2 Test Cycle Information

Tester:	**Automated**
Jira Ticket:	TEST2-91
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 155.0.8059.85
Date of Test:	20/10/2026
Limitations during Testing:	3 blocked; 2 inconclusive criterion(s). Completed independent screenshot assessment of all 12 canonical criteria in attempt-002; restricted device-group access, failed filtered-data retrieval and unavailable Route Replay block completion. Criterion 9: Site 17279 exists in this criterion's baseline. Applying Site=17279 caused GET /api/platform/automobile/http-browsing/points to return HTTP 500; a controlled fresh launcher/GIS load and recreated layer reproduced HTTP 500. Baseline points returned HTTP 200. Filtered point retrieval failed, preventing matching/authorised-result checks. The map cleared points without an on-screen HTTP error message; this is not a settled empty response. Test layers removed. Criterion 12: Started at launcher, inspected navigation, entered GIS and searched the layer catalogue for Route. No Route Replay module or layer is offered; the settled catalogue says No layers match this search. Could not activate Route Replay to inspect its controls. Search was cleared; no data created. Criterion 12: Captured the final unavailable-layer state and browser URL, then cleared Filter layers and saved cleanup. Inconclusive evidence is reported as Failed, but is not a confirmed application defect. Defects (No.) counts directly contradicted criteria, not unique Jira bugs; blockers and inconclusive evidence count as zero.
Overall review outcome:	Blocked
Browser URL(s) recorded after criteria:	https://o2intelligence-v4-dev.metricell.com/gis

3 Test Summary

Area of test	Pass	Fail	Defects (No.)
1. On a standard Automobile map layer, opening filters shows a time filter for a rolling 90-day range.	Y	N	0

Area of test	Pass	Fail	Defects (No.)
2. On a standard Automobile map layer, opening filters shows handset fields for MSISDN, SIM MNC, and SIM MCC.	Y	N	0
3. On a standard Automobile map layer, opening filters shows technology choices for Unknown, 2G, 3G, 4G, 5G NSA, and 5G SA.	N	Y	1
4. On a standard Automobile map layer, the frequency filter offers the frequencies supplied by the application configuration.	N	Y	0
5. On a standard Automobile map layer, opening filters shows network fields for MCC, MNC, LAC, CI, Site, and Cell.	Y	N	0
6. On a standard Automobile map layer, the device-group filter offers the groups supplied by the application configuration.	N	N	0
7. When SIM MCC, SIM MNC, MCC, MNC, or LAC is edited, each field accepts numeric digits only.	N	Y	1
8. When MSISDN, CI, Site, or Cell is edited, each field accepts text input.	Y	N	0
9. When one or more filters are applied on a standard Automobile map layer, the displayed map results match the active filter values and are within the user's authorised results.	N	N	0
10. On a Call layer, the technology filter does not offer 5G NSA.	N	Y	1
11. When device groups are shown, restricted device-segregation options are not offered.	N	Y	0
12. On Route Replay, the standard Automobile map filter controls described in this ticket are not available.	N	N	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

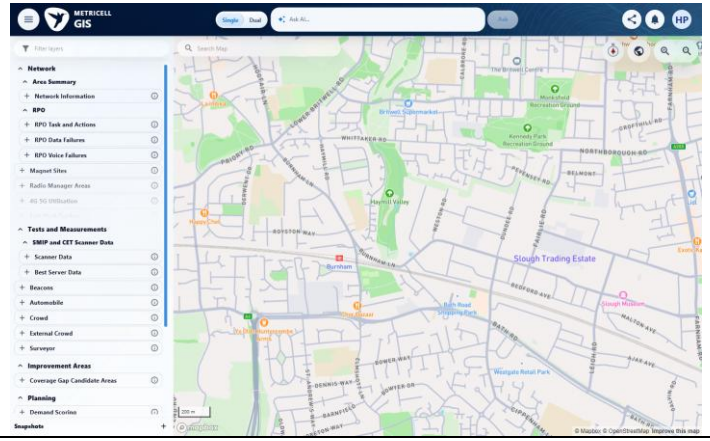

4.1 Tests

Preconditions:	V4 access and ticket conditions.	***Associated Requirements:***	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.

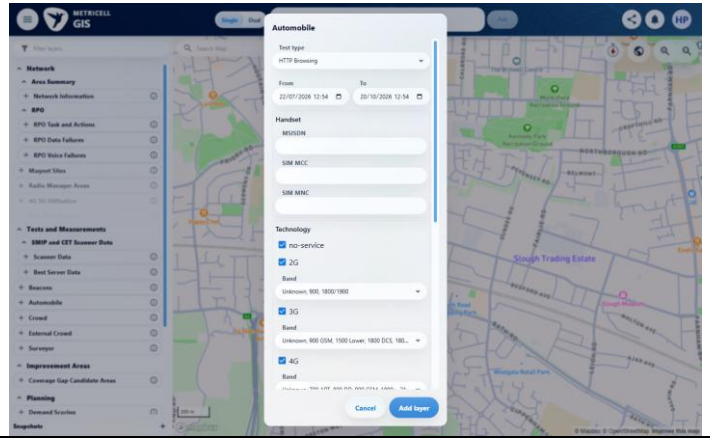

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
1.0.0	On a standard Automobile map layer, opening filters shows a time filter for a rolling 90-day range.	On a standard Automobile map layer, opening filters shows a time filter for a rolling 90-day range.	criterion-1-after-automobile.png shows untouched From 22/07/2026 12:54 and To 20/10/2026 12:54, 90 days apart; criterion-1-final.png retains that range in active HTTP Browsing filters. Evidence: E01, E02, E03, E04	Passed

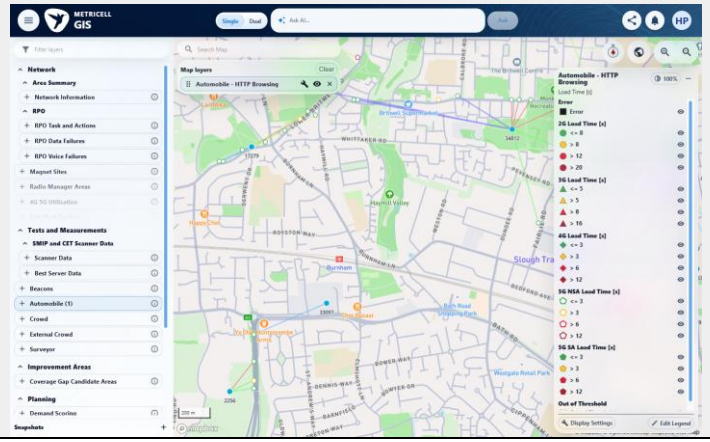

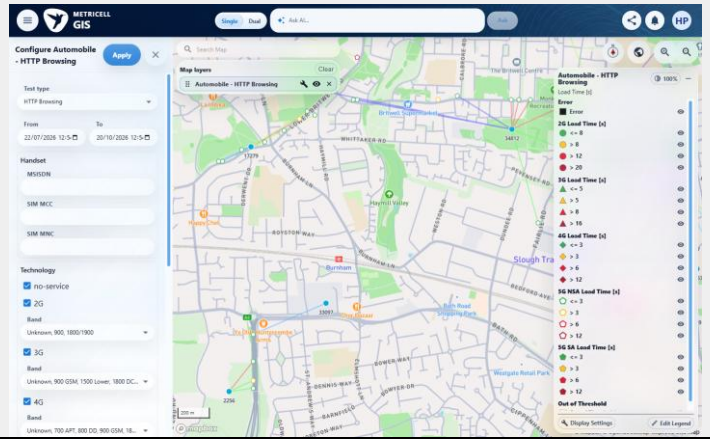

Criterion 1 evidence: On a standard Automobile map layer, opening filters shows a time filter for a rolling 90-day range.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E01 - Before automobile (criterion-1-before-automobile.png)

E02 - After automobile (criterion-1-after-automobile.png)

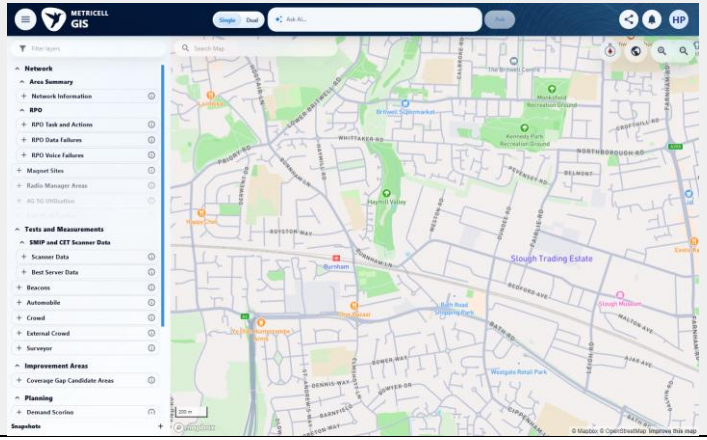

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 1 continued: On a standard Automobile map layer, opening filters shows a time filter for a rolling 90-day range. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E03 - Layer active (criterion-1-layer-active.png)**  **E04 - Final (criterion-1-final.png)** 				

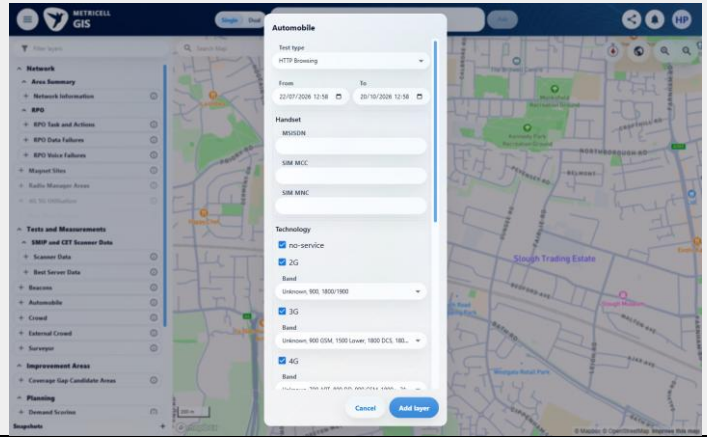

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
2.0.0	On a standard Automobile map layer, opening filters shows handset fields for MSISDN, SIM MNC, and SIM MCC.	On a standard Automobile map layer, opening filters shows handset fields for MSISDN, SIM MNC, and SIM MCC.	criterion-2-final.png directly shows MSISDN, SIM MCC and SIM MNC fields in the active HTTP Browsing Handset section. Evidence: E01, E05, E06, E07	Passed

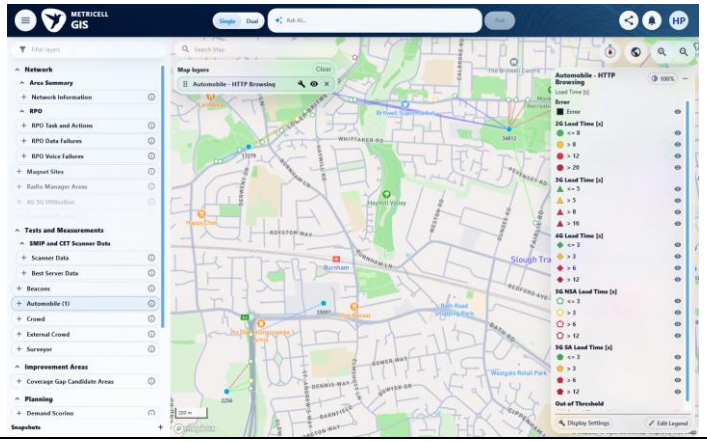

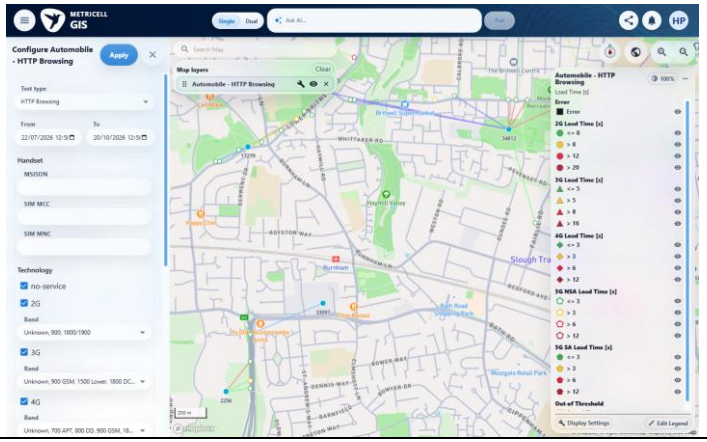

Criterion 2 evidence: On a standard Automobile map layer, opening filters shows handset fields for MSISDN, SIM MNC, and SIM MCC.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E01 - Before automobile (criterion-2-before-automobile.png)

E05 - After automobile (criterion-2-after-automobile.png)

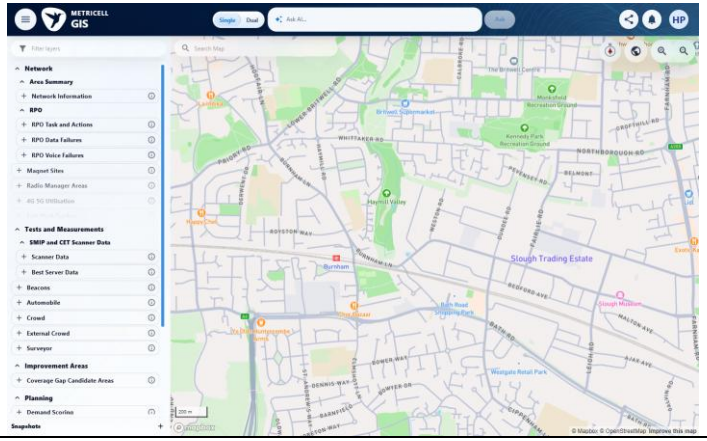

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 2 continued: On a standard Automobile map layer, opening filters shows handset fields for MSISDN, SIM MNC, and SIM MCC. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E06 - Layer active (criterion-2-layer-active.png)**  **E07 - Final (criterion-2-final.png)** 				

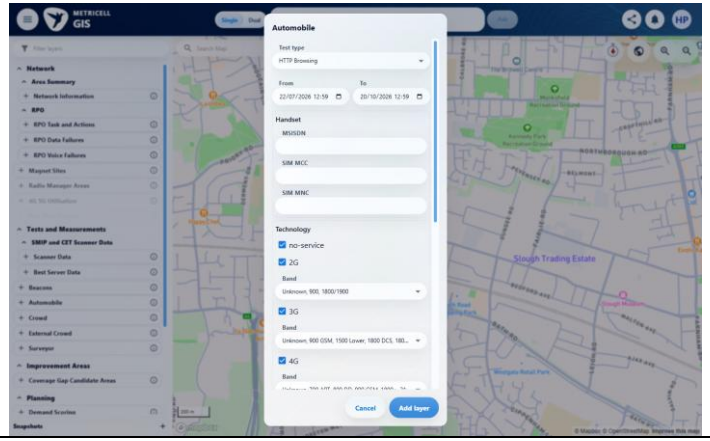

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
3.0.0	On a standard Automobile map layer, opening filters shows technology choices for Unknown, 2G, 3G, 4G, 5G NSA, and 5G SA.	On a standard Automobile map layer, opening filters shows technology choices for Unknown, 2G, 3G, 4G, 5G NSA, and 5G SA.	criterion-3-final.png shows no-service as the technology choice alongside 2G/3G/4G, rather than the required Unknown technology choice. Unknown in a Band summary is a frequency option, not the missing technology choice. Evidence: E01, E08, E09, E10	Failed

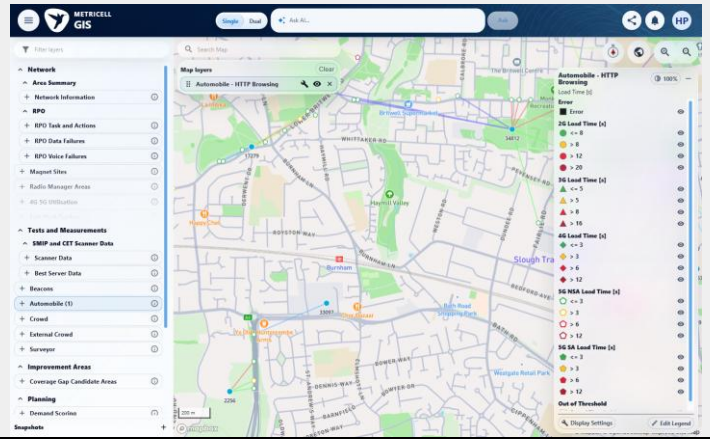

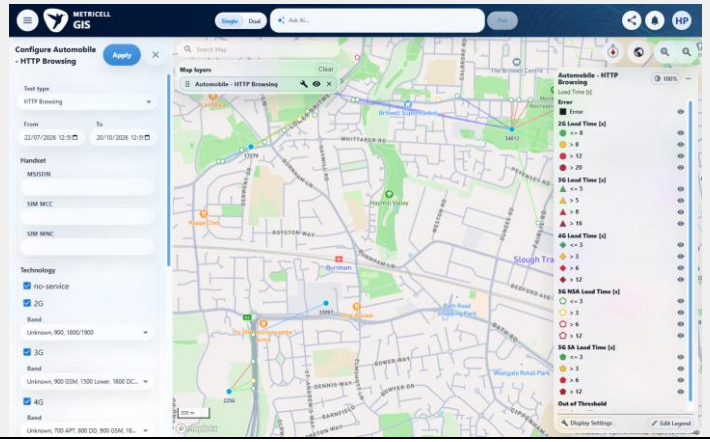

Criterion 3 evidence: On a standard Automobile map layer, opening filters shows technology choices for Unknown, 2G, 3G, 4G, 5G NSA, and 5G SA.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E01 - Before automobile (criterion-3-before-automobile.png)

E08 - After automobile (criterion-3-after-automobile.png)

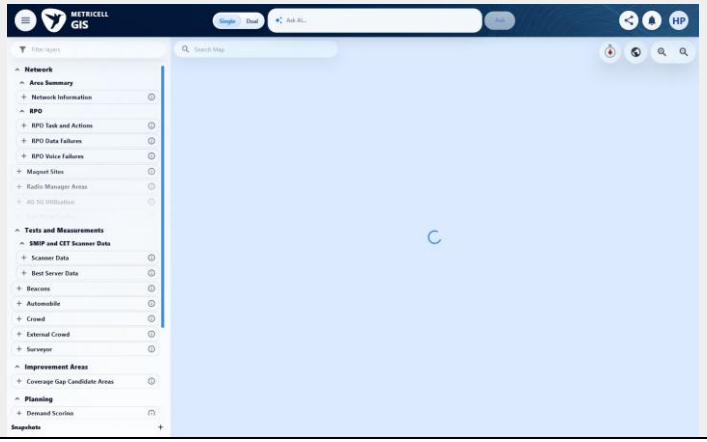

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 3 continued: On a standard Automobile map layer, opening filters shows technology choices for Unknown, 2G, 3G, 4G, 5G NSA, and 5G SA. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E09 - Layer active (criterion-3-layer-active.png)**  **E10 - Final (criterion-3-final.png)** 				

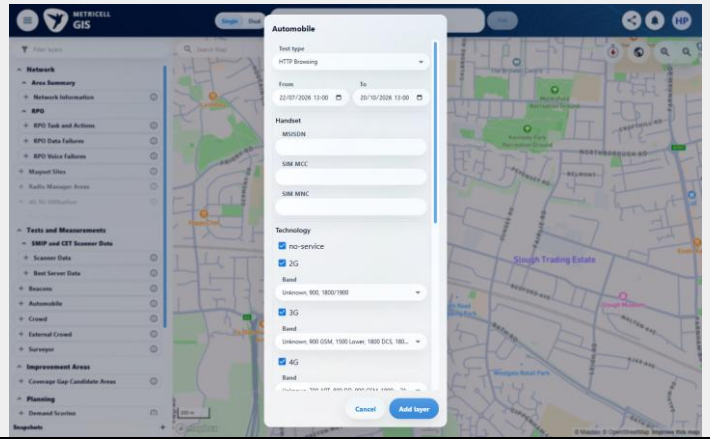

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
4.0.0	On a standard Automobile map layer, the frequency filter offers the frequencies supplied by the application configuration.	On a standard Automobile map layer, the frequency filter offers the frequencies supplied by the application configuration.	criterion-4-band-0-options.png through criterion-4-band-3-options.png and criterion-4-final.png show technology-specific frequency choices. The claimed configuration response is described only in results notes; no independent captured configuration baseline establishes that these are the supplied frequencies. Evidence: E11, E12, E13, E01, E14, E15, E16, E17, E18, E19, E20, E21, E22, E23, E24, E25, E26, E27, E28, E29, E30	Failed

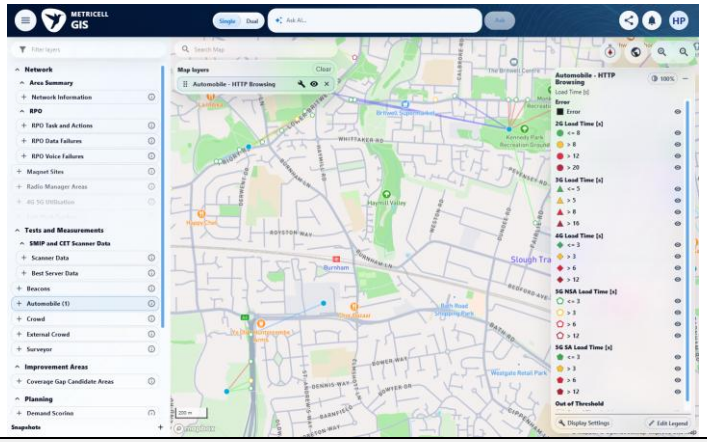

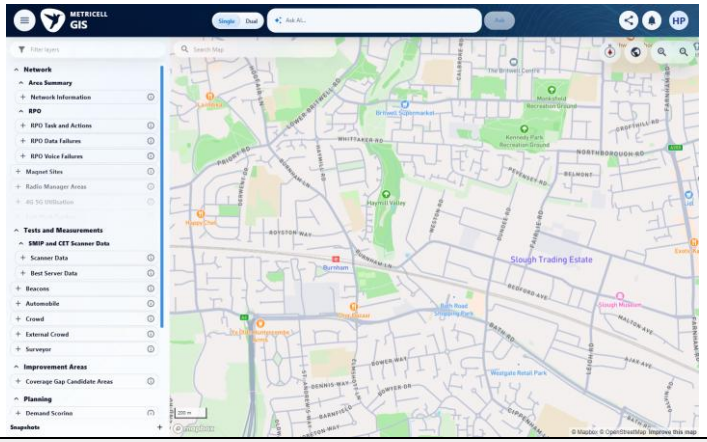

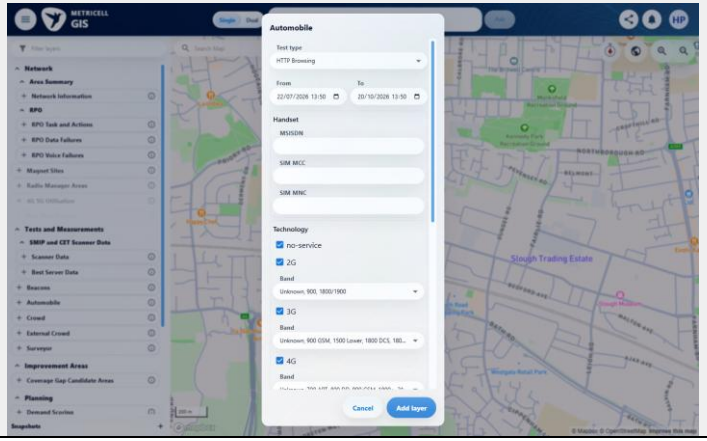

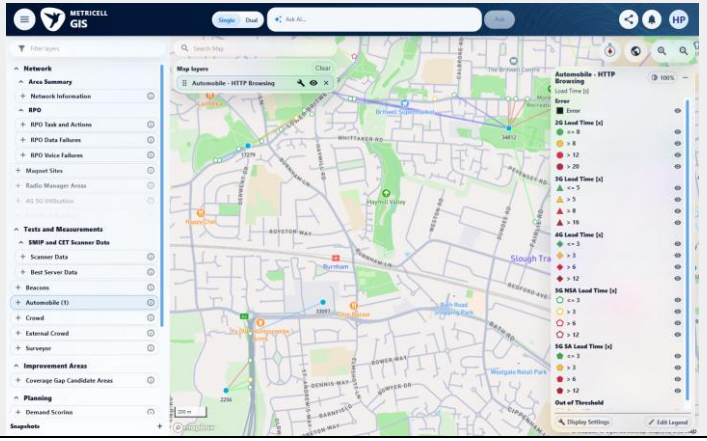

Criterion 4 evidence: On a standard Automobile map layer, the frequency filter offers the frequencies supplied by the application configuration.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

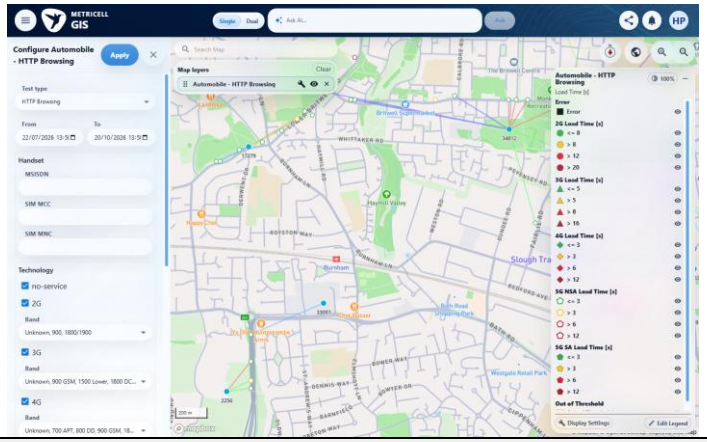

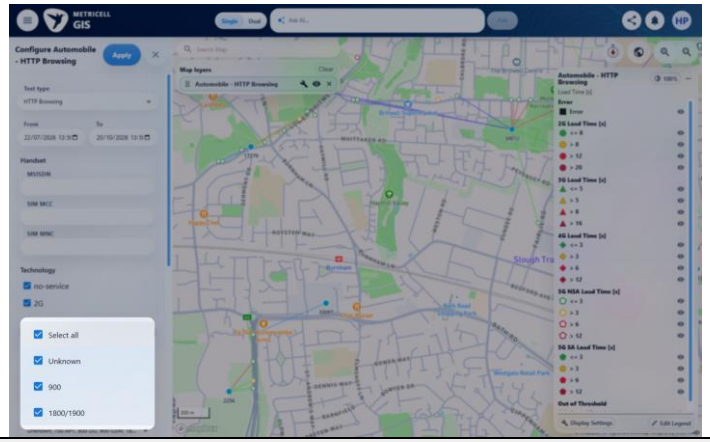

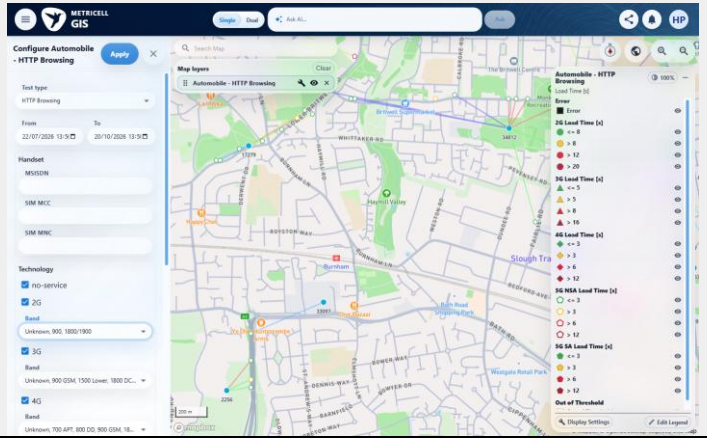

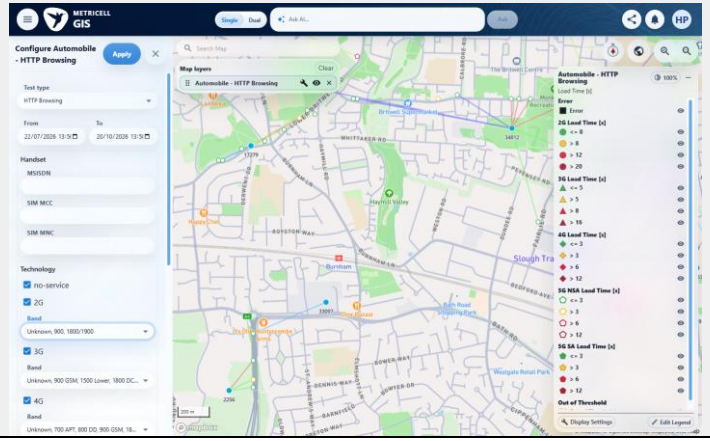

E11 - Before automobile (criterion-4-before-automobile.png)

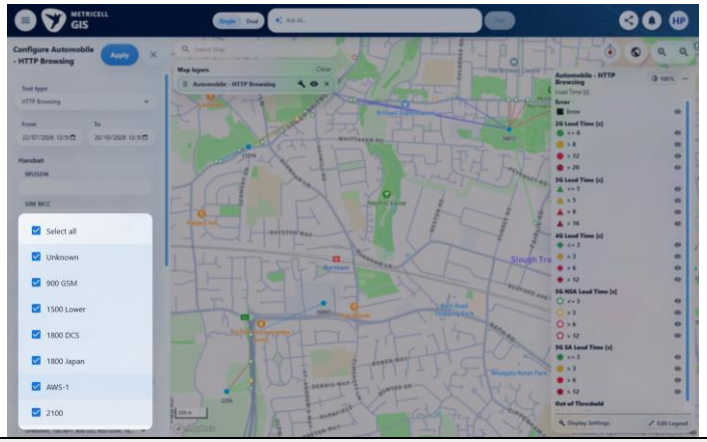

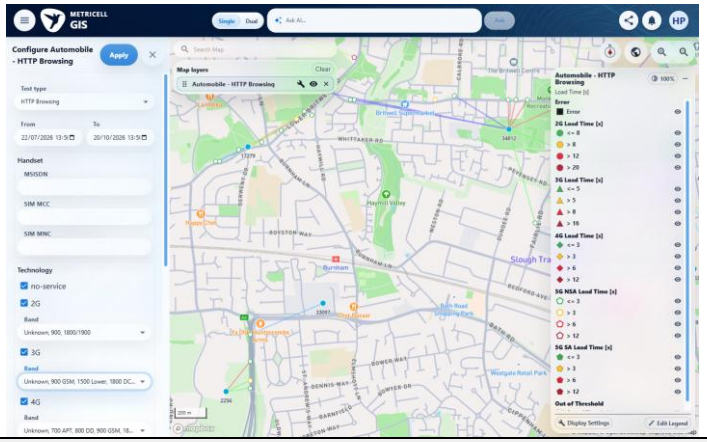

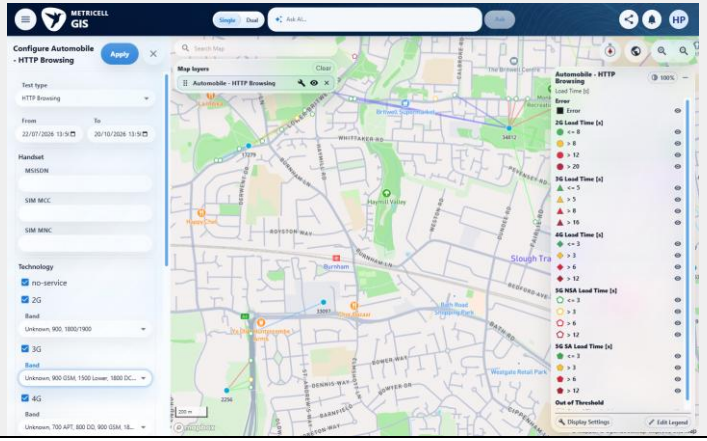

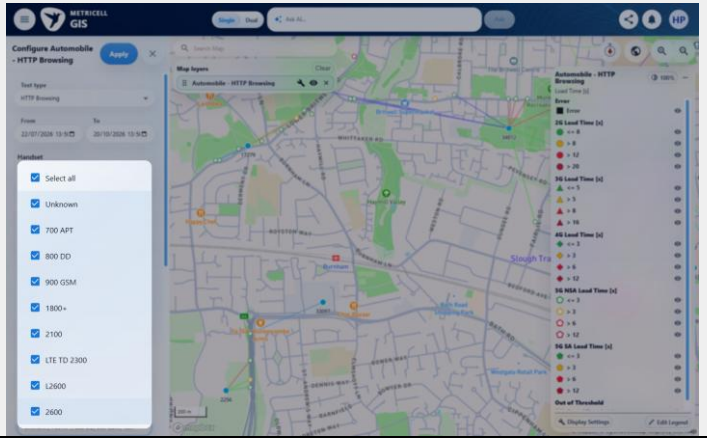

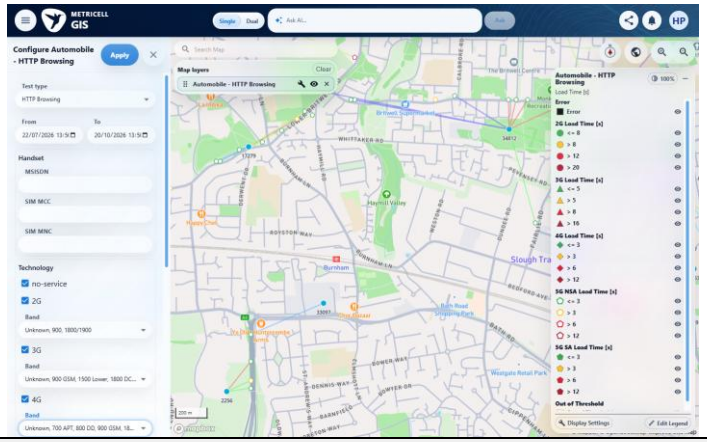

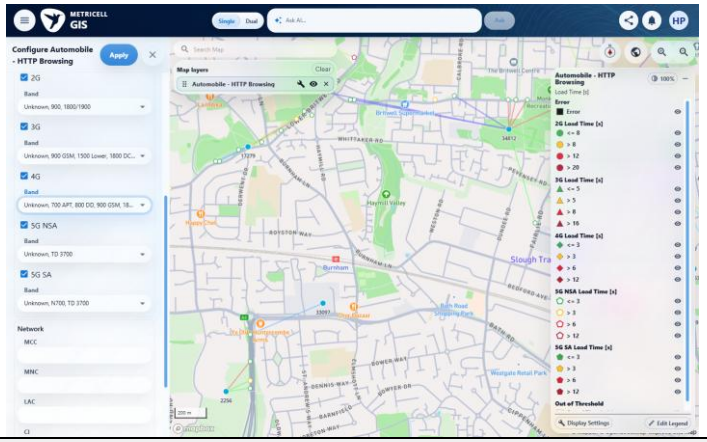

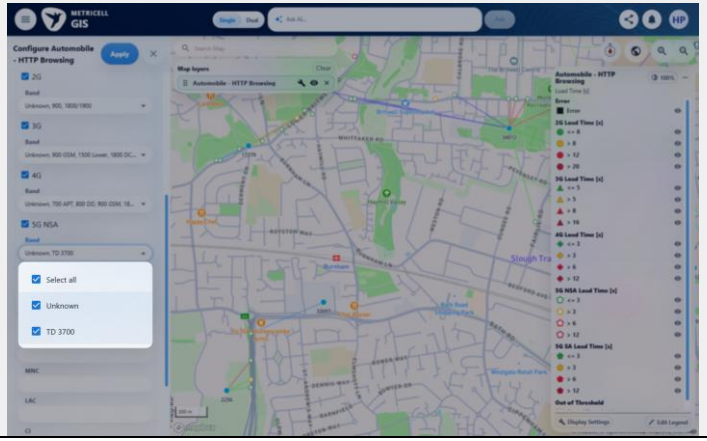

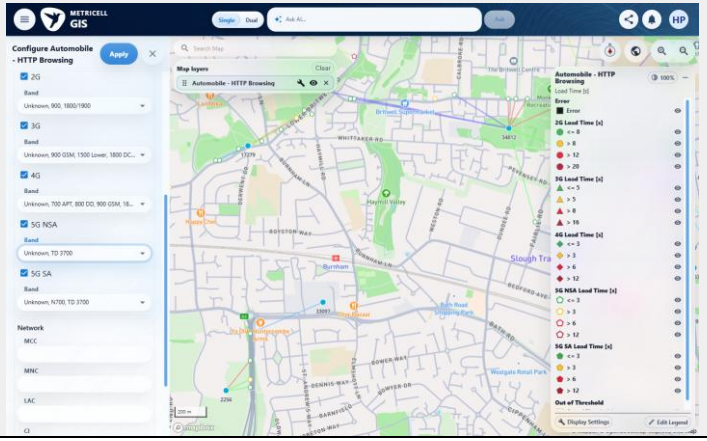

E12 - After automobile (criterion-4-after-automobile.png)

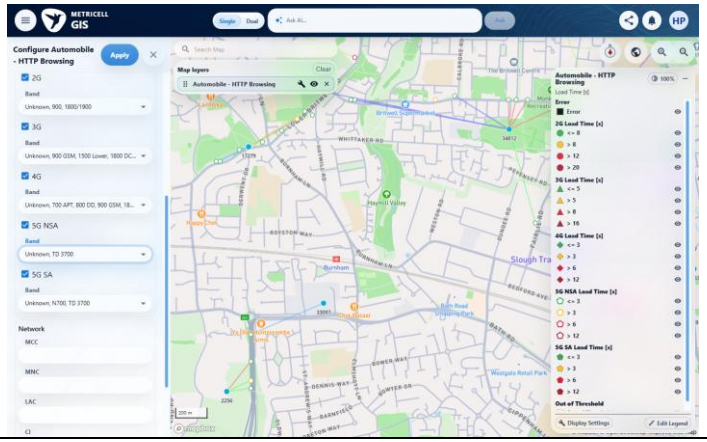

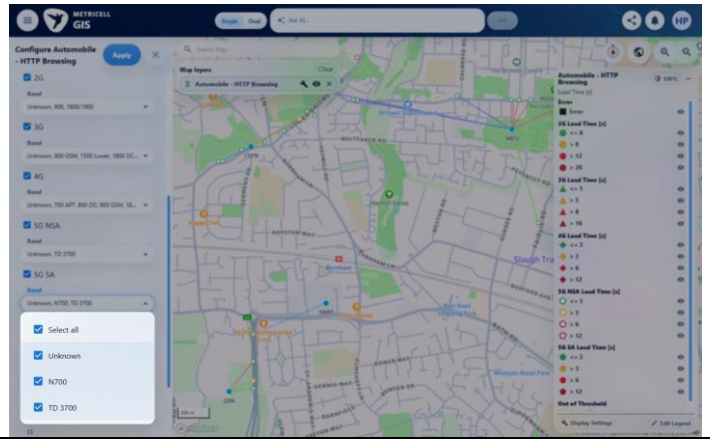

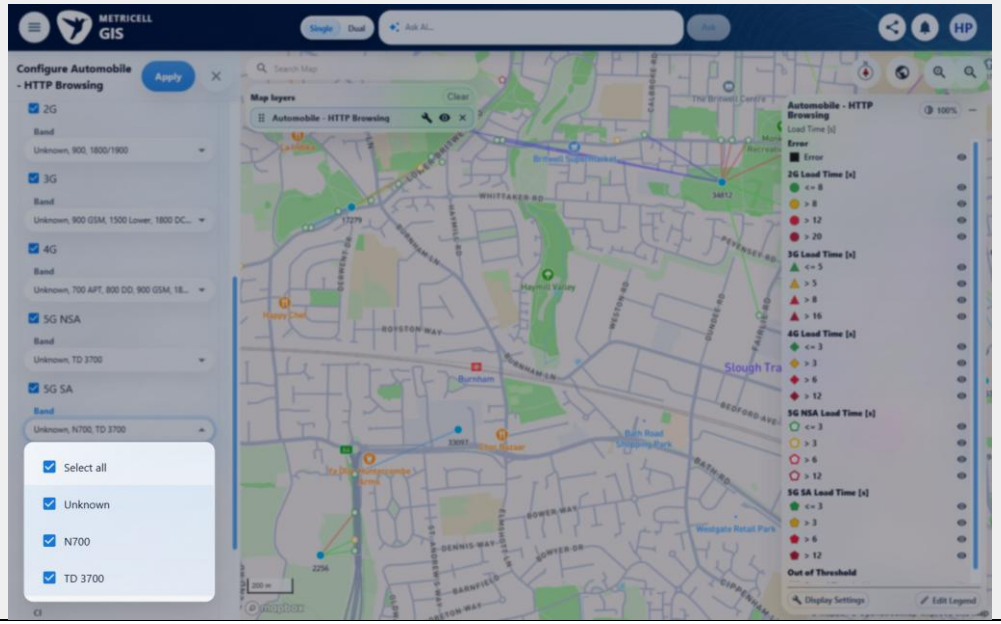

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 4 continued: On a standard Automobile map layer, the frequency filter offers the frequencies supplied by the application configuration. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E13 - Layer active (criterion-4-layer-active.png)** 			**E01 - Recheck before automobile (criterion-4-recheck-before-automobile.png)** 	
Criterion 4 continued: On a standard Automobile map layer, the frequency filter offers the frequencies supplied by the application configuration. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E14 - Recheck after automobile (criterion-4-recheck-after-automobile.png)** 			**E15 - Recheck layer active (criterion-4-recheck-layer-active.png)** 	

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 4 continued: On a standard Automobile map layer, the frequency filter offers the frequencies supplied by the application configuration. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E16 - Before band 0 (criterion-4-before-band-0.png)**  **E17 - Band 0 options (criterion-4-band-0-options.png)** 				
Criterion 4 continued: On a standard Automobile map layer, the frequency filter offers the frequencies supplied by the application configuration. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E18 - Band 0 closed (criterion-4-band-0-closed.png)**  **E19 - Before band 1 (criterion-4-before-band-1.png)** 				

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 4 continued: On a standard Automobile map layer, the frequency filter offers the frequencies supplied by the application configuration. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E20 - Band 1 options (criterion-4-band-1-options.png)**  **E21 - Band 1 closed (criterion-4-band-1-closed.png)** 				
Criterion 4 continued: On a standard Automobile map layer, the frequency filter offers the frequencies supplied by the application configuration. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E22 - Before band 2 (criterion-4-before-band-2.png)**  **E23 - Band 2 options (criterion-4-band-2-options.png)** 				

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 4 continued: On a standard Automobile map layer, the frequency filter offers the frequencies supplied by the application configuration. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E24 - Band 2 closed (criterion-4-band-2-closed.png)**  **E25 - Before band 3 (criterion-4-before-band-3.png)** 				
Criterion 4 continued: On a standard Automobile map layer, the frequency filter offers the frequencies supplied by the application configuration. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E26 - Band 3 options (criterion-4-band-3-options.png)**  **E27 - Band 3 closed (criterion-4-band-3-closed.png)** 				

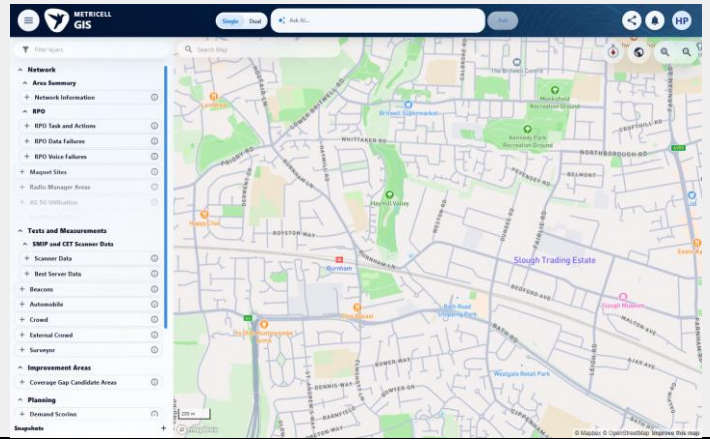

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 4 continued: On a standard Automobile map layer, the frequency filter offers the frequencies supplied by the application configuration. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E28 - Before band 4 (criterion-4-before-band-4.png)**  **E29 - Band 4 options (criterion-4-band-4-options.png)** 				

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 4 continued: On a standard Automobile map layer, the frequency filter offers the frequencies supplied by the application configuration. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E30 - Final (criterion-4-final.png)** 				

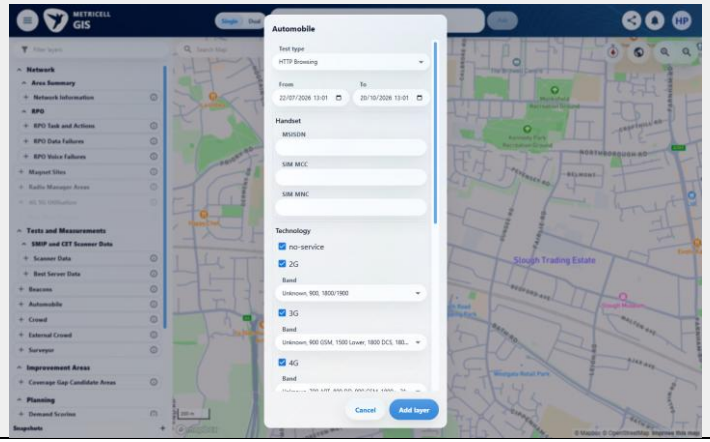

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
5.0.0	On a standard Automobile map layer, opening filters shows network fields for MCC, MNC, LAC, CI, Site, and Cell.	On a standard Automobile map layer, opening filters shows network fields for MCC, MNC, LAC, CI, Site, and Cell.	criterion-5-final.png directly shows all six Network fields: MCC, MNC, LAC, CI, Site and Cell. Evidence: E01, E31, E06, E32	Passed

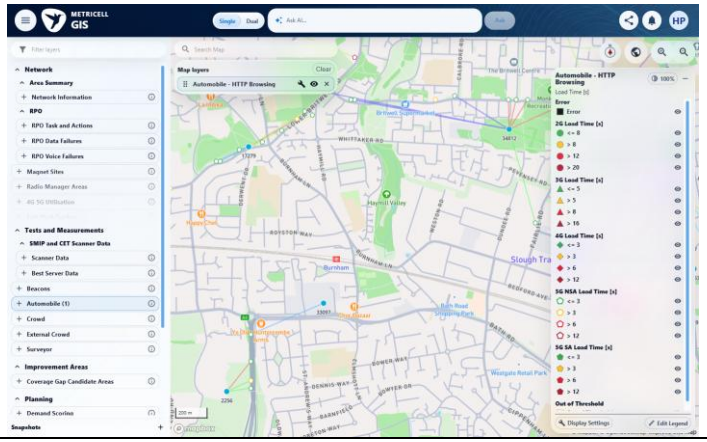

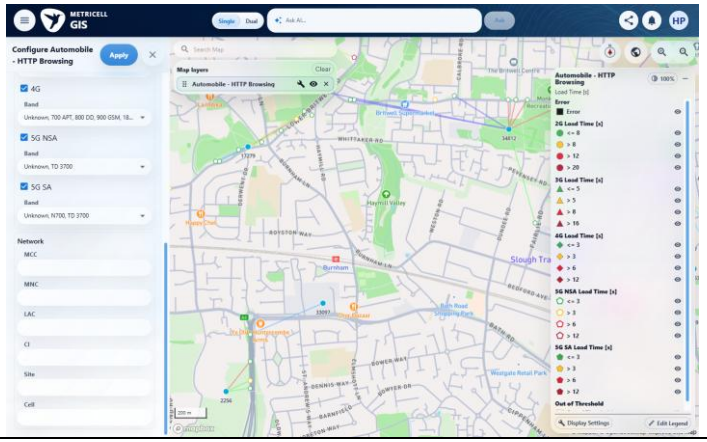

Criterion 5 evidence: On a standard Automobile map layer, opening filters shows network fields for MCC, MNC, LAC, CI, Site, and Cell.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E01 - Before automobile (criterion-5-before-automobile.png)

E31 - After automobile (criterion-5-after-automobile.png)

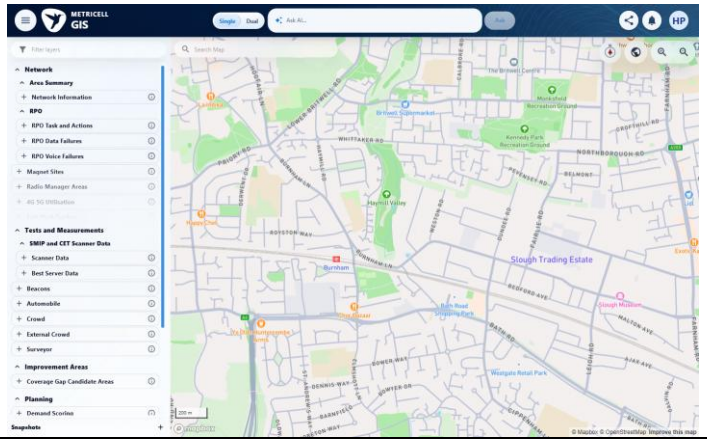

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 5 continued: On a standard Automobile map layer, opening filters shows network fields for MCC, MNC, LAC, CI, Site, and Cell. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E06 - Layer active (criterion-5-layer-active.png)**  **E32 - Final (criterion-5-final.png)** 				

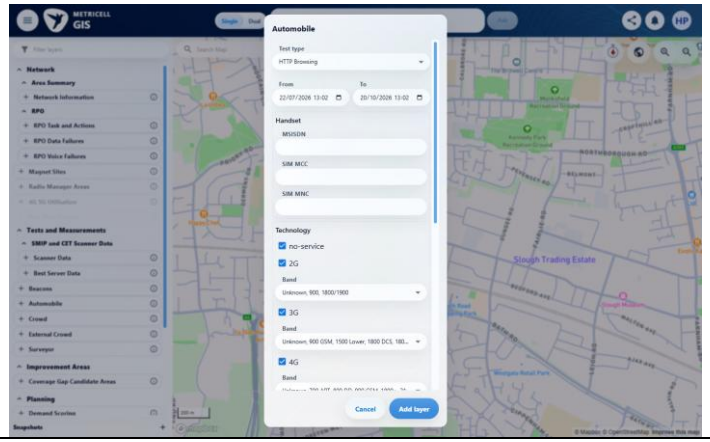

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
6.0.0	On a standard Automobile map layer, the device-group filter offers the groups supplied by the application configuration.	On a standard Automobile map layer, the device-group filter offers the groups supplied by the application configuration.	The results report deviceSegregationRestricted:true and nine configured groups, requiring an authorised unrestricted user to inspect group choices. criterion-6-after-automobile.png and criterion-6-final.png show the available form portions without a device-group control; configured-group choices cannot be assessed in this restricted environment. Evidence: E01, E33, E06, E34	Blocked

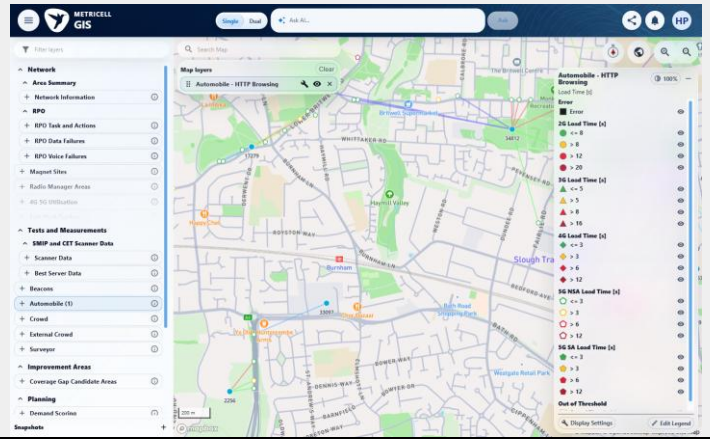

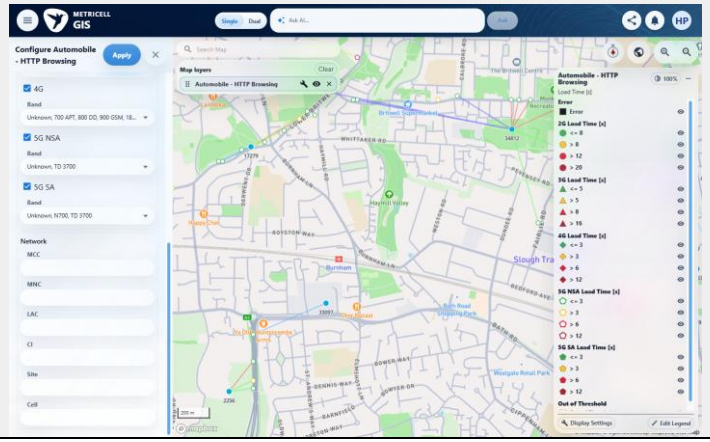

Criterion 6 evidence: On a standard Automobile map layer, the device-group filter offers the groups supplied by the application configuration.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E01 - Before automobile (criterion-6-before-automobile.png)

E33 - After automobile (criterion-6-after-automobile.png)

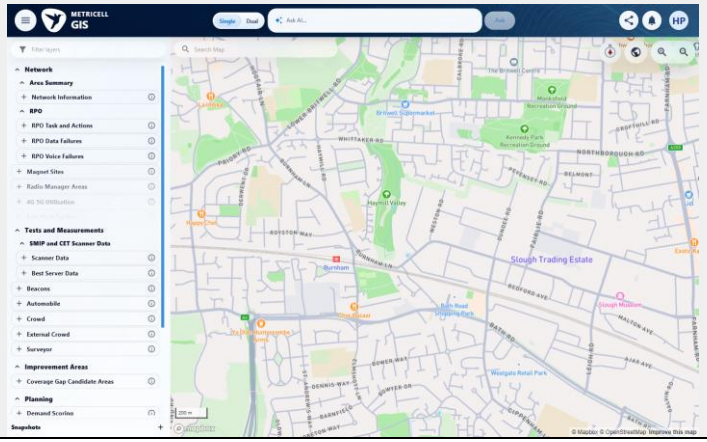

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 6 continued: On a standard Automobile map layer, the device-group filter offers the groups supplied by the application configuration. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E06 - Layer active (criterion-6-layer-active.png)**  **E34 - Final (criterion-6-final.png)** 				

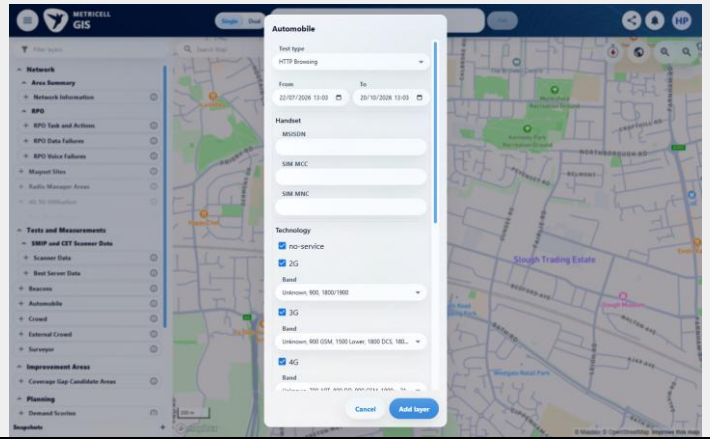

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
7.0.0	When SIM MCC, SIM MNC, MCC, MNC, or LAC is edited, each field accepts numeric digits only.	When SIM MCC, SIM MNC, MCC, MNC, or LAC is edited, each field accepts numeric digits only.	criterion-7-after-sim-mcc-digits.png shows 123 accepted; criterion-7-after-sim-mcc-invalid.png, criterion-7-after-sim-mnc-invalid.png, criterion-7-after-mcc-invalid.png, criterion-7-after-mnc-invalid.png and criterion-7-after-lac-invalid.png each visibly retain 123.-e, contradicting digits-only entry. Evidence: E01, E35, E06, E36, E37, E38, E39, E40, E41, E34, E42, E43, E44, E45, E46, E47, E48, E49	Failed

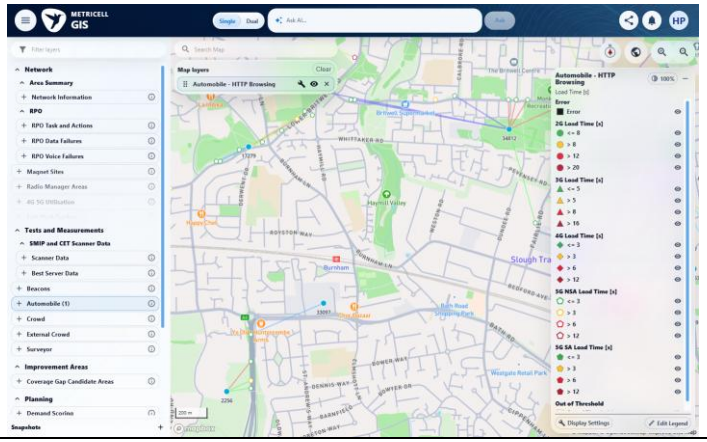

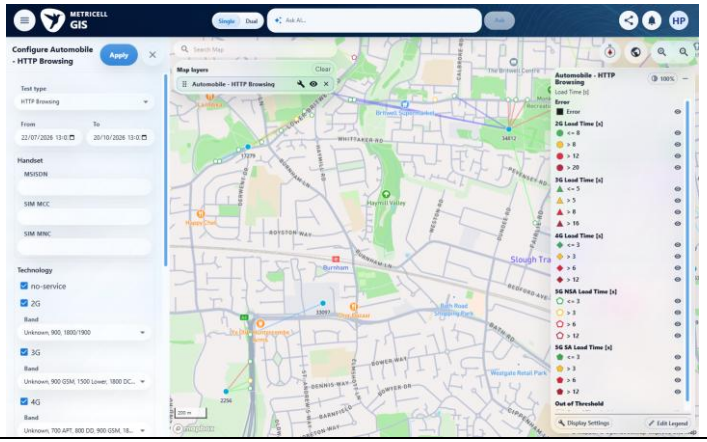

Criterion 7 evidence: When SIM MCC, SIM MNC, MCC, MNC, or LAC is edited, each field accepts numeric digits only.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E01 - Before automobile (criterion-7-before-automobile.png)

E35 - After automobile (criterion-7-after-automobile.png)

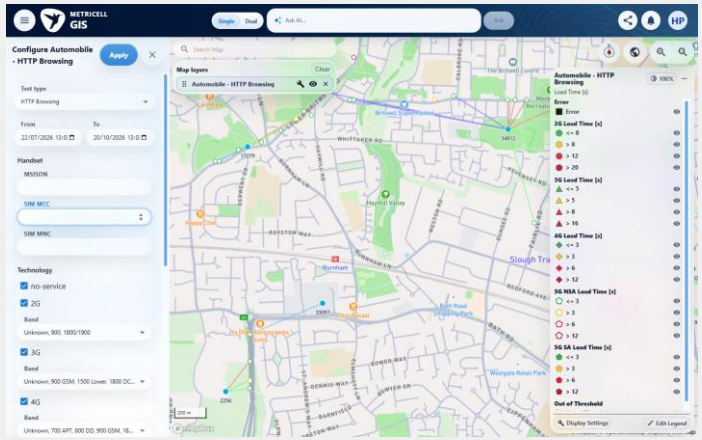

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 7 continued: When SIM MCC, SIM MNC, MCC, MNC, or LAC is edited, each field accepts numeric digits only. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E06 - Layer active (criterion-7-layer-active.png)**  **E36 - Before sim mcc (criterion-7-before-sim-mcc.png)** 				

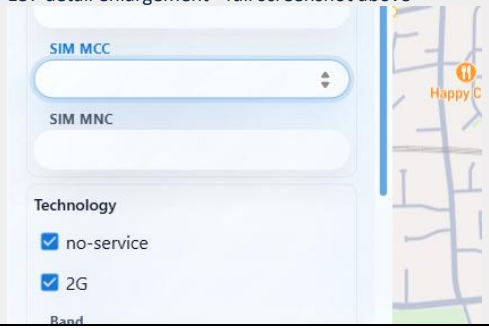

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome

Criterion 7 continued: When SIM MCC, SIM MNC, MCC, MNC, or LAC is edited, each field accepts numeric digits only.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

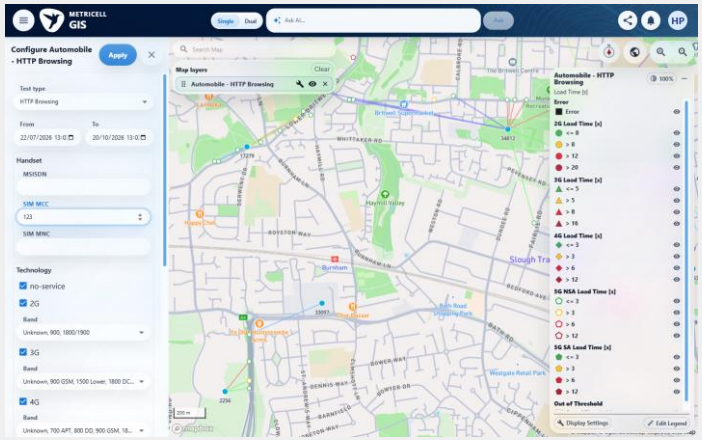

E37 - Before sim mcc digits (criterion-7-before-sim-mcc-digits.png)

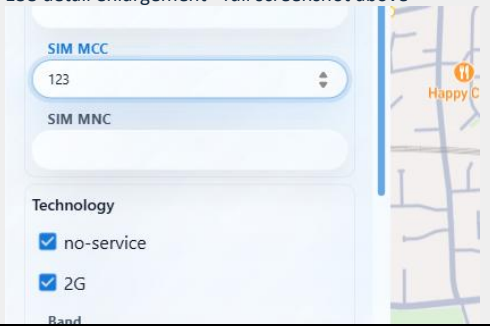

E37 detail enlargement - full screenshot above

E38 - After sim mcc digits (criterion-7-after-sim-mcc-digits.png)

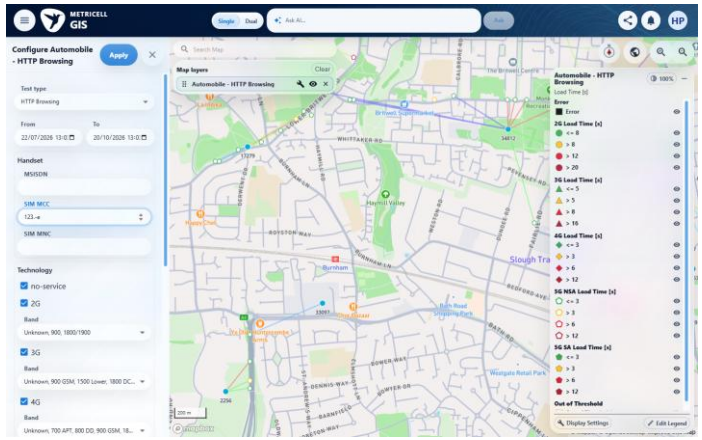

E38 detail enlargement - full screenshot above

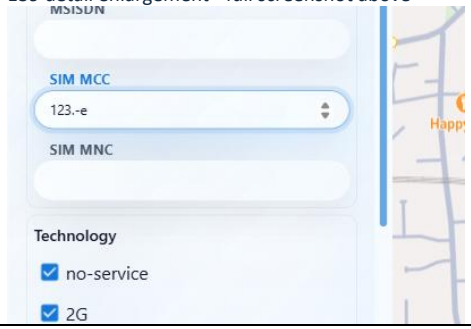

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome

Criterion 7 continued: When SIM MCC, SIM MNC, MCC, MNC, or LAC is edited, each field accepts numeric digits only.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

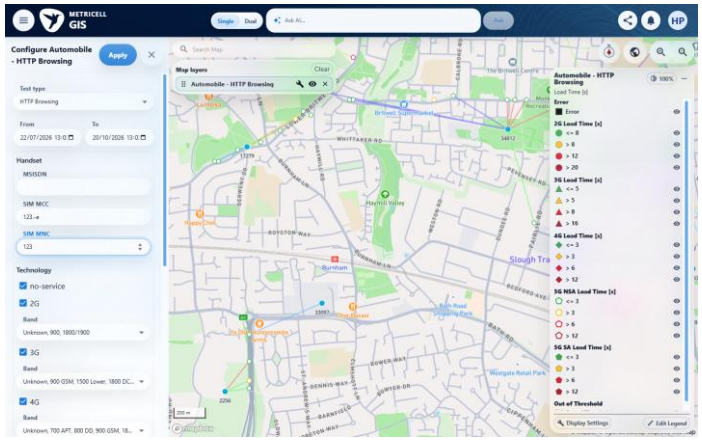

E39 - Before sim mnc digits (criterion-7-before-sim-mnc-digits.png)

Criterion 10 continued: On a Call layer, the technology filter does not offer 5G NSA. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E73 - Final (criterion-10-final.png)**				

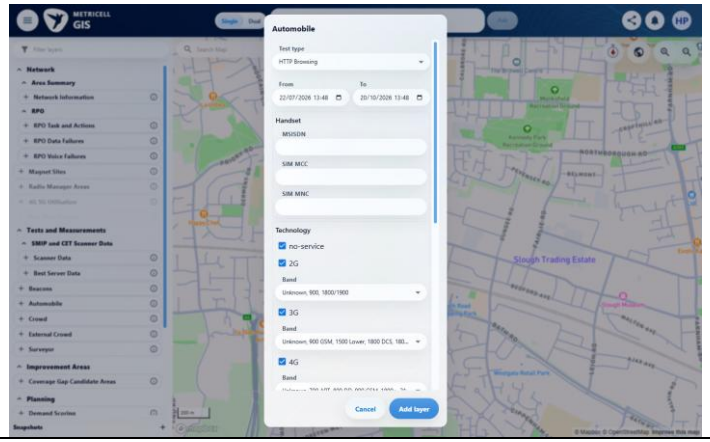

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
11.0.0	When device groups are shown, restricted device-segregation options are not offered.	When device groups are shown, restricted device-segregation options are not offered.	criterion-11-after-automobile.png shows the add form's upper portion and criterion-11-final.png shows the active form's bottom; criterion-11-layer-active.png has no filter panel. No captured state shows device groups displayed, and the complete active form is not captured, so these images do not establish restricted-option exclusion when groups are shown. Evidence: E01, E74, E06, E34	Failed

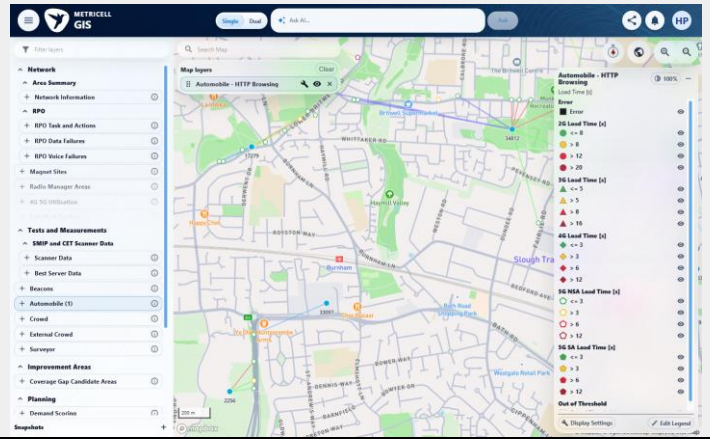

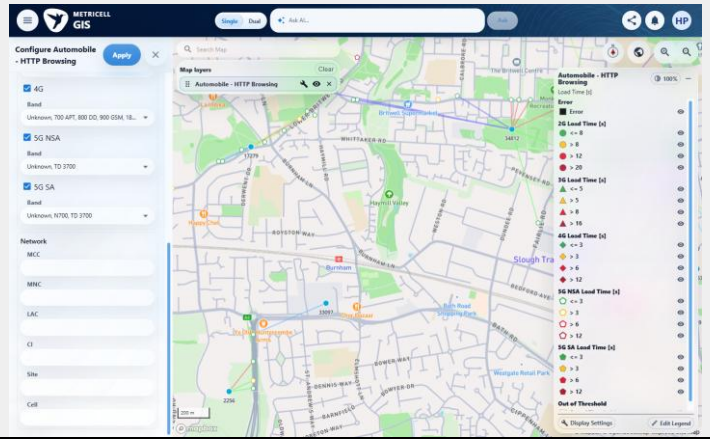

Criterion 11 evidence: When device groups are shown, restricted device-segregation options are not offered.
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis

E01 - Before automobile (criterion-11-before-automobile.png)

E74 - After automobile (criterion-11-after-automobile.png)

Criterion 12 continued: On Route Replay, the standard Automobile map filter controls described in this ticket are not available. **Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis** **E77 - Final (criterion-12-final.png)** 				

metricell
Better Connected

About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
