About Metricell8

1 Revision History

Version	Date	Revision Author	Summary of Changes
[1.0]	06/10/2026	TEST2 QA Automation	Generated from TEST2 evidence review

2 Test Cycle Information

Tester:	Automated
Jira Ticket:	TEST2-54
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 154.0.8037.98
Date of Test:	06/10/2026
Limitations during Testing:	2 blocked; 0 inconclusive criterion(s). Evidence assessment completed for attempt-001; geographic-extent reset control is unavailable. Criterion 1: GIS and zoom-in are available, but no visible control for resetting the geographic extent/default zoom is exposed. The only reset is labelled 'Reset north and flatten map', which describes orientation. The required reset-map-view feature is unavailable for this criterion; its behavior was not assumed or substituted. Criterion 2: Direct before/after PNG evidence shows a visibly closer settled map after one zoom-in. Cleanup recovered successfully after the tooltip interception; the map was restored. Criterion 3: Cannot perform the required geographic-extent reset action because no matching visible control is available. The orientation reset label does not establish an extent-reset feature. No test data was needed; this is a missing control prerequisite, not a data or authentication failure. The map was restored to its initial default coverage using Zoom out for cleanup only.
Overall review outcome:	Blocked

3 Test Summary

Area of test	Pass	Fail	Defects (No.)
1. Starting from the launcher with authorised...	N	N	0
2. From the recorded initial map view, selecting...	Y	N	0
3. After zooming, selecting reset map view...	N	N	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

4.1 Tests

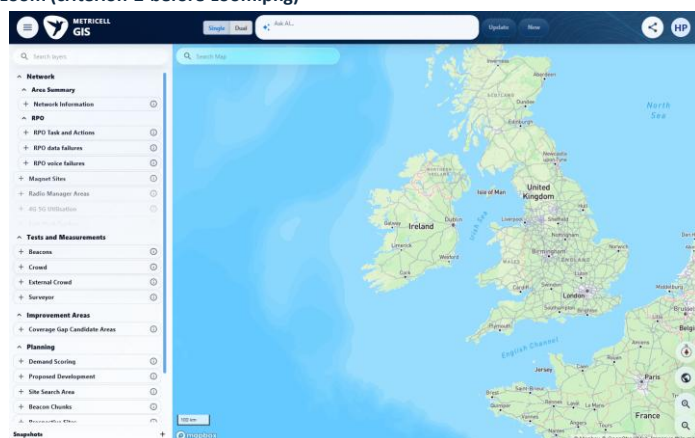

Preconditions:		V4 access and ticket conditions.	Associated Requirements:	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.
ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome		
1.0.0	Starting from the launcher with authorised access, opening GIS displays a settled map with visible zoom-in and reset-map-view controls.	Starting from the launcher with authorised access, opening GIS displays a settled map with visible zoom-in and reset-map-view controls.	Launcher and final GIS images show a settled 100 km map and zoom controls, but no geographic-extent reset control is available in the visible control stack. The recorded control inspection identifies the reset as orientation-only. Evidence: E01, E02	Blocked		
Criterion 1 evidence: Starting from the launcher with authorised access, opening GIS displays a settled map with visible zoom-in and reset-map-view controls. Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis						
E01 - Initial (criterion-1-initial.png)						
						
E02 - Final (criterion-1-final.png)						
						

2.0.0	From the recorded initial map view, selecting zoom-in once produces a visibly closer settled map view while the GIS workspace and map controls remain available.	From the recorded initial map view, selecting zoom-in once produces a visibly closer settled map view while the GIS workspace and map controls remain available.	This criterion's before-zoom image shows 100 km coverage; after-zoom and final images show a settled 50 km map with larger Ireland and detailed labels while GIS controls remain visible, matching the recorded single zoom-in. cleanup-default still shows 50 km; cleanup-restored proves the later return to 100 km. Evidence: E03, E04	Passed
-------	--	--	--	--------

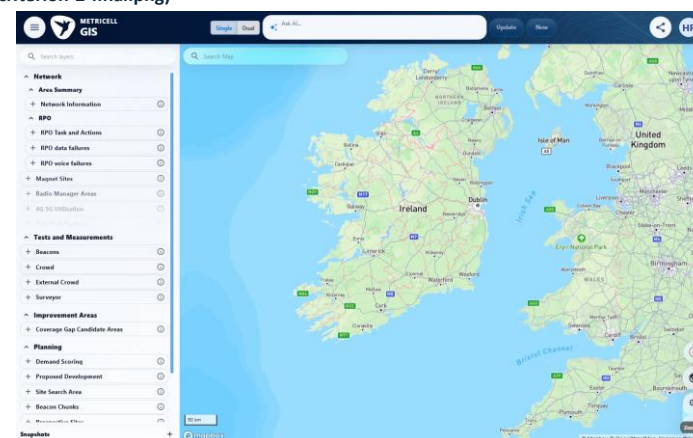

Criterion 2 evidence: From the recorded initial map view, selecting zoom-in once produces a visibly closer settled map view while the GIS workspace and map controls remain available.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E03 - Before zoom (criterion-2-before-zoom.png)

E04 - Final (criterion-2-final.png)

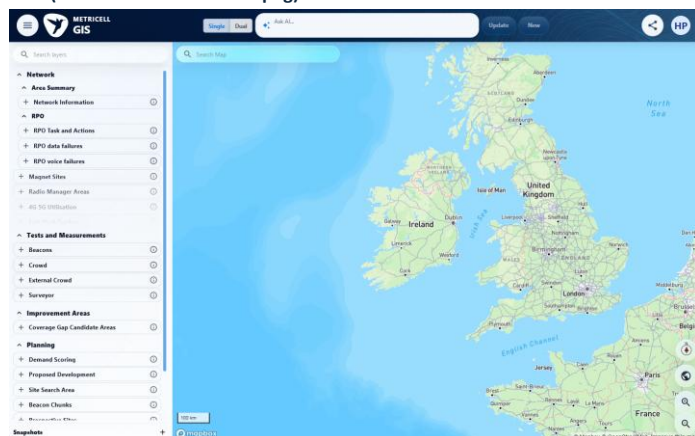

3.0.0	After zooming, selecting reset map view returns the map to its initial default geographic extent and scale as visibly demonstrated, while the GIS controls remain available.	After zooming, selecting reset map view returns the map to its initial default geographic extent and scale as visibly demonstrated, while the GIS controls remain available.	This criterion records the initial 100 km view and zoomed 50 km view, but the final image labels the available reset 'Reset north and flatten map'; the required geographic-extent reset action is unavailable. Cleanup returns to the initial coverage using Zoom out, which does not demonstrate reset-map-view behavior. Evidence: E03, E04, E05	Blocked
-------	--	--	--	---------

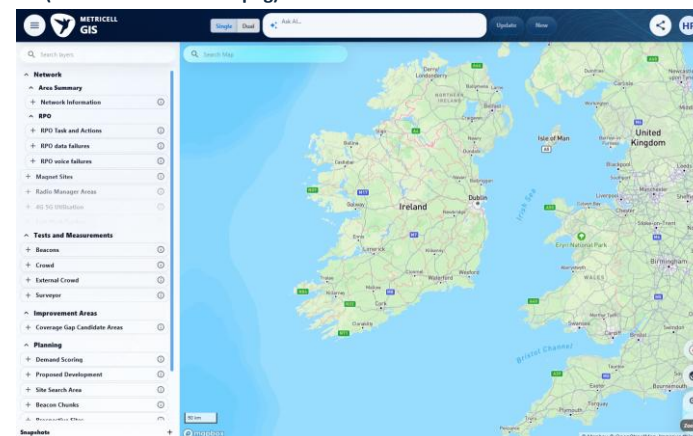

Criterion 3 evidence: After zooming, selecting reset map view returns the map to its initial default geographic extent and scale as visibly demonstrated, while the GIS controls remain available.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metrice.com/gis>

E03 - Before zoom (criterion-3-before-zoom.png)

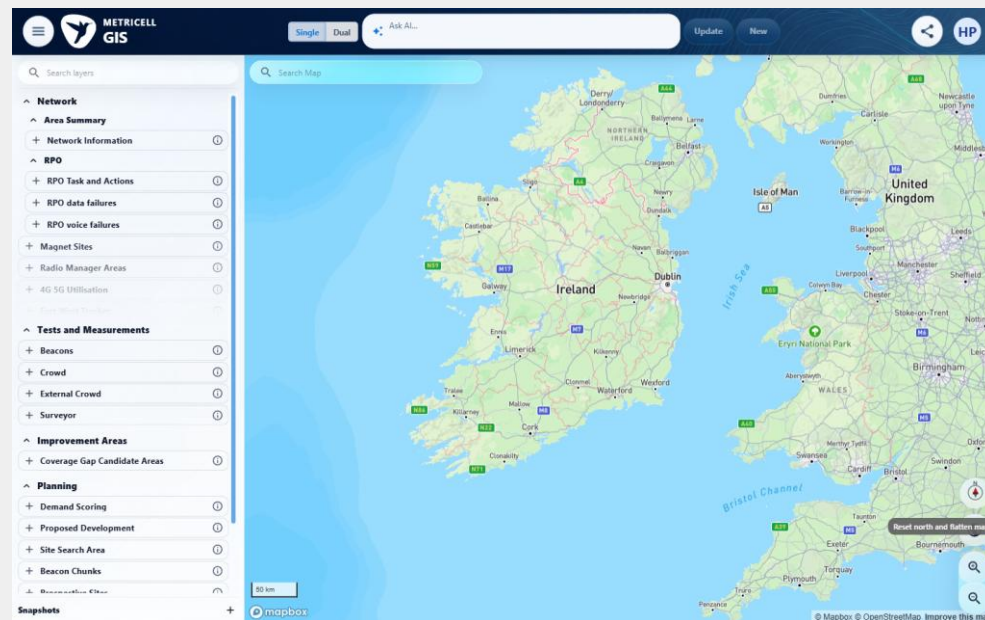

E04 - After zoom (criterion-3-after-zoom.png)

Criterion 3 continued: After zooming, selecting reset map view returns the map to its initial default geographic extent and scale as visibly demonstrated, while the GIS controls remain available.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E05 - Final (criterion-3-final.png)

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
