About Metricell12

1 Revision History

Version	Date	Revision Author	Summary of Changes
[1.0]	08/10/2026	TEST2 QA Automation	Generated from TEST2 evidence review

2 Test Cycle Information

Tester:	Automated
Jira Ticket:	TEST2-63
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 154.0.8037.98
Date of Test:	08/10/2026
Limitations during Testing:	0 blocked; 1 inconclusive criterion(s). Completed attempt-001 evidence assessment; full catalogue restoration remains inconclusive because the complete before/after catalogue was not captured. Criterion 4: Verified GIS and the map remained visible, with no sign-in or application-error page interrupting the search-and-clear journey; captured final evidence and the current GIS URL. Inconclusive evidence is reported as Failed, but is not a confirmed application defect. Defects (No.) counts directly contradicted criteria, not unique Jira bugs; blockers and inconclusive evidence count as zero.
Overall review outcome:	Failed (inconclusive evidence)
Browser URL(s) recorded after criteria:	https://o2intelligence-v4-dev.metricell.com/gis

3 Test Summary

Area of test	Pass	Fail	Defects (No.)
1. With GIS open, Search layers empty, and the permitted setup complete, the catalogue visibly contains Surveyor and the tester has recorded the complete loaded Map layers entries and their order as the pre-search baseline.	Y	N	0

Area of test	Pass	Fail	Defects (No.)
2. After entering `Surveyor` in Search layers, the search text remains visible, Surveyor is visible in the filtered catalogue, and the loaded Map layers entries and order are unchanged from the recorded pre-search baseline.	Y	N	0
3. After clearing Search layers, the original catalogue entries are visible again and the loaded Map layers entries and order match the recorded pre-search baseline.	N	Y	0
4. After the search-and-clear journey, the user remains in GIS, the map is visible, and no application-error page or sign-in screen has interrupted the journey.	Y	N	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

4.1 Tests

<i>Preconditions:</i>	V4 access and ticket conditions.	<i>Associated Requirements:</i>	Ticket criteria below.	<i>Automation Notes:</i>	Screenshots below each criterion; full log retained locally.
------------------------------	----------------------------------	--	------------------------	---------------------------------	--

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	With GIS open, Search layers empty, and the permitted setup complete, the catalogue visibly contains Surveyor and the tester has recorded the complete loaded Map layers entries and their order as the pre-search baseline.	With GIS open, Search layers empty, and the permitted setup complete, the catalogue visibly contains Surveyor and the tester has recorded the complete loaded Map layers entries and their order as the pre-search baseline.	criterion-1-after-confirm.png and criterion-1-final.png show GIS with empty Search layers, Surveyor (1) in the catalogue, and the complete Map layers list containing only Surveyor - Service, matching the recorded pre-search baseline. Evidence: E01	Passed

Criterion 1 evidence: With GIS open, Search layers empty, and the permitted setup complete, the catalogue visibly contains Surveyor and the tester has recorded the complete loaded Map layers entries and their order as the pre-search baseline.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E01 - Final (criterion-1-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
2.0.0	After entering 'Surveyor' in Search layers, the search text remains visible, Surveyor is visible in the filtered catalogue, and the loaded Map layers entries and order are unchanged from the recorded pre-search baseline.	After entering 'Surveyor' in Search layers, the search text remains visible, Surveyor is visible in the filtered catalogue, and the loaded Map layers entries and order are unchanged from the recorded pre-search baseline.	criterion-2-after-confirm-before-search.png establishes the sole Surveyor - Service layer; criterion-2-after-search.png and criterion-2-final.png show retained Surveyor search text, the filtered Surveyor (1) entry, and the same sole loaded layer. Evidence: E02, E03	Passed

Criterion 2 evidence: After entering 'Surveyor' in Search layers, the search text remains visible, Surveyor is visible in the filtered catalogue, and the loaded Map layers entries and order are unchanged from the recorded pre-search baseline.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E02 - After confirm before search (criterion-2-after-confirm-before-search.png)

E03 - Final (criterion-2-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
3.0.0	After clearing Search layers, the original catalogue entries are visible again and the loaded Map layers entries and order match the recorded pre-search baseline.	After clearing Search layers, the original catalogue entries are visible again and the loaded Map layers entries and order match the recorded pre-search baseline.	criterion-3's before-search, filtered, and cleared screenshots show empty search restored and the sole Surveyor - Service layer unchanged. Visible catalogue entries return, but the 46-entry restoration claimed in results/report is not fully evidenced: middle Network entries and lower Planning/Custom Datasets entries are outside the captured scroll view before and after clearing. Evidence: E02, E04, E05	Failed

Criterion 3 evidence: After clearing Search layers, the original catalogue entries are visible again and the loaded Map layers entries and order match the recorded pre-search baseline.

Browser URL recorded after clearing: <https://o2intelligence-v4-dev.metricell.com/gis>

E02 - After confirm before search (criterion-3-after-confirm-before-search.png)

E04 - After search before clear (criterion-3-after-search-before-clear.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
----------------	-----------------	-----------------	-------------------------------	---------

Criterion 3 continued: After clearing Search layers, the original catalogue entries are visible again and the loaded Map layers entries and order match the recorded pre-search baseline.
 Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E05 - Final (criterion-3-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
4.0.0	After the search-and-clear journey, the user remains in GIS, the map is visible, and no application-error page or sign-in screen has interrupted the journey.	After the search-and-clear journey, the user remains in GIS, the map is visible, and no application-error page or sign-in screen has interrupted the journey.	criterion-4's ordered setup, search, clear, and final screenshots retain GIS and a visible map without an error or sign-in screen. The recorded browserUrl is https://o2intelligence-v4-dev.metricell.com/gis . Evidence: E02, E04, E05	Passed

Criterion 4 evidence: After the search-and-clear journey, the user remains in GIS, the map is visible, and no application-error page or sign-in screen has interrupted the journey.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E02 - After confirm before search (criterion-4-after-confirm-before-search.png)

E04 - After search before clear (criterion-4-after-search-before-clear.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 4 continued: After the search-and-clear journey, the user remains in GIS, the map is visible, and no application-error page or sign-in screen has interrupted the journey. Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis E05 - Final (criterion-4-final.png)				
				

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
