About Metricell 10

1 Revision History

Version	Date	Revision Author	Summary of Changes
[1.0]	12/10/2026	TEST2 QA Automation	Generated from TEST2 evidence review

2 Test Cycle Information

Tester:	**Automated**
Jira Ticket:	TEST2-70
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 155.0.8059.40
Date of Test:	12/10/2026
Limitations during Testing:	Criterion 4: A settled street map and visible map controls were present at /gis. The restored Coverage Gap Candidate Areas layer displayed 'Unable to load coverage gap candidate areas' in its existing side panel; its data could not be inspected, but layer data is outside this navigation-only criterion. The layer and panel were left untouched. Defects (No.) counts directly contradicted criteria, not unique Jira bugs; blockers and inconclusive evidence count as zero.
Overall review outcome:	Passed
Browser URL(s) recorded after criteria:	https://o2intelligence-v4-dev.metricell.com/launcher; https://o2intelligence-v4-dev.metricell.com/api-request-audit; https://o2intelligence-v4-dev.metricell.com/gis

3 Test Summary

Area of test	Pass	Fail	Defects (No.)
1. Starting from the authorised V4 launcher at /launcher, the page visibly shows both the GIS and API Request Audit module cards, and each card has an Open control.	Y	N	0

Area of test	Pass	Fail	Defects (No.)
2. From the authorised launcher, activating the API Request Audit Open control navigates to a non-error audit page that visibly contains identifiable audit content, such as request metrics or the Requests and errors over time chart.	Y	N	0
3. After opening API Request Audit, using the browser Back control returns to the launcher, where the GIS module card and its Open control are visibly available.	Y	N	0
4. From the returned launcher, activating the GIS Open control navigates to a settled GIS map view with visible map controls.	Y	N	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

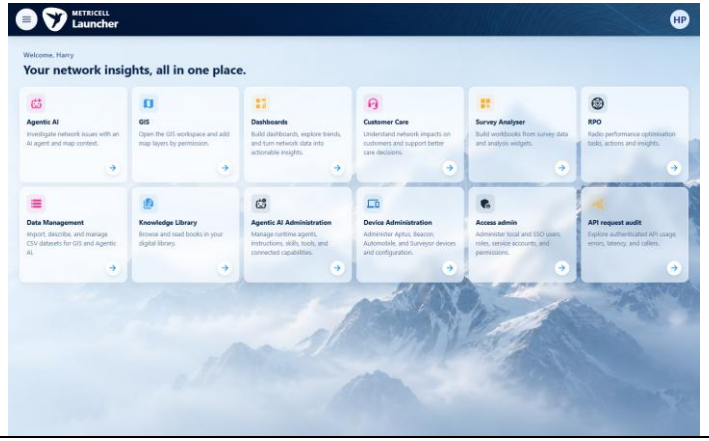

4.1 Tests

Preconditions:	V4 access and ticket conditions.	***Associated Requirements:***	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	Starting from the authorised V4 launcher at /launcher, the page visibly shows both the GIS and API Request Audit module cards, and each card has an Open control.	Starting from the authorised V4 launcher at /launcher, the page visibly shows both the GIS and API Request Audit module cards, and each card has an Open control.	criterion-1-initial.png and criterion-1-final.png show GIS and API request audit cards with arrow Open controls; browserUrl confirms the authorised host at /launcher. Evidence: E01	Passed

Criterion 1 evidence: Starting from the authorised V4 launcher at /launcher, the page visibly shows both the GIS and API Request Audit module cards, and each card has an Open control.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/launcher

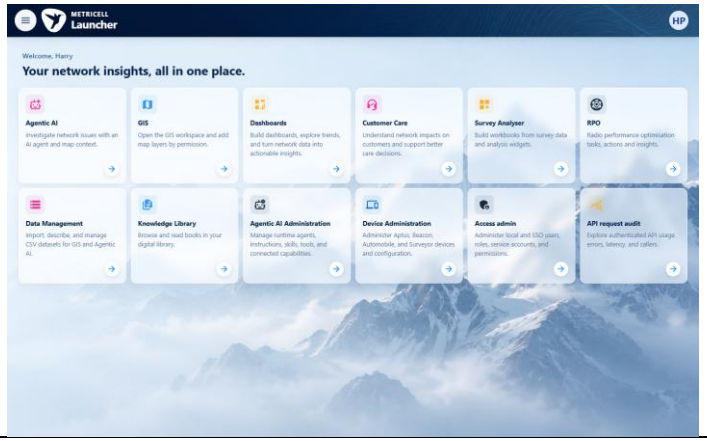

E01 - Final (criterion-1-final.png)

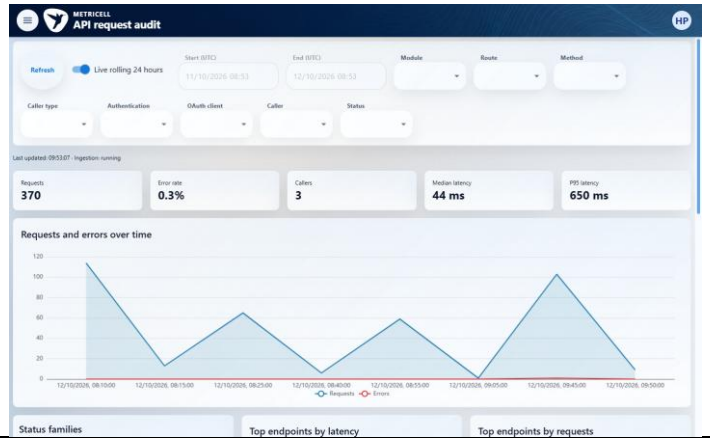

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
2.0.0	From the authorised launcher, activating the API Request Audit Open control navigates to a non-error audit page that visibly contains identifiable audit content, such as request metrics or the Requests and errors over time chart.	From the authorised launcher, activating the API Request Audit Open control navigates to a non-error audit page that visibly contains identifiable audit content, such as request metrics or the Requests and errors over time chart.	criterion-2-before-open-audit.png shows the launcher Open control; criterion-2-after-open-audit.png and criterion-2-final.png show 370 requests, 0.3% error rate, 3 callers and the Requests and errors over time chart. The recorded browserUrl confirms /api-request-audit on the authorised host. Evidence: E02, E03	Passed

Criterion 2 evidence: From the authorised launcher, activating the API Request Audit Open control navigates to a non-error audit page that visibly contains identifiable audit content, such as request metrics or the Requests and errors over time chart.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/api-request-audit

E02 - Initial (criterion-2-initial.png)

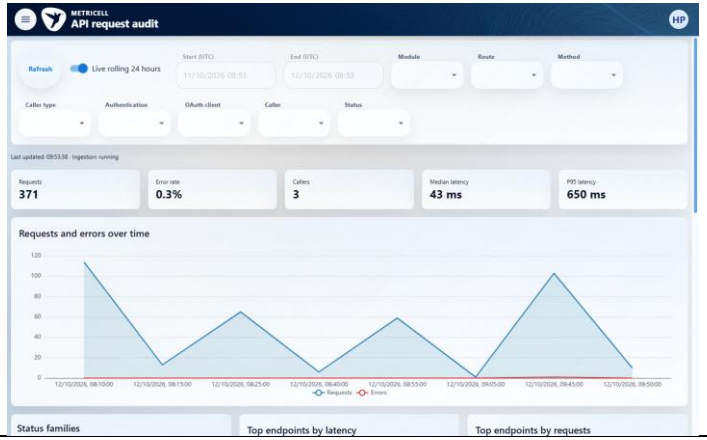

E03 - Final (criterion-2-final.png)

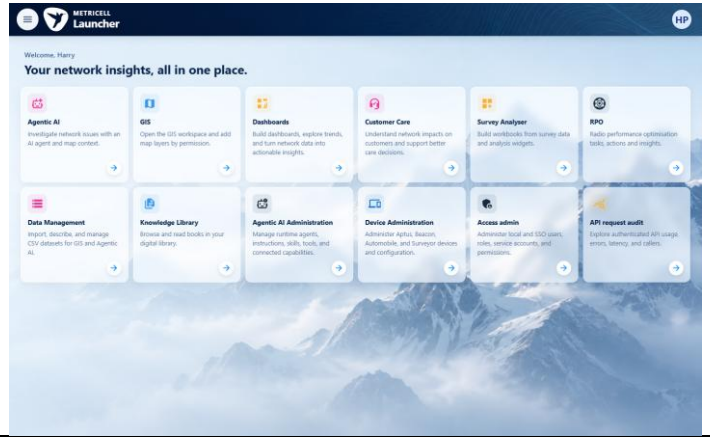

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
3.0.0	After opening API Request Audit, using the browser Back control returns to the launcher, where the GIS module card and its Open control are visibly available.	After opening API Request Audit, using the browser Back control returns to the launcher, where the GIS module card and its Open control are visibly available.	The criterion-owned initial/before-open-audit, after-open-audit/before-back and after-back/final images show the complete launcher-to-audit-to-launcher journey documented in steps_taken. criterion-3-after-back.png and criterion-3-final.png show GIS and its arrow Open control; browserUrl confirms the authorised host at /launcher. Evidence: E04, E05	Passed

Criterion 3 evidence: After opening API Request Audit, using the browser Back control returns to the launcher, where the GIS module card and its Open control are visibly available.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/launcher

E04 - Before back (criterion-3-before-back.png)

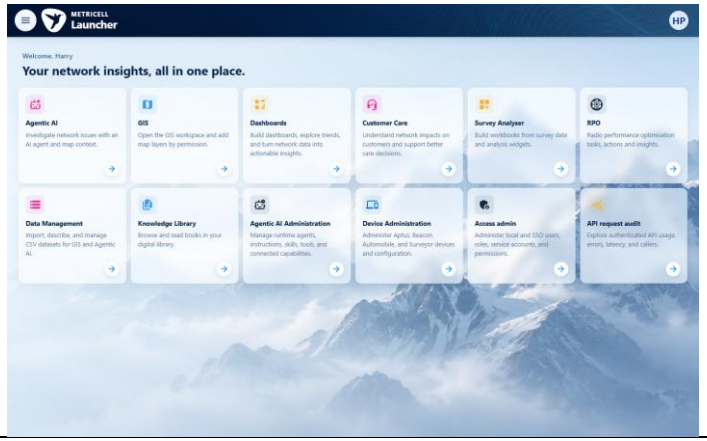

E05 - Final (criterion-3-final.png)

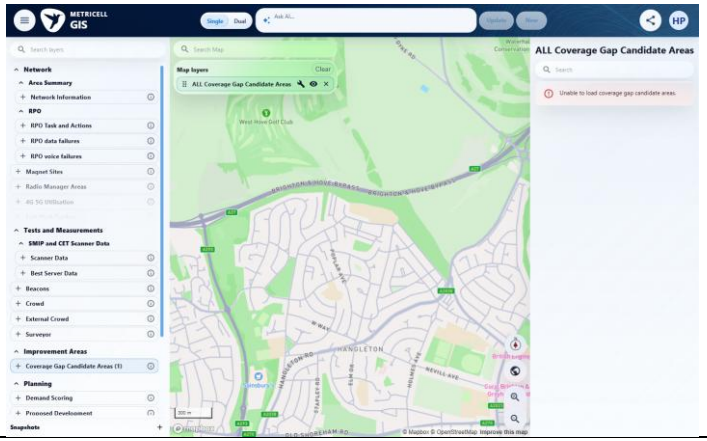

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
4.0.0	From the returned launcher, activating the GIS Open control navigates to a settled GIS map view with visible map controls.	From the returned launcher, activating the GIS Open control navigates to a settled GIS map view with visible map controls.	The criterion-owned audit and Back sequence leads to the returned launcher in criterion-4-after-back.png and criterion-4-before-open-gis.png. criterion-4-after-open-gis.png and criterion-4-final.png show a settled street map with place labels, map search, north reset, map style and zoom controls; browserUrl confirms the authorised host at /gis. The coverage gap candidate areas panel has a data-loading error, outside this map-navigation criterion. criterion-4-cleanup-launcher.png shows the final launcher. Evidence: E05, E06	Passed

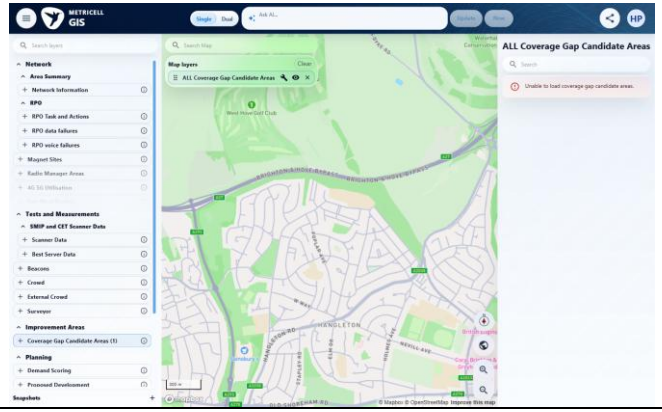

Criterion 4 evidence: From the returned launcher, activating the GIS Open control navigates to a settled GIS map view with visible map controls.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E05 - Before open gis (criterion-4-before-open-gis.png)

E06 - Final (criterion-4-final.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Supporting setup captures - full attempt evidence remains in the local evidence folder				
E07 - After open gis (criterion-4-after-open-gis.png)

Better Connected

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
