About Metricell14

1 Revision History

Version	Date	Revision Author	Summary of Changes
[1.0]	08/10/2026	TEST2 QA Automation	Generated from TEST2 evidence review

2 Test Cycle Information

Tester:	Automated
Jira Ticket:	TEST2-66
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 155.0.8059.40
Date of Test:	08/10/2026
Limitations during Testing:	Criterion 1: Recorded the visible Hangleton/West Hove map at 300 m scale, Single layout, Map layers containing only ALL Coverage Gap Candidate Areas, and its existing Unable to load coverage gap candidate areas alert. Criterion 3: The first scoped locator attempt timed out without changing the page: TimeoutError: locator.click: Timeout 30000ms exceeded while waiting for getByText('Surveyor', { exact: true }).locator('..').getByRole('button', { name: 'Add layer', exact: true }). Defects (No.) counts directly contradicted criteria, not unique Jira bugs; blockers and inconclusive evidence count as zero.
Overall review outcome:	Passed
Browser URL(s) recorded after criteria:	https://o2intelligence-v4-dev.metricell.com/gis

3 Test Summary

Area of test	Pass	Fail	Defects (No.)
1. Starting in GIS with the initial visible map and Map layers state recorded, open Surveyor configuration from the Surveyor layer-catalogue control and verify that the dialog displays Username, Cancel, and Add layer controls.	Y	N	0

Area of test	Pass	Fail	Defects (No.)
2. Enter TEST2-cancel-check in Username and verify that the value is visibly present in the Surveyor configuration dialog before cancellation.	Y	N	0
3. Select Cancel and verify that the dialog closes, GIS returns to the recorded map and Map layers state, and no Surveyor layer is added.	Y	N	0
4. Reopen Surveyor configuration and verify that the dialog is usable with Username, Cancel, and Add layer controls available.	Y	N	0
5. Select Cancel again and verify that the dialog closes without adding a Surveyor layer and the recorded map and Map layers state remains unchanged.	Y	N	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

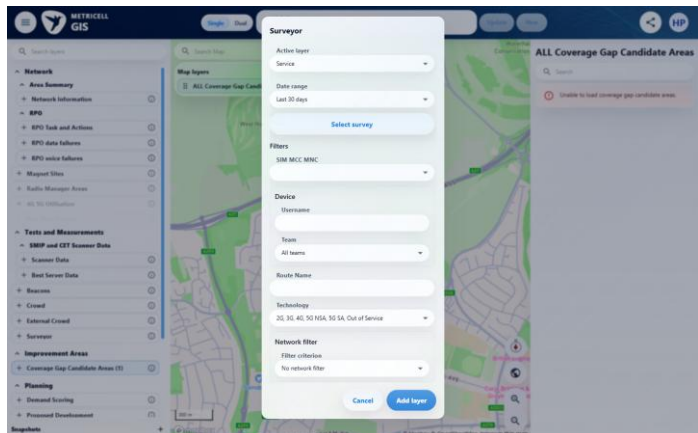

4.1 Tests

Preconditions:		V4 access and ticket conditions.	Associated Requirements:	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.
ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path		Outcome	
1.0.0	Starting in GIS with the initial visible map and Map layers state recorded, open Surveyor configuration from the Surveyor layer-catalogue control and verify that the dialog displays Username, Cancel, and Add layer controls.	Starting in GIS with the initial visible map and Map layers state recorded, open Surveyor configuration from the Surveyor layer-catalogue control and verify that the dialog displays Username, Cancel, and Add layer controls.	Criterion 1's recorded GIS baseline shows the Hangleton/West Hove map at 300 m and sole ALL Coverage Gap Candidate Areas layer; after-open and final show Surveyor with Username, Cancel and Add layer. Evidence: E01		Passed	

Criterion 1 evidence: Starting in GIS with the initial visible map and Map layers state recorded, open Surveyor configuration from the Surveyor layer-catalogue control and verify that the dialog displays Username, Cancel, and Add layer controls.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E01 - Final (criterion-1-final.png)

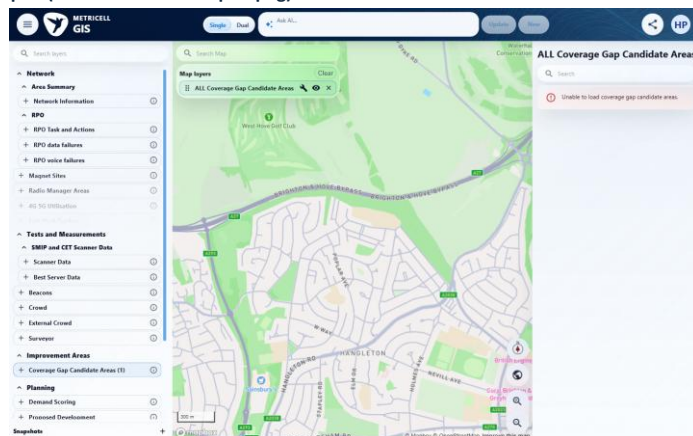

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
2.0.0	Enter TEST2-cancel-check in Username and verify that the value is visibly present in the Surveyor configuration dialog before cancellation.	Enter TEST2-cancel-check in Username and verify that the value is visibly present in the Surveyor configuration dialog before cancellation.	Criterion 2's before-edit image shows an empty Username; after-edit and final visibly show TEST2-cancel-check before cancellation. Evidence: E02, E03, E04	Passed

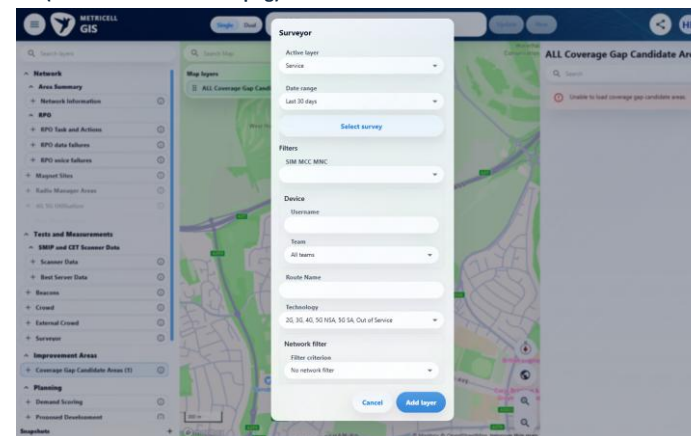

Criterion 2 evidence: Enter TEST2-cancel-check in Username and verify that the value is visibly present in the Surveyor configuration dialog before cancellation.

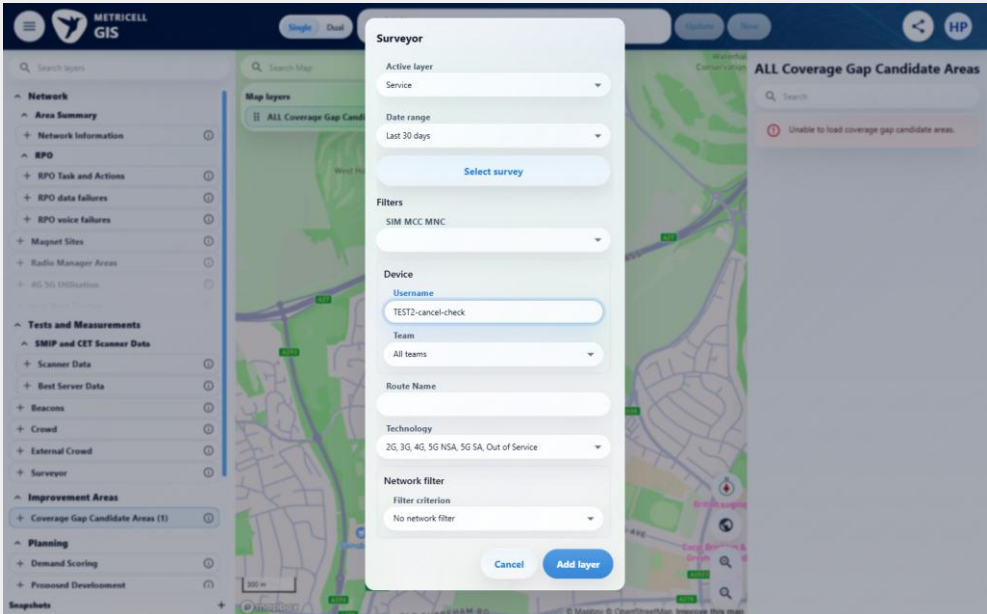

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E02 - Before open (criterion-2-before-open.png)

E03 - Before edit (criterion-2-before-edit.png)

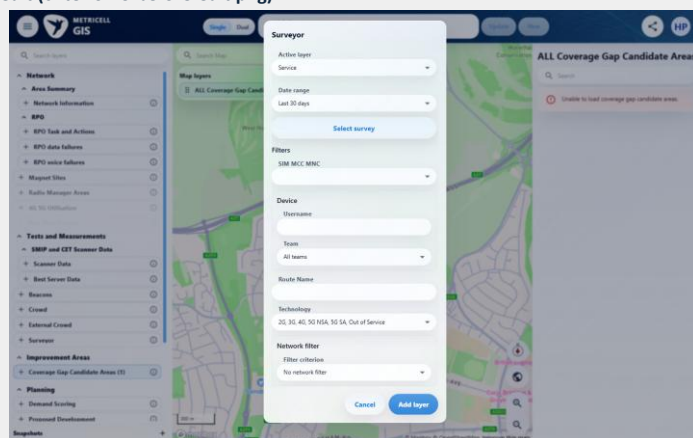

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
	Criterion 2 continued: Enter TEST2-cancel-check in Username and verify that the value is visibly present in the Surveyor configuration dialog before cancellation. Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis E04 - Final (criterion-2-final.png)			
				

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
3.0.0	Select Cancel and verify that the dialog closes, GIS returns to the recorded map and Map layers state, and no Surveyor layer is added.	Select Cancel and verify that the dialog closes, GIS returns to the recorded map and Map layers state, and no Surveyor layer is added.	Criterion 3's recovered, ordered sequence shows the empty dialog, edited Username, then closure after Cancel. After-cancel and final match its recorded map, 300 m scale, Single layout and sole existing layer, with no Surveyor layer. The locator timeout preceded successful recovery and is not an application defect. Evidence: E05, E04, E06	Passed

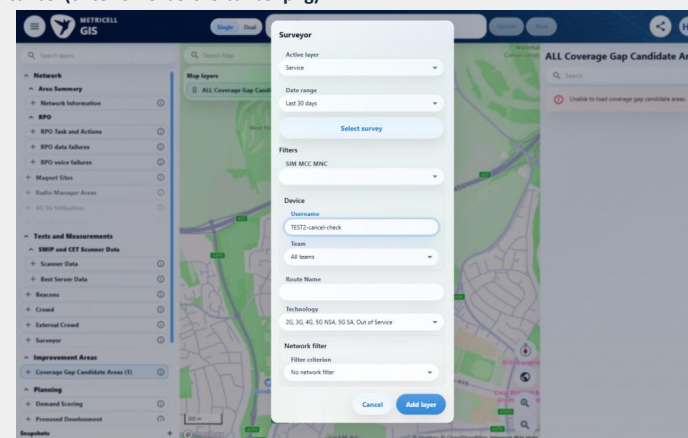

Criterion 3 evidence: Select Cancel and verify that the dialog closes, GIS returns to the recorded map and Map layers state, and no Surveyor layer is added.

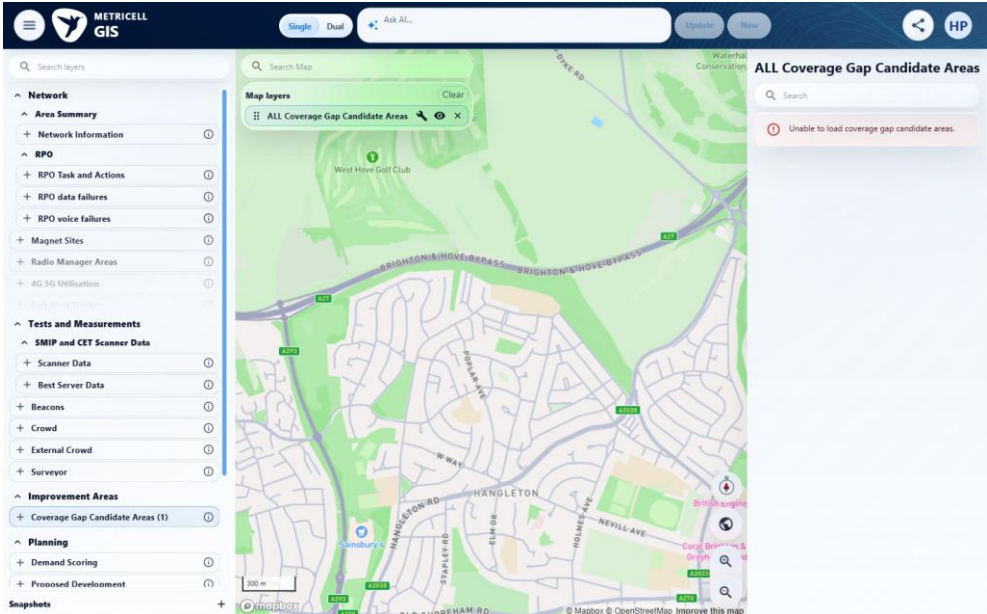

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E05 - Before edit (criterion-3-before-edit.png)

E04 - Before cancel (criterion-3-before-cancel.png)

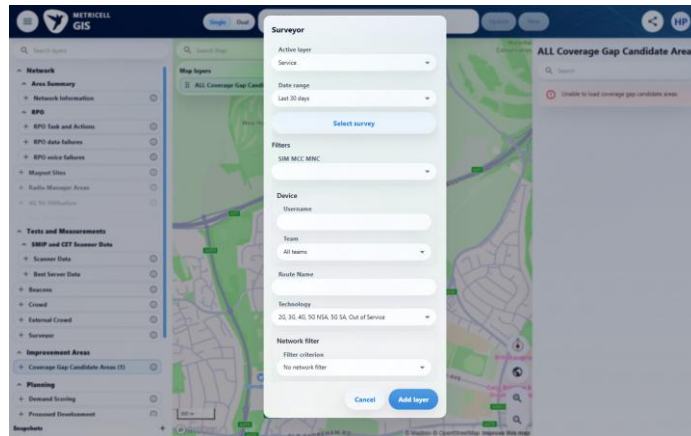

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 3 continued: Select Cancel and verify that the dialog closes, GIS returns to the recorded map and Map layers state, and no Surveyor layer is added. Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis E06 - Final (criterion-3-final.png)				
				

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
4.0.0	Reopen Surveyor configuration and verify that the dialog is usable with Username, Cancel, and Add layer controls available.	Reopen Surveyor configuration and verify that the dialog is usable with Username, Cancel, and Add layer controls available.	Criterion 4's own sequence shows the edited Username, closed dialog before reopening, and reopened dialog with an empty Username and available Cancel and Add layer controls; cleanup shows successful cancellation. Evidence: E05, E07, E08, E09	Passed

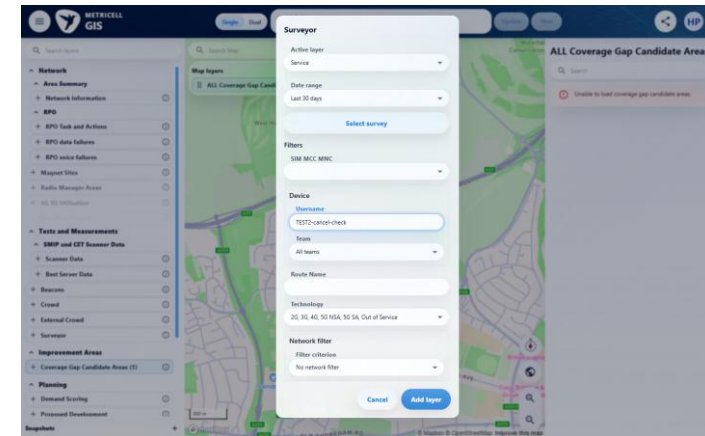

Criterion 4 evidence: Reopen Surveyor configuration and verify that the dialog is usable with Username, Cancel, and Add layer controls available.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E05 - Before edit (criterion-4-before-edit.png)

E07 - Before cancel (criterion-4-before-cancel.png)

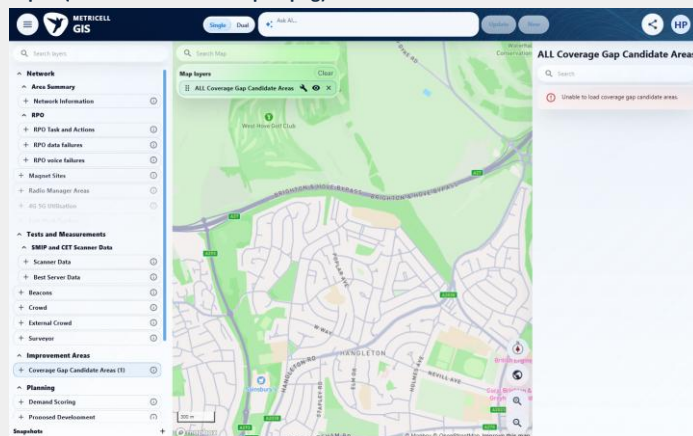

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
----------------	-----------------	-----------------	-------------------------------	---------

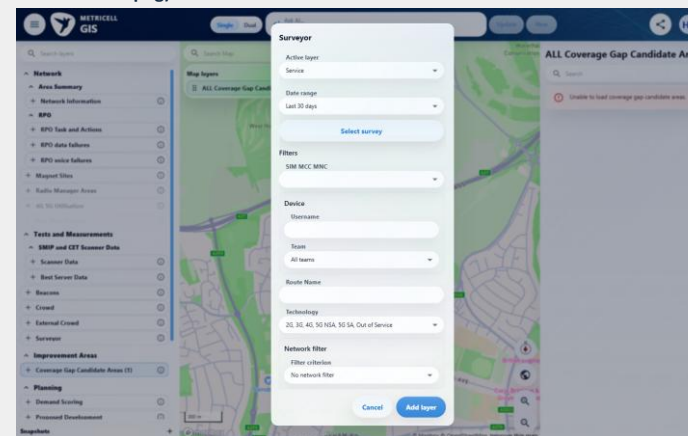

Criterion 4 continued: Reopen Surveyor configuration and verify that the dialog is usable with Username, Cancel, and Add layer controls available.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E08 - Before reopen (criterion-4-before-reopen.png)

E09 - Final (criterion-4-final.png)

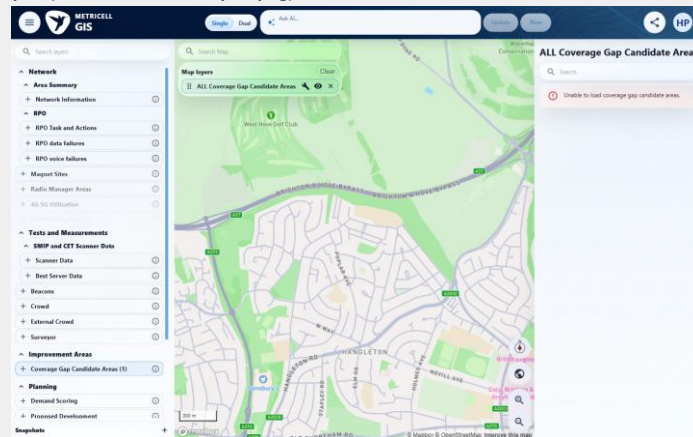

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
5.0.0	Select Cancel again and verify that the dialog closes without adding a Surveyor layer and the recorded map and Map layers state remains unchanged.	Select Cancel again and verify that the dialog closes without adding a Surveyor layer and the recorded map and Map layers state remains unchanged.	Criterion 5's own sequence shows the edited dialog, first closure, reopened empty Username, and second closure. After-second-cancel and final preserve its baseline map, 300 m scale, Single layout and sole ALL Coverage Gap Candidate Areas layer; no Surveyor layer is added. Evidence: E10, E05, E07, E08, E11, E06	Passed

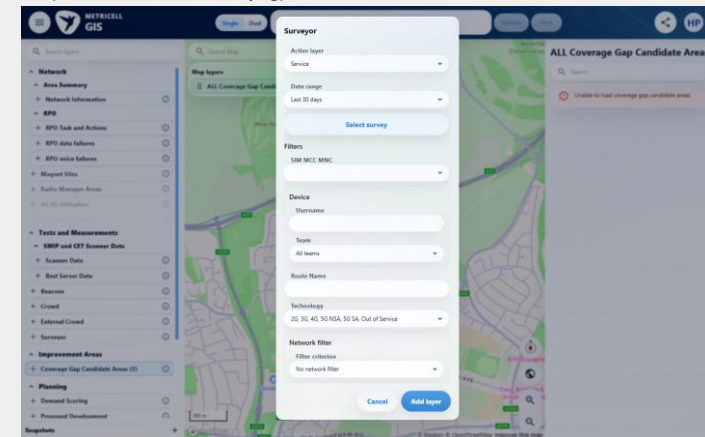

Criterion 5 evidence: Select Cancel again and verify that the dialog closes without adding a Surveyor layer and the recorded map and Map layers state remains unchanged.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E10 - Before open (criterion-5-before-open.png)

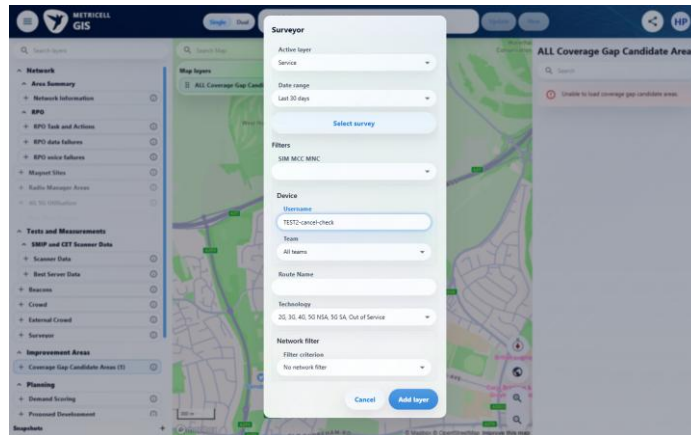

E05 - Before edit (criterion-5-before-edit.png)

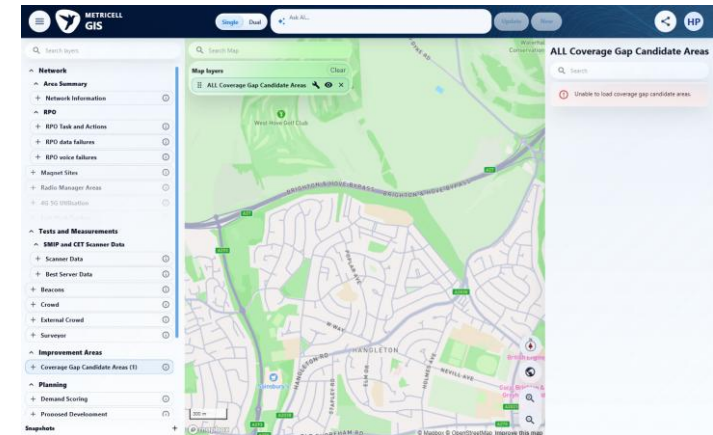

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
----------------	-----------------	-----------------	-------------------------------	---------

Criterion 5 continued: Select Cancel again and verify that the dialog closes without adding a Surveyor layer and the recorded map and Map layers state remains unchanged.
 Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E07 - Before first cancel (criterion-5-before-first-cancel.png)

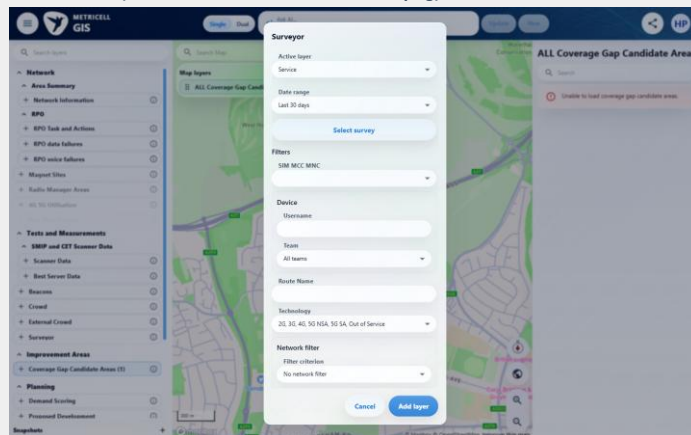

E08 - Before reopen (criterion-5-before-reopen.png)

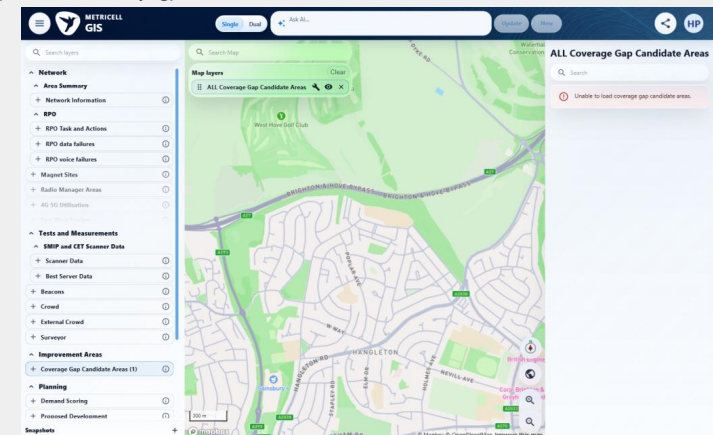

Criterion 5 continued: Select Cancel again and verify that the dialog closes without adding a Surveyor layer and the recorded map and Map layers state remains unchanged.
 Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E11 - Before second cancel (criterion-5-before-second-cancel.png)

E06 - Final (criterion-5-final.png)

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
