About Metricell12

1 Revision History

Version	Date	Revision Author	Summary of Changes
[1.0]	08/10/2026	TEST2 QA Automation	Generated from TEST2 evidence review

2 Test Cycle Information

Tester:	Automated
Jira Ticket:	TEST2-63
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 155.0.8059.40
Date of Test:	08/10/2026
Limitations during Testing:	No testing limitations recorded. Defects (No.) counts directly contradicted criteria, not unique Jira bugs; blockers and inconclusive evidence count as zero.
Overall review outcome:	Passed
Browser URL(s) recorded after criteria:	https://o2intelligence-v4-dev.metricell.com/gis

3 Test Summary

Area of test	Pass	Fail	Defects (No.)
1. With GIS open, Search layers empty, and the permitted setup complete, the catalogue visibly contains Surveyor and the tester has recorded the complete loaded Map layers entries and their order as the pre-search baseline.	Y	N	0

Area of test	Pass	Fail	Defects (No.)
2. After entering Surveyor in Search layers, the search text remains visible, Surveyor is visible in the filtered catalogue, and the loaded Map layers entries and order are unchanged from the recorded pre-search baseline.	Y	N	0
3. After clearing Search layers, the original catalogue entries are visible again and the loaded Map layers entries and order match the recorded pre-search baseline.	Y	N	0
4. After the search-and-clear journey, the user remains in GIS, the map is visible, and no application-error page or sign-in screen has interrupted the journey.	Y	N	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

4.1 Tests

Preconditions:		V4 access and ticket conditions.	Associated Requirements:	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.
ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path		Outcome	
1.0.0	With GIS open, Search layers empty, and the permitted setup complete, the catalogue visibly contains Surveyor and the tester has recorded the complete loaded Map layers entries and their order as the pre-search baseline.	With GIS open, Search layers empty, and the permitted setup complete, the catalogue visibly contains Surveyor and the tester has recorded the complete loaded Map layers entries and their order as the pre-search baseline.	criterion-1-final.png shows GIS with Search layers empty, Surveyor (1) in the unfiltered catalogue and the complete Map layers baseline containing only Surveyor - Service at position 1. The criterion-owned setup images show the initially empty loaded-layer state and the Surveyor configuration before addition. Evidence: E01		Passed	
Criterion 1 evidence: With GIS open, Search layers empty, and the permitted setup complete, the catalogue visibly contains Surveyor and the tester has recorded the complete loaded Map layers entries and their order as the pre-search baseline.						
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis						
E01 - Final (criterion-1-final.png)						

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
2.0.0	After entering Surveyor in Search layers, the search text remains visible, Surveyor is visible in the filtered catalogue, and the loaded Map layers entries and order are unchanged from the recorded pre-search baseline.	After entering Surveyor in Search layers, the search text remains visible, Surveyor is visible in the filtered catalogue, and the loaded Map layers entries and order are unchanged from the recorded pre-search baseline.	criterion-2-before-search.png records the unfiltered catalogue and sole loaded layer Surveyor - Service. criterion-2-final.png shows Surveyor retained in Search layers and Surveyor (1) in the filtered catalogue, with the same sole Map layers entry and order. Evidence: E02, E03	Passed

Criterion 2 evidence: After entering Surveyor in Search layers, the search text remains visible, Surveyor is visible in the filtered catalogue, and the loaded Map layers entries and order are unchanged from the recorded pre-search baseline.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E02 - Before search (criterion-2-before-search.png)

E03 - Final (criterion-2-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
3.0.0	After clearing Search layers, the original catalogue entries are visible again and the loaded Map layers entries and order match the recorded pre-search baseline.	After clearing Search layers, the original catalogue entries are visible again and the loaded Map layers entries and order match the recorded pre-search baseline.	The criterion-3 before-search, after-search, before-clear, after-clear and final images show the complete search-and-clear sequence. The cleared state restores the original visible catalogue entries, including Network Information, RPO entries, Tests and Measurements, Surveyor (1), Improvement Areas and Planning; the sole loaded layer remains Surveyor - Service in its original position. Evidence: E04, E03, E05, E06	Passed

Criterion 3 evidence: After clearing Search layers, the original catalogue entries are visible again and the loaded Map layers entries and order match the recorded pre-search baseline.

Browser URL recorded after clearing: <https://o2intelligence-v4-dev.metricell.com/gis>

E04 - Before search (criterion-3-before-search.png)

E03 - After search (criterion-3-after-search.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
----------------	-----------------	-----------------	-------------------------------	---------

Criterion 3 continued: After clearing Search layers, the original catalogue entries are visible again and the loaded Map layers entries and order match the recorded pre-search baseline.
 Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E05 - Before clear (criterion-3-before-clear.png)

E06 - Final (criterion-3-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
4.0.0	After the search-and-clear journey, the user remains in GIS, the map is visible, and no application-error page or sign-in screen has interrupted the journey.	After the search-and-clear journey, the user remains in GIS, the map is visible, and no application-error page or sign-in screen has interrupted the journey.	The criterion-4 before-search, after-search, before-clear, after-clear and final images show GIS and the map throughout the recorded search-and-clear journey without an error or sign-in screen. The final image shows empty search and the restored catalogue, and the browser-derived browserUrl is https://o2intelligence-v4-dev.metricell.com/gis . Evidence: E02, E03, E06	Passed

Criterion 4 evidence: After the search-and-clear journey, the user remains in GIS, the map is visible, and no application-error page or sign-in screen has interrupted the journey.
Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E02 - Before search (criterion-4-before-search.png)

E03 - Before clear (criterion-4-before-clear.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 4 continued: After the search-and-clear journey, the user remains in GIS, the map is visible, and no application-error page or sign-in screen has interrupted the journey. Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis E06 - Final (criterion-4-final.png)				
				

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
----------------	-----------------	-----------------	-------------------------------	---------

Supporting setup captures - full attempt evidence remains in the local evidence folder

E07 - After open gis (criterion-1-after-open-gis.png)

E08 - After open surveyor config (criterion-1-after-open-surveyor-config.png)

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
