About Metricell 19

1 Revision History

Version	Date	Revision Author	Summary of Changes
[1.0]	19/10/2026	TEST2 QA Automation	Generated from TEST2 evidence review

2 Test Cycle Information

Tester:	**Automated**
Jira Ticket:	TEST2-88
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 155.0.8059.85
Date of Test:	19/10/2026
Limitations during Testing:	12 blocked; 0 inconclusive criterion(s). Reviewed all 36 referenced captures from attempt-001. Each criterion's final capture shows no layers matching MS Teams, preventing the required MS Teams Call starting state and display-setting tests. Criterion 1: The required active MS Teams Call layer could not be established: searching available GIS layers for MS Teams returned No layers match this search. No display settings or suitable MS Teams Call result data were accessible. No settings were changed. Defects (No.) counts directly contradicted criteria, not unique Jira bugs; blockers and inconclusive evidence count as zero.
Overall review outcome:	Blocked
Browser URL(s) recorded after criteria:	https://o2intelligence-v4-dev.metricell.com/gis

3 Test Summary

Area of test	Pass	Fail	Defects (No.)
1. Given the MS Teams Call layer is active, when the user opens its display settings, then the configured map-colouring choices and controls for detailed routes, linked sites and linked cells are visible.	N	N	0

Area of test	Pass	Fail	Defects (No.)
2. Given the MS Teams Call layer is active and a configured colouring choice is selected, when the map updates, then MS Teams Call result points and the legend display the selected configured colouring and its corresponding legend section.	N	N	0
3. Given the MS Teams Call layer is active, when the user turns detailed routes on and the map refreshes, then detailed route geometry for the active MS Teams Call results is visible.	N	N	0
4. Given the MS Teams Call layer is active and detailed routes are visible, when the user turns detailed routes off and the map refreshes, then that detailed route geometry is hidden.	N	N	0
5. Given the MS Teams Call layer is active and the map is below the configured zoom level for linked sites, when display settings are open, then the linked-site control is unavailable and indicates that the user must zoom in.	N	N	0
6. Given the MS Teams Call layer is active and the map is at or above the configured zoom level for linked sites, when the user turns linked sites on and the map refreshes, then linked-site overlays for the active MS Teams Call results are visible.	N	N	0
7. Given linked-site overlays are visible at a supported zoom level, when the user turns linked sites off and the map refreshes, then those linked-site overlays are hidden.	N	N	0
8. Given linked sites are enabled and the map is at a zoom level that supports linked cells, when display settings are open, then the linked-cell control is available.	N	N	0

Area of test	Pass	Fail	Defects (No.)
9. Given linked sites are disabled or the map is below the zoom level that supports linked cells, when display settings are open, then the linked-cell control is unavailable.	N	N	0
10. Given linked sites are enabled and the map is at a zoom level that supports linked cells, when the user turns linked cells on and the map refreshes, then linked-cell overlays are visible.	N	N	0
11. Given linked-cell overlays are visible, when the user turns linked cells off and the map refreshes, then those linked-cell overlays are hidden.	N	N	0
12. Given any MS Teams Call display setting is changed, when the map refreshes, then the setting is applied only to the active MS Teams Call layer and other visible map layers, standard map filters and legend point-filtering state retain their prior visible states.	N	N	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

4.1 Tests

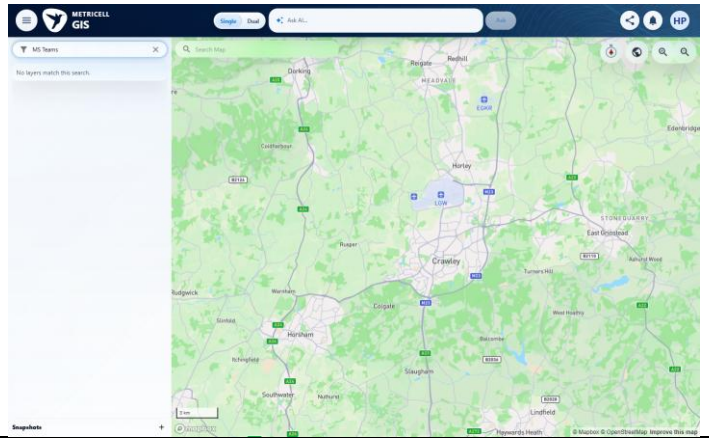

Preconditions:	V4 access and ticket conditions.	***Associated Requirements:***	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	Given the MS Teams Call layer is active, when the user opens its display settings, then the configured map-colouring choices and controls for detailed routes, linked sites and linked cells are visible.	Given the MS Teams Call layer is active, when the user opens its display settings, then the configured map-colouring choices and controls for detailed routes, linked sites and linked cells are visible.	criterion-1-final.png shows the MS Teams layer search settled at "No layers match this search." The required active MS Teams Call layer was unavailable; display controls could not be inspected. Evidence: E01	Blocked

Criterion 1 evidence: Given the MS Teams Call layer is active, when the user opens its display settings, then the configured map-colouring choices and controls for detailed routes, linked sites and linked cells are visible.

Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

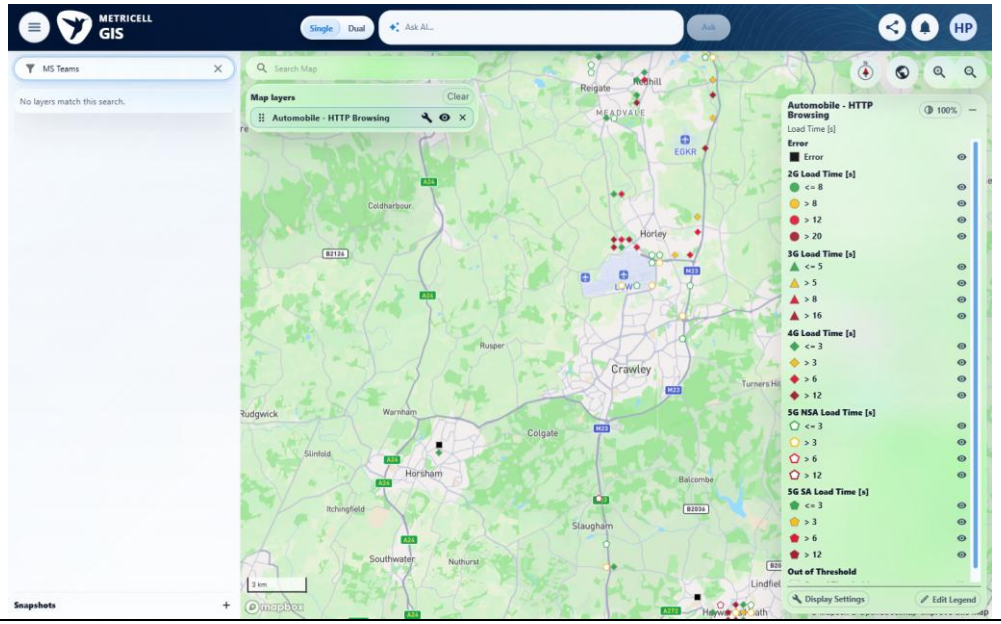

E01 - Final (criterion-1-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
2.0.0	Given the MS Teams Call layer is active and a configured colouring choice is selected, when the map updates, then MS Teams Call result points and the legend display the selected configured colouring and its corresponding legend section.	Given the MS Teams Call layer is active and a configured colouring choice is selected, when the map updates, then MS Teams Call result points and the legend display the selected configured colouring and its corresponding legend section.	criterion-2-final.png shows the MS Teams layer search settled at "No layers match this search." The required active MS Teams Call layer was unavailable; colouring and its corresponding legend could not be exercised. Evidence: E02	Blocked

Criterion 2 evidence: Given the MS Teams Call layer is active and a configured colouring choice is selected, when the map updates, then MS Teams Call result points and the legend display the selected configured colouring and its corresponding legend section.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

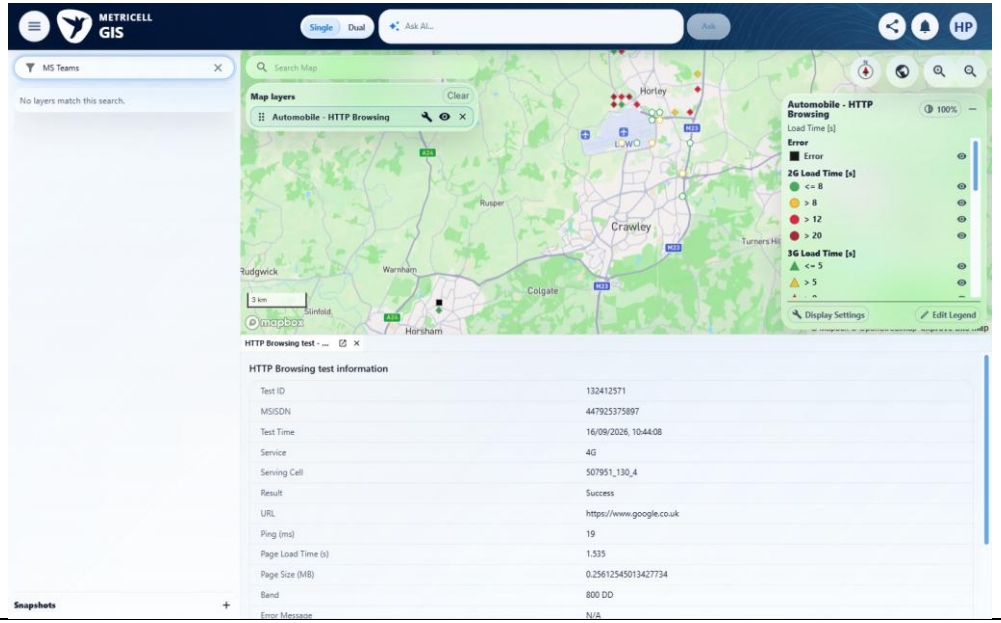

E02 - Final (criterion-2-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
3.0.0	Given the MS Teams Call layer is active, when the user turns detailed routes on and the map refreshes, then detailed route geometry for the active MS Teams Call results is visible.	Given the MS Teams Call layer is active, when the user turns detailed routes on and the map refreshes, then detailed route geometry for the active MS Teams Call results is visible.	criterion-3-final.png shows the MS Teams layer search settled at "No layers match this search." The required active MS Teams Call layer was unavailable; enabling detailed routes could not be exercised. Evidence: E03	Blocked

Criterion 3 evidence: Given the MS Teams Call layer is active, when the user turns detailed routes on and the map refreshes, then detailed route geometry for the active MS Teams Call results is visible.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

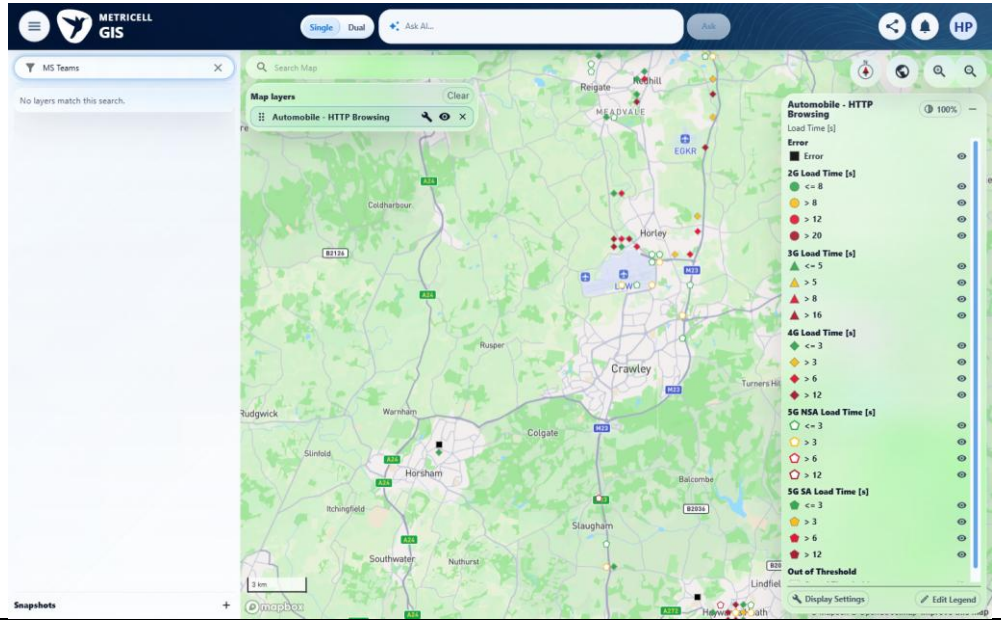

E03 - Final (criterion-3-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
4.0.0	Given the MS Teams Call layer is active and detailed routes are visible, when the user turns detailed routes off and the map refreshes, then that detailed route geometry is hidden.	Given the MS Teams Call layer is active and detailed routes are visible, when the user turns detailed routes off and the map refreshes, then that detailed route geometry is hidden.	criterion-4-final.png shows the MS Teams layer search settled at "No layers match this search." The required active MS Teams Call layer was unavailable; disabling detailed routes could not be exercised. Evidence: E02	Blocked

Criterion 4 evidence: Given the MS Teams Call layer is active and detailed routes are visible, when the user turns detailed routes off and the map refreshes, then that detailed route geometry is hidden.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

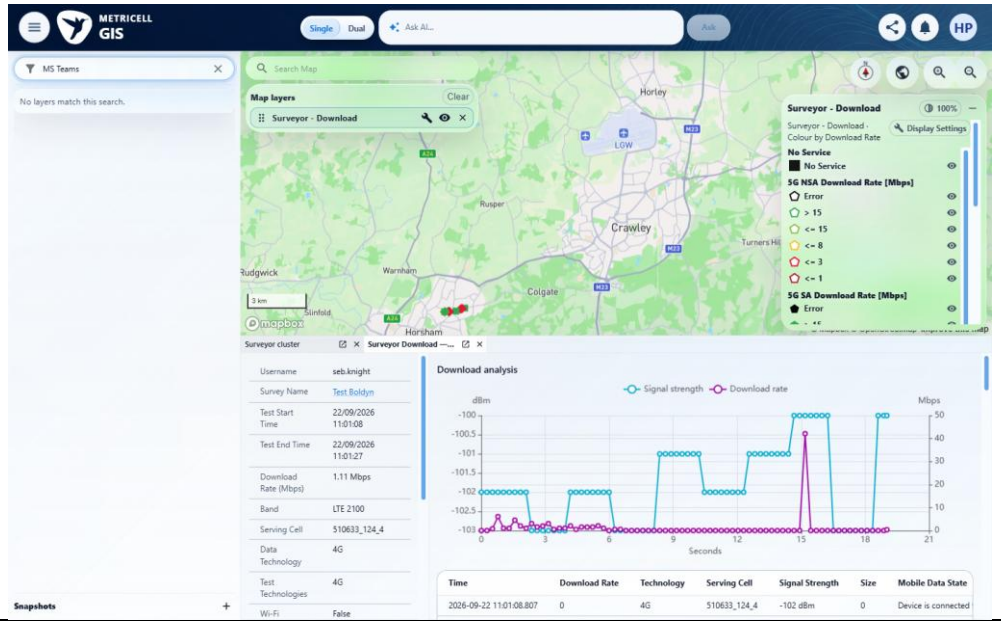

E02 - Final (criterion-4-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
5.0.0	Given the MS Teams Call layer is active and the map is below the configured zoom level for linked sites, when display settings are open, then the linked-site control is unavailable and indicates that the user must zoom in.	Given the MS Teams Call layer is active and the map is below the configured zoom level for linked sites, when display settings are open, then the linked-site control is unavailable and indicates that the user must zoom in.	criterion-5-final.png shows the MS Teams layer search settled at "No layers match this search." The required active MS Teams Call layer was unavailable; linked-site zoom gating and its explanation could not be inspected. Evidence: E04	Blocked

Criterion 5 evidence: Given the MS Teams Call layer is active and the map is below the configured zoom level for linked sites, when display settings are open, then the linked-site control is unavailable and indicates that the user must zoom in.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

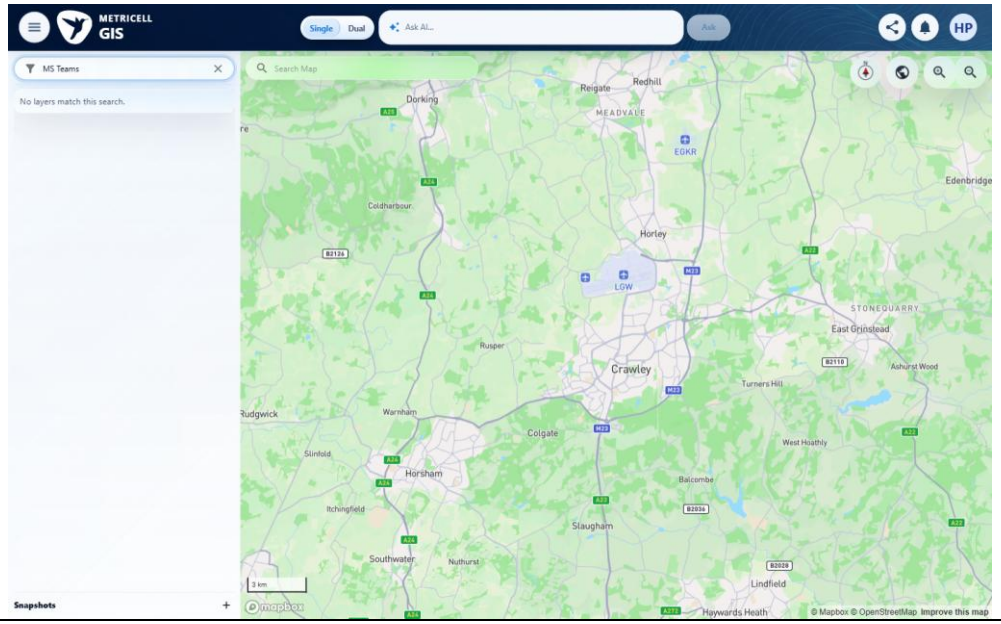

E04 - Final (criterion-5-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
6.0.0	Given the MS Teams Call layer is active and the map is at or above the configured zoom level for linked sites, when the user turns linked sites on and the map refreshes, then linked-site overlays for the active MS Teams Call results are visible.	Given the MS Teams Call layer is active and the map is at or above the configured zoom level for linked sites, when the user turns linked sites on and the map refreshes, then linked-site overlays for the active MS Teams Call results are visible.	criterion-6-final.png shows the MS Teams layer search settled at "No layers match this search." The required active MS Teams Call layer was unavailable; enabling linked sites at supported zoom could not be exercised. Evidence: E05	Blocked

Criterion 6 evidence: Given the MS Teams Call layer is active and the map is at or above the configured zoom level for linked sites, when the user turns linked sites on and the map refreshes, then linked-site overlays for the active MS Teams Call results are visible.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

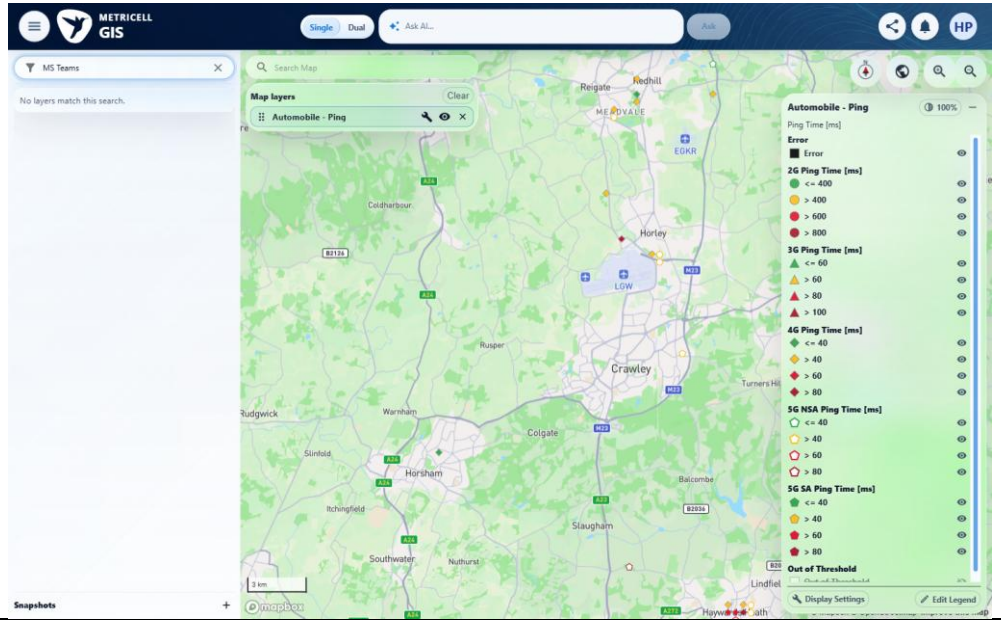

E05 - Final (criterion-6-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
7.0.0	Given linked-site overlays are visible at a supported zoom level, when the user turns linked sites off and the map refreshes, then those linked-site overlays are hidden.	Given linked-site overlays are visible at a supported zoom level, when the user turns linked sites off and the map refreshes, then those linked-site overlays are hidden.	criterion-7-final.png shows the MS Teams layer search settled at "No layers match this search." The required active MS Teams Call layer was unavailable; disabling linked-site overlays could not be exercised. Evidence: E06	Blocked

Criterion 7 evidence: Given linked-site overlays are visible at a supported zoom level, when the user turns linked sites off and the map refreshes, then those linked-site overlays are hidden.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

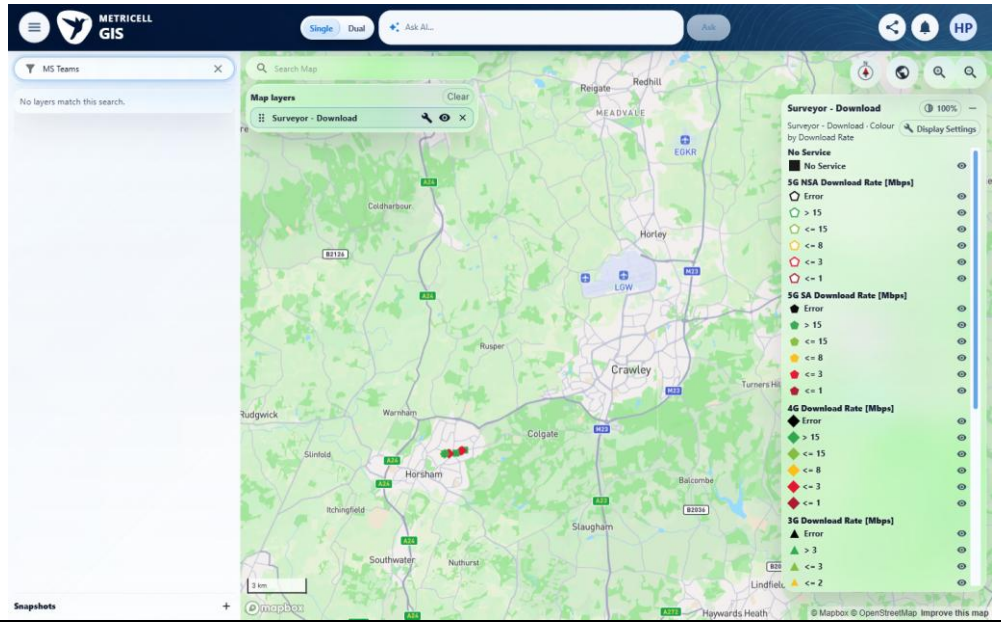

E06 - Final (criterion-7-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
8.0.0	Given linked sites are enabled and the map is at a zoom level that supports linked cells, when display settings are open, then the linked-cell control is available.	Given linked sites are enabled and the map is at a zoom level that supports linked cells, when display settings are open, then the linked-cell control is available.	criterion-8-final.png shows the MS Teams layer search settled at "No layers match this search." The required active MS Teams Call layer was unavailable; linked-cell availability with linked sites enabled could not be inspected. Evidence: E07	Blocked

Criterion 8 evidence: Given linked sites are enabled and the map is at a zoom level that supports linked cells, when display settings are open, then the linked-cell control is available.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

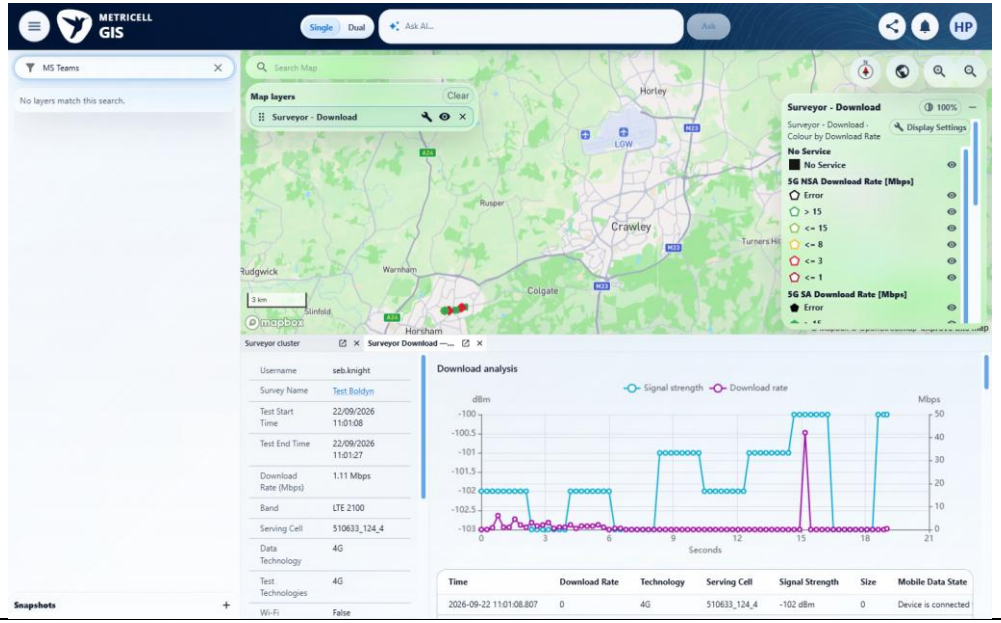

E07 - Final (criterion-8-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
9.0.0	Given linked sites are disabled or the map is below the zoom level that supports linked cells, when display settings are open, then the linked-cell control is unavailable.	Given linked sites are disabled or the map is below the zoom level that supports linked cells, when display settings are open, then the linked-cell control is unavailable.	criterion-9-final.png shows the MS Teams layer search settled at "No layers match this search." The required active MS Teams Call layer was unavailable; linked-cell gating by linked sites or zoom could not be inspected. Evidence: E04	Blocked

Criterion 9 evidence: Given linked sites are disabled or the map is below the zoom level that supports linked cells, when display settings are open, then the linked-cell control is unavailable.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

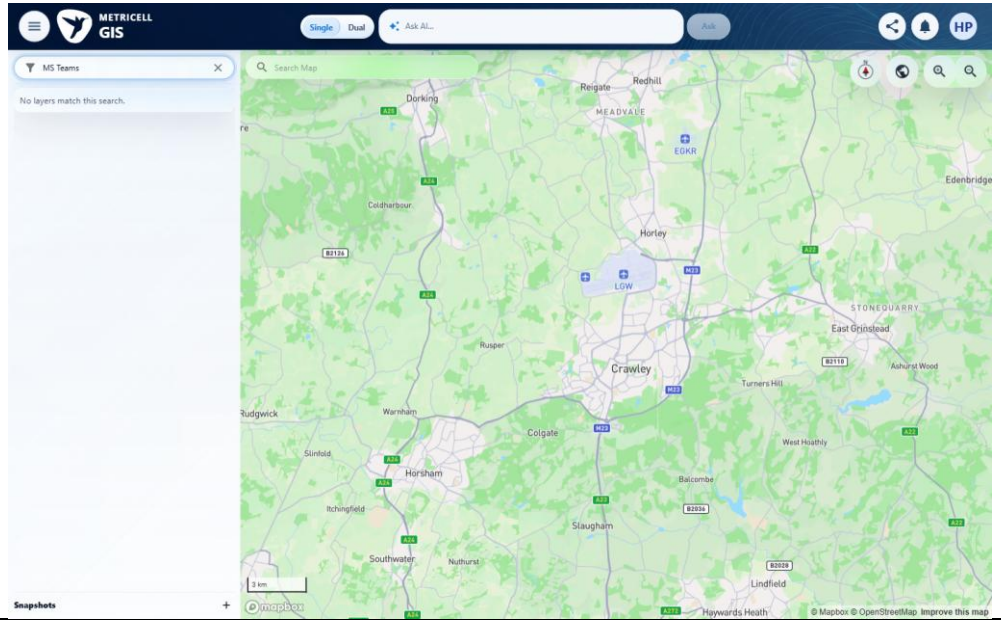

E04 - Final (criterion-9-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
10.0.0	Given linked sites are enabled and the map is at a zoom level that supports linked cells, when the user turns linked cells on and the map refreshes, then linked-cell overlays are visible.	Given linked sites are enabled and the map is at a zoom level that supports linked cells, when the user turns linked cells on and the map refreshes, then linked-cell overlays are visible.	criterion-10-final.png shows the MS Teams layer search settled at "No layers match this search." The required active MS Teams Call layer was unavailable; enabling linked-cell overlays could not be exercised. Evidence: E05	Blocked

Criterion 10 evidence: Given linked sites are enabled and the map is at a zoom level that supports linked cells, when the user turns linked cells on and the map refreshes, then linked-cell overlays are visible.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

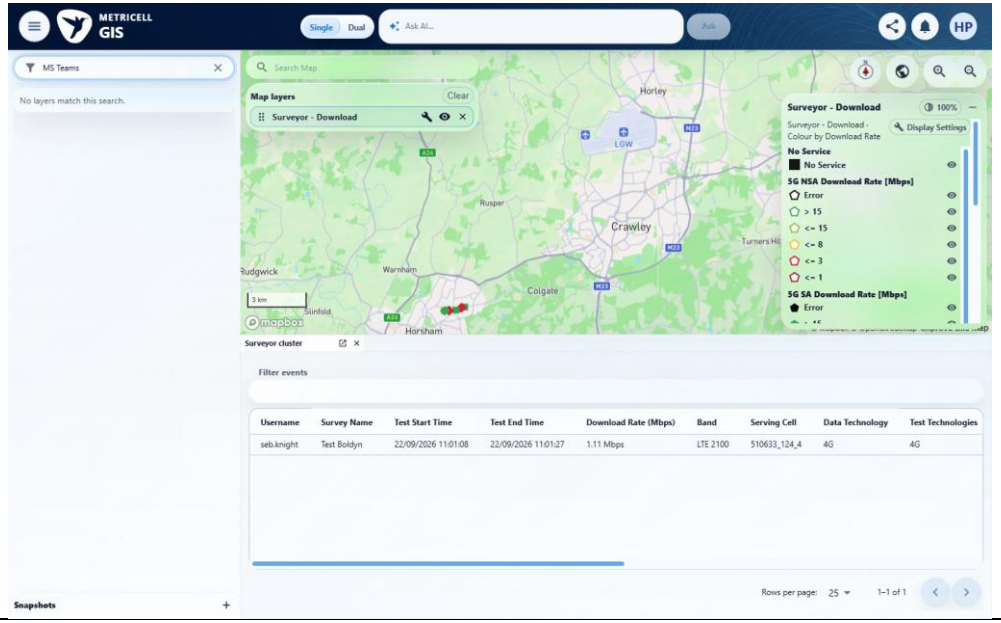

E05 - Final (criterion-10-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
11.0.0	Given linked-cell overlays are visible, when the user turns linked cells off and the map refreshes, then those linked-cell overlays are hidden.	Given linked-cell overlays are visible, when the user turns linked cells off and the map refreshes, then those linked-cell overlays are hidden.	criterion-11-final.png shows the MS Teams layer search settled at "No layers match this search." The required active MS Teams Call layer was unavailable; disabling linked-cell overlays could not be exercised. Evidence: E08	Blocked

Criterion 11 evidence: Given linked-cell overlays are visible, when the user turns linked cells off and the map refreshes, then those linked-cell overlays are hidden.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

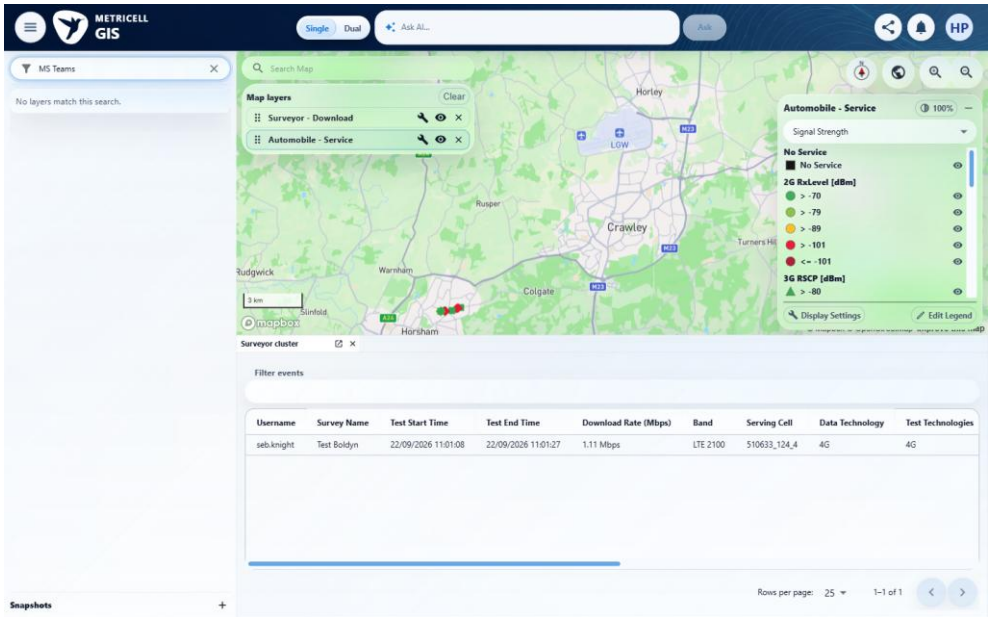

E08 - Final (criterion-11-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
12.0.0	Given any MS Teams Call display setting is changed, when the map refreshes, then the setting is applied only to the active MS Teams Call layer and other visible map layers, standard map filters and legend point-filtering state retain their prior visible states.	Given any MS Teams Call display setting is changed, when the map refreshes, then the setting is applied only to the active MS Teams Call layer and other visible map layers, standard map filters and legend point-filtering state retain their prior visible states.	criterion-12-final.png shows the MS Teams layer search settled at "No layers match this search." The required active MS Teams Call layer was unavailable; layer-specific changes and preservation of other layers, map filters and legend filtering could not be exercised. Evidence: E09	Blocked

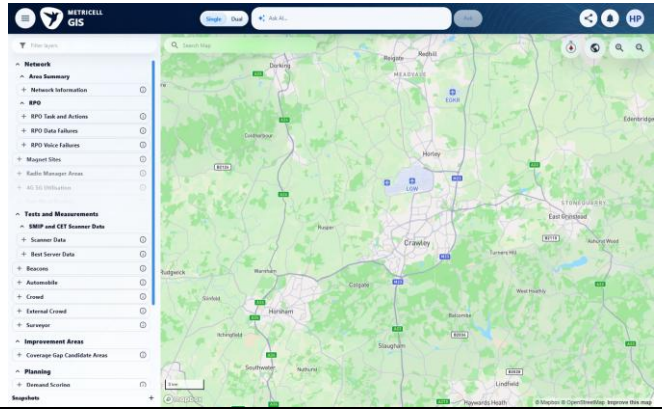

Criterion 12 evidence: Given any MS Teams Call display setting is changed, when the map refreshes, then the setting is applied only to the active MS Teams Call layer and other visible map layers, standard map filters and legend point-filtering state retain their prior visible states.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E09 - Final (criterion-12-final.png)

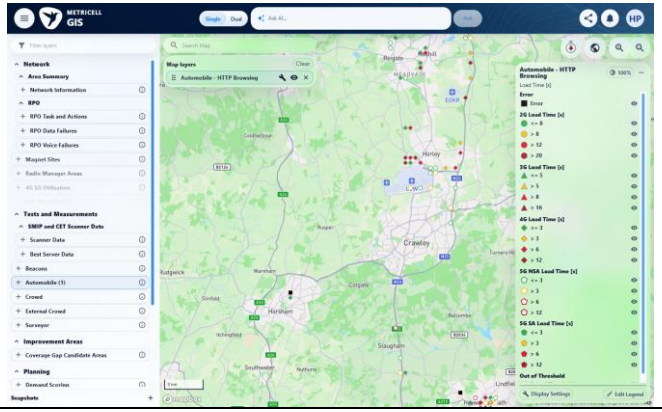

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Supporting setup captures - full attempt evidence remains in the local evidence folder				

E10 - After open gis (criterion-1-after-open-gis.png)

E11 - After open gis (criterion-2-after-open-gis.png)

Better Connected

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
