About Metricell12

1 Revision History

Version	Date	Revision Author	Summary of Changes
[1.0]	06/10/2026	TEST2 QA Automation	Generated from TEST2 evidence review

2 Test Cycle Information

Tester:	Automated
Jira Ticket:	TEST2-59
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 154.0.8037.98
Date of Test:	06/10/2026
Limitations during Testing:	Criterion 2: Before loading, an incorrect parent locator timed out and an unscoped Add layer selector was ambiguous; neither changed the UI. Recovered using the observed Surveyor reference and scoped dialog Add layer button. Defects (No.) counts directly contradicted criteria, not unique Jira bugs; blockers and inconclusive evidence count as zero.
Overall review outcome:	Passed
Browser URL(s) recorded after criteria:	https://o2intelligence-v4-dev.metricell.com/gis

3 Test Summary

Area of test	Pass	Fail	Defects (No.)
1. With the GIS layer catalogue unfiltered and a...	Y	N	0
2. After entering `Surveyor` in the visible...	Y	N	0
3. After clearing the Search layers field, the...	Y	N	0
4. After filtering and clearing the catalogue,...	Y	N	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

4.1 Tests

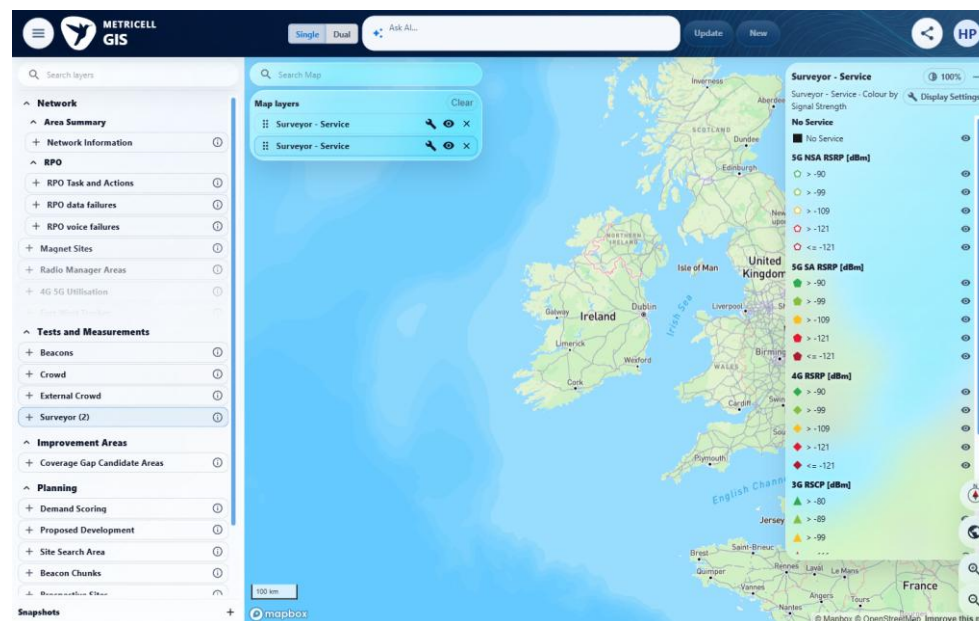

Preconditions:		V4 access and ticket conditions.	Associated Requirements:	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.
ID / Criterion	Criteria Tested		Expected Result	Actual Result / Evidence Path		Outcome

1.0.0	With the GIS layer catalogue unfiltered and a test-created Surveyor layer loaded with its default configuration, Surveyor and the recorded visible non-Surveyor catalogue entry are both visible, and the loaded Surveyor layer is identifiable in Map layers or the legend.	With the GIS layer catalogue unfiltered and a test-created Surveyor layer loaded with its default configuration, Surveyor and the recorded visible non-Surveyor catalogue entry are both visible, and the loaded Surveyor layer is identifiable in Map layers or the legend.	criterion-1-after-open-surveyor-before-add.png records the untouched pre-add configuration (Service, Last 30 days, All teams, all listed technologies, No network filter). criterion-1-after-open-gis.png shows the original single layer; criterion-1-final.png shows empty Search layers, Beacons, Surveyor (2), and the added second Surveyor - Service row with its legend. Evidence: E01	Passed
-------	--	--	--	--------

Criterion 1 evidence: With the GIS layer catalogue unfiltered and a test-created Surveyor layer loaded with its default configuration, Surveyor and the recorded visible non-Surveyor catalogue entry are both visible, and the loaded Surveyor layer is identifiable in Map layers or the legend.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E01 - Final (criterion-1-final.png)

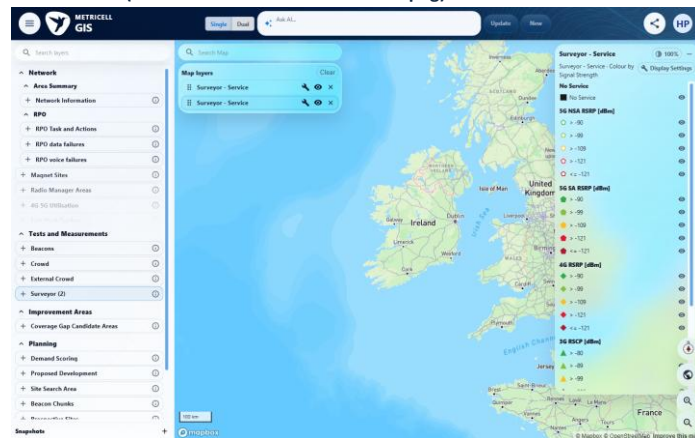

2.0.0	After entering `Surveyor` in the visible Search layers field, at least one matching Surveyor catalogue entry remains visible and the recorded non-Surveyor entry is absent from the filtered catalogue, while the previously loaded Surveyor layer remains identifiable in Map layers or the legend without a duplicate.	After entering `Surveyor` in the visible Search layers field, at least one matching Surveyor catalogue entry remains visible and the recorded non-Surveyor entry is absent from the filtered catalogue, while the previously loaded Surveyor layer remains identifiable in Map layers or the legend without a duplicate.	criterion-2-loaded-before-search.png records Beacons and the complete two-row Map layers list. criterion-2-after-search.png shows Surveyor in Search layers, only Surveyor (2) in the catalogue, and the same two Map layers rows. The recovered sequence provides direct evidence despite the earlier locator errors. Evidence: E02, E03	Passed
-------	--	--	--	--------

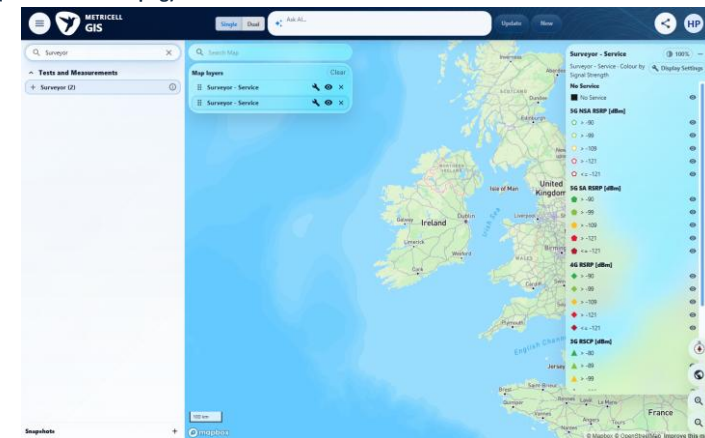

Criterion 2 evidence: After entering `Surveyor` in the visible Search layers field, at least one matching Surveyor catalogue entry remains visible and the recorded non-Surveyor entry is absent from the filtered catalogue, while the previously loaded Surveyor layer remains identifiable in Map layers or the legend without a duplicate.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E02 - Loaded before search (criterion-2-loaded-before-search.png)

E03 - Final (criterion-2-final.png)

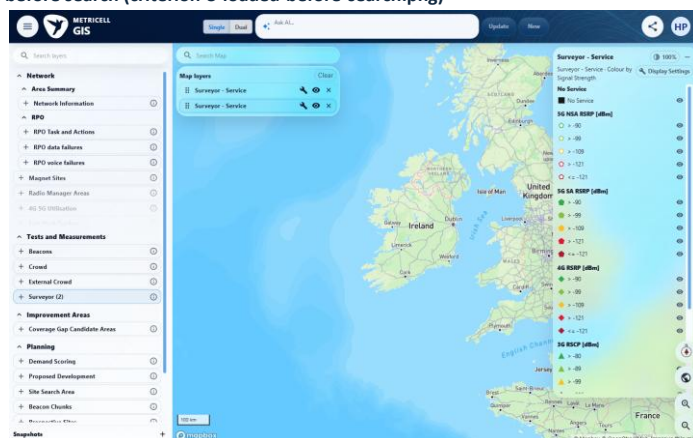

3.0.0	After clearing the Search layers field, the recorded non-Surveyor catalogue entry is visible again, and the current Map layers entries match the recorded pre-search list with no duplicate or removed layer.	After clearing the Search layers field, the recorded non-Surveyor catalogue entry is visible again, and the current Map layers entries match the recorded pre-search list with no duplicate or removed layer.	criterion-3-loaded-before-search.png, criterion-3-filtered-before-clear.png and criterion-3-after-clear.png show this criterion's unfiltered, filtered and cleared states. Beacons returns after clearing, and the complete two-row Surveyor - Service list retains its order and count. Evidence: E02, E03, E04	Passed
-------	---	---	---	--------

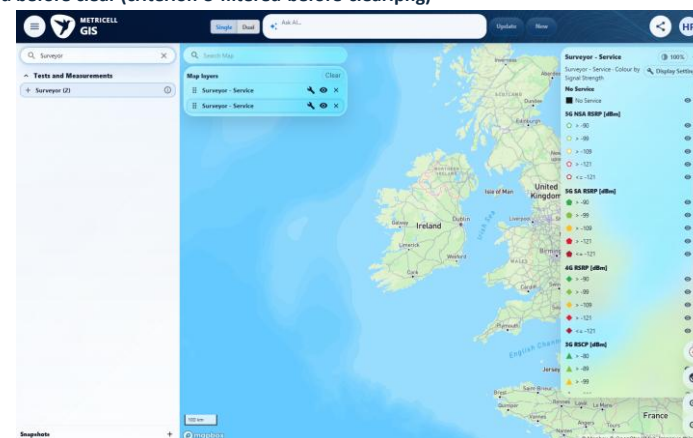

Criterion 3 evidence: After clearing the Search layers field, the recorded non-Surveyor catalogue entry is visible again, and the current Map layers entries match the recorded pre-search list with no duplicate or removed layer.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E02 - Loaded before search (criterion-3-loaded-before-search.png)

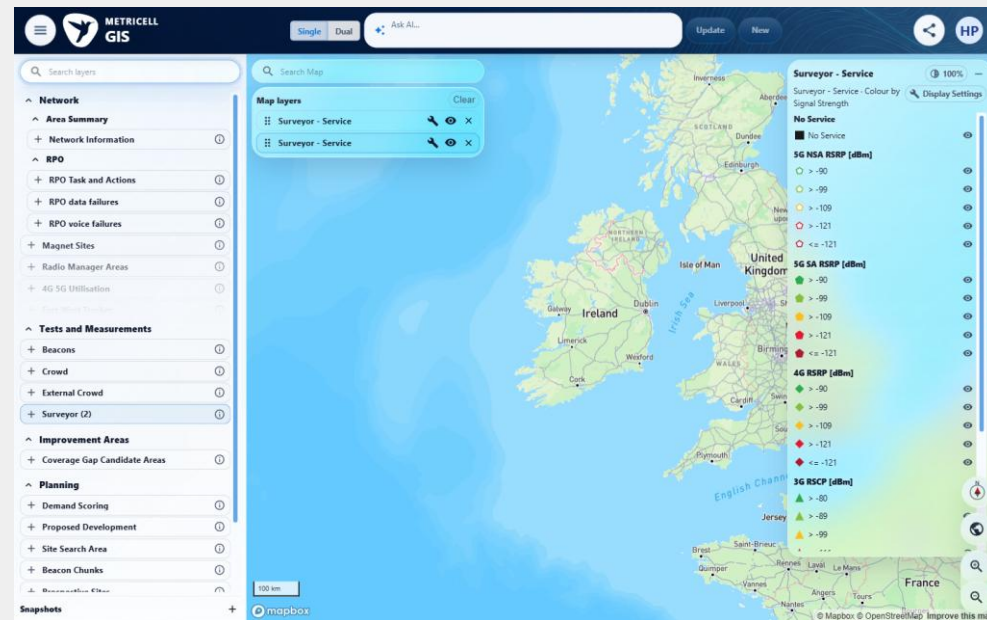

E03 - Filtered before clear (criterion-3-filtered-before-clear.png)

Criterion 3 continued: After clearing the Search layers field, the recorded non-Surveyor catalogue entry is visible again, and the current Map layers entries match the recorded pre-search list with no duplicate or removed layer.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E04 - Final (criterion-3-final.png)

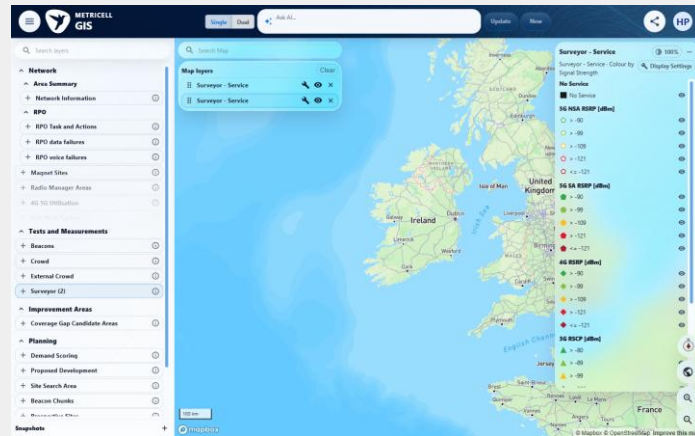

4.0.0	After filtering and clearing the catalogue, Display Settings for the same loaded Surveyor layer remains accessible and its Show linked sites state matches the state recorded before the search journey.	After filtering and clearing the catalogue, Display Settings for the same loaded Surveyor layer remains accessible and its Show linked sites state matches the state recorded before the search journey.	criterion-4-display-settings-before-search.png and criterion-4-after-reopen-settings.png show Show linked sites checked before and after this criterion's filter-and-clear journey, with the same two loaded rows. criterion-4-settings-closed-before-filter.png still shows fading settings controls; criterion-4-filtered-before-clear.png proves they subsequently closed, and criterion-4-cleared-before-reopen-settings.png proves the cleared state before reopening. Evidence: E02, E05, E06, E03, E04, E07	Passed
-------	--	--	---	--------

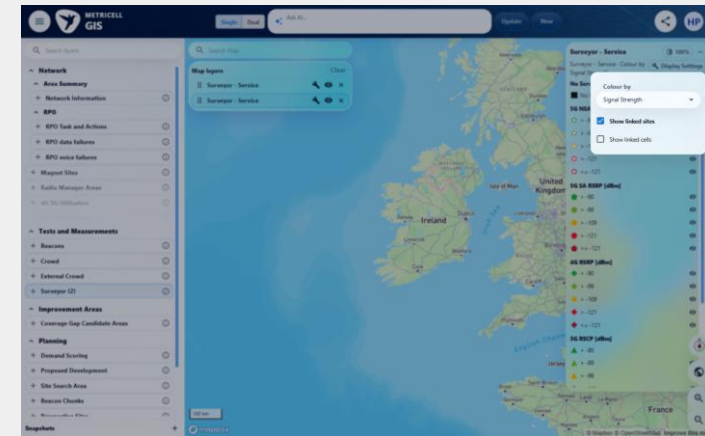

Criterion 4 evidence: After filtering and clearing the catalogue, Display Settings for the same loaded Surveyor layer remains accessible and its Show linked sites state matches the state recorded before the search journey.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E02 - Loaded before search (criterion-4-loaded-before-search.png)

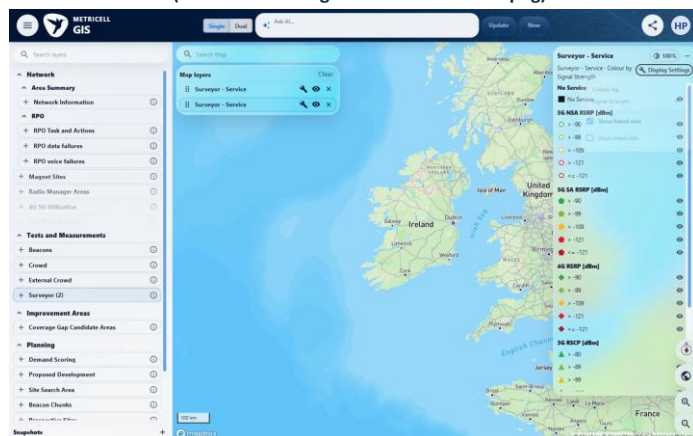

E05 - Display settings before search (criterion-4-display-settings-before-search.png)

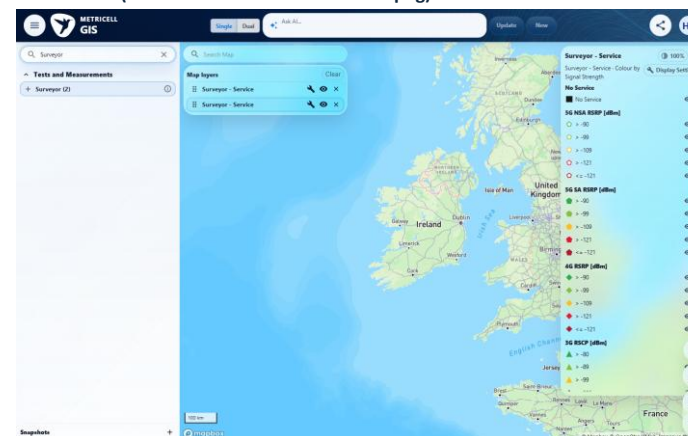

Criterion 4 continued: After filtering and clearing the catalogue, Display Settings for the same loaded Surveyor layer remains accessible and its Show linked sites state matches the state recorded before the search journey.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E06 - Settings closed before filter (criterion-4-settings-closed-before-filter.png)

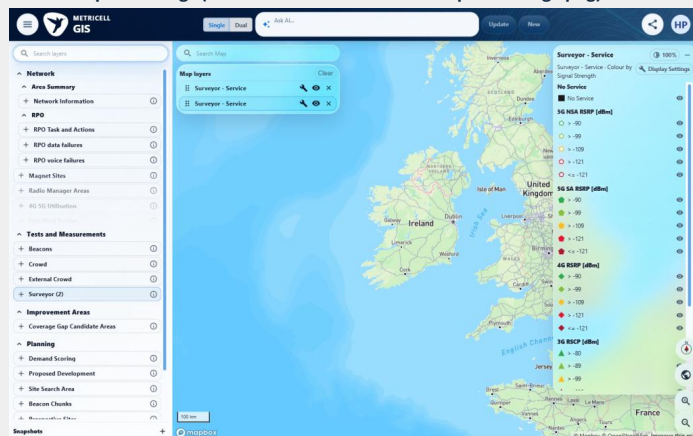

E03 - Filtered before clear (criterion-4-filtered-before-clear.png)

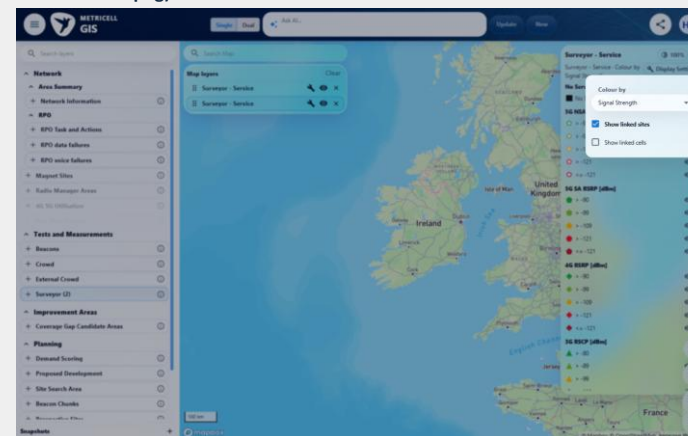

Criterion 4 continued: After filtering and clearing the catalogue, Display Settings for the same loaded Surveyor layer remains accessible and its Show linked sites state matches the state recorded before the search journey.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E04 - Cleared before reopen settings (criterion-4-cleared-before-reopen-settings.png)

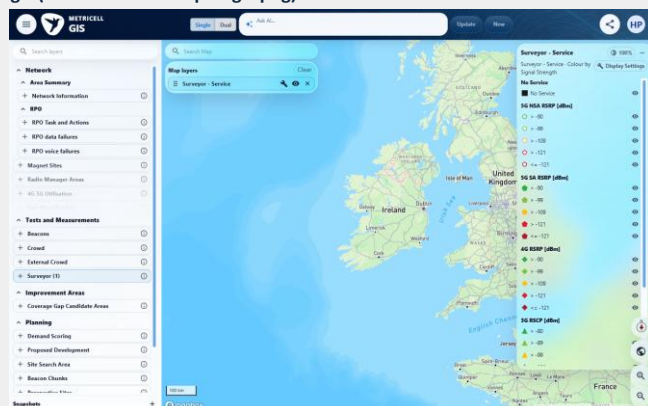

E07 - Final (criterion-4-final.png)

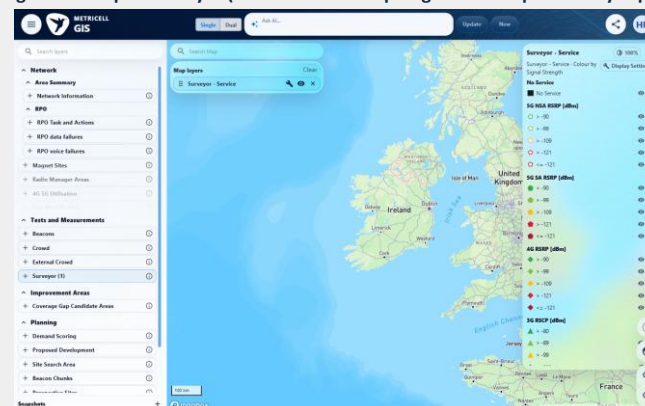

Supporting setup captures - full attempt evidence remains in the local evidence folder

E08 - After open gis (criterion-1-after-open-gis.png)

E09 - After open gis before open surveyor (criterion-2-after-open-gis-before-open-surveyor.png)

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
