Testing notes: Tool interruption: functions.wait reported 'code-mode host timed out waiting for wait response', then 'cell 32 belongs to a stale code-mode host generation'. Criterion 7 has no verified final assertion or current final browserUrl. Only the saved launcher/configuration evidence is available; whether Apply completed is unverified. Per the QA brief's interruption rule, browser work stopped and the existing owned lease was preserved for coordinator reconciliation. Automobile state after criterion 7 and any incomplete UI restoration must be checked by the coordinator. Browser identity was observed once for this session; it does not imply this criterion ran.

If result details fail to load, the interface shows an error state without stale or misleading detail data.	Browser execution stopped during criterion 7 after a wait timeout and stale code-mode host error. This criterion was not executed; no criterion-owned browser evidence was captured and testing could not be completed. Post-interruption Automobile state and restoration require coordinator reconciliation. Evidence: Unavailable Browser URL recorded after criterion: Not recorded	Blocked
Criterion 16 assessment: Browser execution stopped during criterion 7 after a wait timeout and stale code-mode host error. This criterion was not executed; no criterion-owned browser evidence was captured and testing could not be completed. Post-interruption Automobile state and restoration require coordinator reconciliation. Testing notes: Tool interruption: functions.wait reported 'code-mode host timed out waiting for wait response', then 'cell 32 belongs to a stale code-mode host generation'. Criterion 16 has no verified final assertion or current final browserUrl. No PNG was possible for this criterion because browser execution had stopped. Per the QA brief's interruption rule, browser work stopped and the existing owned lease was preserved for coordinator reconciliation. Automobile state after criterion 7 and any incomplete UI restoration must be checked by the coordinator. Browser identity was observed once for this session; it does not imply this criterion ran.
