1 Revision History

Version	Date	Revision Author	Summary of Changes
[1.0]	09/10/2026	TEST2 QA Automation	Generated from TEST2 evidence review

2 Test Cycle Information

Tester:	**Automated**
Jira Ticket:	TEST2-68
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 155.0.8059.40
Date of Test:	09/10/2026
Limitations during Testing:	Criterion 1: Direct criterion-specific screenshots and browser observations support this result. The pre-existing coverage-gap data panel displayed Unable to load coverage gap candidate areas throughout; it did not prevent catalogue search, Surveyor configuration or baseline restoration. Defects (No.) counts directly contradicted criteria, not unique Jira bugs; blockers and inconclusive evidence count as zero.
Overall review outcome:	Passed
Browser URL(s) recorded after criteria:	https://o2intelligence-v4-dev.metricell.com/gis

3 Test Summary

Area of test	Pass	Fail	Defects (No.)
1. Starting in GIS with Search layers empty and the recorded baseline visible, enter zzqa_no_match_batch_20261009 in Search layers; the entered text remains visible, no matching catalogue entries are displayed, and the GIS map remains available.	Y	N	0
2. Replace the no-match Search layers text with Surveyor without reloading GIS; a matching Surveyor catalogue entry becomes visible.	Y	N	0

Area of test	Pass	Fail	Defects (No.)
3. With the filtered Surveyor catalogue entry visible, open its configuration control; the Surveyor configuration displays Username, Cancel, and Add layer controls.	Y	N	0
4. Select Cancel and clear Search layers; the original catalogue entries return, the existing Map layers entries and order and the map view match the recorded baseline, and no new layer is present.	Y	N	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

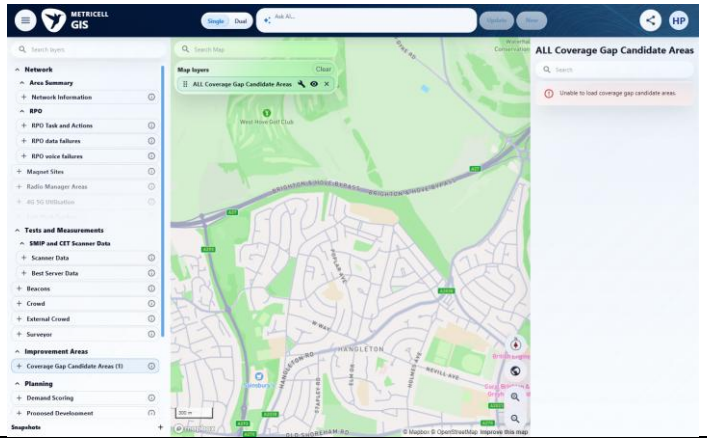

4.1 Tests

Preconditions:	V4 access and ticket conditions.	***Associated Requirements:***	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.

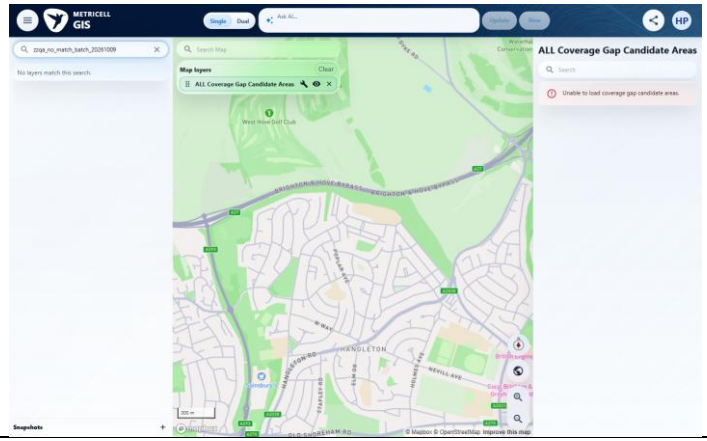

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	Starting in GIS with Search layers empty and the recorded baseline visible, enter zzqa_no_match_batch_20261009 in Search layers; the entered text remains visible, no matching catalogue entries are displayed, and the GIS map remains available.	Starting in GIS with Search layers empty and the recorded baseline visible, enter zzqa_no_match_batch_20261009 in Search layers; the entered text remains visible, no matching catalogue entries are displayed, and the GIS map remains available.	The criterion-owned baseline shows empty Search layers and the catalogue; the subsequent capture shows zzqa_no_match_batch_20261009 retained, no matching layers and the rendered map still available. The browser-derived URL records the required GIS destination. Evidence: E01, E02	Passed

Criterion 1 evidence: Starting in GIS with Search layers empty and the recorded baseline visible, enter zzqa_no_match_batch_20261009 in Search layers; the entered text remains visible, no matching catalogue entries are displayed, and the GIS map remains available.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E01 - Before no match (criterion-1-before-no-match.png)

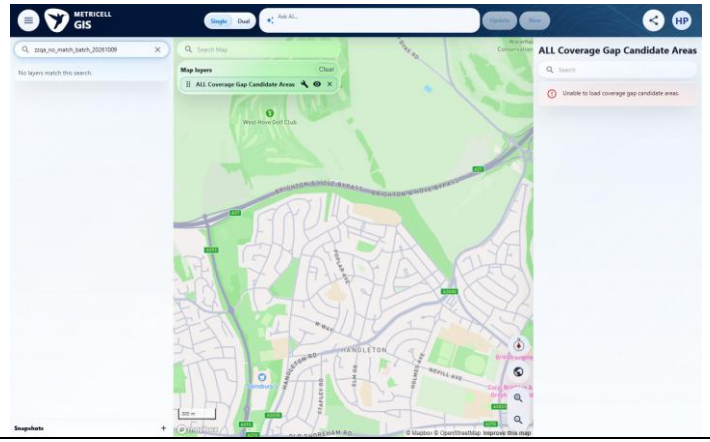

E02 - Final (criterion-1-final.png)

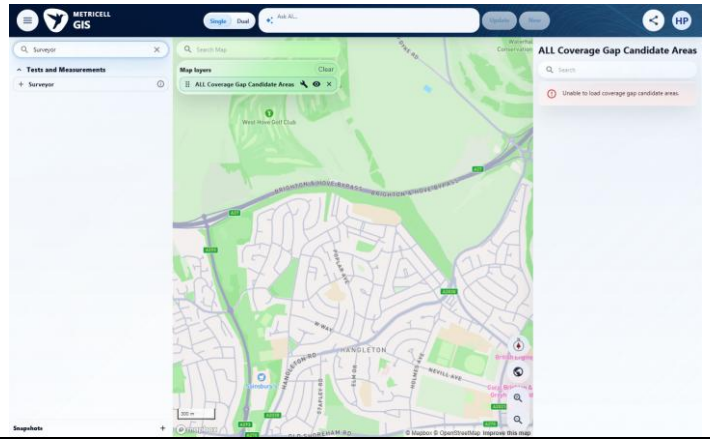

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
2.0.0	Replace the no-match Search layers text with Surveyor without reloading GIS; a matching Surveyor catalogue entry becomes visible.	Replace the no-match Search layers text with Surveyor without reloading GIS; a matching Surveyor catalogue entry becomes visible.	The criterion-owned sequence shows the no-match text and empty catalogue followed by Surveyor in Search layers and a matching Surveyor entry. Recorded steps confirm replacement without navigation or reload, with the browser-derived URL remaining on GIS. Evidence: E03, E04, E05	Passed

Criterion 2 evidence: Replace the no-match Search layers text with Surveyor without reloading GIS; a matching Surveyor catalogue entry becomes visible.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

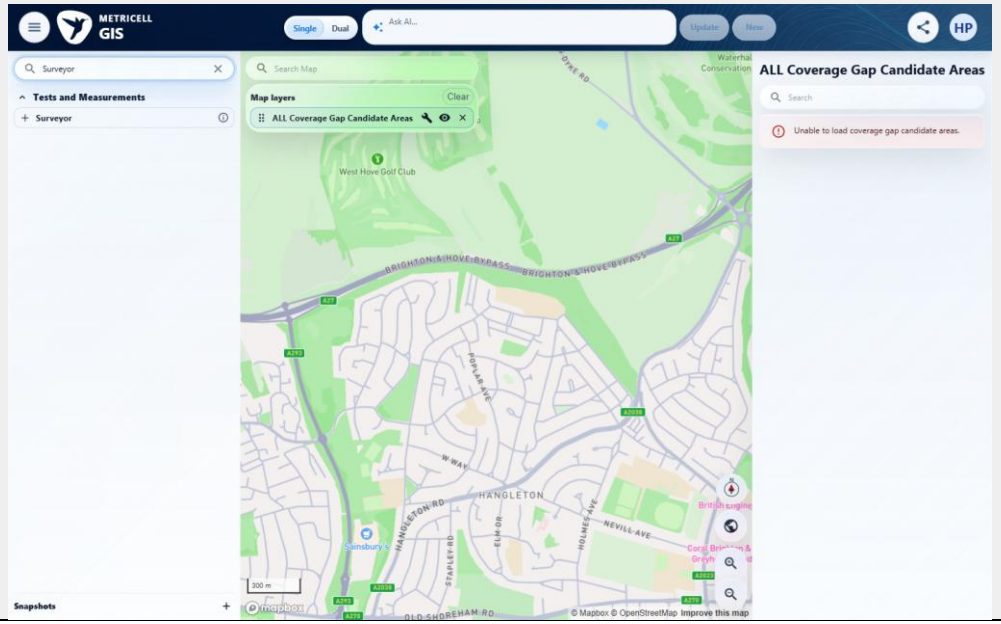

E03 - After no match before replace (criterion-2-after-no-match-before-replace.png)

E04 - After replace (criterion-2-after-replace.png)

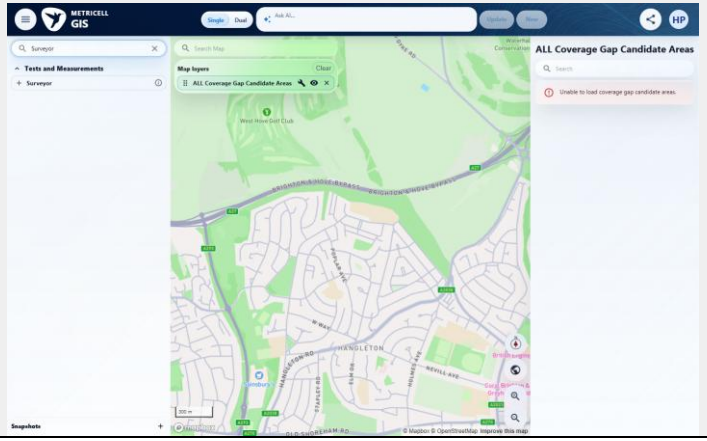

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 2 continued: Replace the no-match Search layers text with Surveyor without reloading GIS; a matching Surveyor catalogue entry becomes visible. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E05 - Final (criterion-2-final.png)**				

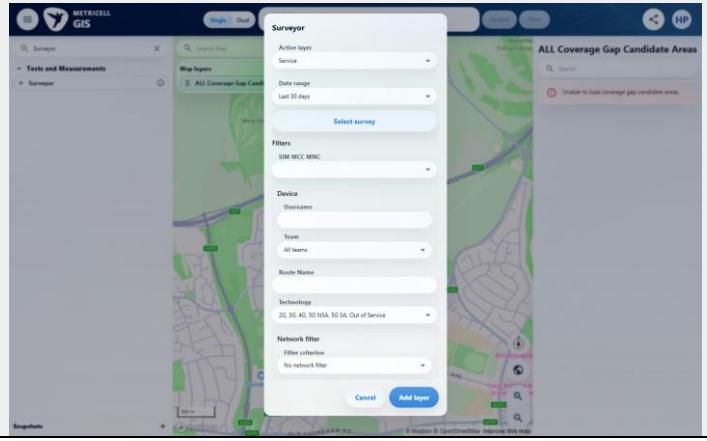

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
3.0.0	With the filtered Surveyor catalogue entry visible, open its configuration control; the Surveyor configuration displays Username, Cancel, and Add layer controls.	With the filtered Surveyor catalogue entry visible, open its configuration control; the Surveyor configuration displays Username, Cancel, and Add layer controls.	The criterion-owned recovery sequence shows the filtered Surveyor entry followed by its open configuration, with Username, Cancel and Add layer all visibly present. Evidence: E04, E06	Passed

Criterion 3 evidence: With the filtered Surveyor catalogue entry visible, open its configuration control; the Surveyor configuration displays Username, Cancel, and Add layer controls.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E04 - After replace before open (criterion-3-after-replace-before-open.png)

E06 - Final (criterion-3-final.png)

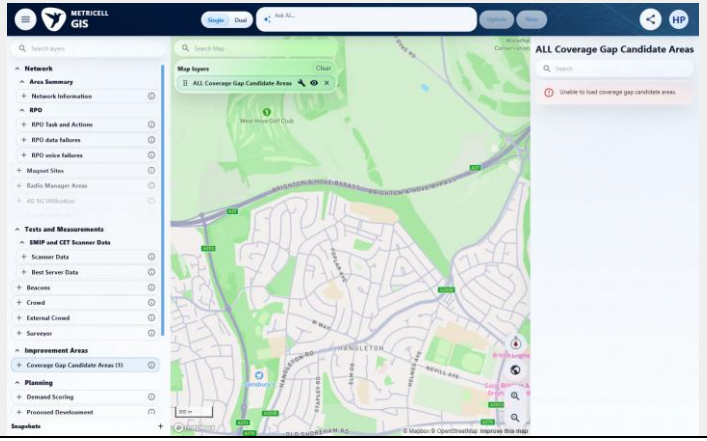

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
4.0.0	Select Cancel and clear Search layers; the original catalogue entries return, the existing Map layers entries and order and the map view match the recorded baseline, and no new layer is present.	Select Cancel and clear Search layers; the original catalogue entries return, the existing Map layers entries and order and the map view match the recorded baseline, and no new layer is present.	The criterion-owned sequence shows the baseline, no-match search, recovered Surveyor entry, open configuration, closed configuration after Cancel and empty search after clearing. The restored catalogue matches baseline; ALL Coverage Gap Candidate Areas remains the sole map layer, with matching landmarks and 300 m scale and no added layer or dialog. Evidence: E07, E06, E08, E09	Passed

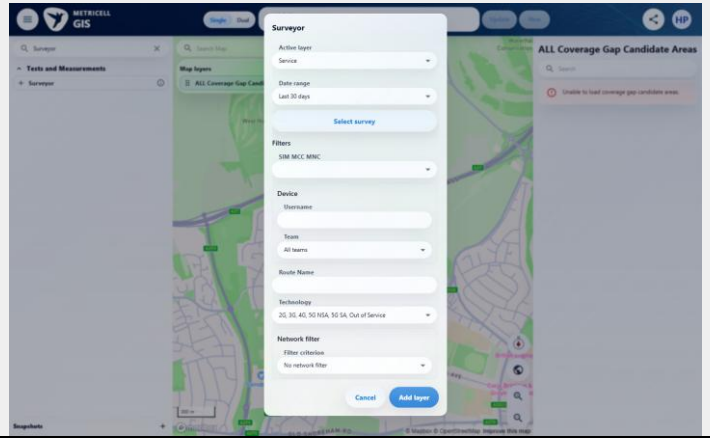

Criterion 4 evidence: Select Cancel and clear Search layers; the original catalogue entries return, the existing Map layers entries and order and the map view match the recorded baseline, and no new layer is present.

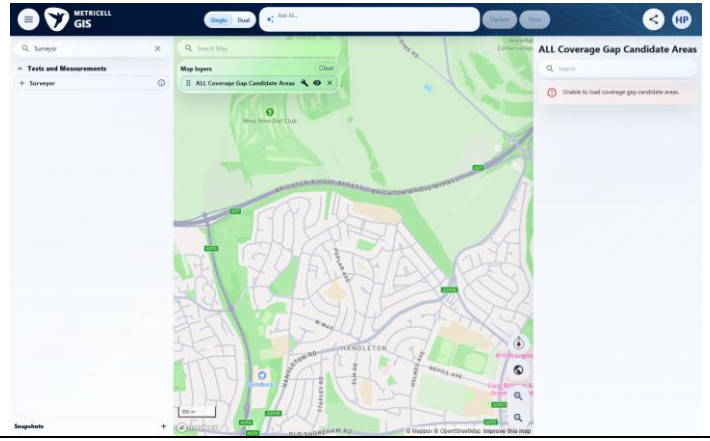

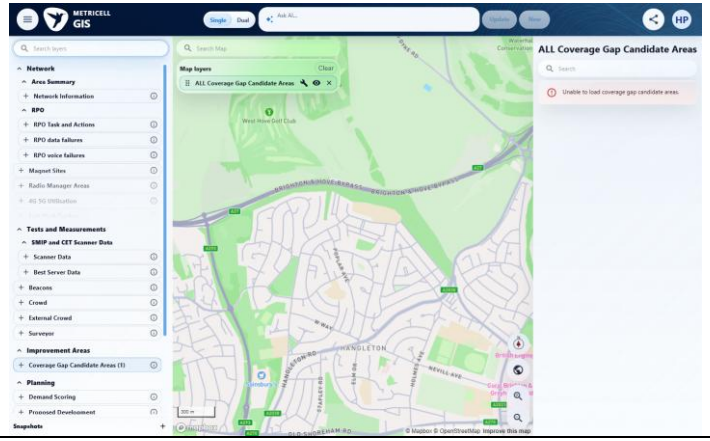

Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E07 - Baseline before no match (criterion-4-baseline-before-no-match.png)

E06 - After open before cancel (criterion-4-after-open-before-cancel.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 4 continued: Select Cancel and clear Search layers; the original catalogue entries return, the existing Map layers entries and order and the map view match the recorded baseline, and no new layer is present. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E08 - After cancel before clear (criterion-4-after-cancel-before-clear.png)**  **E09 - Final (criterion-4-final.png)**

Better Connected

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
