2 Test Cycle Information

Tester:	**Automated**
Jira Ticket:	TEST2-85
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 155.0.8059.85
Date of Test:	19/10/2026
Limitations during Testing:	6 blocked; 3 inconclusive criterion(s). Reviewed all ten canonical criteria against live attempt-002 results and local evidence. All 82 listed PNGs exist and are non-empty; an additional recovery capture claimed in criterion 3 is missing. Required fixtures and browser setup remain blocked, while summary, filtering and loading evidence is inconclusive. Criterion 3: 74 sample rows display Time, Download Rate, Technology, Serving Cell, Signal Strength, Size and Mobile Data State. Signal Strength includes dBm, but Download Rate and Size have neither header units nor value units (e.g. 0.35 and 2.65). During this criterion's setup, a stale restored cluster/layer was removed after the Add Surveyor locator timed out; the dedicated after-reset/before-reopen PNG was not captured (missing .agent-staging/handoff-TEST2-85-retry-attempt-002/screenshots/criterion-3-after-reset-restored-layer.png). Per the evidence rule, this remains Blocked despite the observed missing units. Criterion 3: Recovered browser-persisted stale cluster/layer after an Add Surveyor locator timeout, then opened a fresh Download configuration. Criterion 4: After independently selecting Surveyor Download and adding its layer, clicking the intended map location did not produce Surveyor cluster events. Playwright timed out waiting 10000 ms for that table. Browser instead showed HTTP Browsing test - 16/09/2026, 10:44:08, with no configured Download layer. Sorting was not exercised; browser state changed unexpectedly. Criterion 9: Independently selected the available completed Download; its summary and 74 sample rows loaded successfully. This is not an unavailable-details fixture. No matching unavailable Download was supplied or identified in the selected cluster, so no-data handling cannot be established. Criterion 9: Inspected successfully loaded summary and 74 measurement rows; no unavailable-details fixture was identified. Criterion 10: Started independently from launcher and opened GIS. During restoration of browser-persisted selected layers before configuring the criterion, Playwright timed out after 10000 ms waiting for Remove from selected nth(1); the layer controls changed underneath the action. Error-state testing did not occur. Browser state could not be restored reliably; no further unrelated controls were changed. Criterion 10: Attempted to restore browser-persisted map selections before configuring Download; Remove from selected nth(1) vanished and timed out after 10000 ms. Criterion 10: Captured actual blocker state and read current URL; error-state assertion was not reached. Restoration could not be confirmed reliably. Inconclusive evidence is reported as Failed, but is not a confirmed application defect. Defects (No.) counts directly contradicted criteria, not unique Jira bugs; blockers and inconclusive evidence count as zero.

3 Test Summary

Area of test	Pass	Fail	Defects (No.)
1. Given a completed Download test is selected and its details have loaded, the summary shows the reported technology, user, handset, service, serving cell, duration, tested technologies, indoor/outdoor status, Download Rate, and Wi-Fi connection status.	N	Y	0
2. Given Download samples are available, a time-series chart shows Signal Strength in dBm and Download Rate in Mbps across the test duration.	Y	N	0
3. Given per-sample Download data is available, each returned sample is shown in a table with its relevant units.	N	N	0
4. Given the per-sample table contains multiple rows, sorting by a displayed column changes their visible order according to that column.	N	N	0
5. Given per-sample data is available, filtering the table shows only rows matching the selected filter.	N	Y	0
6. Given average signal metrics are returned, Average Signal Strength, Average Signal Quality, and Average SNR appear in the summary immediately after Download Rate.	N	N	0
7. Given the selected Download point has no measurable duration, the detail presentation shows the standard no-data state instead of an empty detail view.	N	N	0
8. Given Download details are loading, the detail presentation shows a loading state.	N	Y	0
9. Given Download details are unavailable, the detail presentation shows a no-data state.	N	N	0

Area of test	Pass	Fail	Defects (No.)
10. Given loading Download details fails, the detail presentation shows an error state and does not display incorrect data.	N	N	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

1.0.0	Given a completed Download test is selected and its details have loaded, the summary shows the reported technology, user, handset, service, serving cell, duration, tested technologies, indoor/outdoor status, Download Rate, and Wi-Fi connection status.	Given a completed Download test is selected and its details have loaded, the summary shows the reported technology, user, handset, service, serving cell, duration, tested technologies, indoor/outdoor status, Download Rate, and Wi-Fi connection status.	criterion-1-final.png shows username, start/end times, Download Rate, band, serving cell, data/test technologies and Wi-Fi, but the summary continues below the viewport. Handset, service, duration and indoor/outdoor status are not established by the captured summary. Evidence: E01, E02, E03, E04, E05, E06	Failed

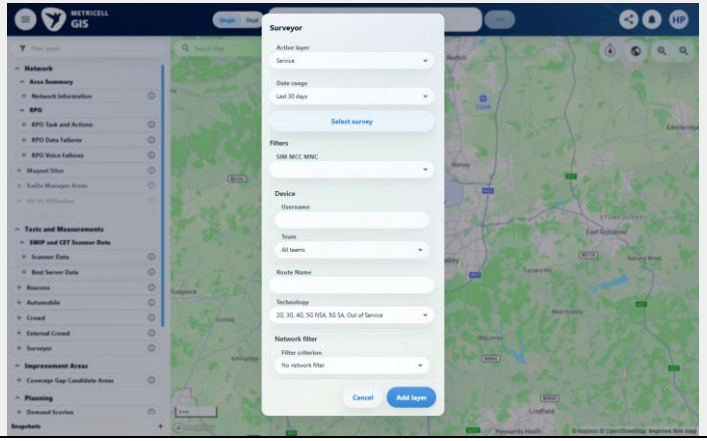

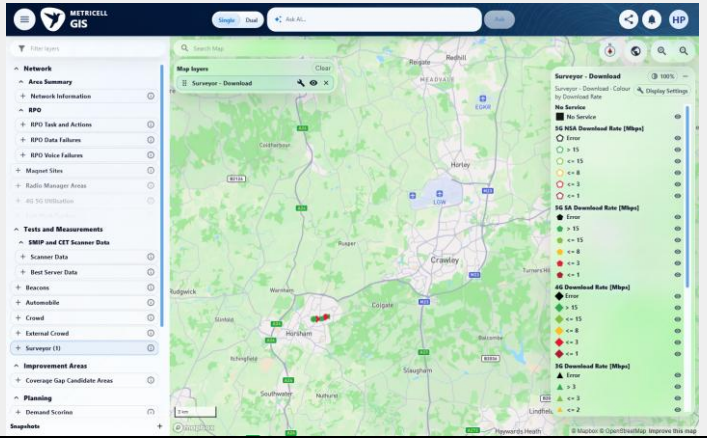

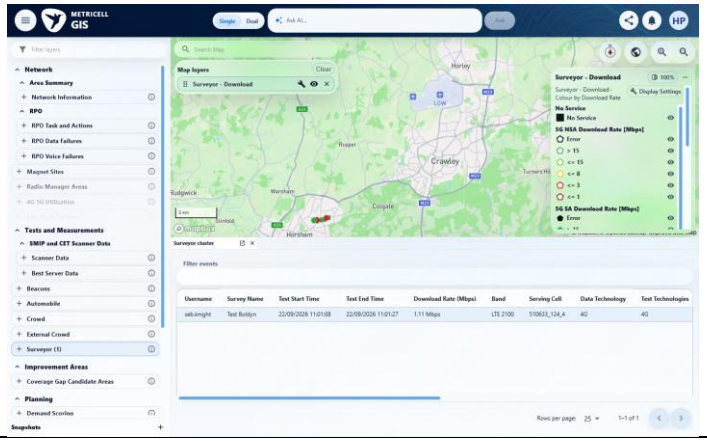

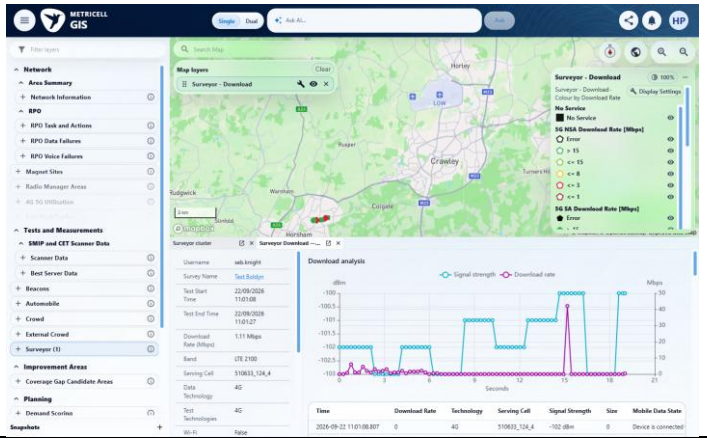

Criterion 1 evidence: Given a completed Download test is selected and its details have loaded, the summary shows the reported technology, user, handset, service, serving cell, duration, tested technologies, indoor/outdoor status, Download Rate, and Wi-Fi connection status.

2.0.0	Given Download samples are available, a time-series chart shows Signal Strength in dBm and Download Rate in Mbps across the test duration.	Given Download samples are available, a time-series chart shows Signal Strength in dBm and Download Rate in Mbps across the test duration.	criterion-2-after-select-cluster.png identifies the completed Download from 11:01:08 to 11:01:27. criterion-2-final.png shows Signal strength and Download rate series, dBm/Mbps axes and Seconds across approximately 0–19 seconds, matching that duration. Evidence: E07, E08, E09, E10, E11, E12	Passed

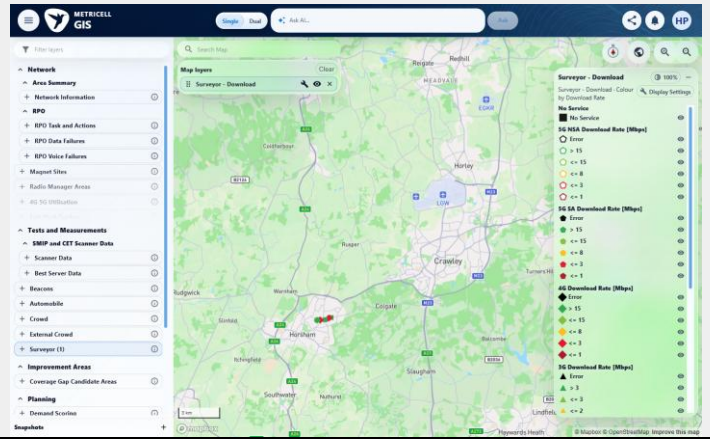

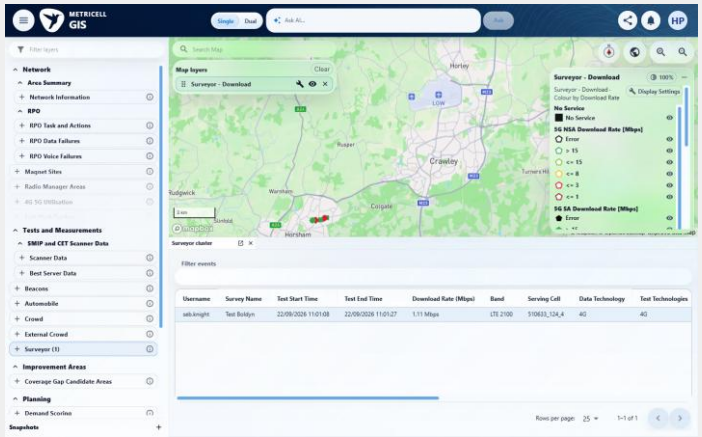

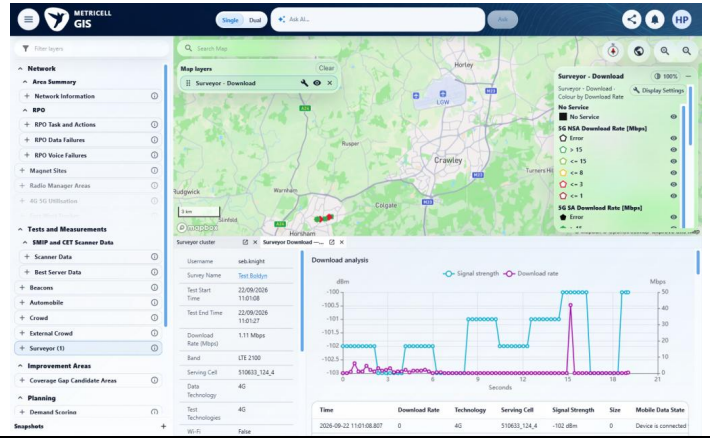

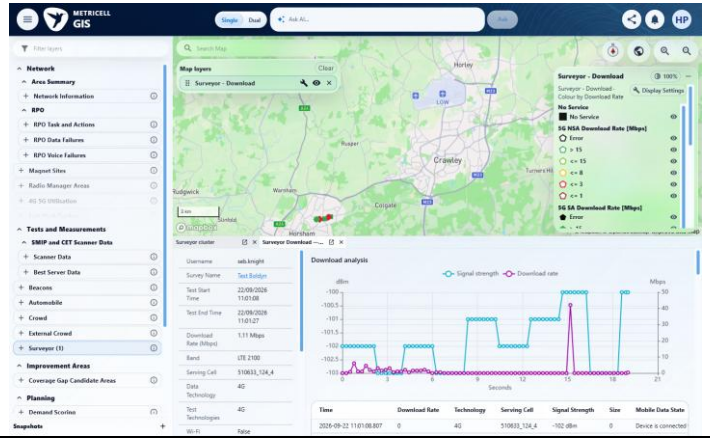

Criterion 2 evidence: Given Download samples are available, a time-series chart shows Signal Strength in dBm and Download Rate in Mbps across the test duration.

3.0.0	Given per-sample Download data is available, each returned sample is shown in a table with its relevant units.	Given per-sample Download data is available, each returned sample is shown in a table with its relevant units.	The reported recovery capture criterion-3-after-reset-restored-layer.png is missing. criterion-3-after-select-cluster.png and criterion-3-final.png show a recovered Download and its table header/first row, with dBm on Signal Strength but no units on Download Rate or Size. The claimed transition capture is unavailable and the full returned sample table is not captured. Evidence: E13, E14, E15, E10, E11, E12	Blocked

4.0.0	Given the per-sample table contains multiple rows, sorting by a displayed column changes their visible order according to that column.	Given the per-sample table contains multiple rows, sorting by a displayed column changes their visible order according to that column.	The reported cluster-selection timeout prevented sorting. criterion-4-blocker.png shows HTTP Browsing details while both HTTP Browsing and Surveyor - Download layers are selected, contradicting the note that no Download layer remained. No criterion-owned Download table sorting sequence is available. Evidence: E16, E17, E18, E19	Blocked

5.0.0	Given per-sample data is available, filtering the table shows only rows matching the selected filter.	Given per-sample data is available, filtering the table shows only rows matching the selected filter.	criterion-5-after-open-details.png and criterion-5-final.png show the chart and only the measurement header/first row at the bottom of the viewport. No sample-filter action or matching-row result is captured; the remaining table/control area is not visible, so screenshots do not establish the claimed absence of all filtering controls. Evidence: E20, E14, E21, E10, E11, E12	Failed

6.0.0	Given average signal metrics are returned, Average Signal Strength, Average Signal Quality, and Average SNR appear in the summary immediately after Download Rate.	Given average signal metrics are returned, Average Signal Strength, Average Signal Quality, and Average SNR appear in the summary immediately after Download Rate.	The tester reports no average metrics returned and no matching fixture. criterion-6-final.png shows Download Rate followed by Band and Serving Cell, without average metrics in that visible section. A fixture returning Average Signal Strength, Average Signal Quality and Average SNR is unavailable, so their conditional ordering cannot be assessed. Evidence: E22, E23, E09, E10, E11	Blocked
