1 Revision History

Version	Date	Revision Author	Summary of Changes
[1.0]	12/10/2026	TEST2 QA Automation	Generated from TEST2 evidence review

2 Test Cycle Information

Tester:	**Automated**
Jira Ticket:	TEST2-71
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 155.0.8059.40
Date of Test:	12/10/2026
Limitations during Testing:	Criterion 1: The pre-existing ALL Coverage Gap Candidate Areas panel displayed 'Unable to load coverage gap candidate areas.' The basemap remained rendered and available; this unrelated data error did not prevent the catalogue-search assertions. Existing layer, panel, map extent and settings were preserved. Defects (No.) counts directly contradicted criteria, not unique Jira bugs; blockers and inconclusive evidence count as zero.
Overall review outcome:	Passed
Browser URL(s) recorded after criteria:	https://o2intelligence-v4-dev.metricell.com/gis

3 Test Summary

Area of test	Pass	Fail	Defects (No.)
1. With GIS open and Search layers initially empty, entering zzqa_showcase_no_match_20261012 leaves the entered text visible, shows no matching catalogue entries, and keeps the GIS map available.	Y	N	0
2. Replacing the no-match text with Surveyor without reloading GIS shows Surveyor in the filtered catalogue while keeping the GIS map available.	Y	N	0

Area of test	Pass	Fail	Defects (No.)
3. Clearing Search layers restores the original catalogue and leaves the complete Map layers entries and order and the map view matching the recorded pre-search baseline, with no layer added or removed.	Y	N	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

4.1 Tests

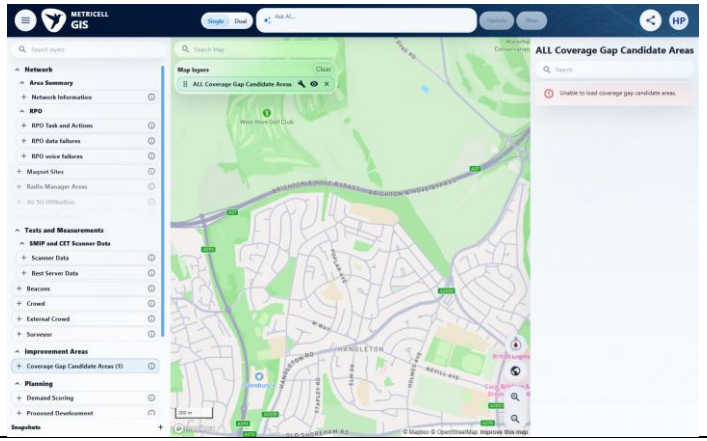

Preconditions:	V4 access and ticket conditions.	***Associated Requirements:***	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	With GIS open and Search layers initially empty, entering zzqa_showcase_no_match_20261012 leaves the entered text visible, shows no matching catalogue entries, and keeps the GIS map available.	With GIS open and Search layers initially empty, entering zzqa_showcase_no_match_20261012 leaves the entered text visible, shows no matching catalogue entries, and keeps the GIS map available.	criterion-1-before-no-match.png shows empty Search layers and a populated catalogue. criterion-1-after-no-match.png and criterion-1-final.png retain zzqa_showcase_no_match_20261012, show no matching layers and a rendered GIS map. The pre-existing coverage-gap data error does not obstruct the search or basemap. Evidence: E01, E02	Passed

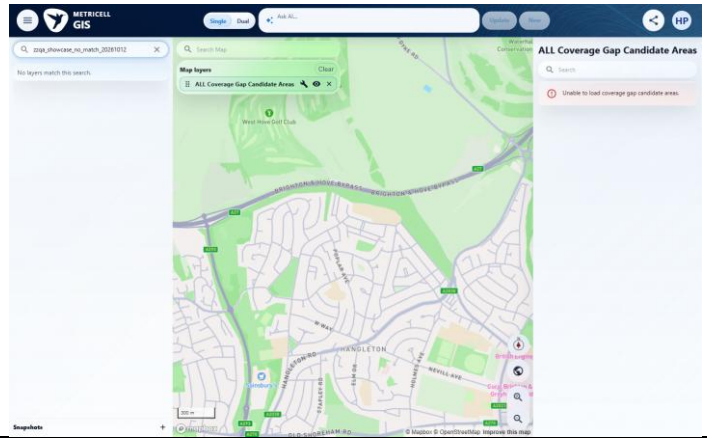

Criterion 1 evidence: With GIS open and Search layers initially empty, entering zzqa_showcase_no_match_20261012 leaves the entered text visible, shows no matching catalogue entries, and keeps the GIS map available.

Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E01 - Before no match (criterion-1-before-no-match.png)

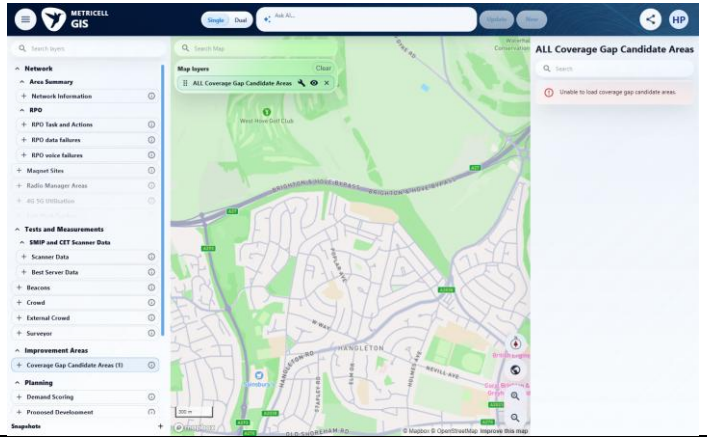

E02 - Final (criterion-1-final.png)

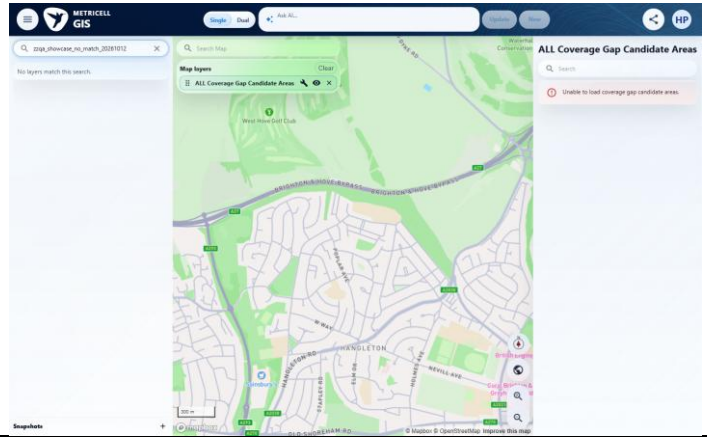

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
2.0.0	Replacing the no-match text with Surveyor without reloading GIS shows Surveyor in the filtered catalogue while keeping the GIS map available.	Replacing the no-match text with Surveyor without reloading GIS shows Surveyor in the filtered catalogue while keeping the GIS map available.	criterion-2-after-no-match-before-recovery.png shows the no-match query; criterion-2-after-recovery.png and criterion-2-final.png show Surveyor as the filtered catalogue entry with the map still rendered. This criterion's ordered replacement steps record no reload; the initial selector error was recovered before testing. Evidence: E03, E04, E05	Passed

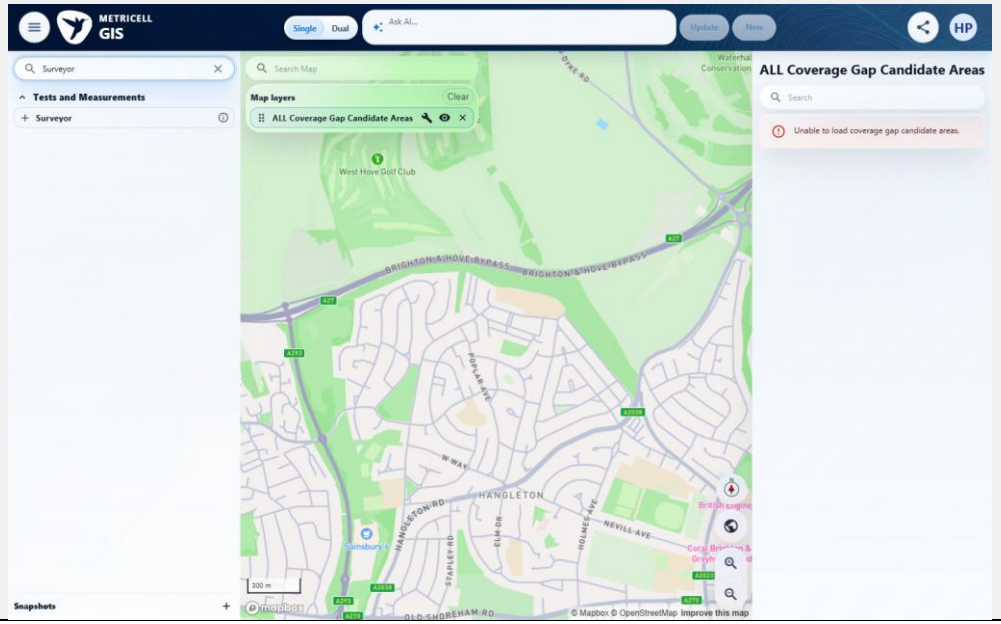

Criterion 2 evidence: Replacing the no-match text with Surveyor without reloading GIS shows Surveyor in the filtered catalogue while keeping the GIS map available.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E03 - Before no match (criterion-2-before-no-match.png)

E04 - After no match before recovery (criterion-2-after-no-match-before-recovery.png)

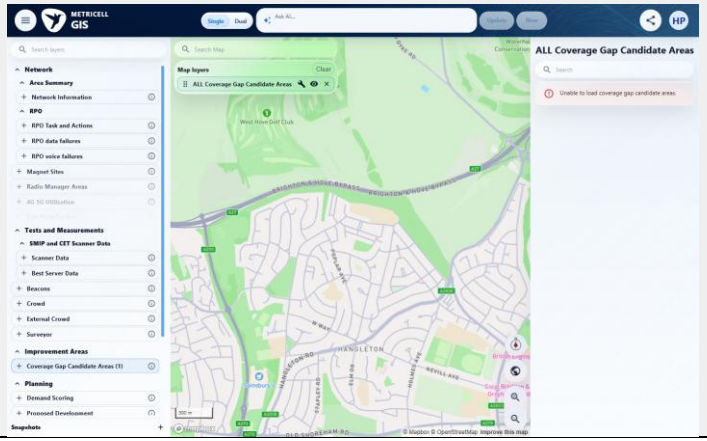

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 2 continued: Replacing the no-match text with Surveyor without reloading GIS shows Surveyor in the filtered catalogue while keeping the GIS map available. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E05 - Final (criterion-2-final.png)**				

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
3.0.0	Clearing Search layers restores the original catalogue and leaves the complete Map layers entries and order and the map view matching the recorded pre-search baseline, with no layer added or removed.	Clearing Search layers restores the original catalogue and leaves the complete Map layers entries and order and the map view matching the recorded pre-search baseline, with no layer added or removed.	criterion-3-baseline-map.png and criterion-3-baseline-layers.png show the original catalogue, unobscured map and complete single-entry Map layers list (ALL Coverage Gap Candidate Areas). criterion-3-after-no-match-before-recovery.png and criterion-3-after-recovery-before-clear.png show the criterion-owned search sequence. criterion-3-after-clear-restored-map.png, criterion-3-after-clear-restored-layers.png and criterion-3-final.png show empty Search layers, the restored catalogue, the same sole layer and controls, and matching West Hove Golf Club/Hangleton landmarks, extent and 300 m scale. No added or removed layer is visible. Evidence: E06, E07, E08	Passed

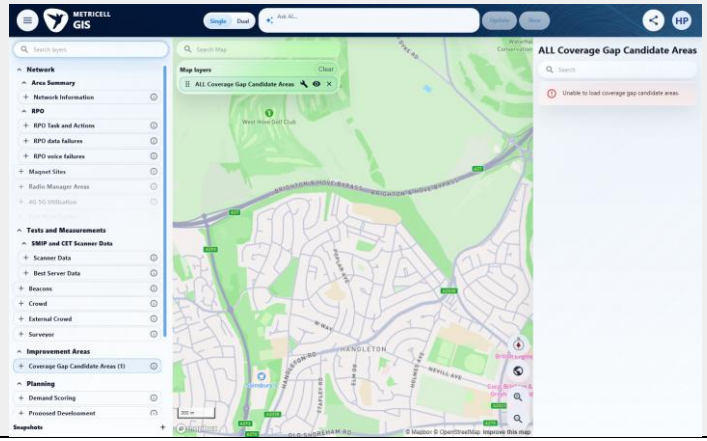

Criterion 3 evidence: Clearing Search layers restores the original catalogue and leaves the complete Map layers entries and order and the map view matching the recorded pre-search baseline, with no layer added or removed.

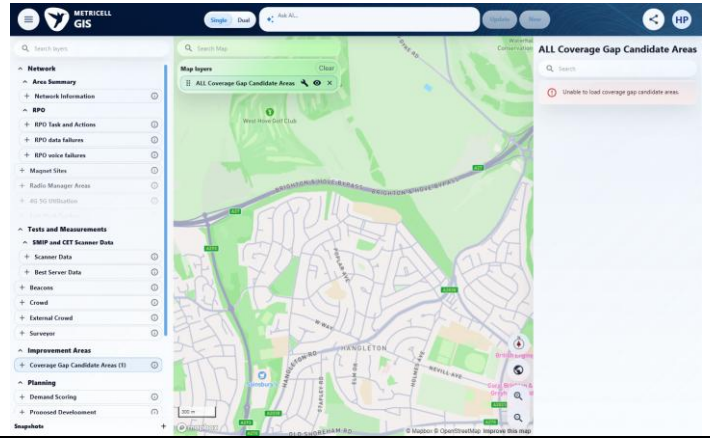

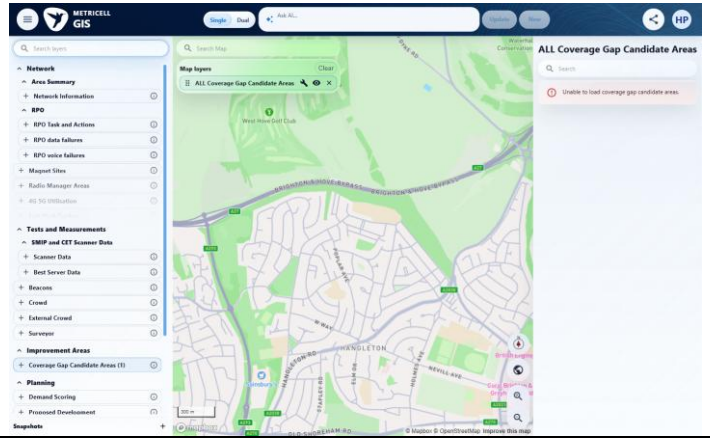

Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E06 - Baseline map (criterion-3-baseline-map.png)

E07 - After clear restored map (criterion-3-after-clear-restored-map.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 3 continued: Clearing Search layers restores the original catalogue and leaves the complete Map layers entries and order and the map view matching the recorded pre-search baseline, with no layer added or removed. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E08 - Baseline layers (criterion-3-baseline-layers.png)**  **E07 - Final (criterion-3-final.png)**

Better Connected

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
