Version	Date	Revision Author	Summary of Changes
[1.0]	01/10/2026	TEST2 QA Automation	Generated from TEST2 evidence review

Tester:	Automated
Jira Ticket:	TEST2-48
Environment:	Chrome
Browser Details:	Chrome version not recorded
Date of Test:	01/10/2026
Limitations during Testing:	No testing limitations recorded.
Overall review outcome:	Passed
Criterion final URL(s):	https://o2intelligence-v4-dev.metricell.com/gis

Area of test	Pass	Fail	Defects (No.)
1. Starting from the V4 launcher, the signed-in user opens GIS, loads an available Surveyor layer, and the layer legend displays a `Display Settings` control.	Y	N	0
2. After opening `Display Settings`, the panel displays a `Show linked sites` control with a discernible current state.	Y	N	0
3. After changing `Show linked sites` to the opposite state, the control visibly displays the new state.	Y	N	0

4. After restoring 'Show linked sites' to its original state, closing and reopening 'Display Settings' shows the original state again.	Y	N	0
--	---	---	---

All automated tests must map to an approved criterion and produce reproducible results plus decisive evidence. Use Failed, Blocked, or Unverified where applicable.

4.1 Tests

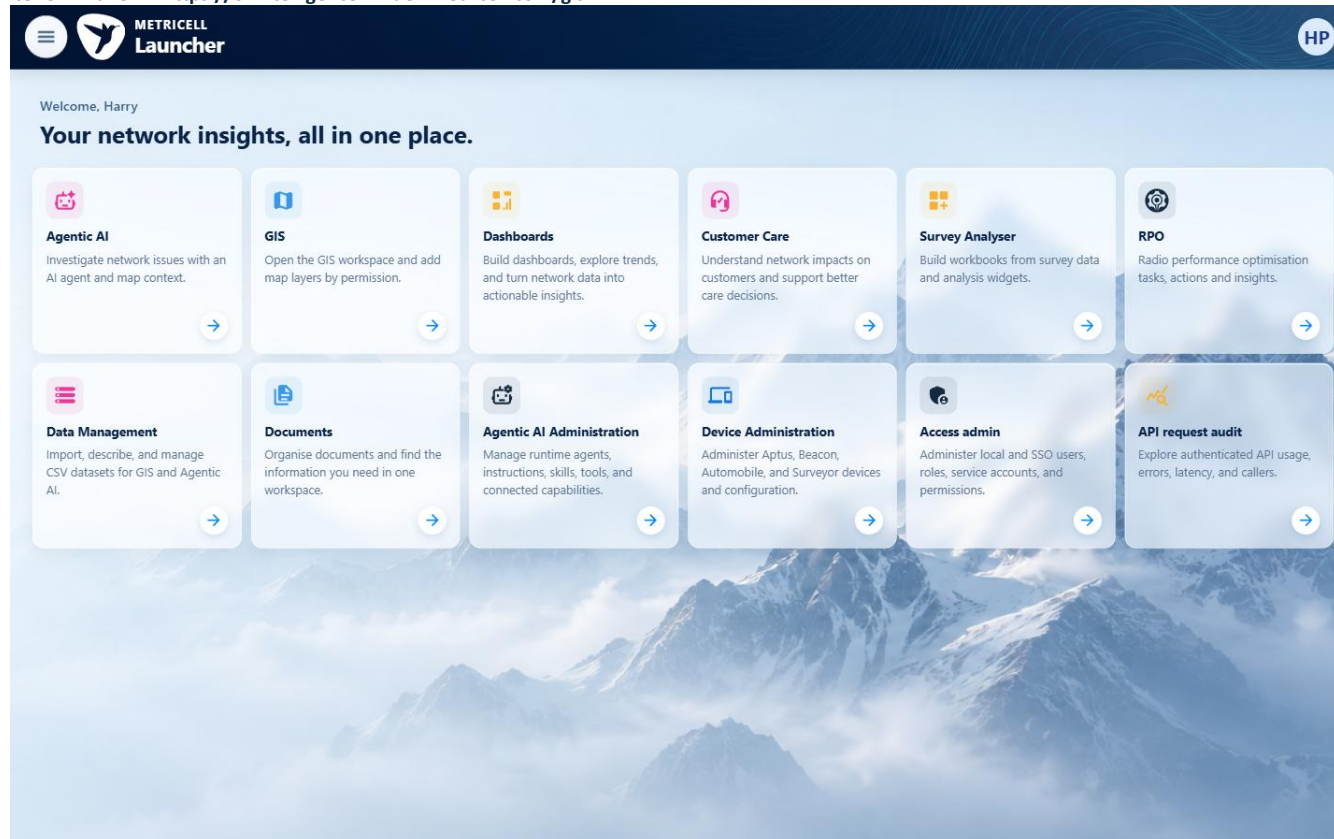

Preconditions:	Per-criterion prerequisites are stated in the acceptance criteria and test steps; no separate fixture inventory was supplied.	Associated Requirements:	Criteria from criteria.md.	Automation Notes:	Automated browser run; uniquely identified PNG evidence appears in the appendix. Unverified is reported as Failed.

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	Starting from the V4 launcher, the signed-in user opens GIS, loads an available Surveyor layer, and the layer legend displays a `Display Settings` control.	Starting from the V4 launcher, the signed-in user opens GIS, loads an available Surveyor layer, and the layer legend displays a `Display Settings` control.	Screenshots show the signed-in launcher, GIS, and loaded Surveyor - Service legend with Display Settings. The result browserUrl is https://o2intelligence-v4-dev.metricell.com/gis, an expected V4 host. All named criterion screenshots exist and are non-empty. Steps taken: Navigated to the V4 launcher and confirmed the signed-in welcome screen.; Opened GIS, selected the available Surveyor layer with its default Service configuration, and added it to the map.; Observed the Surveyor - Service legend with the Display Settings control.; Removed the added layer to restore the map. Evidence: E01, E02, E03, E04, E05 Criterion final URL: https://o2intelligence-v4-dev.metricell.com/gis	Passed
2.0.0	After opening `Display Settings`, the panel displays a `Show linked sites` control with a discernible current state.	After opening `Display Settings`, the panel displays a `Show linked sites` control with a discernible current state.	The Display Settings screenshot shows Show linked sites checked. The result browserUrl is https://o2intelligence-v4-dev.metricell.com/gis, an expected V4 host. All named criterion screenshots exist and are non-empty. Steps taken: Returned to the V4 launcher, opened GIS, and	Passed

			added the available Surveyor layer using its default configuration.; Opened Display Settings and observed Show linked sites checked.; Removed the added layer to restore the map. Evidence: E06, E07, E08, E09, E10, E11 Criterion final URL: https://o2intelligence-v4-dev.metricell.com/gis	
3.0.0	After changing `Show linked sites` to the opposite state, the control visibly displays the new state.	After changing `Show linked sites` to the opposite state, the control visibly displays the new state.	Before and after screenshots show Show linked sites checked, then unchecked. The result browserUrl is https://o2intelligence-v4-dev.metricell.com/gis , an expected V4 host. All named criterion screenshots exist and are non-empty. Steps taken: Returned to the V4 launcher, opened GIS, and added the available Surveyor layer using its default configuration.; Opened Display Settings and observed Show linked sites initially checked.; Clicked Show linked sites once and observed that it was unchecked.; Restored Show linked sites to checked and removed the added layer. Evidence: E06, E07, E08, E12, E09, E10, E13, E14 Criterion final URL: https://o2intelligence-v4-dev.metricell.com/gis	Passed
4.0.0	After restoring `Show linked sites` to its original state, closing and reopening `Display Settings` shows the original state again.	After restoring `Show linked sites` to its original state, closing and reopening `Display Settings` shows the original state again.	Screenshots show the restored checked state before closing and the checked state after reopening Display Settings. The result browserUrl is https://o2intelligence-v4-dev.metricell.com/gis , an expected V4 host. All named criterion screenshots exist and are non-empty. Steps taken: Returned to the V4 launcher, opened GIS, and added the available Surveyor layer using its default configuration.; Opened Display Settings and observed Show linked sites checked.; Closed Display Settings, reopened it, and observed Show linked sites remained checked.; Removed the added layer to restore the map. Evidence: E06, E07, E08, E12, E09, E10, E15, E16, E11 Criterion final URL: https://o2intelligence-v4-dev.metricell.com/gis	Passed

Evidence Appendix - unique source screenshots

E01 - criterion-1-initial.png | Criterion final URL: <https://o2intelligence-v4-dev.metricell.com/gis>

The screenshot displays the METRICELL GIS application interface. On the left is a sidebar menu with categories: Network, Tests and Measurements, Improvement Areas, and Planning. The main area shows a map of the United Kingdom with a 'Surveyor' modal form overlaid. The form contains the following fields:

- Active layer:** Service (dropdown)
- Date range:** Last 30 days (dropdown)
- Select survey:** (button)
- Filters:** SIM MCC MNC (dropdown)
- Device:**
 - Username: (text input)
 - Team: All teams (dropdown)
- Route Name:** (text input)
- Technology:** 2G, 3G, 4G, 5G NSA, 5G SA, Out of Service (dropdown)
- Network filter:** Filter criterion: No network filter (dropdown)

At the bottom of the modal are 'Cancel' and 'Add layer' buttons. The background map shows the UK with labels for various cities and geographical features like the North Sea and English Channel.

The screenshot displays the METRICELL GIS application interface. On the left, a sidebar menu lists various categories: Network (Area Summary, Network Information, RPO, RPO Task and Actions, RPO data failures, RPO voice failures, Magnet Sites, Radio Manager Areas, 4G 5G Utilization), Tests and Measurements (Beacons, Crowd, Surveyor), Improvement Areas (Coverage Gap Candidate Areas), and Planning (Demand Scoring, Proposed Development, Site Search Area, Beacon Chunks, Prospective Sites). The main map area shows a map of the United Kingdom and surrounding regions. A 'Surveyor' filter modal is open in the center, allowing users to refine their search. The modal includes fields for 'Active layer' (Service), 'Date range' (Last 30 days), a 'Select survey' button, 'Filters' (SIM MCC MNC), 'Device' (Username, Team, All teams), 'Route Name', 'Technology' (2G, 3G, 4G, 5G NSA, 5G SA, Out of Service), and 'Network filter' (Filter criterion, No network filter). At the bottom of the modal are 'Cancel' and 'Add layer' buttons. The map background shows major cities like London, Manchester, and Edinburgh, with labels for the North Sea, Irish Sea, and English Channel.

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
