About Metricell28

Version	Date	Revision Author	Summary of Changes
[1.0]	30/09/2026	TEST2 QA Automation	Generated from TEST2 evidence review

Tester:	Automated
Jira Ticket:	TEST2-47
Environment:	Chrome
Browser Details:	Chrome version not recorded
Date of Test:	30/09/2026
Limitations during Testing:	None recorded

Area of test	Pass	Fail	Defects (No.)
1. With a Surveyor layer loaded in V4 GIS, the layer's legend displays a `Display Settings` control directly beneath it.	Y	N	0
2. With a Surveyor layer loaded, the Display Settings control exposes the active legend/colouring option and the `Show Linked Sites` option.	Y	N	0
3. When linked sites are enabled and the zoom prerequisite is satisfied, the Display Settings control exposes `Show Linked Cells`; when either prerequisite is not satisfied, `Show Linked Cells` is unavailable.	N	Y	1

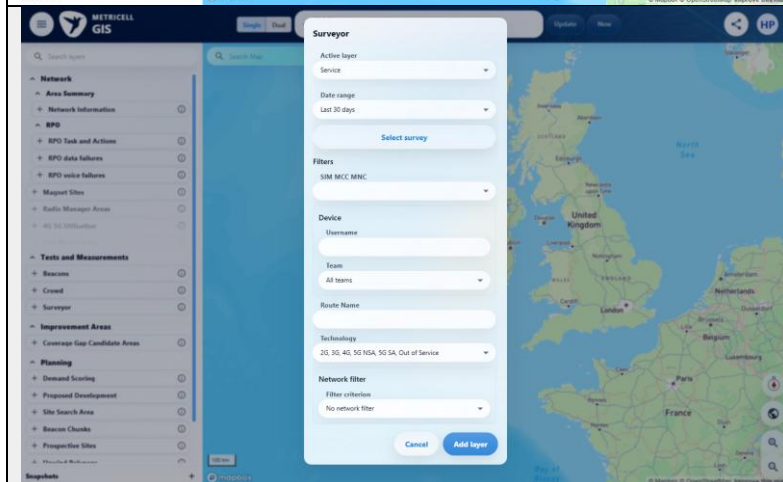

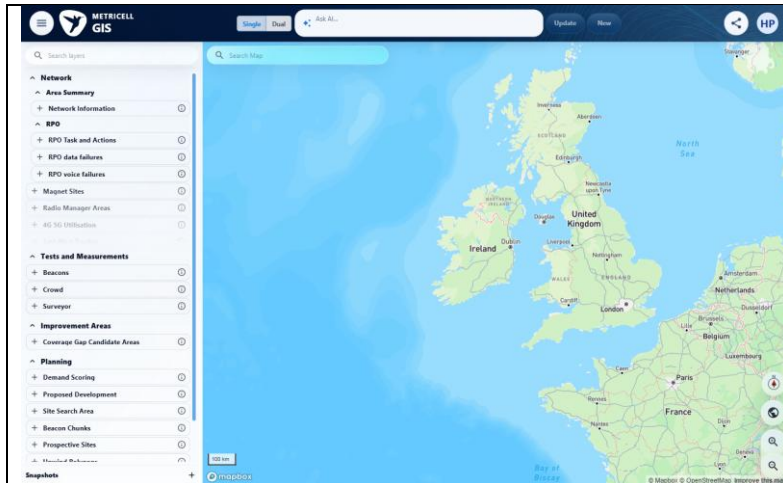

4. When the active legend is `Band` and linked sites are shown, the Display Settings control exposes `Colour Point Links By Azimuth/Band`; for another legend or with linked sites hidden, that control is unavailable.	N	Y	1
5. When the active legend is `Building`, the Display Settings control exposes `Show Labels`; for another legend, `Show Labels` is unavailable.	N	N	0
6. The Surveyor Display Settings control does not expose a `Sector` option.	Y	N	0
7. After changing an available presentation setting, the Surveyor layer's underlying filtered result set remains unchanged while the selected presentation setting is reflected in the layer display.	N	N	0
8. After changing Surveyor presentation settings, restoring the GIS to its normal saved/restored state retains those settings and their corresponding layer display.	Y	N	0

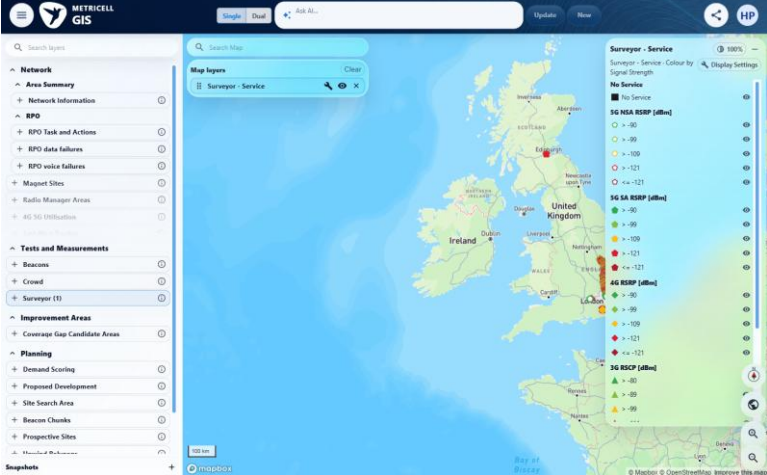

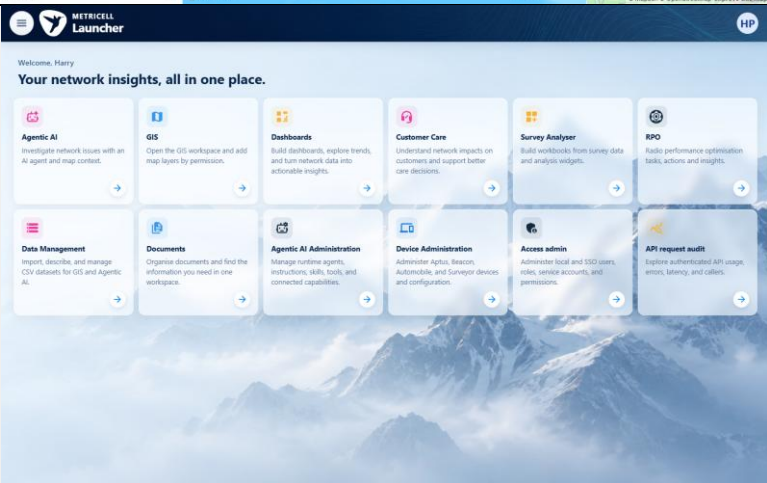

All automated tests must map to an approved criterion and produce reproducible results plus decisive evidence. Use Failed, Blocked, or Unverified where applicable.

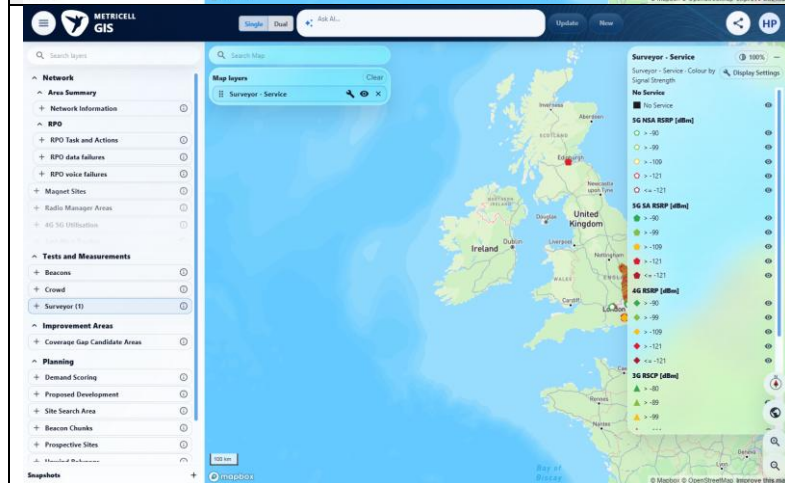

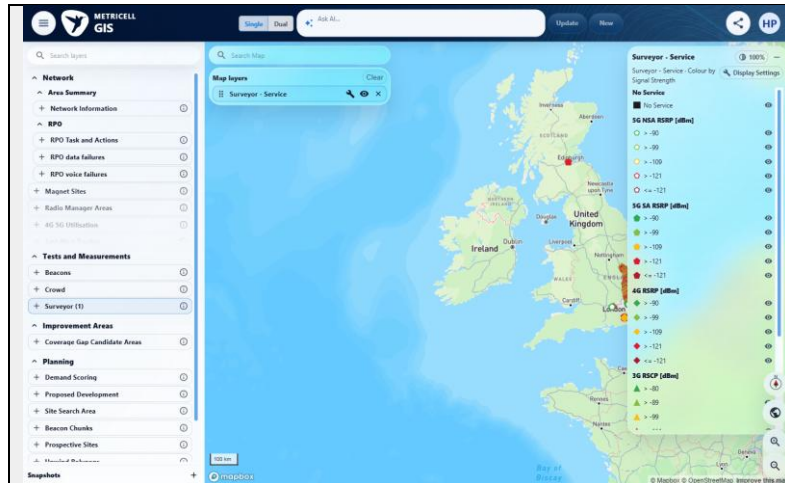

4.1 Tests

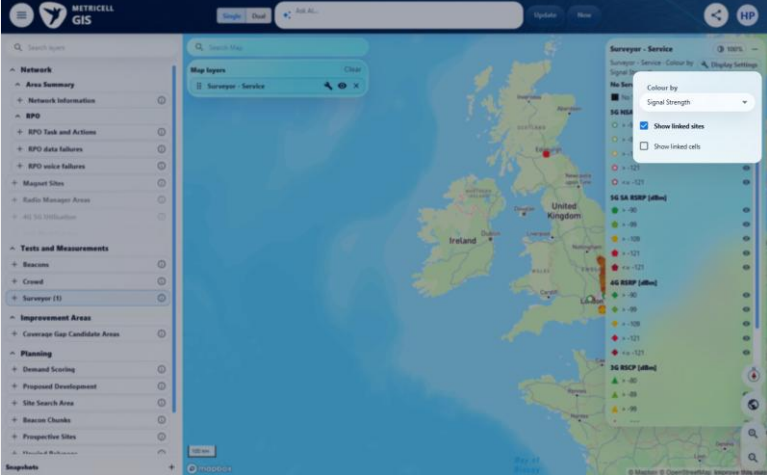

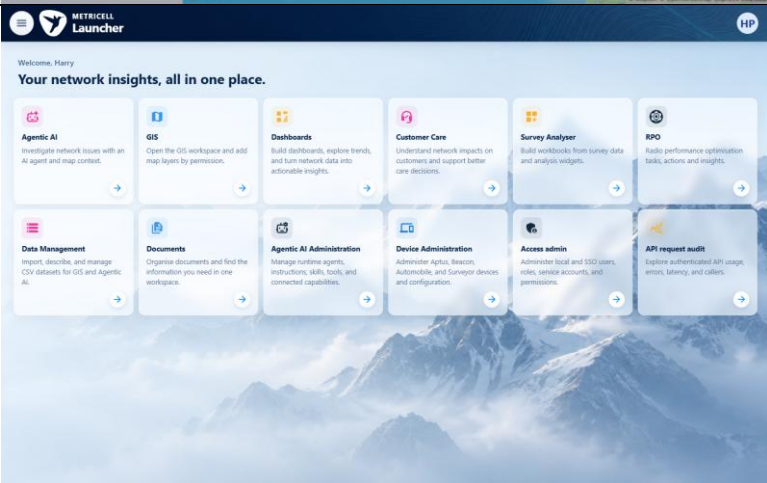

Preconditions:	Not recorded in agent output.	Associated Requirements:	Criteria from criteria.md.	Automation Notes:	Automated browser run; PNG evidence reviewed.

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	With a Surveyor layer loaded in V4 GIS, the layer's legend displays a `Display Settings` control directly beneath it.	With a Surveyor layer loaded in V4 GIS, the layer's legend displays a `Display Settings` control directly beneath it.	The selected attempt screenshots show a loaded Surveyor - Service layer and its Display Settings control in the layer legend panel. Steps taken: Started from the launcher and opened GIS.; Added the Surveyor layer using its default Service configuration.; Observed the Display Settings control directly under the Surveyor legend.	Passed

				
				
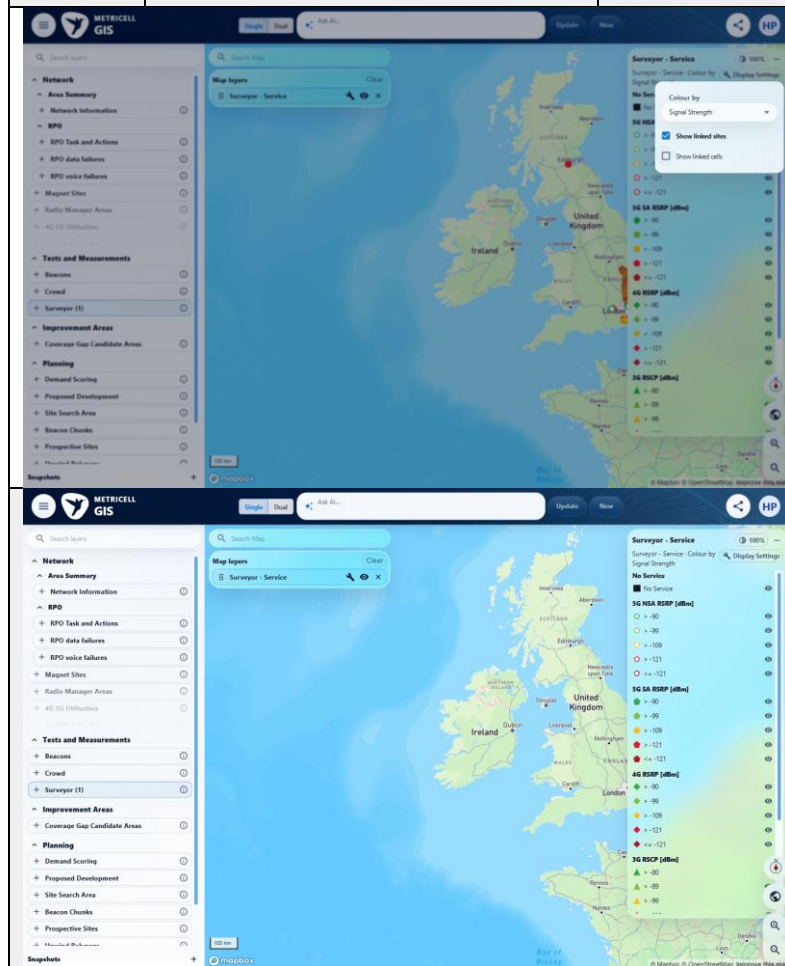

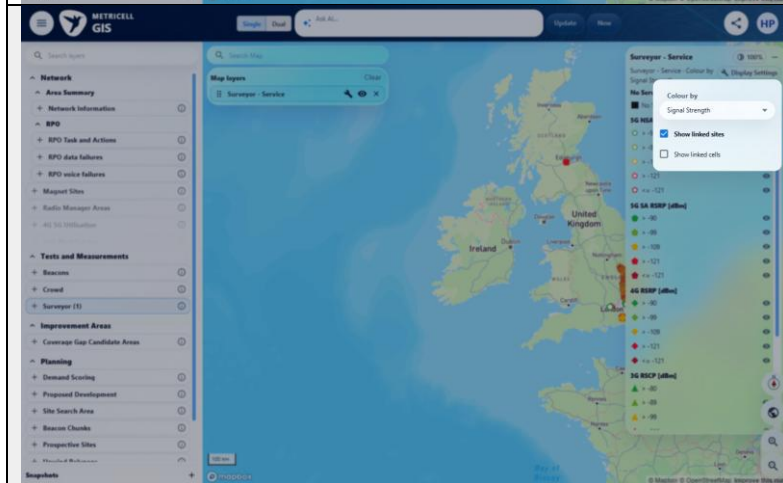

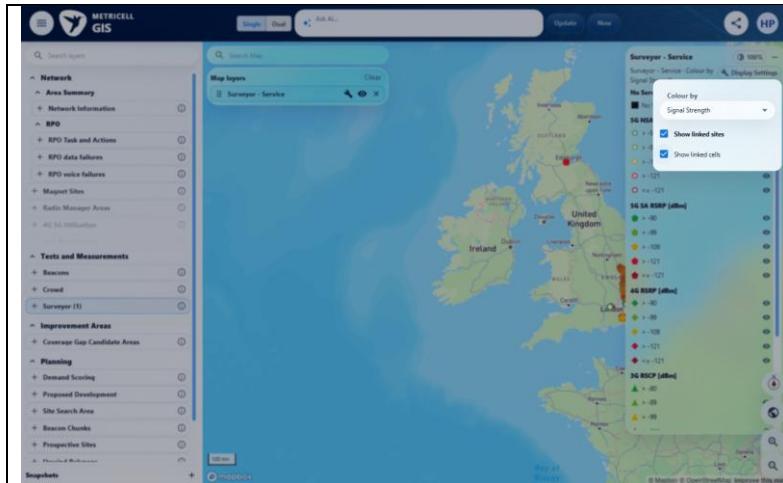

2.0.0	With a Surveyor layer loaded, the Display Settings control exposes the active legend/colouring option and the 'Show Linked Sites' option.	With a Surveyor layer loaded, the Display Settings control exposes the active legend/colouring option and the 'Show Linked Sites' option.	The settings screenshot directly shows Colour by set to Signal Strength and Show linked sites checked. Steps taken: Started from the launcher and opened GIS with Surveyor loaded.; Opened Display Settings.; Observed Colour by set to Signal Strength and Show linked sites checked.	Passed

				
				
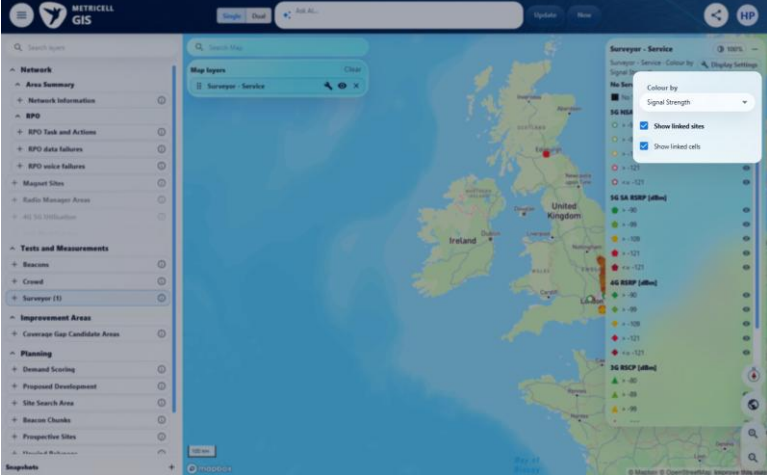

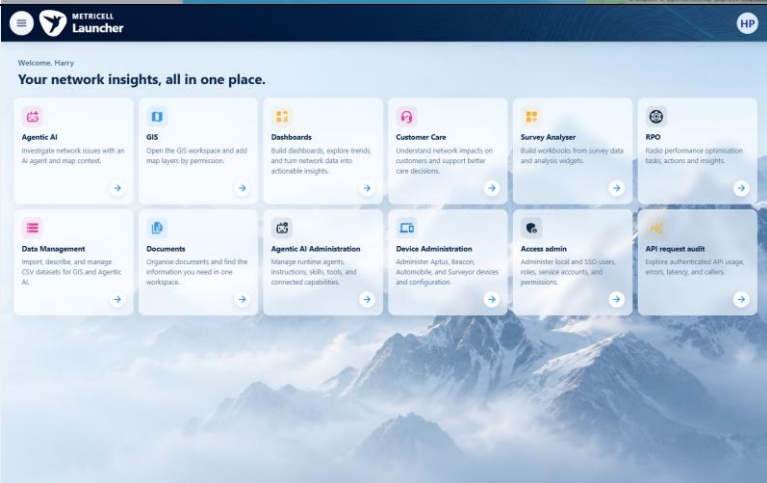

3.0.0	When linked sites are enabled and the zoom prerequisite is satisfied, the Display Settings control exposes 'Show Linked Cells'; when either prerequisite is not satisfied, 'Show Linked Cells' is unavailable.	When linked sites are enabled and the zoom prerequisite is satisfied, the Display Settings control exposes 'Show Linked Cells'; when either prerequisite is not satisfied, 'Show Linked Cells' is unavailable.	The screenshots show Show linked cells available and toggleable at a displayed 100 km map scale, but do not establish the zoom threshold or show its unavailable state when a prerequisite is unmet. Steps taken: Started from the launcher and opened GIS with Surveyor loaded.; Opened Display Settings; Show linked sites was checked and Show linked cells was	Failed

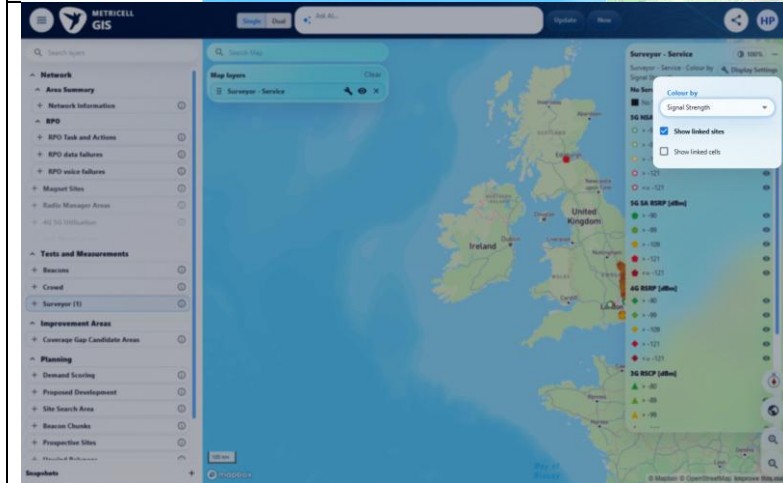

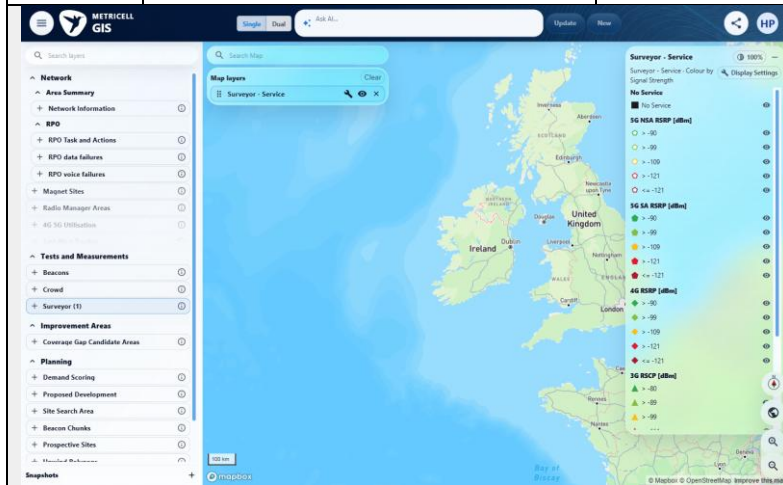

available at the displayed 100 km map scale.; Toggled Show linked cells on and then restored it to off.

				
				
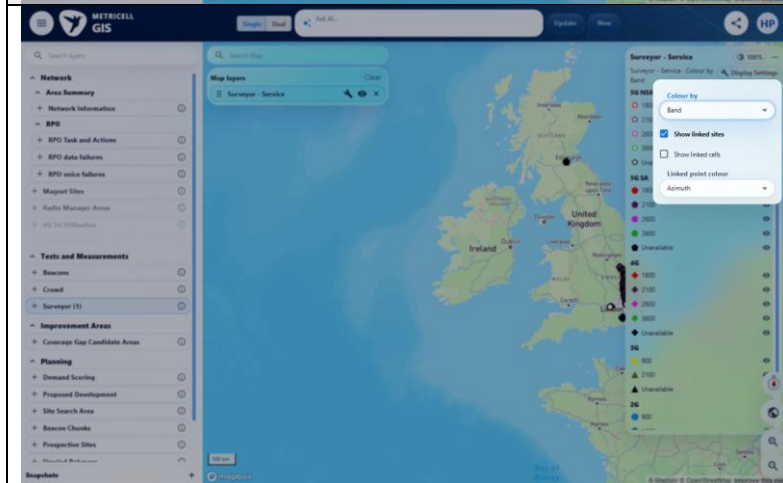

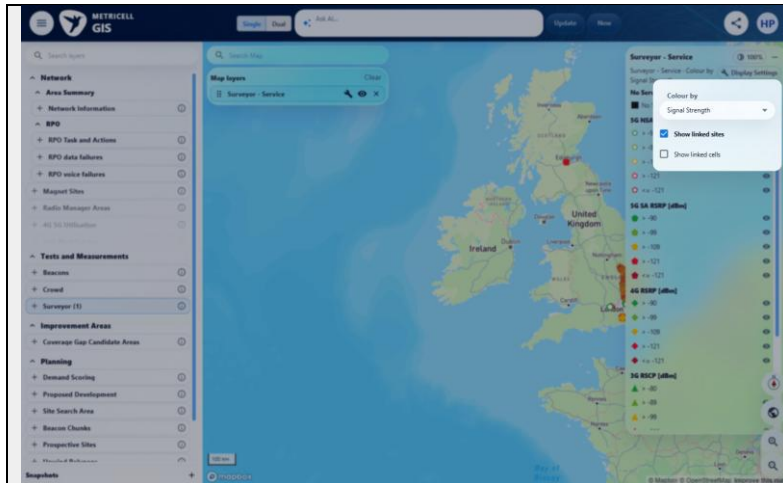

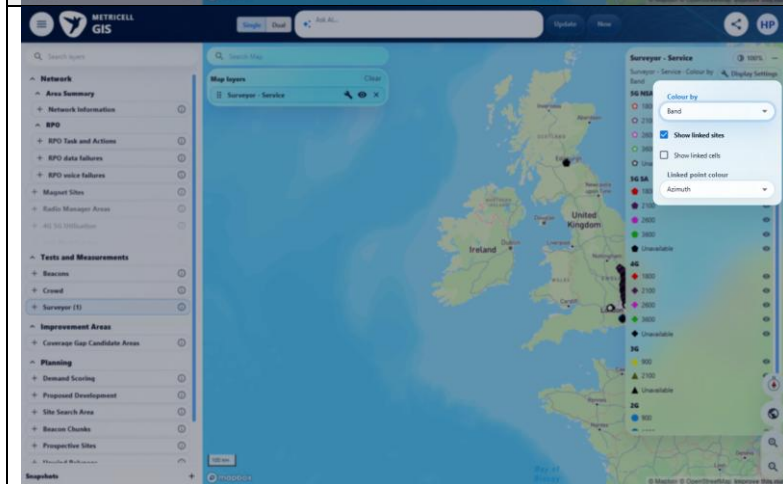

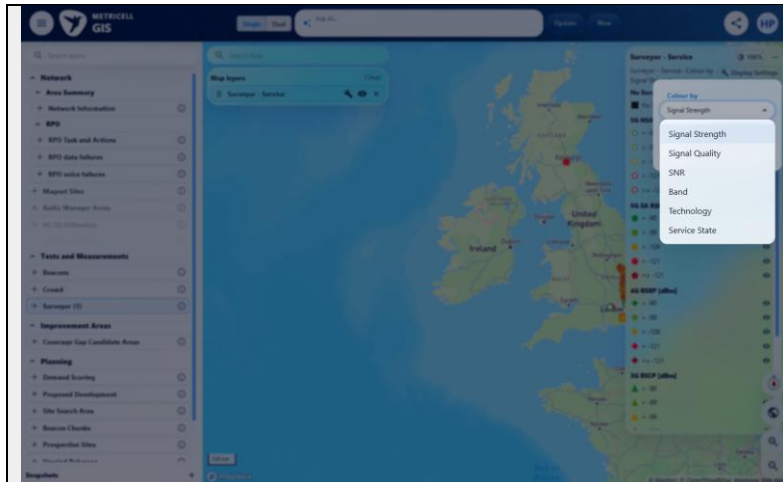

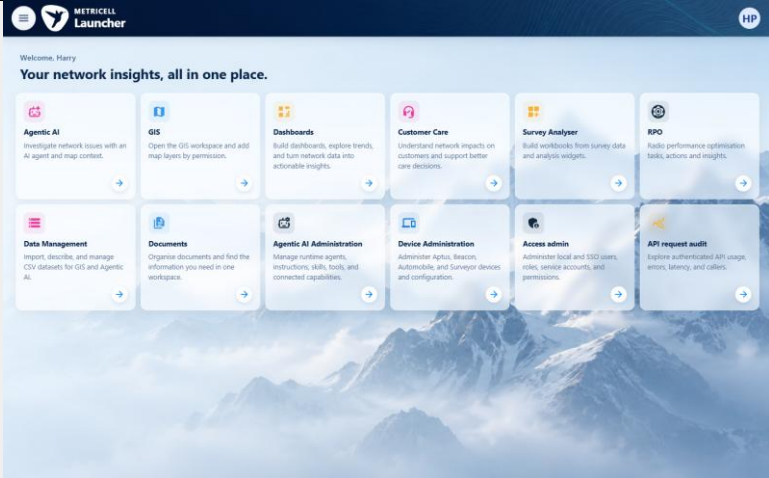

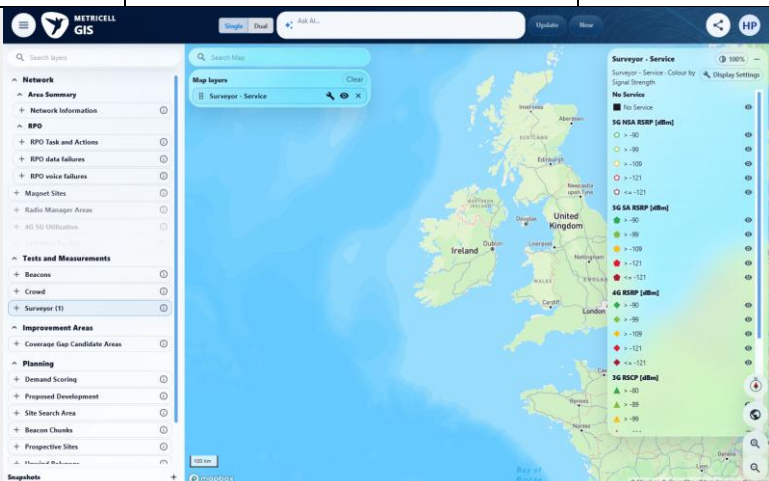

4.0.0	When the active legend is `Band` and linked sites are shown, the Display Settings control exposes `Colour Point Links By Azimuth/Band`; for another legend or with linked sites hidden, that control is unavailable.	When the active legend is `Band` and linked sites are shown, the Display Settings control exposes `Colour Point Links By Azimuth/Band`; for another legend or with linked sites hidden, that control is unavailable.	The screenshots directly show Band selected, Show linked sites checked, and Linked point colour set to Azimuth. They do not show the control becoming unavailable for another legend or when linked sites are hidden. Steps taken: Started from the launcher and opened GIS with Surveyor loaded.; Opened the Colour by list and selected Band while Show linked sites was checked.;	Failed

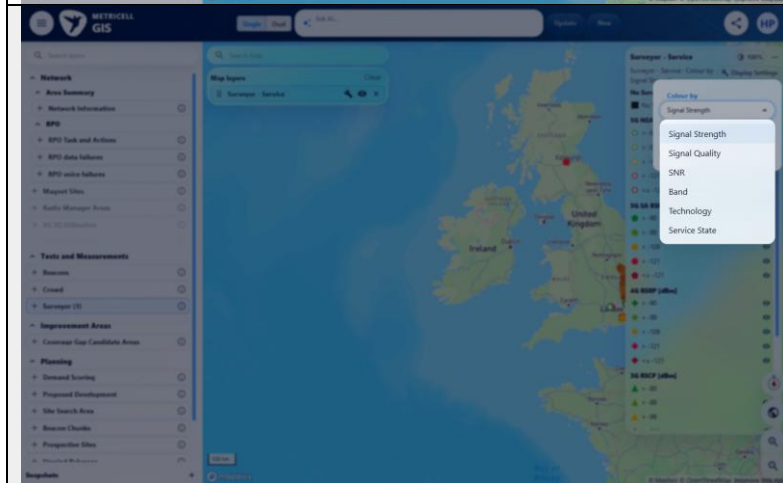

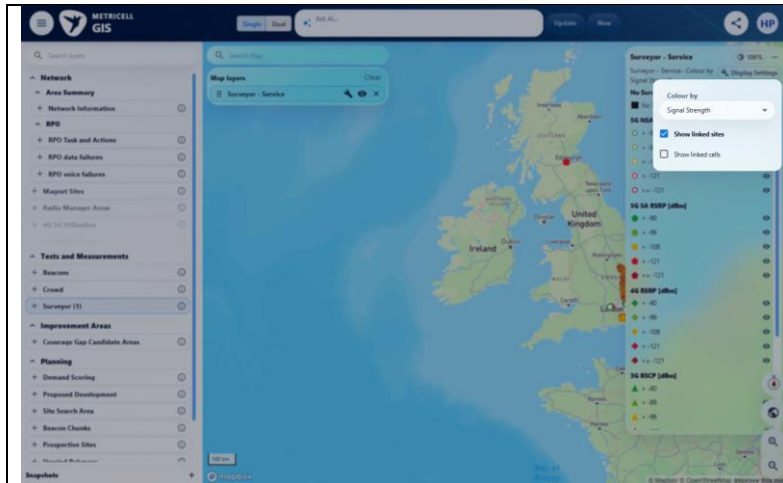

Observed the Linked point colour control with Azimuth selected.; Restored Colour by to Signal Strength.

				
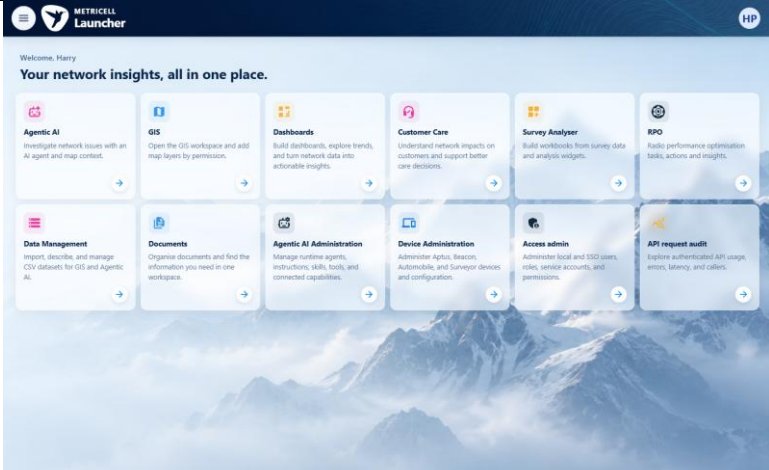

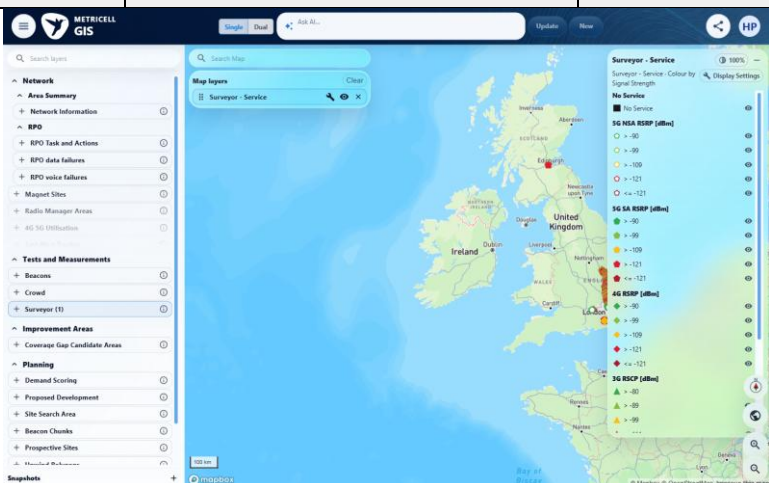

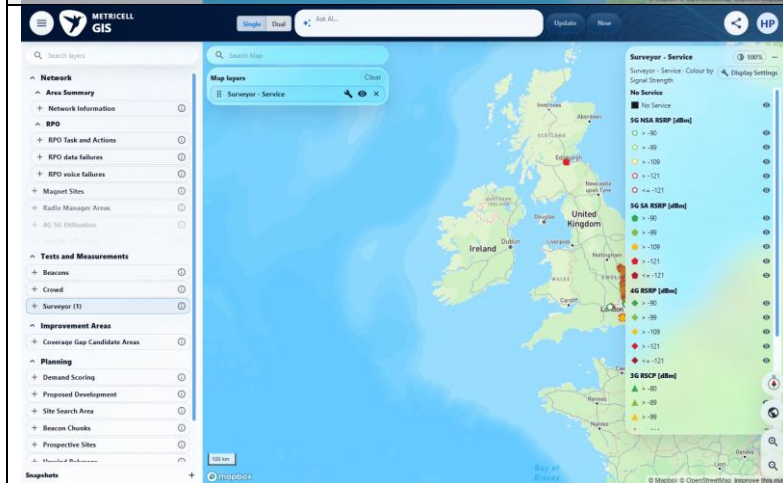

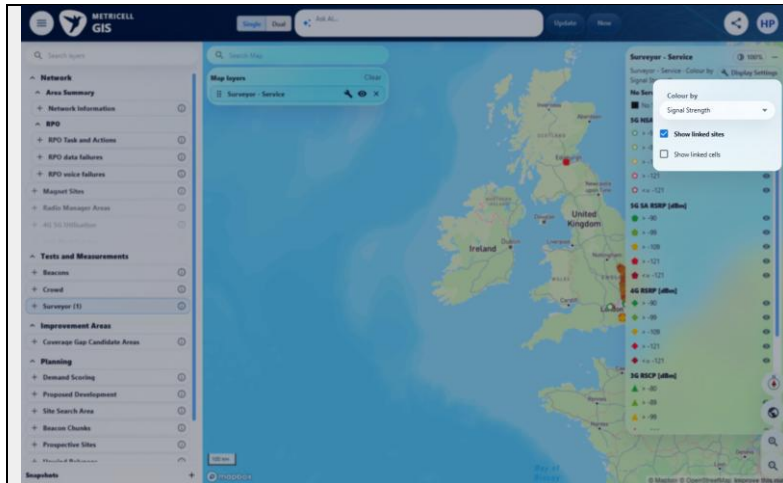

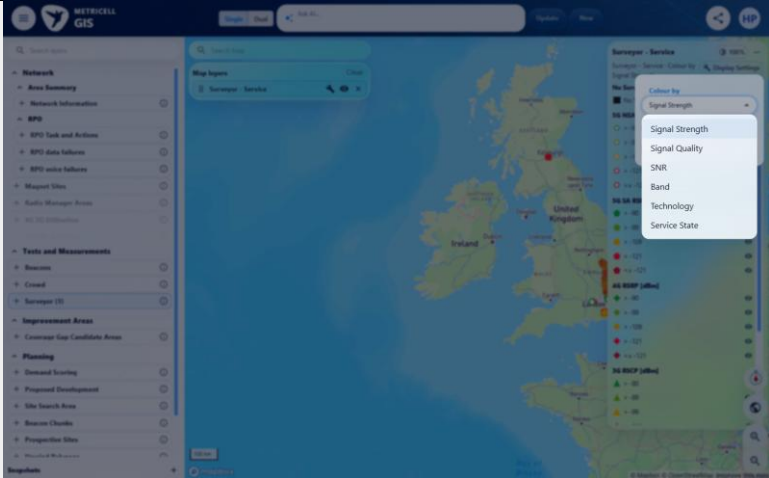

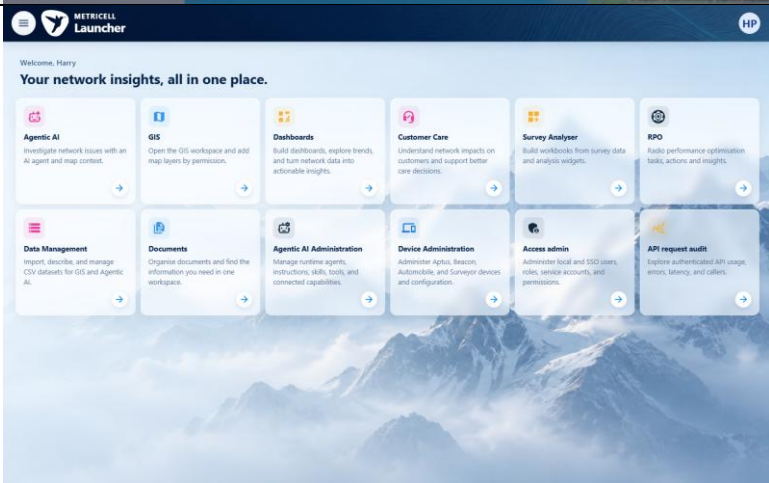

5.0.0	When the active legend is 'Building', the Display Settings control exposes 'Show Labels'; for another legend, 'Show Labels' is unavailable.	When the active legend is 'Building', the Display Settings control exposes 'Show Labels'; for another legend, 'Show Labels' is unavailable.	The selected attempt screenshots show only the available Service-oriented Colour by choices and no Building option, so the required Building state could not be established. Steps taken: Started from the launcher and opened GIS with the Surveyor Service layer loaded.; Opened Display Settings and inspected the Colour by choices.	Blocked
				

				
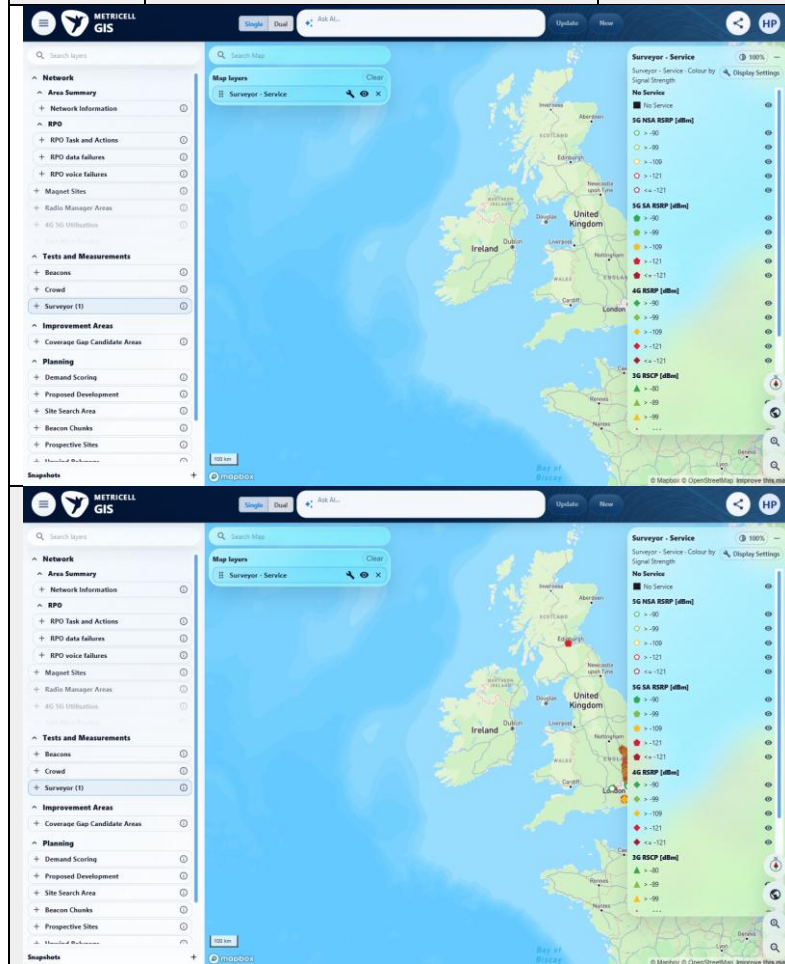

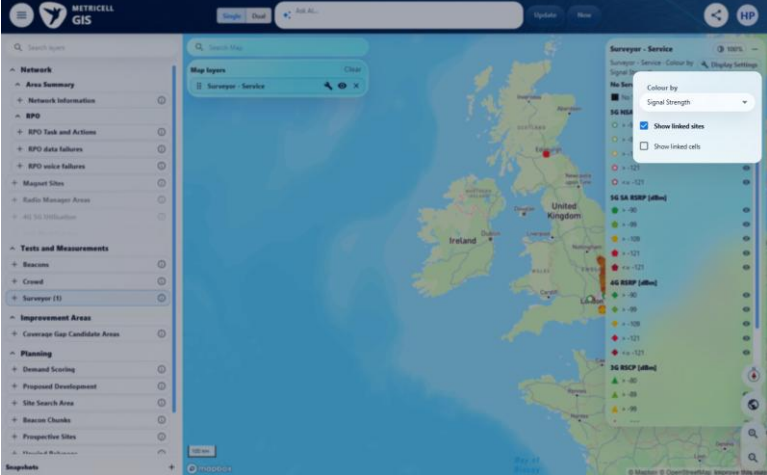

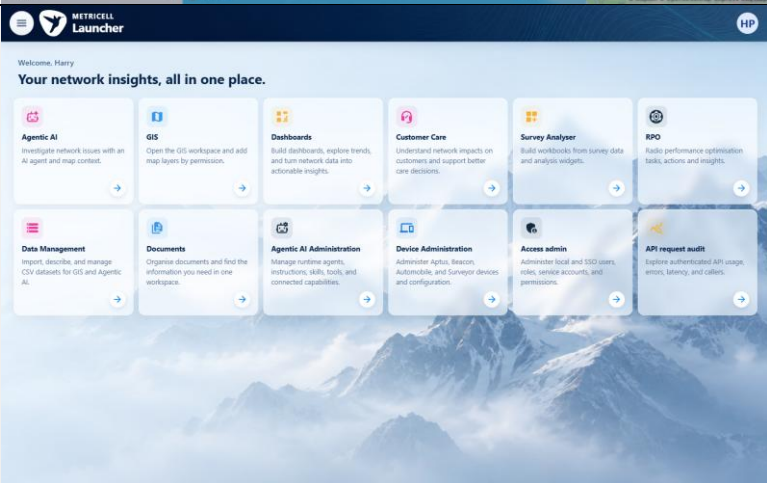

6.0.0	The Surveyor Display Settings control does not expose a `Sector` option.	The Surveyor Display Settings control does not expose a `Sector` option.	The screenshot showing the available Colour by options lists Signal Strength, Signal Quality, SNR, Band, Technology, and Service State, with no Sector option. Steps taken: Started from the launcher and opened GIS with Surveyor loaded.; Opened Display Settings and inspected the Colour by options and linked display controls.; Observed no Sector option.	Passed
				

				
				
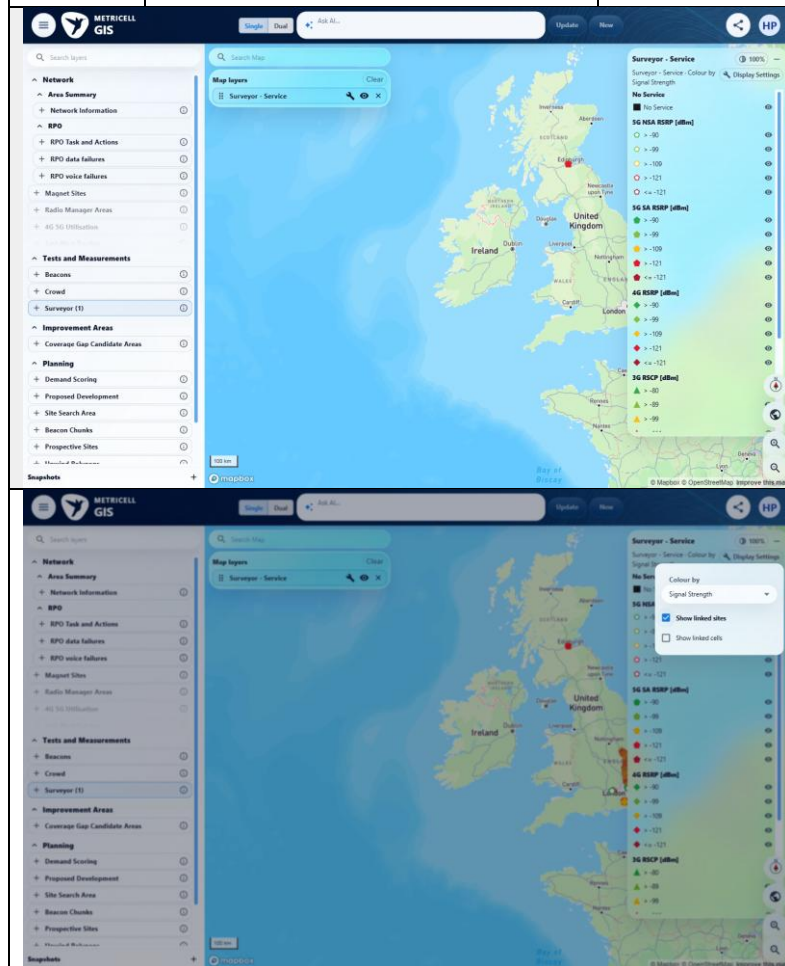

7.0.0	After changing an available presentation setting, the Surveyor layer's underlying filtered result set remains unchanged while the selected presentation setting is reflected in the layer display.	After changing an available presentation setting, the Surveyor layer's underlying filtered result set remains unchanged while the selected presentation setting is reflected in the layer display.	The screenshots show presentation controls but no observable result count or record list to compare the underlying filtered result set. Steps taken: Started from the launcher and opened GIS with Surveyor loaded.; Opened Display Settings and inspected the visible layer display and available settings.;	Blocked

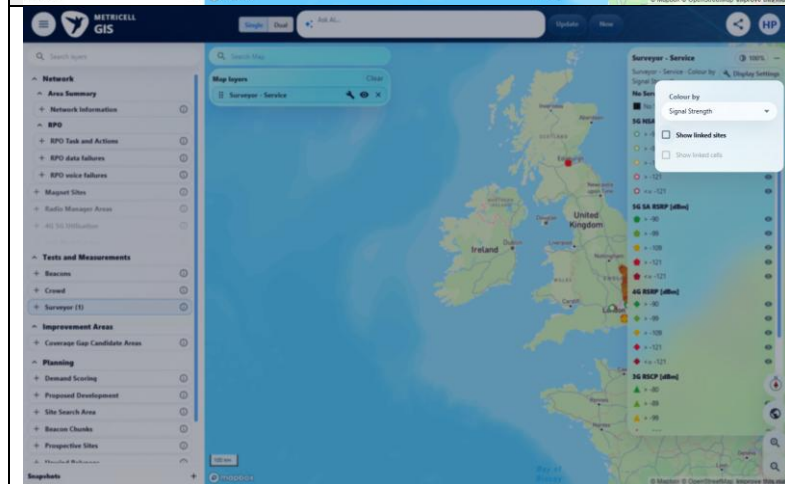

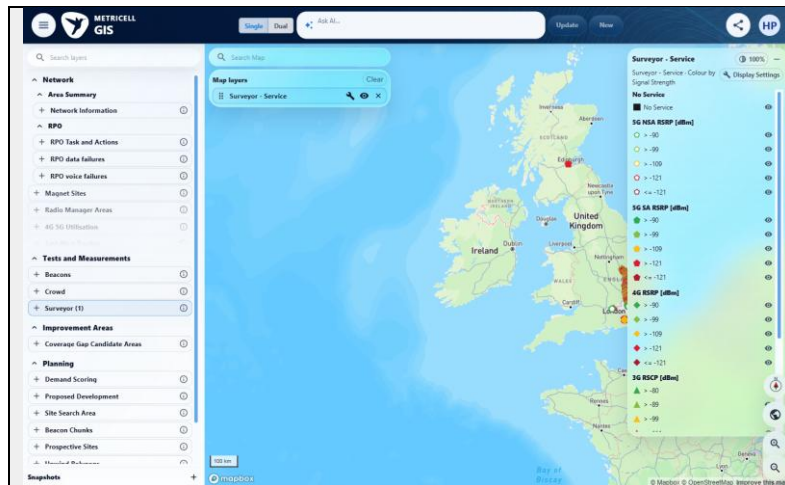

Could not compare the underlying filtered result set
because the GIS view exposed no result count or record list.

				
				
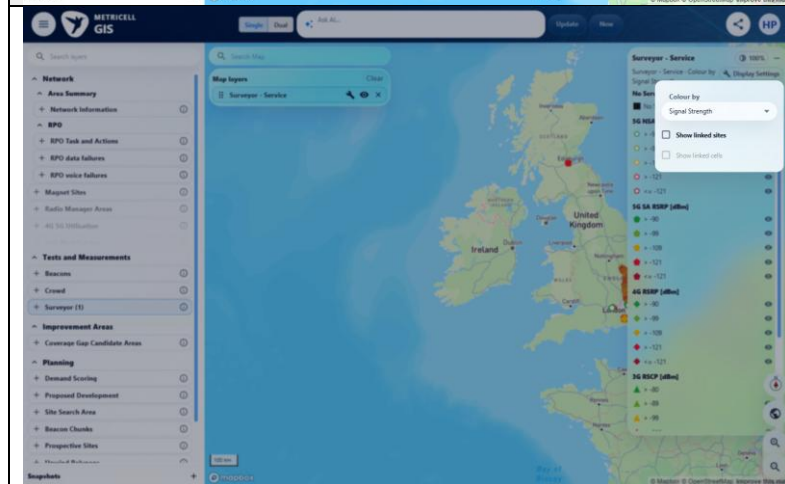

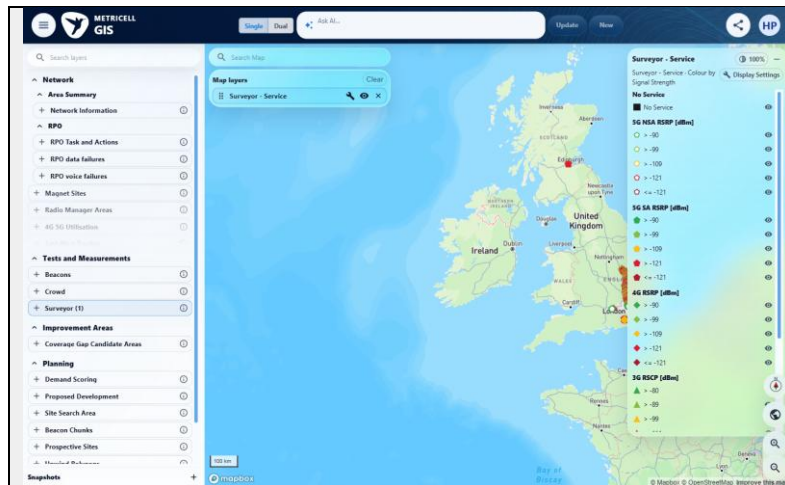

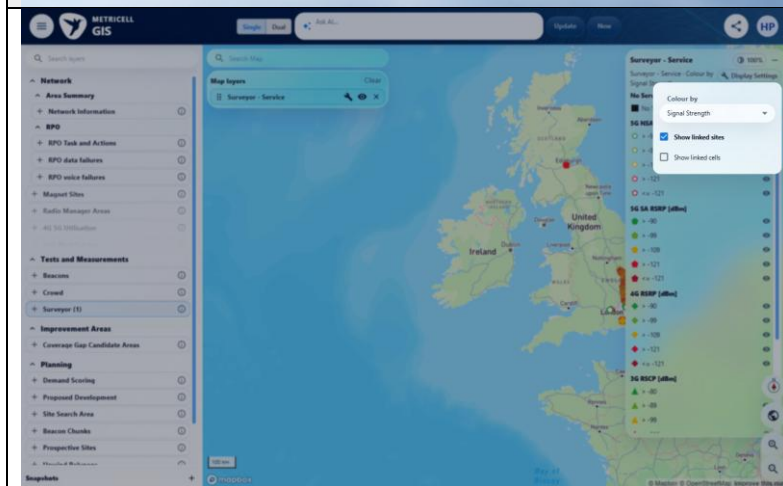

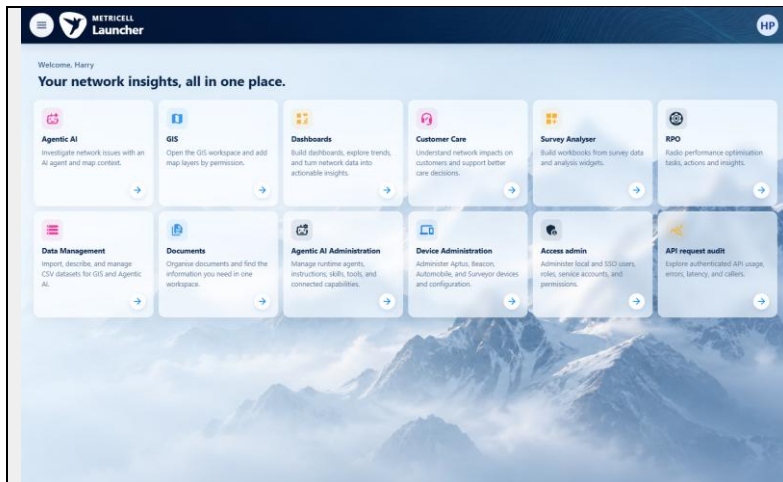

8.0.0	After changing Surveyor presentation settings, restoring the GIS to its normal saved/restored state retains those settings and their corresponding layer display.	After changing Surveyor presentation settings, restoring the GIS to its normal saved/restored state retains those settings and their corresponding layer display.	The screenshots show Show linked sites unchecked after returning to the launcher and reopening GIS, then show it restored to its original checked state. Steps taken: Started from the launcher and opened GIS with Surveyor loaded.; Opened Display Settings and changed Show linked sites from checked to unchecked.; Returned to the launcher, reopened GIS, and observed	Passed

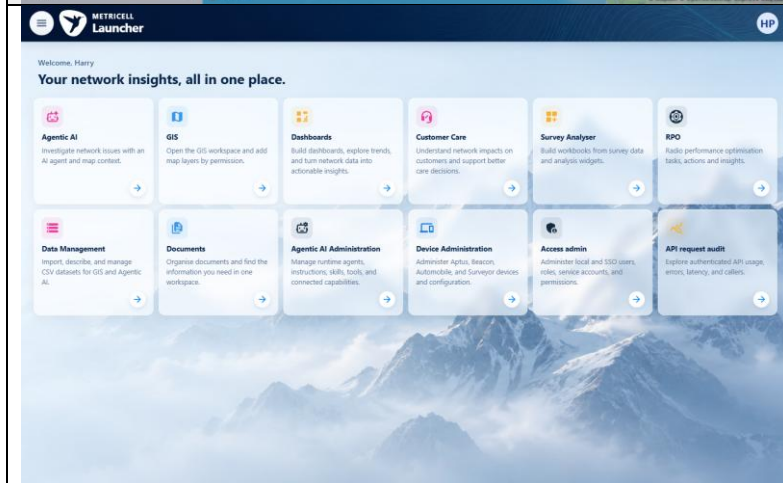

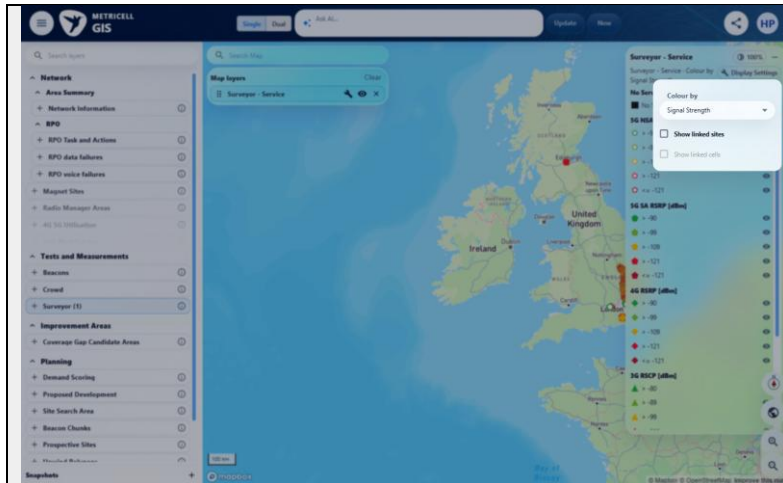

Show linked sites remained unchecked with Surveyor loaded.; Restored Show linked sites to its original checked state.

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
