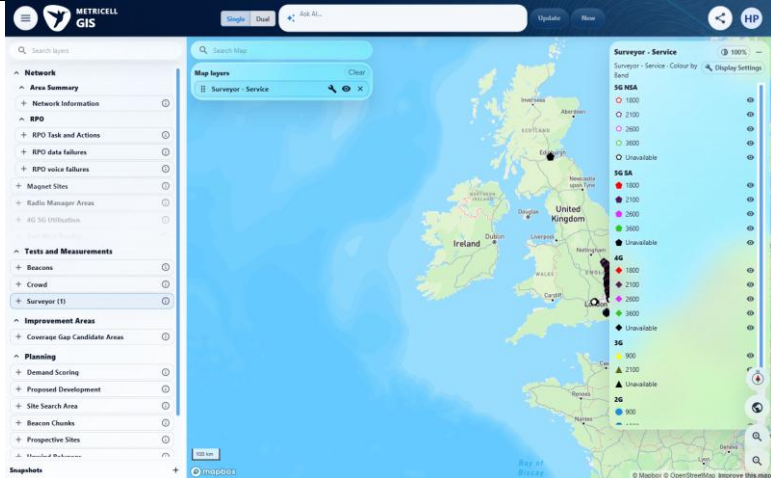

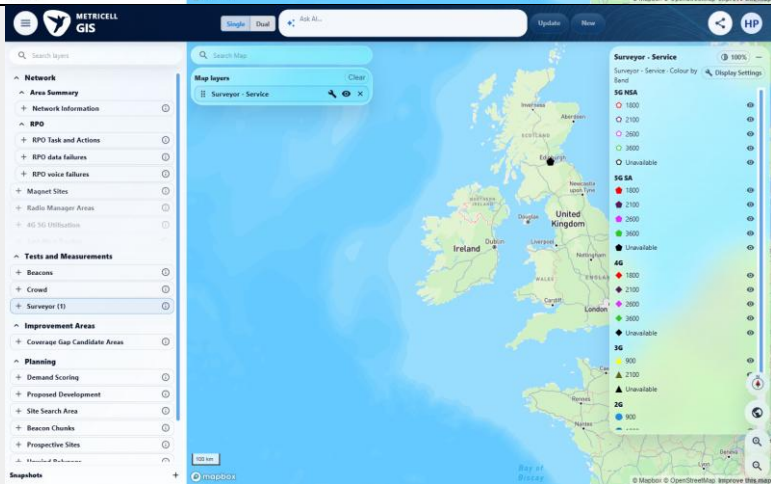

With the Surveyor group expanded, verify that a Download layer entry is displayed.

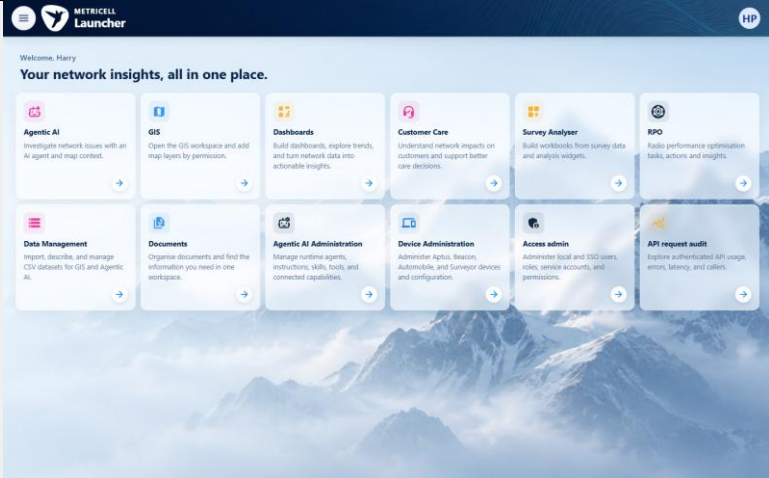

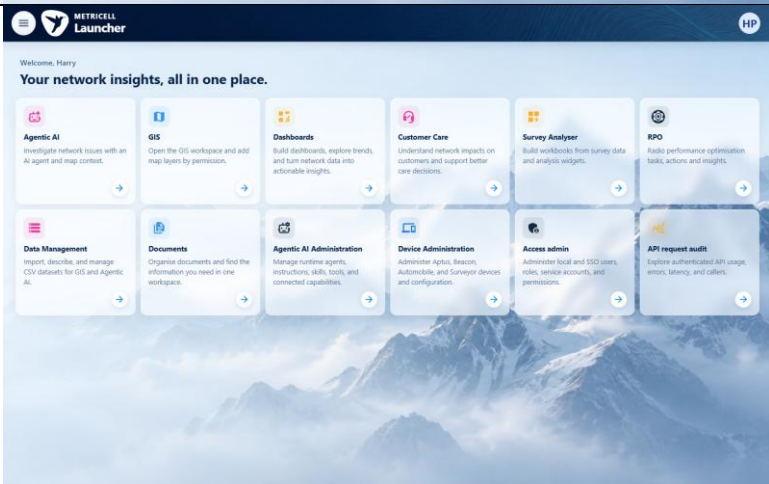

The current signed-in GIS catalogue does not provide conclusive criterion-specific evidence with the Surveyor group expanded. The live test data/session may not match the requested catalogue; this is not evidence of a product failure.
Steps taken: Navigated to the V4 launcher, opened GIS, and inspected the visible layer catalogue.

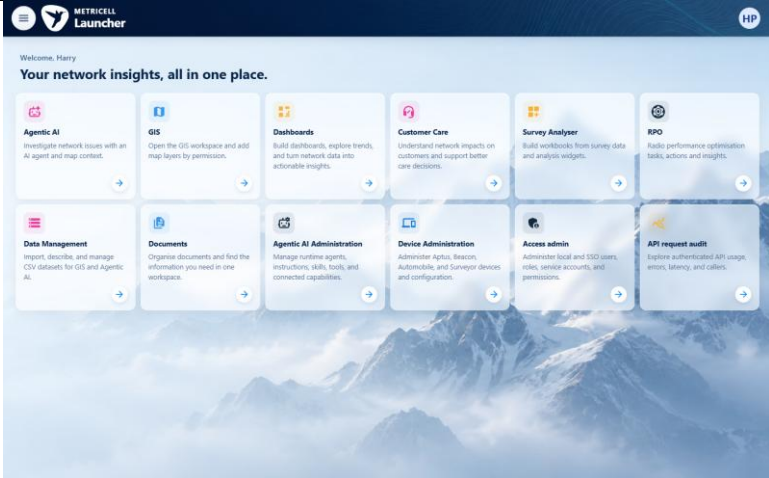

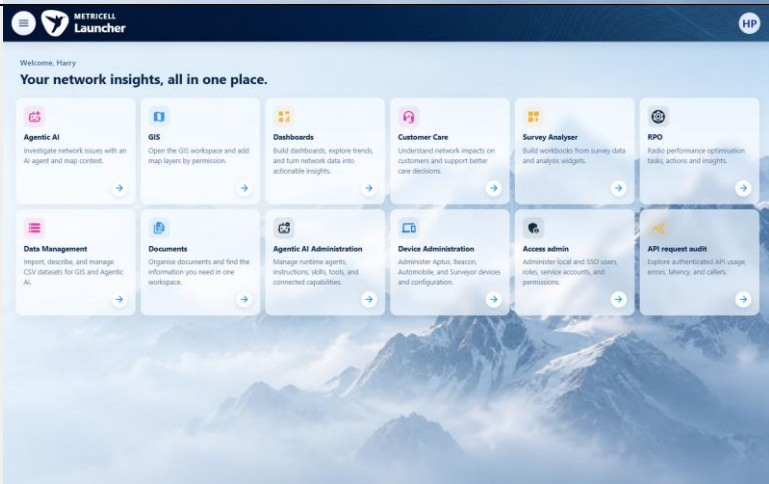

Failed

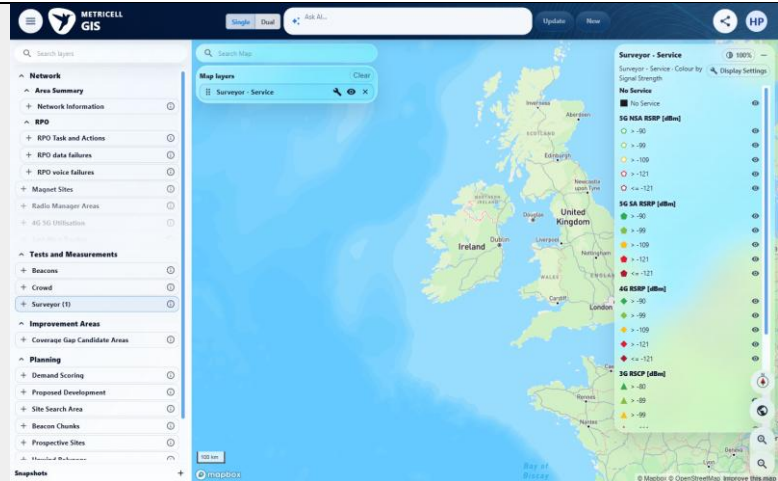

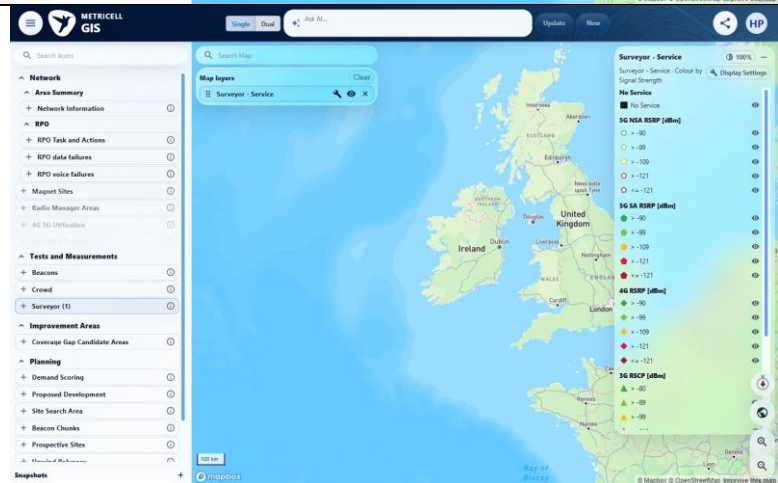

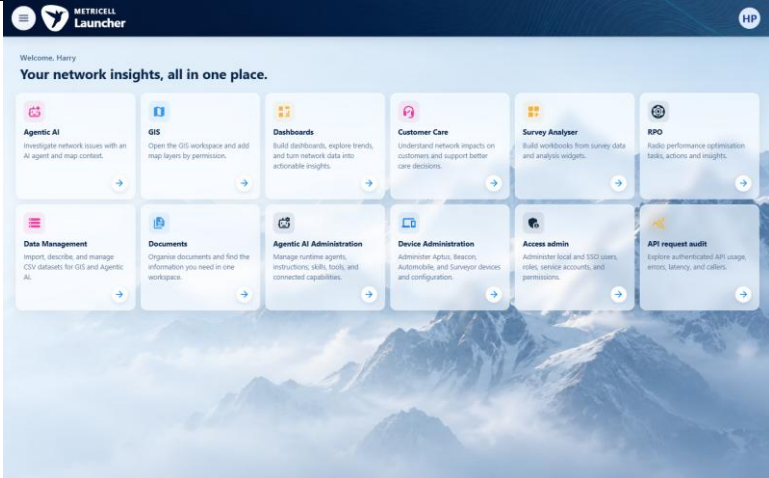

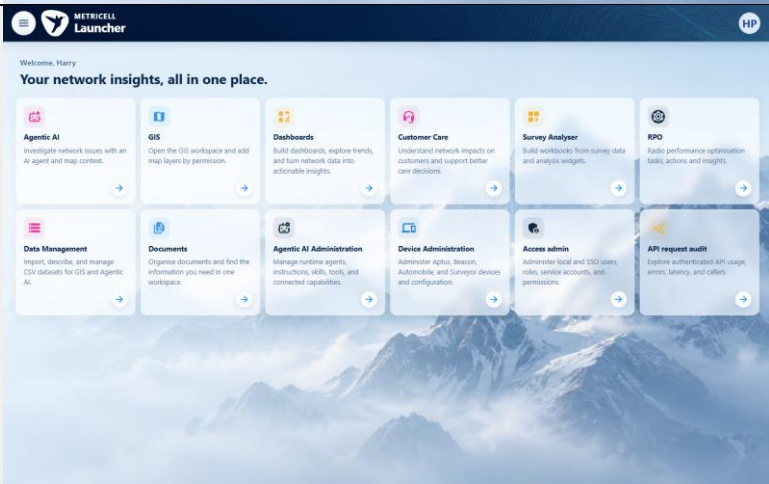

7.0.0	With the Surveyor group expanded, verify that an Upload layer entry is displayed.	With the Surveyor group expanded, verify that an Upload layer entry is displayed.	The current signed-in GIS catalogue does not provide conclusive criterion-specific evidence with the Surveyor group expanded. The live test data/session may not match the requested catalogue; this is not evidence of a product failure. Steps taken: Navigated to the V4 launcher, opened GIS, and inspected the visible layer catalogue.	Failed
-------	---	---	---	--------

				
				
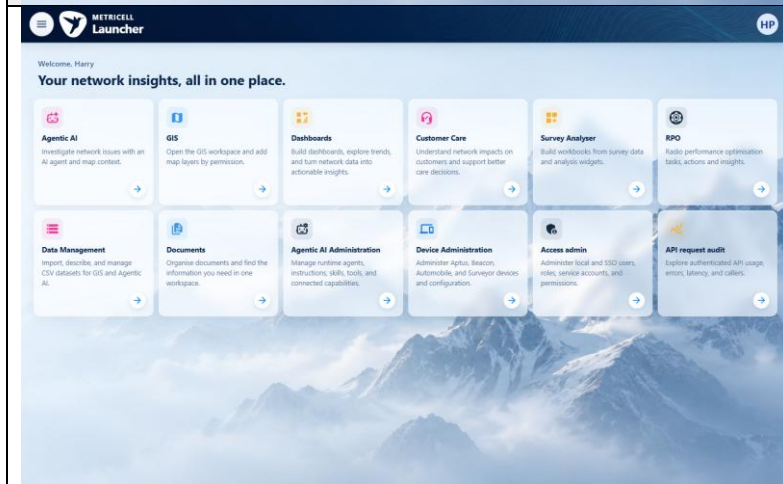

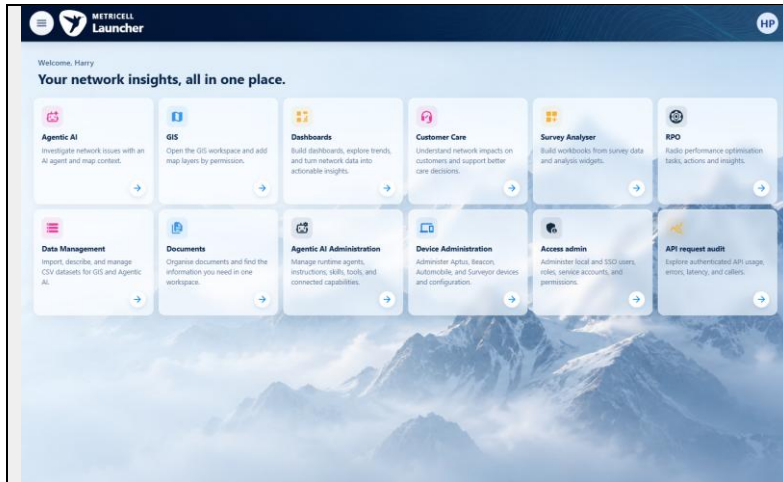

8.0.0	With the Surveyor group expanded, verify that a Site Testing layer entry is displayed.	With the Surveyor group expanded, verify that a Site Testing layer entry is displayed.	The current signed-in GIS catalogue does not provide conclusive criterion-specific evidence with the Surveyor group expanded. The live test data/session may not match the requested catalogue; this is not evidence of a product failure. Steps taken: Navigated to the V4 launcher, opened GIS, and inspected the visible layer catalogue.	Failed

				
				
9.0.0	With the Surveyor group expanded, verify that a Call layer entry is displayed.	With the Surveyor group expanded, verify that a Call layer entry is displayed.	The current signed-in GIS catalogue does not provide conclusive criterion-specific evidence with the Surveyor group expanded. The live test data/session may not match the requested catalogue; this is not evidence of a product failure. Steps taken: Navigated to the V4 launcher, opened GIS, and inspected the visible layer catalogue.	Failed

				
				
10.0.0	For each displayed Surveyor layer entry, select the entry and verify that the GIS layer selector accepts the selection.	For each displayed Surveyor layer entry, select the entry and verify that the GIS layer selector accepts the selection.	A Surveyor - Service layer was visible as selected during the run, but the evidence does not establish selection acceptance for every displayed Surveyor entry. The temporary selection was removed during cleanup. Steps taken: Navigated to the V4 launcher, opened GIS, and inspected the visible layer catalogue.	Failed

				
				
11.0.0	Using a signed-in account without access to a Surveyor layer, open the V4 GIS layer selector and verify that the unavailable layer is not displayed.	Using a signed-in account without access to a Surveyor layer, open the V4 GIS layer selector and verify that the unavailable layer is not displayed.	Testing was blocked because no signed-in account without access to a Surveyor layer was available. The account and permissions were not changed. Steps taken: Navigated to the V4 launcher, opened GIS, and inspected the visible layer catalogue.	Blocked

				
				
12.0.0	With the Surveyor group expanded, verify that User, Browsing, and YouTube layer entries are not displayed.	With the Surveyor group expanded, verify that User, Browsing, and YouTube layer entries are not displayed.	Evidence from the current GIS catalogue is inconclusive for the retired entries because the Surveyor group was not independently expanded and verified. Steps taken: Navigated to the V4 launcher, opened GIS, and inspected the visible layer catalogue.	Failed

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
