Version	Date	Revision Author	Summary of Changes
[1.0]	21/10/2026	TEST2 QA Automation	Generated from TEST2 evidence review

2 Test Cycle Information

Tester:	**Automated**
Jira Ticket:	TEST2-87
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 155.0.8059.85
Date of Test:	21/10/2026
Limitations during Testing:	Blocked criterion(s): 1, 2, 3, 4, 5, 6, 7. See the assessment below each criterion. Defects (No.) counts directly contradicted criteria, not unique Jira bugs; blockers and inconclusive evidence count as zero.
Overall review outcome:	Blocked
Browser URL(s) recorded after criteria:	https://o2intelligence-v4-dev.metricell.com/gis

3 Test Summary

Area of test	Outcome	Fail	Defects (No.)
1. When a completed Call test is opened in the shared point-detail dialog, its summary shows the available duration, test result, connection time, start time, end time, handset, and disconnection cause.	Blocked	N	0
2. When Call samples are returned, the timeline chart shows call state, service technology, and signal strength across the test duration.	Blocked	N	0
3. When Call samples are returned, the dialog displays them in a table whose columns can be sorted and filtered.	Blocked	N	0
4. For each displayed Call sample, the Serving Cell column shows the known serving site/cell when available; when it is unavailable, it shows that sample's CGI.	Blocked	N	0
5. Selecting a displayed Call sample opens the related Service details for the selected sample's point in time.	Blocked	N	0
6. When the selected Call point has no measurable duration, the dialog shows the standard no-data state instead of an empty detail view.	Blocked	N	0
7. While Call details are loading, the dialog shows the standard loading state; when details are unavailable, it shows the standard no-data state; when loading fails, it shows the standard error state, with no incorrect Call data displayed.	Blocked	N	0

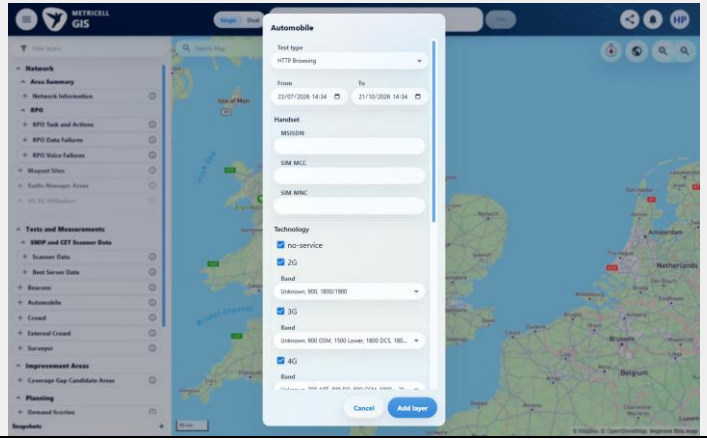

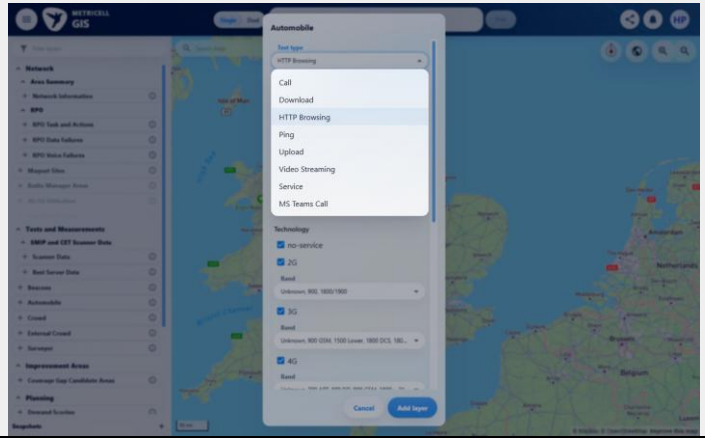

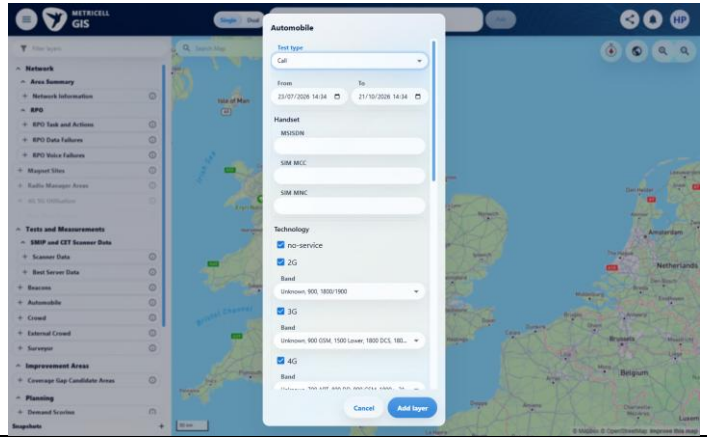

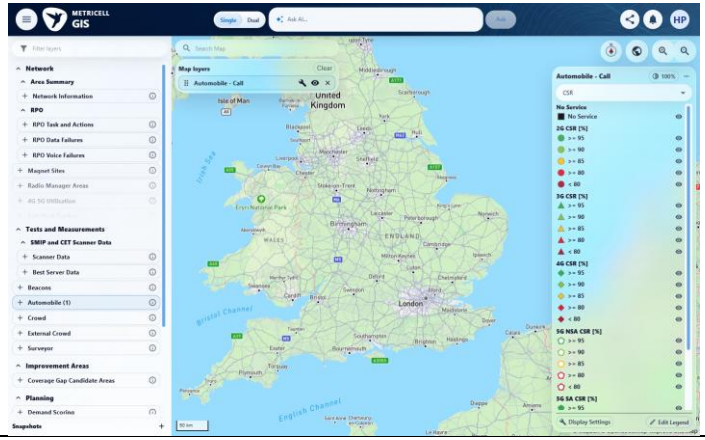

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

4.1 Tests

Preconditions:	V4 access and ticket conditions.	***Associated Requirements:***	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	When a completed Call test is opened in the shared point-detail dialog, its summary shows the available duration, test result, connection time, start time, end time, handset, and disconnection cause.	When a completed Call test is opened in the shared point-detail dialog, its summary shows the available duration, test result, connection time, start time, end time, handset, and disconnection cause.	criterion-1-call-config.png confirms Automobile > Call; criterion-1-final.png shows the Automobile - Call layer and legend without visible Call points or a detail dialog. Results record GET /api/platform/automobile/call/points HTTP 500, reproduced on a fresh load; this is unavailable point retrieval, not a settled empty response. Completed-record selection and summary fields could not be tested. Evidence: E01, E02, E03, E04	Blocked
Criterion 1 assessment: criterion-1-call-config.png confirms Automobile > Call; criterion-1-final.png shows the Automobile - Call layer and legend without visible Call points or a detail dialog. Results record GET /api/platform/automobile/call/points HTTP 500, reproduced on a fresh load; this is unavailable point retrieval, not a settled empty response. Completed-record selection and summary fields could not be tested. Testing notes: GET /api/platform/automobile/call/points returned HTTP 500 on the first normal load and again after a controlled fresh launcher/GIS load with Automobile > Call selected and the default 90-day range. This is a point-retrieval error, not a settled empty response or a Call detail-request failure. The map displayed the Automobile - Call layer and legend without selectable Call points; no on-screen HTTP error message was observed. Required Call records could not be obtained. No completed Call record was selectable, so the shared detail dialog and summary fields could not be checked.				

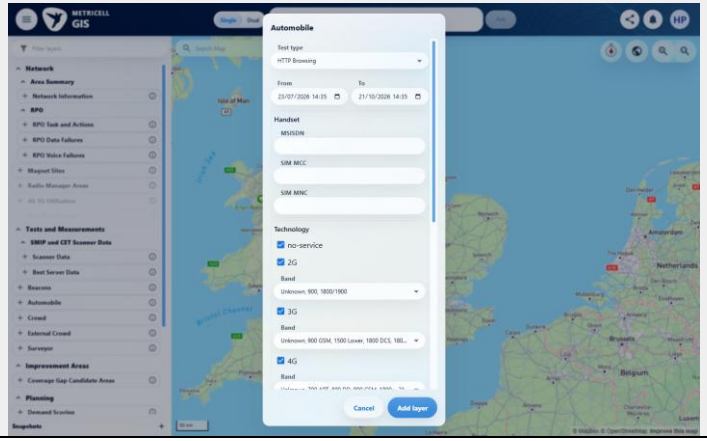

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 1 evidence: When a completed Call test is opened in the shared point-detail dialog, its summary shows the available duration, test result, connection time, start time, end time, handset, and disconnection cause. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E01 - Automobile config (criterion-1-automobile-config.png)**  **E02 - Test type choices (criterion-1-test-type-choices.png)** 				
Criterion 1 continued: When a completed Call test is opened in the shared point-detail dialog, its summary shows the available duration, test result, connection time, start time, end time, handset, and disconnection cause. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E03 - Call config (criterion-1-call-config.png)**  **E04 - Final (criterion-1-final.png)** 				

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
2.0.0	When Call samples are returned, the timeline chart shows call state, service technology, and signal strength across the test duration.	When Call samples are returned, the timeline chart shows call state, service technology, and signal strength across the test duration.	criterion-2-call-config-selected.png confirms Automobile > Call; criterion-2-final.png shows the Automobile - Call layer and legend without visible Call points or a detail dialog. Results record GET /api/platform/automobile/call/points HTTP 500, reproduced on a fresh load; this is unavailable point retrieval, not a settled empty response. No record or samples were available to test timeline state, technology or signal strength. Evidence: E05, E06, E07, E04	Blocked

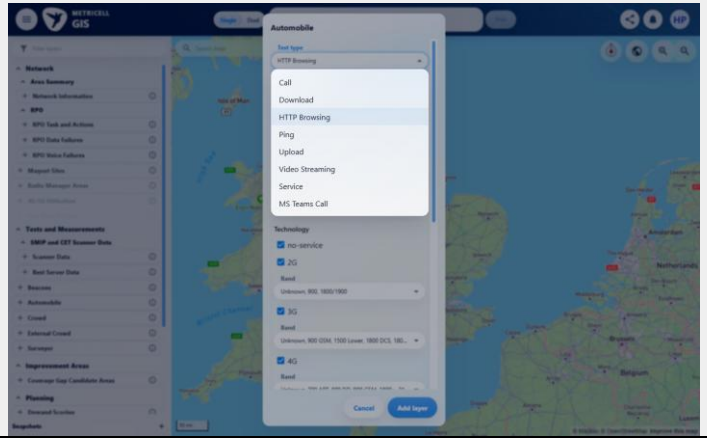

Criterion 2 assessment: criterion-2-call-config-selected.png confirms Automobile > Call; criterion-2-final.png shows the Automobile - Call layer and legend without visible Call points or a detail dialog. Results record GET /api/platform/automobile/call/points HTTP 500, reproduced on a fresh load; this is unavailable point retrieval, not a settled empty response. No record or samples were available to test timeline state, technology or signal strength.
Testing notes: GET /api/platform/automobile/call/points returned HTTP 500 on the first normal load and again after a controlled fresh launcher/GIS load with Automobile > Call selected and the default 90-day range. This is a point-retrieval error, not a settled empty response or a Call detail-request failure. The map displayed the Automobile - Call layer and legend without selectable Call points; no on-screen HTTP error message was observed. Required Call records could not be obtained. No Call record or samples could be retrieved, so the timeline could not be checked.

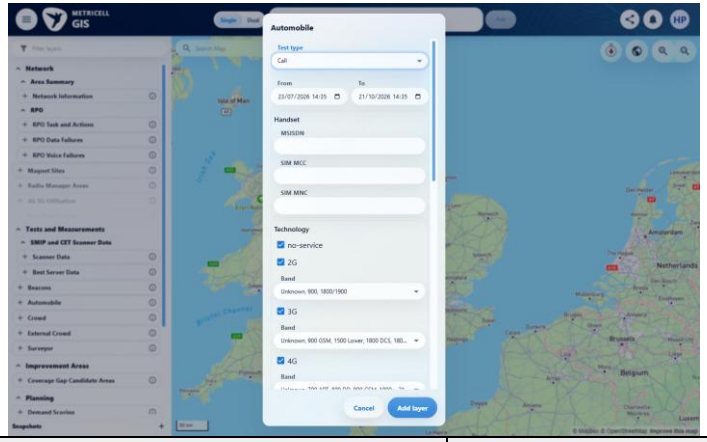

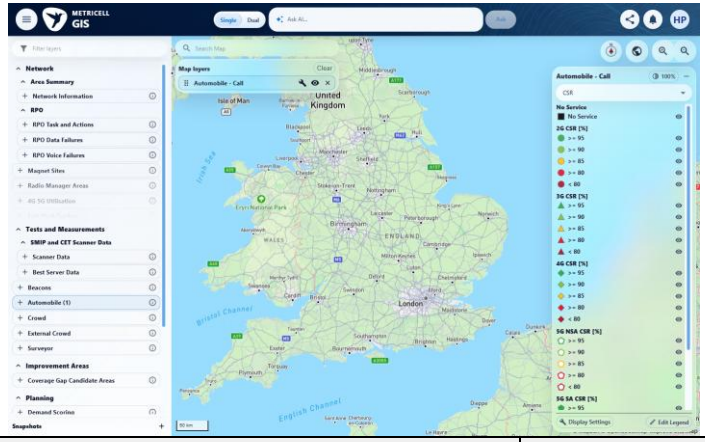

Criterion 2 evidence: When Call samples are returned, the timeline chart shows call state, service technology, and signal strength across the test duration.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

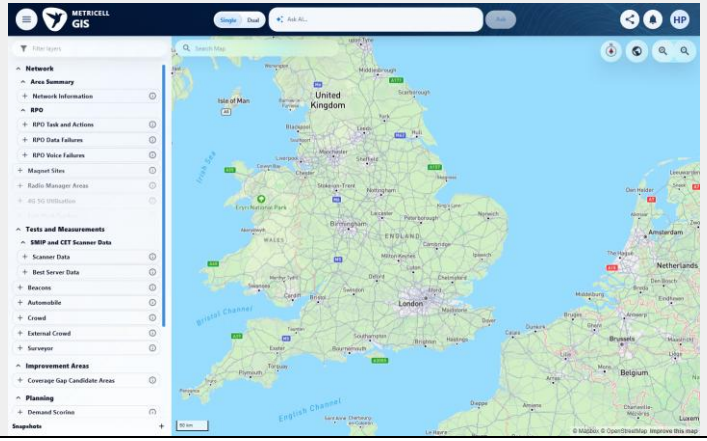

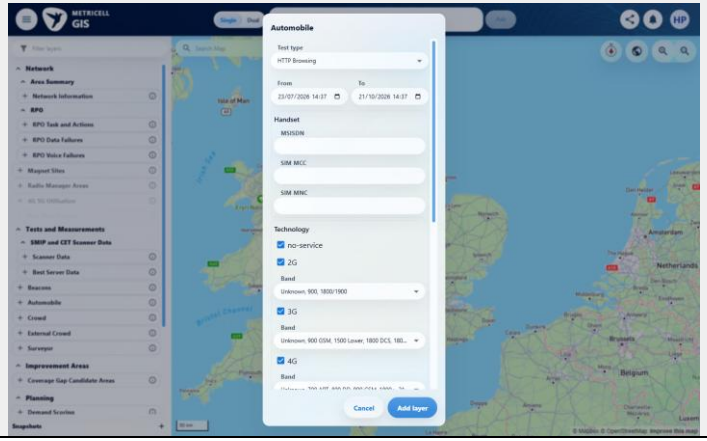

E05 - Automobile config (criterion-2-automobile-config.png)

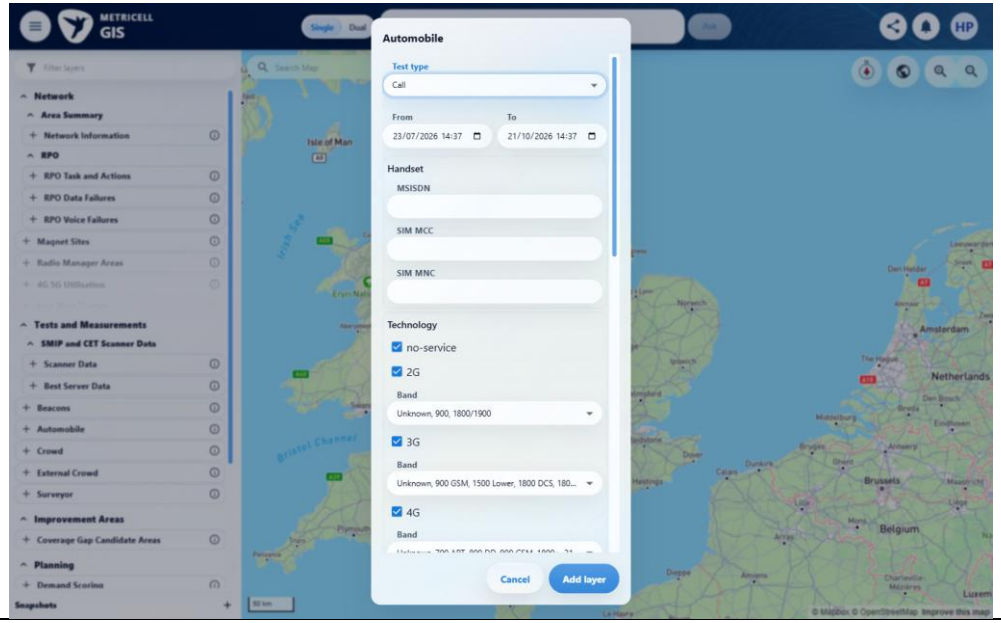

E06 - Test type choices (criterion-2-test-type-choices.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 2 continued: When Call samples are returned, the timeline chart shows call state, service technology, and signal strength across the test duration. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E07 - Call config selected (criterion-2-call-config-selected.png)**  **E04 - Final (criterion-2-final.png)** 				
3.0.0	When Call samples are returned, the dialog displays them in a table whose columns can be sorted and filtered.	When Call samples are returned, the dialog displays them in a table whose columns can be sorted and filtered.	criterion-3-final.png confirms Automobile > Call configuration, not a detail dialog. Testing stopped at the shared prerequisite: results record GET /api/platform/automobile/call/points HTTP 500 on the first and controlled fresh loads. No samples were available to exercise table sorting and filtering. Evidence: E08, E09, E10	Blocked
Criterion 3 assessment: criterion-3-final.png confirms Automobile > Call configuration, not a detail dialog. Testing stopped at the shared prerequisite: results record GET /api/platform/automobile/call/points HTTP 500 on the first and controlled fresh loads. No samples were available to exercise table sorting and filtering. Testing notes: GET /api/platform/automobile/call/points returned HTTP 500 on the first normal load and again after a controlled fresh launcher/GIS load with Automobile > Call selected and the default 90-day range. This is a point-retrieval error, not a settled empty response or a Call detail-request failure. The map displayed the Automobile - Call layer and legend without selectable Call points; no on-screen HTTP error message was observed. Required Call records could not be obtained. No Call record or samples could be retrieved, so table sorting/filtering could not be exercised. The final PNG records the inspected Automobile > Call scope at the blocked boundary; it does not show a detail dialog.				

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 3 evidence: When Call samples are returned, the dialog displays them in a table whose columns can be sorted and filtered. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E08 - Before automobile config (criterion-3-before-automobile-config.png)**  **E09 - Automobile config (criterion-3-automobile-config.png)** 				

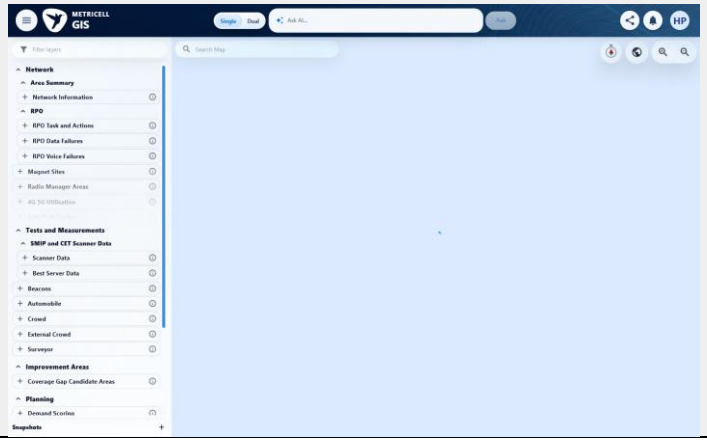

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 3 continued: When Call samples are returned, the dialog displays them in a table whose columns can be sorted and filtered. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E10 - Final (criterion-3-final.png)** 				

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
4.0.0	For each displayed Call sample, the Serving Cell column shows the known serving site/cell when available; when it is unavailable, it shows that sample's CGI.	For each displayed Call sample, the Serving Cell column shows the known serving site/cell when available; when it is unavailable, it shows that sample's CGI.	criterion-4-final.png confirms Automobile > Call configuration, not a detail dialog. Testing stopped at the shared prerequisite: results record GET /api/platform/automobile/call/points HTTP 500 on the first and controlled fresh loads. No samples were available to check known Serving Cell values or CGI fallback. The before-configuration capture still shows GIS loading; later configuration captures show the map, not a Call detail state. Evidence: E11, E09, E10	Blocked

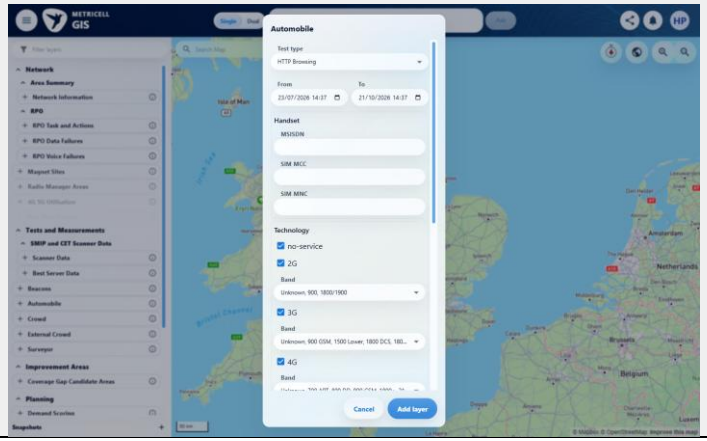

Criterion 4 assessment: criterion-4-final.png confirms Automobile > Call configuration, not a detail dialog. Testing stopped at the shared prerequisite: results record GET /api/platform/automobile/call/points HTTP 500 on the first and controlled fresh loads. No samples were available to check known Serving Cell values or CGI fallback. The before-configuration capture still shows GIS loading; later configuration captures show the map, not a Call detail state.
Testing notes: GET /api/platform/automobile/call/points returned HTTP 500 on the first normal load and again after a controlled fresh launcher/GIS load with Automobile > Call selected and the default 90-day range. This is a point-retrieval error, not a settled empty response or a Call detail-request failure. The map displayed the Automobile - Call layer and legend without selectable Call points; no on-screen HTTP error message was observed. Required Call records could not be obtained. No Call samples could be retrieved, so known Serving Cell and CGI fallback values could not be checked. The final PNG records the inspected Automobile > Call scope at the blocked boundary; it does not show a detail dialog.

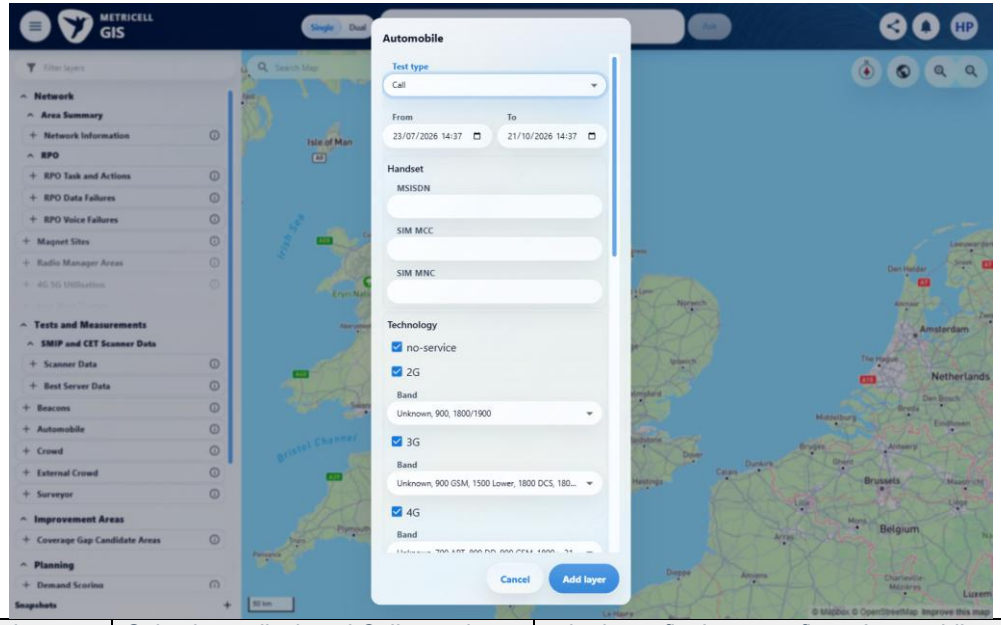

Criterion 4 evidence: For each displayed Call sample, the Serving Cell column shows the known serving site/cell when available; when it is unavailable, it shows that sample's CGI.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

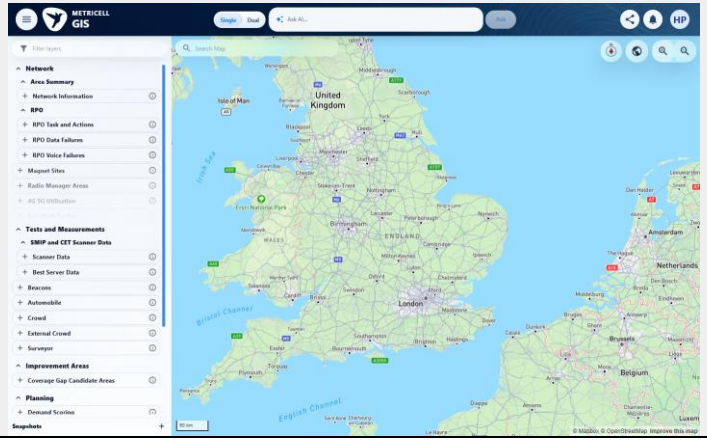

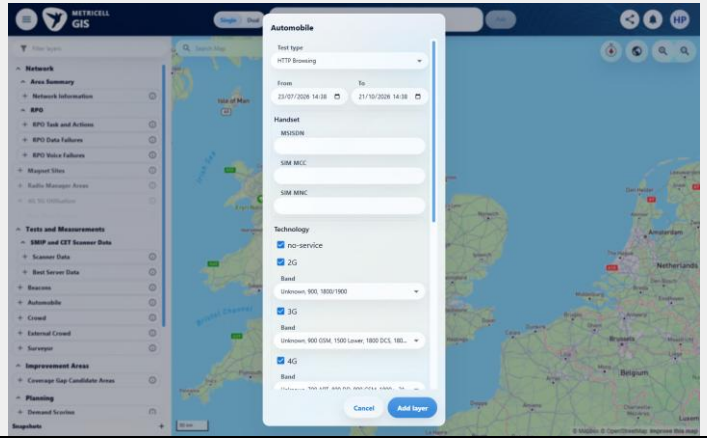

E11 - Before automobile config (criterion-4-before-automobile-config.png)

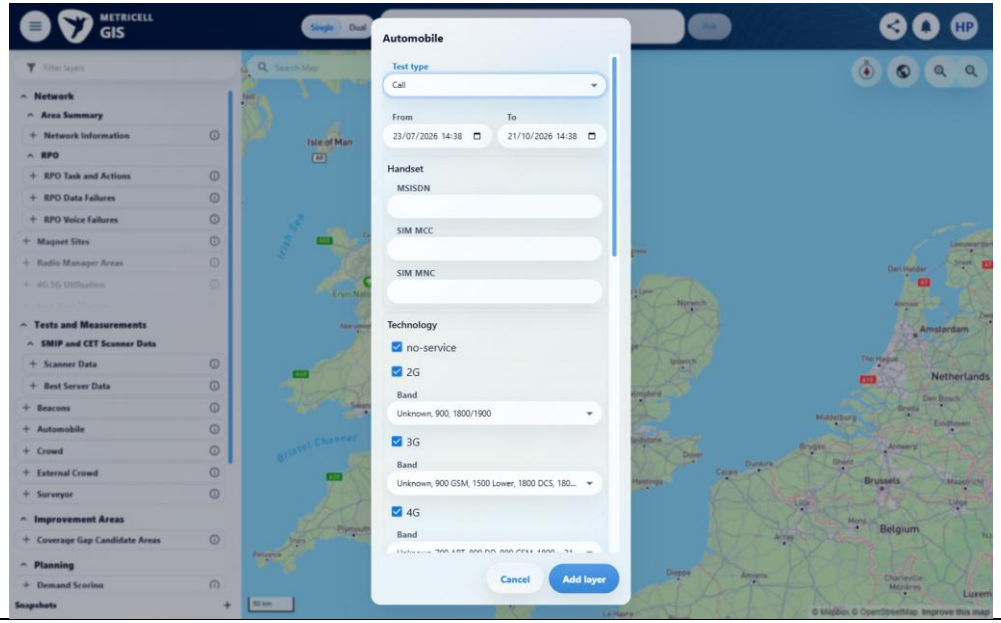

E09 - Automobile config (criterion-4-automobile-config.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 4 continued: For each displayed Call sample, the Serving Cell column shows the known serving site/cell when available; when it is unavailable, it shows that sample's CGI. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E10 - Final (criterion-4-final.png)** 				
5.0.0	Selecting a displayed Call sample opens the related Service details for the selected sample's point in time.	Selecting a displayed Call sample opens the related Service details for the selected sample's point in time.	criterion-5-final.png confirms Automobile > Call configuration, not a detail dialog. Testing stopped at the shared prerequisite: results record GET /api/platform/automobile/call/points HTTP 500 on the first and controlled fresh loads. No sample could be selected to verify Service details at its timestamp. Evidence: E08, E12, E13	Blocked
Criterion 5 assessment: criterion-5-final.png confirms Automobile > Call configuration, not a detail dialog. Testing stopped at the shared prerequisite: results record GET /api/platform/automobile/call/points HTTP 500 on the first and controlled fresh loads. No sample could be selected to verify Service details at its timestamp. Testing notes: GET /api/platform/automobile/call/points returned HTTP 500 on the first normal load and again after a controlled fresh launcher/GIS load with Automobile > Call selected and the default 90-day range. This is a point-retrieval error, not a settled empty response or a Call detail-request failure. The map displayed the Automobile - Call layer and legend without selectable Call points; no on-screen HTTP error message was observed. Required Call records could not be obtained. No Call sample could be selected, so related Automobile Service details at its timestamp could not be opened. The final PNG records the inspected Automobile > Call scope at the blocked boundary; it does not show a detail dialog.				

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 5 evidence: Selecting a displayed Call sample opens the related Service details for the selected sample's point in time. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E08 - Before automobile config (criterion-5-before-automobile-config.png)**  **E12 - Automobile config (criterion-5-automobile-config.png)** 				

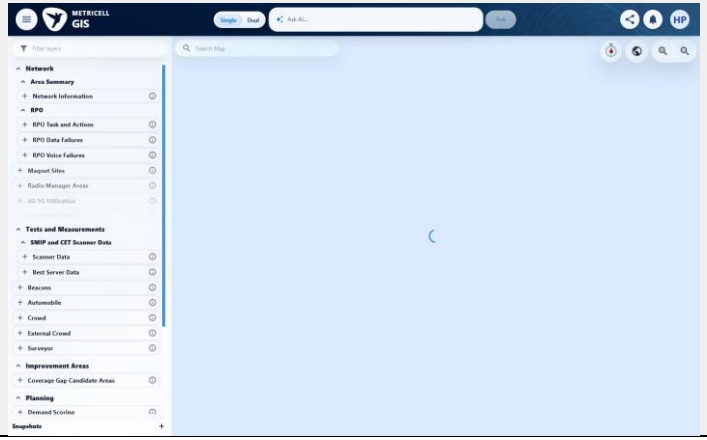

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 5 continued: Selecting a displayed Call sample opens the related Service details for the selected sample's point in time. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E13 - Final (criterion-5-final.png)** 				

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
6.0.0	When the selected Call point has no measurable duration, the dialog shows the standard no-data state instead of an empty detail view.	When the selected Call point has no measurable duration, the dialog shows the standard no-data state instead of an empty detail view.	criterion-6-final.png confirms Automobile > Call configuration, not a detail dialog. Testing stopped at the shared prerequisite: results record GET /api/platform/automobile/call/points HTTP 500 on the first and controlled fresh loads. No zero-duration record could be selected to verify the dialog's no-data state. The before-configuration capture still shows GIS loading; later configuration captures show the map, not a Call detail state. Evidence: E14, E15, E16	Blocked

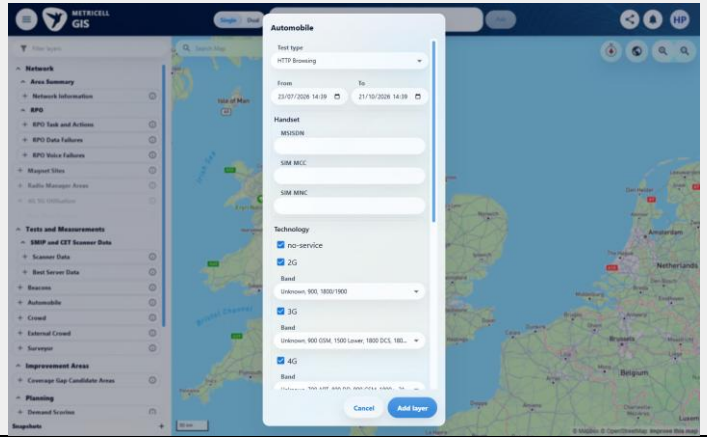

Criterion 6 assessment: criterion-6-final.png confirms Automobile > Call configuration, not a detail dialog. Testing stopped at the shared prerequisite: results record GET /api/platform/automobile/call/points HTTP 500 on the first and controlled fresh loads. No zero-duration record could be selected to verify the dialog's no-data state. The before-configuration capture still shows GIS loading; later configuration captures show the map, not a Call detail state.
Testing notes: GET /api/platform/automobile/call/points returned HTTP 500 on the first normal load and again after a controlled fresh launcher/GIS load with Automobile > Call selected and the default 90-day range. This is a point-retrieval error, not a settled empty response or a Call detail-request failure. The map displayed the Automobile - Call layer and legend without selectable Call points; no on-screen HTTP error message was observed. Required Call records could not be obtained. No zero-duration Call record could be selected, so the detail dialog's no-data behavior could not be checked. The final PNG records the inspected Automobile > Call scope at the blocked boundary; it does not show a detail dialog.

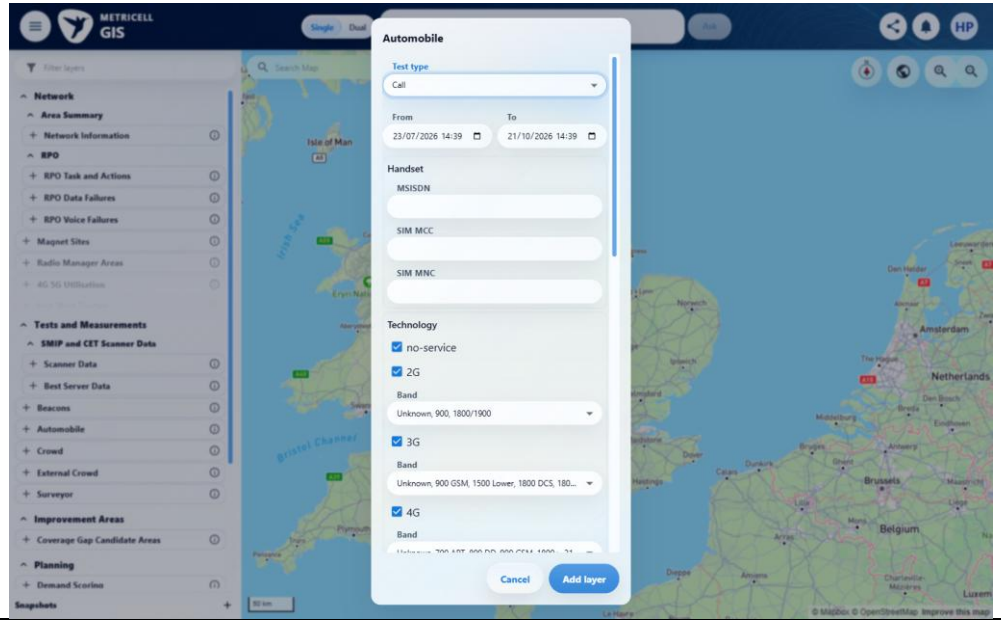

Criterion 6 evidence: When the selected Call point has no measurable duration, the dialog shows the standard no-data state instead of an empty detail view.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E14 - Before automobile config (criterion-6-before-automobile-config.png)

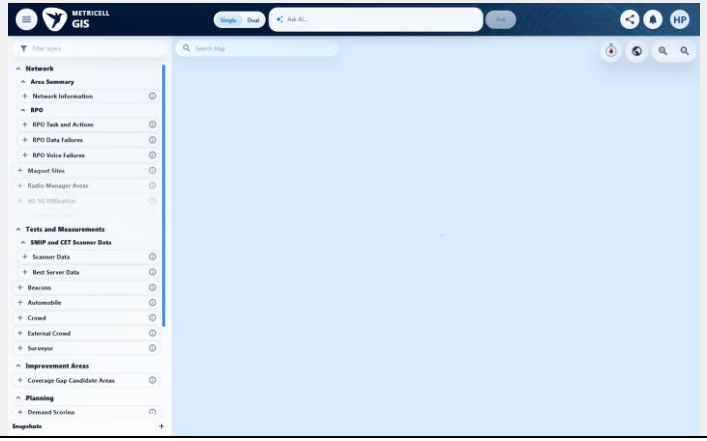

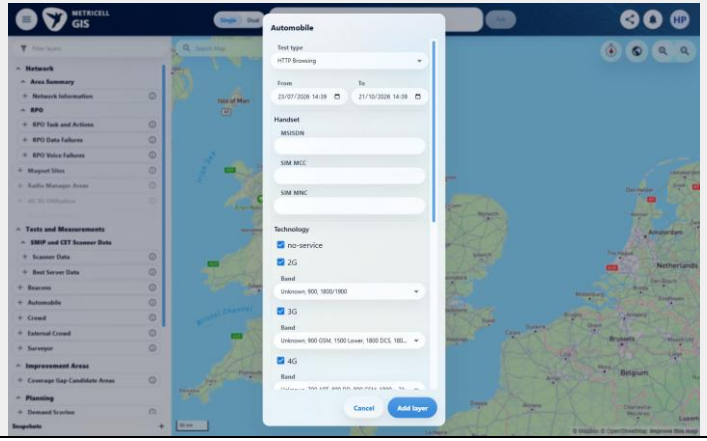

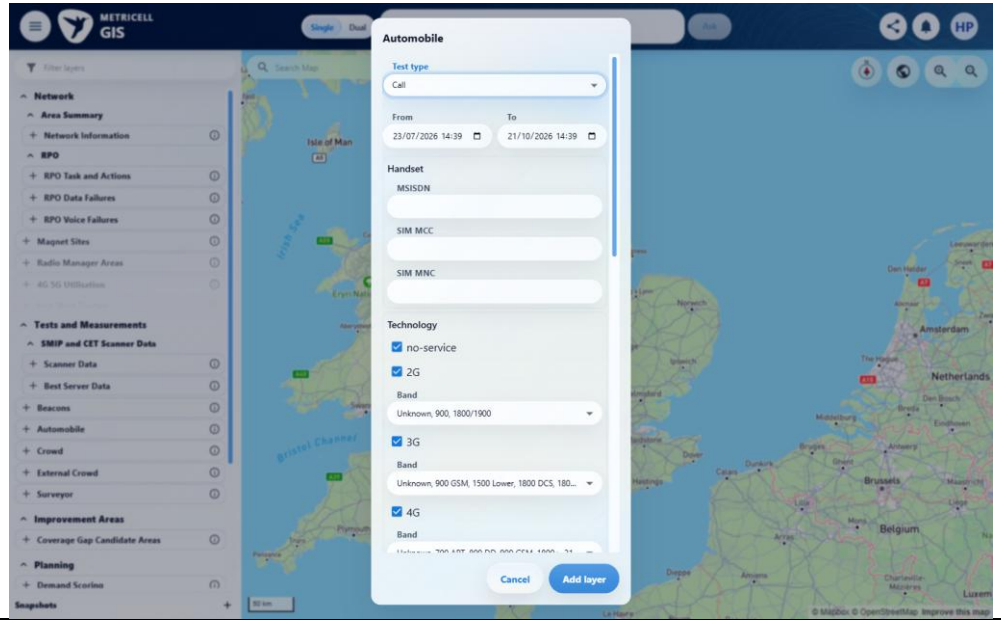

E15 - Automobile config (criterion-6-automobile-config.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 6 continued: When the selected Call point has no measurable duration, the dialog shows the standard no-data state instead of an empty detail view. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E16 - Final (criterion-6-final.png)** 				

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
7.0.0	While Call details are loading, the dialog shows the standard loading state; when details are unavailable, it shows the standard no-data state; when loading fails, it shows the standard error state, with no incorrect Call data displayed.	While Call details are loading, the dialog shows the standard loading state; when details are unavailable, it shows the standard no-data state; when loading fails, it shows the standard error state, with no incorrect Call data displayed.	criterion-7-final.png confirms Automobile > Call configuration, not a detail dialog. Testing stopped at the shared prerequisite: results record GET /api/platform/automobile/call/points HTTP 500 on the first and controlled fresh loads. No detail request was established to test loading, no-data, error or stale-data handling; the points failure does not prove a detail-error state. No simulation was used. The before-configuration capture still shows GIS loading; later configuration captures show the map, not a Call detail state. Evidence: E17, E15, E16	Blocked
Criterion 7 assessment: criterion-7-final.png confirms Automobile > Call configuration, not a detail dialog. Testing stopped at the shared prerequisite: results record GET /api/platform/automobile/call/points HTTP 500 on the first and controlled fresh loads. No detail request was established to test loading, no-data, error or stale-data handling; the points failure does not prove a detail-error state. No simulation was used. The before-configuration capture still shows GIS loading; later configuration captures show the map, not a Call detail state. Testing notes: GET /api/platform/automobile/call/points returned HTTP 500 on the first normal load and again after a controlled fresh launcher/GIS load with Automobile > Call selected and the default 90-day range. This is a point-retrieval error, not a settled empty response or a Call detail-request failure. The map displayed the Automobile - Call layer and legend without selectable Call points; no on-screen HTTP error message was observed. Required Call records could not be obtained. No Call record/detail request could be established, so detail loading, unavailable and error states could not be tested. The failing points request is not the detail endpoint. No simulation was installed. The final PNG records the inspected Automobile > Call scope at the blocked boundary; it does not show a detail dialog.			

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 7 evidence: While Call details are loading, the dialog shows the standard loading state; when details are unavailable, it shows the standard no-data state; when loading fails, it shows the standard error state, with no incorrect Call data displayed. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E17 - Before automobile config (criterion-7-before-automobile-config.png)**  **E15 - Automobile config (criterion-7-automobile-config.png)** 				

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 7 continued: While Call details are loading, the dialog shows the standard loading state; when details are unavailable, it shows the standard no-data state; when loading fails, it shows the standard error state, with no incorrect Call data displayed. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E16 - Final (criterion-7-final.png)**

Better Connected

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.

Find out more at www.metricell.com
