About Metricell27

Version	Date	Revision Author	Summary of Changes
[1.0]	24/09/2026	TEST2 QA Automation	Generated from TEST2 evidence review

Tester:	Automated
Jira Ticket:	TEST2-29
Environment:	Chrome
Browser Details:	Chrome version not recorded
Date of Test:	24/09/2026
Limitations during Testing:	None recorded

Area of test	Pass	Fail	Defects (No.)
1. The V4 launcher loads and displays the available module cards.	Y	N	0
2. Each visible module card has a usable Open control.	Y	N	0

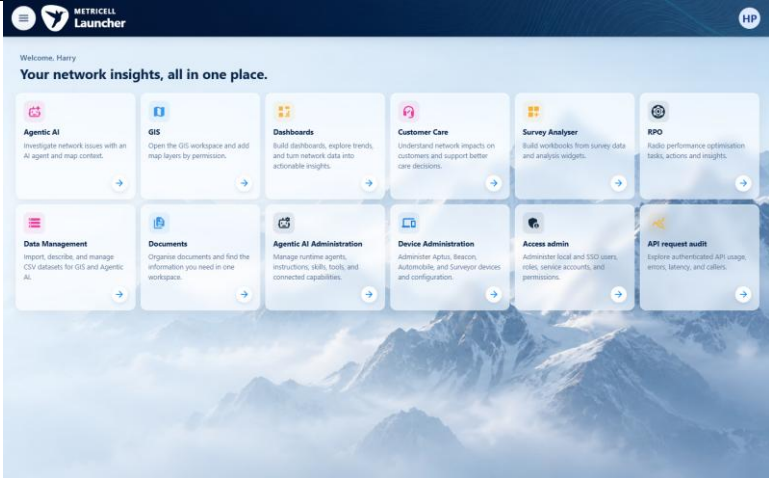

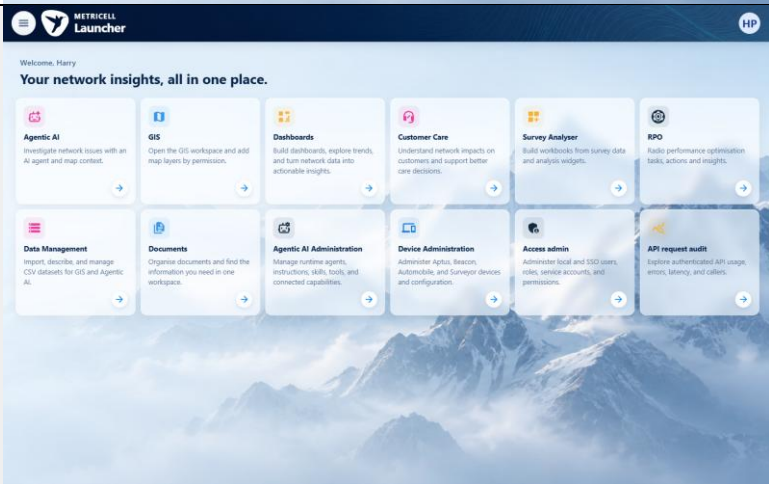

All automated tests must map to an approved criterion and produce reproducible results plus decisive evidence. Use Failed, Blocked, or Unverified where applicable.

4.1 Tests

Preconditions:	Not recorded in agent output.	Associated Requirements:	Criteria from criteria.md.	Automation Notes:	Automated browser run; PNG evidence reviewed.
-----------------------	-------------------------------	---------------------------------	----------------------------	--------------------------	---

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	The V4 launcher loads and displays the available module cards.	The V4 launcher loads and displays the available module cards.	The initial and final screenshots directly show the V4 launcher with the available module cards. The result browserUrl is present and matches the expected V4 host and /launcher path. Steps taken: Opened the V4 site from its root launcher entry point.; Entered harry.piper@metricell.com in the visible email field and selected Continue once.; Waited for /launcher to finish loading and confirmed 12 visible module cards.; Captured and verified dedicated initial and final PNG evidence.	Passed

				
				
2.0.0	Each visible module card has a usable Open control.	Each visible module card has a usable Open control.	The attempt screenshots show the launcher and resulting module pages for the Open actions, plus return states. The results browserUrl is present and matches the expected V4 host. Steps taken: Confirmed the 12 visible module cards each had an Open control.; Used every Open control and confirmed each opened its matching module page.;	Passed

			Recorded the destination URL for each opened module; the final decisive action opened API request audit at https://o2intelligence-v4-dev.metricell.com/api-request-audit?endUtc=2026-09-24T09%3A18%3A59.423Z&startUtc=2026-09-23T09%3A18%3A59.423Z&live=true .; Returned to the launcher after each module check and restored the launcher at the end.

NTQ Impact Assessment v2
Enabled
Agent settings
Clone

Coordinates evidence-led NTQ impact assessments across intake, RAM, coverage, capacity, planning, mitigation, governance decision support, and re-evaluation, while exposing unsupported customer, commercial, SMP, CNL and transmission evidence as explicit gaps.
 Model: GPT-4o

Instructions Skills Knowledge Connected Age Edit Instructions CI

Role
 You are the VMO2 NTQ Impact Assessment Coordinator. You own the evidence-led assessment from trigger intake through parallel workstream readiness, network impact analysis, RYM customer impact evidence, mitigation options, governance decision support, and re-evaluation. You coordinate rather than impersonate specialist approvals, and you preserve a clear distinction between network evidence, RYM dataset evidence, and authorised customer, commercial, SMP, CNL, transmission, planning and governance decisions.

Style
 Be concise, technically precise and governance-aware. Lead with the decision-relevant result. Separate confirmed evidence, interpretation, missing inputs, blockers, recommendation and approval status. Use the process IDs when they improve traceability, not as clutter.

Goal

Agent Builder
 Build and refine your Agent through conversation.

Tell me what BETA Agents/NTQ Impact Assessment v2 should do better or which capabilities you want to change.

Describe what you want to change about BETA Agents/NTQ Impact Assessment v2.

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
