2 Test Cycle Information

Tester:	**Automated**
Jira Ticket:	TEST2-85
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 156.0.8078.48
Date of Test:	26/10/2026
Limitations during Testing:	Blocked criterion(s): 1, 6, 7, 9. See the assessment below each criterion. Criteria 8, 10 used simulated UI conditions; see their assessments.
Overall review outcome:	Blocked
Browser URL(s) recorded after criteria:	https://o2intelligence-v4-dev.metricell.com/gis

3 Test Summary

Area of test	Pass (Y/N)	Fail (Y/N)	Blocked (Y/N)	Defect No
1. Given a completed Download test is selected and its details have loaded, the summary shows the reported technology, user, handset, service, serving cell, duration, tested technologies, indoor/outdoor status, Download Rate, and Wi-Fi connection status.	N	N	Y	0
2. Given Download samples are available, a time-series chart shows Signal Strength in dBm and Download Rate in Mbps across the test duration.	Y	N	N	0
3. Given per-sample Download data is available, each returned sample is shown in a table with its relevant units.	Y	N	N	0
4. Given the per-sample table contains multiple rows, sorting by a displayed column changes their visible order according to that column.	Y	N	N	0
5. Given per-sample data is available, filtering the table shows only rows matching the selected filter.	Y	N	N	0
6. Given average signal metrics are returned, Average Signal Strength, Average Signal Quality, and Average SNR appear in the summary immediately after Download Rate.	N	N	Y	0
7. Given the selected Download point has no measurable duration, the detail presentation shows the standard no-data state instead of an empty detail view.	N	N	Y	0
8. Given Download details are loading, the detail presentation shows a loading state.	Y	N	N	0
9. Given Download details are unavailable, the detail presentation shows a no-data state.	N	N	Y	0
10. Given loading Download details fails, the detail presentation shows an error state and does not display incorrect data.	Y	N	N	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

4.1 Tests

Preconditions:	V4 access and ticket conditions.	***Associated Requirements:***	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.

<table>
<tr><th>ID / Criterion</th><th>Criteria Tested</th><th>Expected Result</th><th>Actual Result / Evidence Path</th><th>Outcome</th></tr>
<tr><td>1.0.0</td><td>Given a completed Download test is selected and its details have loaded, the summary shows the reported technology, user, handset, service, serving cell, duration, tested technologies, indoor/outdoor status, Download Rate, and Wi-Fi connection status.</td><td>Given a completed Download test is selected and its details have loaded, the summary shows the reported technology, user, handset, service, serving cell, duration, tested technologies, indoor/outdoor status, Download Rate, and Wi-Fi connection status.</td><td>Automobile Download point 132047153 is loaded in criterion-1-details-loaded.png; criterion-1-summary-middle-fixed.png and criterion-1-final.png complete the summary. Technology 5G NSA, service 5G NSA, serving cell 105_112_4, duration 30.431 s, tested technologies 4G, Download Rate 24.12 Mbps and Wi-Fi Connected No are readable. User, handset and indoor/outdoor values are absent; the result reports those fields were not supplied by the inspected response. A fixture supplying them is required; MSISDN alone does not establish user identity. Evidence: E01, E02, E03, E04, E05, E06</td><td>Blocked</td></tr>
<tr><td colspan="5">Criterion 1 assessment: Testing notes: Real Automobile Download point 132047153 loaded. Technology, service, serving cell, duration, tested technologies, Download Rate and Wi-Fi status are readable. User, handset and indoor/outdoor values were not supplied in the inspected point/analysis response or shown in its summary; MSISDN is not treated as a user identity. A fixture returning those three values is needed to decide the full criterion; no product failure inferred from absent data.</td></tr>
</table>

Test Technologies	4G

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
3.0.0	Given per-sample Download data is available, each returned sample is shown in a table with its relevant units.	Given per-sample Download data is available, each returned sample is shown in a table with its relevant units.	criterion-3-table-wide-01.png through criterion-3-table-wide-06.png (also criterion-3-final.png) provide overlapping coverage from the first sample at 10:38:50 to the last at 10:39:20 for point 132047153. Time, signal strength in dBm, Download Rate in Mbps, technology, cell, size in MB and mobile data state are readable throughout. The tester bounds the complete response to 121 samples and records a 121/121 ordered seven-field reconciliation with zero mismatches; the full visible sequence supports that scope rather than a sampled-row claim. Evidence: E11, E12, E13, E14, E15, E16, E17, E18, E19, E20, E21	Passed

Criterion 3 evidence: Given per-sample Download data is available, each returned sample is shown in a table with its relevant units.

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
9.0.0	Given Download details are unavailable, the detail presentation shows a no-data state.	Given Download details are unavailable, the detail presentation shows a no-data state.	criterion-9-final.png shows a populated Automobile Download chart for point 132047153, not a no-data state. The supplied results describe a successful 121-sample POST /api/platform/automobile/download/test-analysis and establish neither a genuine unavailable fixture nor an authoritative empty-response contract. The prerequisite remains blocked; no missing-module or current backend-failure claim is supported. Evidence: E39, E40, E41, E42, E43	Blocked

Criterion 9 assessment: Testing notes: A genuine POST /api/platform/automobile/download/test-analysis for point 132047153 returned 200 with 121 samples and a populated chart. No actual unavailable response or project-documented empty-response contract was supplied/established. Emptying a successful response would invent the contract, so no no-data simulation was performed. An authoritative empty-response contract or genuine unavailable fixture is required. The supplied sources establish no empty-response contract, and this inspected record is available. Recorded the missing unavailable-data prerequisite; did not simulate an invented empty response.

Criterion 9 evidence: Given Download details are unavailable, the detail presentation shows a no-data state.

metricell
Better Connected

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
