About Metricell12

1 Revision History

Version	Date	Revision Author	Summary of Changes
[1.0]	08/10/2026	TEST2 QA Automation	Generated from TEST2 evidence review

2 Test Cycle Information

Tester:	Automated
Jira Ticket:	TEST2-65
Environment:	o2intelligence-v4-dev.metricell.com
Browser Details:	Google Chrome 155.0.8059.40
Date of Test:	08/10/2026
Limitations during Testing:	No testing limitations recorded. Defects (No.) counts directly contradicted criteria, not unique Jira bugs; blockers and inconclusive evidence count as zero.
Overall review outcome:	Passed
Browser URL(s) recorded after criteria:	https://o2intelligence-v4-dev.metricell.com/gis

3 Test Summary

Area of test	Pass	Fail	Defects (No.)
1. With the GIS catalogue visible and the pre-dialog Map layers list recorded, opening Surveyor configuration displays the Surveyor configuration dialog with visible Cancel and Add layer controls, without adding a layer.	Y	N	0
2. Selecting Cancel closes the Surveyor configuration dialog and returns to GIS with the map and layer catalogue visible; the Map layers entries and their order match the recorded pre-dialog baseline, including remaining absent when initially absent.	Y	N	0

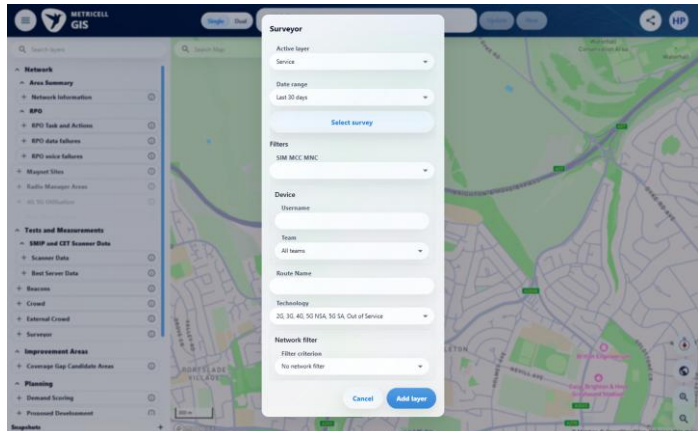

Area of test	Pass	Fail	Defects (No.)
3. After cancelling, opening Surveyor configuration again displays the dialog with its Cancel and Add layer controls available.	Y	N	0
4. Selecting Cancel in the reopened dialog returns to GIS with the original Map layers state intact and without an application-error page or sign-in screen interrupting the flow.	Y	N	0

4 Test Cases

Each test maps to a criterion and decisive browser evidence. Inconclusive results are reported as Failed.

4.1 Tests

Preconditions:		V4 access and ticket conditions.	Associated Requirements:	Ticket criteria below.	Automation Notes:	Screenshots below each criterion; full log retained locally.
ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path		Outcome	
1.0.0	With the GIS catalogue visible and the pre-dialog Map layers list recorded, opening Surveyor configuration displays the Surveyor configuration dialog with visible Cancel and Add layer controls, without adding a layer.	With the GIS catalogue visible and the pre-dialog Map layers list recorded, opening Surveyor configuration displays the Surveyor configuration dialog with visible Cancel and Add layer controls, without adding a layer.	criterion-1-before-open-surveyor.png records the GIS catalogue and absent Map layers baseline. criterion-1-after-open-surveyor.png and criterion-1-final.png show Surveyor with visible Cancel and Add layer controls, while Map layers remains absent and the map view is unchanged. Evidence: E01		Passed	
Criterion 1 evidence: With the GIS catalogue visible and the pre-dialog Map layers list recorded, opening Surveyor configuration displays the Surveyor configuration dialog with visible Cancel and Add layer controls, without adding a layer.						
Browser URL recorded after criterion: https://o2intelligence-v4-dev.metricell.com/gis						
E01 - Final (criterion-1-final.png)						

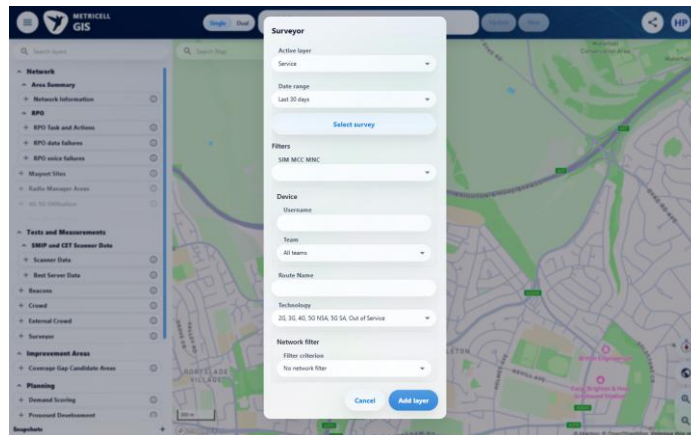

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
2.0.0	Selecting Cancel closes the Surveyor configuration dialog and returns to GIS with the map and layer catalogue visible; the Map layers entries and their order match the recorded pre-dialog baseline, including remaining absent when initially absent.	Selecting Cancel closes the Surveyor configuration dialog and returns to GIS with the map and layer catalogue visible; the Map layers entries and their order match the recorded pre-dialog baseline, including remaining absent when initially absent.	criterion-2-before-open-surveyor.png records the absent Map layers baseline; criterion-2-before-cancel.png shows the open dialog. criterion-2-after-cancel.png and criterion-2-final.png show it closed, with the GIS map and catalogue visible, Map layers still absent and the same map view. Evidence: E01, E02	Passed

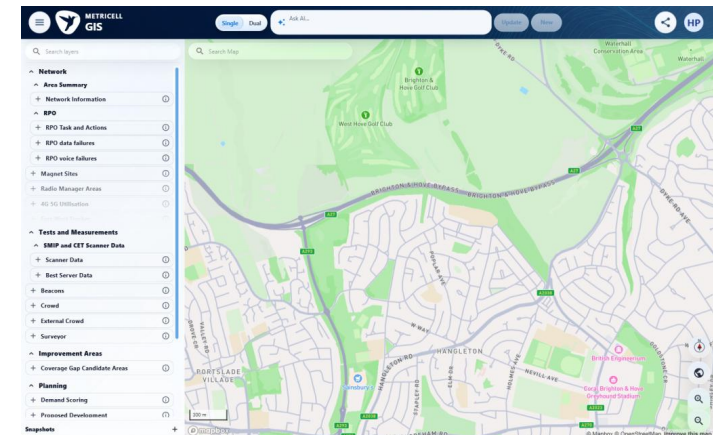

Criterion 2 evidence: Selecting Cancel closes the Surveyor configuration dialog and returns to GIS with the map and layer catalogue visible; the Map layers entries and their order match the recorded pre-dialog baseline, including remaining absent when initially absent.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E01 - Before cancel (criterion-2-before-cancel.png)

E02 - Final (criterion-2-final.png)

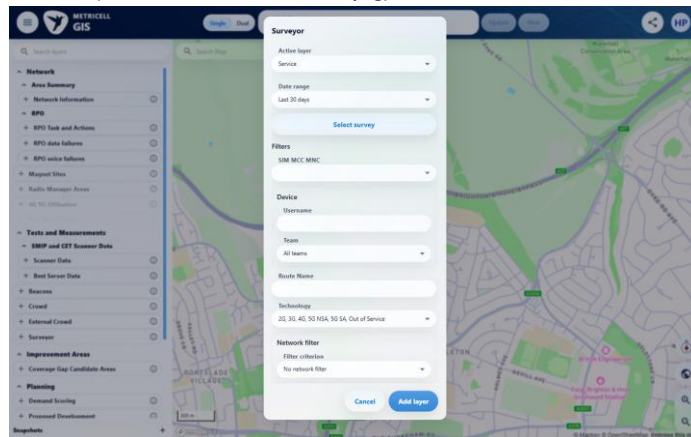

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
3.0.0	After cancelling, opening Surveyor configuration again displays the dialog with its Cancel and Add layer controls available.	After cancelling, opening Surveyor configuration again displays the dialog with its Cancel and Add layer controls available.	Criterion 3's own before-first-cancel, after-first-cancel and before-reopen captures show the open dialog closing to GIS. criterion-3-after-reopen.png and criterion-3-final.png show Surveyor reopened with available Cancel and Add layer controls. Evidence: E01, E03, E02, E04	Passed

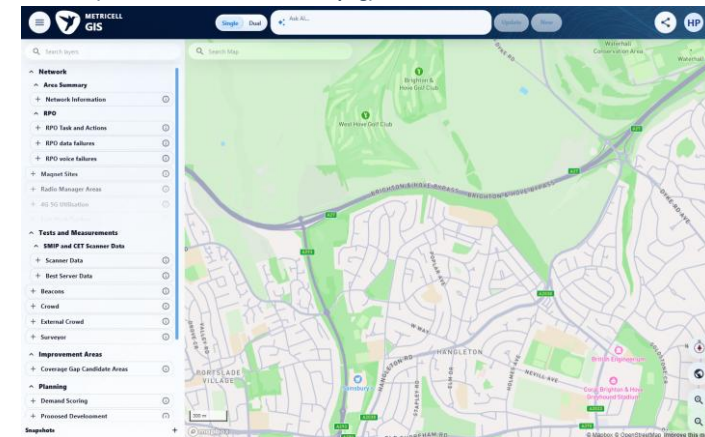

Criterion 3 evidence: After cancelling, opening Surveyor configuration again displays the dialog with its Cancel and Add layer controls available.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E01 - Before first cancel (criterion-3-before-first-cancel.png)

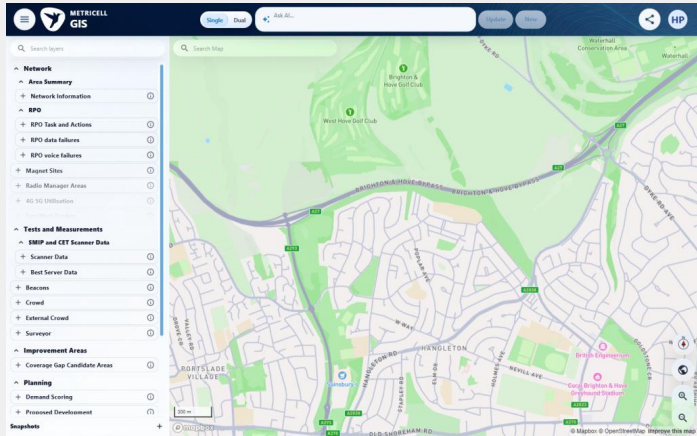

E03 - After first cancel (criterion-3-after-first-cancel.png)

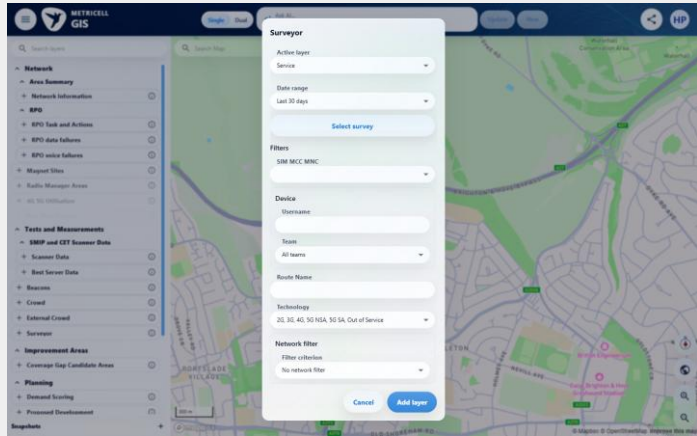

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
----------------	-----------------	-----------------	-------------------------------	---------

Criterion 3 continued: After cancelling, opening Surveyor configuration again displays the dialog with its Cancel and Add layer controls available.
 Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E02 - Before reopen (criterion-3-before-reopen.png)

E04 - Final (criterion-3-final.png)

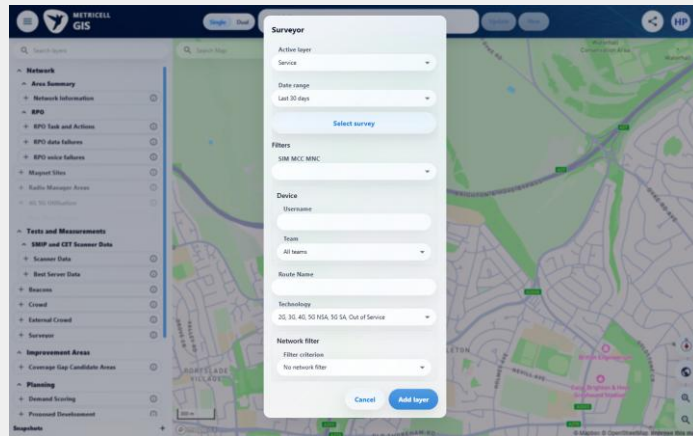

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
4.0.0	Selecting Cancel in the reopened dialog returns to GIS with the original Map layers state intact and without an application-error page or sign-in screen interrupting the flow.	Selecting Cancel in the reopened dialog returns to GIS with the original Map layers state intact and without an application-error page or sign-in screen interrupting the flow.	Criterion 4's own captures show open, first cancellation, reopening and second cancellation in order. criterion-4-after-second-cancel.png and criterion-4-final.png show GIS with the original absent Map layers state and unchanged map view; the captured sequence shows no application-error page or sign-in screen. Evidence: E05, E01, E02, E04	Passed

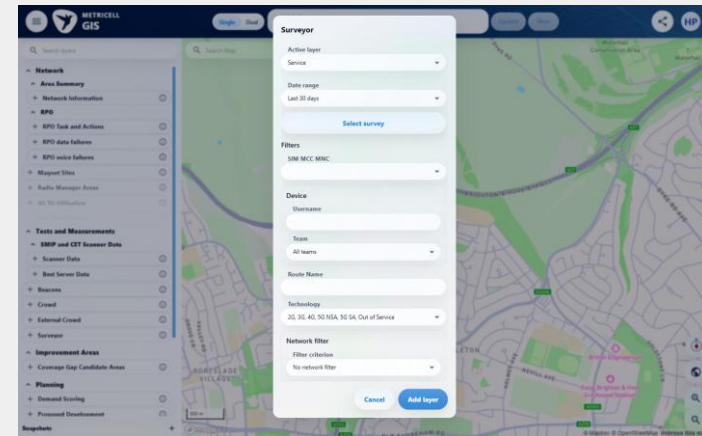

Criterion 4 evidence: Selecting Cancel in the reopened dialog returns to GIS with the original Map layers state intact and without an application-error page or sign-in screen interrupting the flow.

Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E05 - After open surveyor (criterion-4-after-open-surveyor.png)

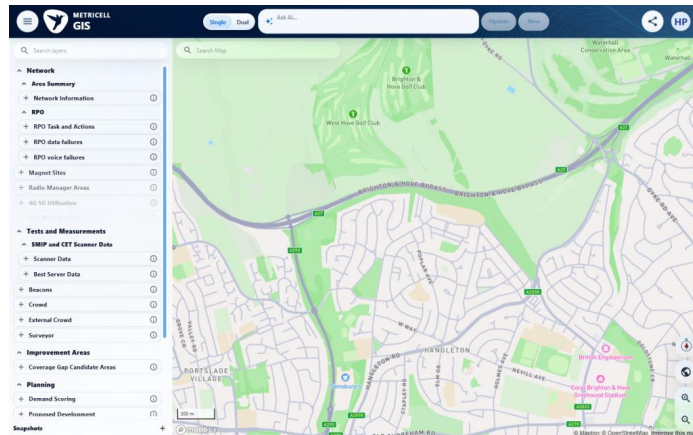

E01 - Before first cancel (criterion-4-before-first-cancel.png)

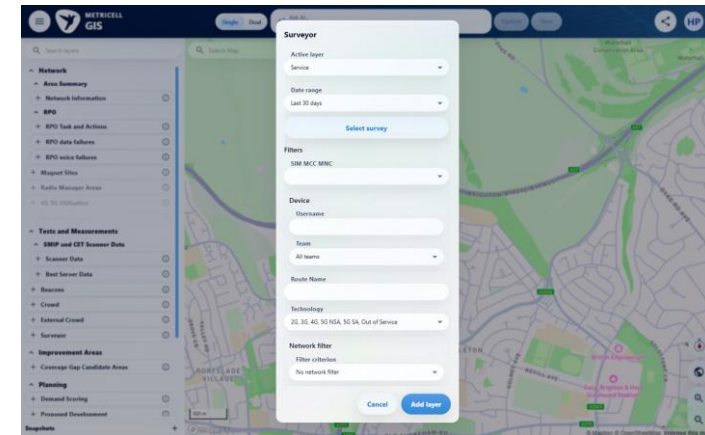

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
----------------	-----------------	-----------------	-------------------------------	---------

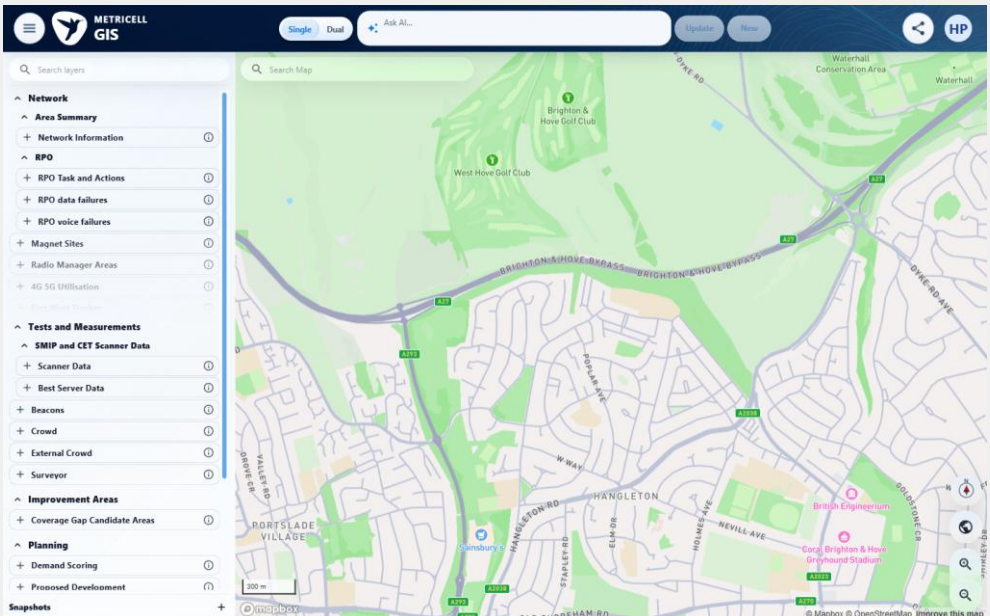

Criterion 4 continued: Selecting Cancel in the reopened dialog returns to GIS with the original Map layers state intact and without an application-error page or sign-in screen interrupting the flow.
 Browser URL recorded after criterion: <https://o2intelligence-v4-dev.metricell.com/gis>

E02 - Before reopen (criterion-4-before-reopen.png)

E04 - Before second cancel (criterion-4-before-second-cancel.png)

ID / Criterion	Criteria Tested	Expected Result	Actual Result / Evidence Path	Outcome
Criterion 4 continued: Selecting Cancel in the reopened dialog returns to GIS with the original Map layers state intact and without an application-error page or sign-in screen interrupting the flow. About Metricell

Metricell is on a mission to deliver connectivity. We work with our customers to design, deliver and manage wireless communication networks – with a shared ambition of achieving flawless network experience. We've been responsible for many first-to-market products, and our technology is characterised by the relentless pursuit of automation and digitalisation.

Our geospatial intelligence tools traverse a wide variety of business processes – from Test & Measurement to Customer Experience Management – and we're pioneers in Crowdsourcing and Digital Self Care. Our technology is today in use by a range of customers; thousands of their personnel; and millions of subscribers worldwide.
