About Metricell7

Version	Date	Revision Author	Summary of Changes
[1.0]	17/09/2026	TEST2 QA Automation	Generated from TEST2 evidence review

Tester:	Automated
Jira Ticket:	TEST2-21
Environment:	Chrome
Browser Details:	Chrome version not recorded
Date of Test:	17/09/2026
Limitations during Testing:	None recorded

Area of test	Pass	Fail	Defects (No.)
1. Given the Beacon view loads, when filter options are retrieved, then the available Beacon groups and profiles are shown without duplicate option labels.	Y	N	0
2. Given a user selects a group, when the filter is applied, then the map shows only Beacons assigned to that group.	N	Y	1
3. Given a user selects a profile, when the filter is applied, then the map shows only Beacons assigned to that profile.	N	Y	1
4. Given a user selects both a group and a profile, when the filters are applied, then the	N	Y	1

map shows only Beacons that match both selections.			
5. Given the selected filters return no matching Beacons, when the view refreshes, then no map markers are shown while the map and filters remain usable.	Y	N	0
6. Given a user changes either filter, when the refreshed results are displayed, then previous map results are not retained.	N	Y	1

All automated tests must map to an approved criterion and produce reproducible results plus decisive evidence. Use Failed, Blocked, or Unverified where applicable.

4.1 Tests

Preconditions:	Not recorded in agent output.	Associated Requirements:	Criteria from criteria.md.	Automation Notes:	Automated browser run; PNG evidence reviewed.
-----------------------	-------------------------------	---------------------------------	----------------------------	--------------------------	---

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	Given the Beacon view loads, when filter options are retrieved, then the available Beacon groups and profiles are shown without duplicate option labels.	Given the Beacon view loads, when filter options are retrieved, then the available Beacon groups and profiles are shown without duplicate option labels.	Direct screenshots show the Group and Profile controls and retrieved options with distinct labels.	Passed
2.0.0	Given a user selects a group, when the filter is applied, then the map shows only Beacons assigned to that group.	Given a user selects a group, when the filter is applied, then the map shows only Beacons assigned to that group.	The refreshed view showed no Beacons available, so matching Beacon assignment was not directly verified.	Failed
3.0.0	Given a user selects a profile, when the filter is applied, then the map shows only Beacons assigned to that profile.	Given a user selects a profile, when the filter is applied, then the map shows only Beacons assigned to that profile.	The Profile control was visible, but no independent profile-filter result was captured.	Failed
4.0.0	Given a user selects both a group and a profile, when the filters are applied, then the map shows only Beacons that match both selections.	Given a user selects both a group and a profile, when the filters are applied, then the map shows only Beacons that match both selections.	Both controls were visible, but no independent combined-filter result was captured.	Failed
5.0.0	Given the selected filters return no matching Beacons, when the view refreshes, then no map markers are shown while the map and filters remain usable.	Given the selected filters return no matching Beacons, when the view refreshes, then no map markers are shown while the map and filters remain usable.	Direct screenshot evidence shows the no-results state after filtering while the view remains usable.	Passed

6.0.0	Given a user changes either filter, when the refreshed results are displayed, then previous map results are not retained.	Given a user changes either filter, when the refreshed results are displayed, then previous map results are not retained.	Previous Beacon result retention could not be independently confirmed from the available result set.	Failed

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
